To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper on which is an engraved paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

OFFICE OF THE MARYLAND CONSOLIDATED LOTTERIES, Baltimore, Maryland, 20th June, 1855.

CAUTION—LOTTERY FRAUDS.

THE Commissioner of the Maryland State Lotteries has deemed it his duty to caution the Public against the numerous Swindlers who circulate by mail and otherwise, fraudulent Lottery schemes, and pretend to be agents for the sale of tickets in Lotteries which are wholly fictitious.

The only legal Lotteries in Maryland are those drawn daily under the superintendence of the Commissioner elected by the people of the State under the new Constitution to examine and approve the schemes and attend to the drawings.

All the tickets in these Lotteries, and all certificates of packages of tickets have the lithographed signature F. X. BRENAN, General Agent for the Commissioner, Office of the Maryland Consolidated Lotteries, Baltimore, Md. All others are fraudulent. For full information on the subject of these frauds, address F. Sunny Side Parlor Cook.

TO obtain a PARLOR OVEN STOVE, that would combine the two qualities of a truly good and ornamental Stove, and at the same time could be relied upon to bake and boil when required,—from the demand for and the convenience of such a desideratum,—has been the cause of much and continued effort among manufacturers. With these facts in view, the proprietor of this patent has, this season, perfected and brought into the market, a Stove that proves to be the true Parlor Cook wanted. The demand for the Stove exceeds the supply, and all who desire the handsomest and best Stove in the market, are invited to examine the "Sunny Side" of the picture here so imperfectly portrayed.

THE GRAPE CROP OF CALIFORNIA.—From information derived from Dr. Trask, who recently has returned from a tour of observation through the southern country, we learn that the grape crop of the present year is likely to prove much more abundant than has been the case in former seasons, while a corresponding increase of the trade in fruit between Los Angelos and this port may be confidently counted upon. During the continuance of the season last year, an amount, of at most not more than five hundred tons, formed the aggregate of shipments to San Francisco. During the present year, it is stated that the quantity already received and to be received here will not fall short of fifteen hundred tons, showing a two-thirds increase over the product of last year in the quantity exported alone.—Independently of this, arrangements have been in progress for the more extensive manufacture of the juice of the grape, and we learn that at least 200,000 gallons of Los Angelos wine will be brought into the market this winter as a moderate sample of what we will be enabled to do in this line henceforth.—*San Francisco Herald.*

It has always seemed strange to us, that so little has been done in the way of propagating the native or wild grape vine of New England, which grows well and bears abundantly. It is far better for our clime than most imported vines. Some of the grapes we have eaten from it this year were excellent.

MOVEMENTS OF GERMANS FROM TEXAS TO MEXICO.—Private letters from Texas, upon which the utmost reliance may be placed, inform us that numbers of the German settlers in the northwestern part of that State are preparing to cross the Rio Grande and settle in Coahuila, in Mexico, where the greatest advantages are offered to them by Governor Langburg. This movement is spreading extensively among the Germans who inhabit that part of Texas, (including the counties of Guadaloupe, Bixar, Comal, Medina and Gillespie, extending to the Liano and San Saba rivers,) forming a population of between fifteen and twenty thousand souls. The continual contention between the German and American settlers, the opposition of the former to know nothingism, slavery, and the prohibitory liquor law, are the primary causes of the movement.

SAD FATE OF A SPIRITUALIST.—Last week a woman named Elizabeth Jewett, who formerly resided at South Boston, but has been of late stopping in Gardiner, Me., became interested in the spiritual developments of the present day, and finally her feelings were wrought up to such a degree, that reason was dethroned. Acting as she alleged under direction of the spirits, she wrote a note informing her friends that she might be found in a certain creek running into the Kennebec River, near Gardiner, and leaving it in her chamber, disappeared. The body was soon found at the place she designated floating in the water, but confined by a rope tied around her waist and attached to a tree.

SOUTH CAROLINA.—According to the Governor's message, lately delivered, the outstanding debt of South Carolina, all told, is $4,087,156 84, with an annual interest of $242,476. When this sum is increased, as it most probably will be, by another million for the completion of the State Capitol, the whole debt will be $5,087,156 23, with an annual interest of $302,576 61. The payments for the year 1854 were $651,592 93, and the receipts at the Treasury were $440,145 39.

LITERARY.—The author of the Widow Bedott Papers, in which there is a good deal of fun, was a modest but eccentric young lady by the name of Miriam Berry, of Whiteborough, N. Y. She married the Rev. B. W. Whicher of that town, and died young.

It is said that Mr William Taylor, who had both his arms broken and was otherwise injured by the collision on the railroad near Burlington, N. J., last summer, has instituted a suit in the United States Circuit Court against the Camden and Amboy Railroad Company, laying his damages at $50,000! There is a report that the company offered to pay Mr Taylor $5000, and to give him a free ticket for life, but that he refused to accept this offer in satisfaction.

DYED ALMOST TO DEATH.—Says the London Times—"A man was placed a few days ago in a lunatic asylum at Berlin, to be treated for mental alienation, brought on by the use of hair dye. On examining the dye which he employed, it was ascertained to be composed of lead, mercury, and lunar caustic. It produced violent pains in the head, and at length led to madness.

SATURDAY, DECEMBER 8, 1855.

POSTAGE.

The Tribune says, "We learn from good authority that the deficit in the Post Office the present year will be about two millions and a half of dollars, or some three quarters of a million more than last year. There has been added during the year 3700 miles of road service to the operations of the Department.

The Portland Argus contains a good article favoring Cheap Postage, in which we read this statement:

In the last fourteen years, the Department transported "free" mail matter, the postage on which would amount to nearly nine ten millions of dollars, over and above all appropriations that have been made for the purpose. What an enormous tax upon the business and friendly correspondence, and upon the circulation of intelligence is this? The amount of "free matter" that passes through the mails is estimated at $2,500,000 annually. Let postage be paid on all this from the treasury, as it ought to be, then the department will be able to improve and extend its privileges.

The article in the Argus is a review of a pamphlet by Pliny Miles. The Argus says:

Without yielding our unqualified assent to all the conclusions of the writer, we must confess that he has displayed much research, and has advanced facts and considerations, which should be carefully read and pondered. The subject is so important, and the fact so well settled, that improvements, if we are to have them, must be set in motion by the people, that we will refer to some of the changes proposed and advocated by this writer, and to some of the facts by which his positions are sustained, in order that the subject may be inquired into. They are:

1st. The abolition of franking, or the payment of all Government postages out of the treasury.

2d. Mr Niles advocates a uniform rate of two cents on all single letters without regard to distance.

He calculates that merely by a simplification of our postage rates, which are now very complex, consisting of more than 50 rates between a small pamphlet and a book weighing three pounds, more than a million dollars' expense would be saved to the department annually, to say nothing of the vast increase of mail matter that would follow such a change.

Aside from the advantages of avoiding mistakes, and saving expense, which uniformity affords, he maintains that two cents will pay better than three cents, because by the latter rate would be lost the local circulation in cities and towns, which is the most profitable branch of every good system, while by the two cent rate for drop letters, as well as others, under a proper arrangement, this would be completely secured and our people vastly better accommodated than now.

The answer which is made to the objection that the department cannot afford to carry letters to California and Oregon for two cents is given by showing that the department ought not to afford the expense of the complex system. It costs, says this writer, more than one million dollars annually, while the profit on all matter sent over three thousand miles which is afforded by the double rate is only $180,646. Upon this hypothesis, the government imposes an extra tax on the Pacific states and territories of $180,000, which it costs $1,000,000 to collect. A pretty strong statement truly.

Another plan proposed, is the transmission of money by mail by means of what is called Post Office money orders. At a time when depredations upon the mails have reached an unparalleled frequency and boldness, any system which promises entire security and no great expense, will at least receive careful consideration from the public. It is stated that by this system the British public remitted five hundred and twenty millions of dollars, at a loss of less than one per cent., and with the cost of less than one dollar in five hundred thousand dollars of the money remitted, including robbery, fire, sinking of vessel, or other accident to the mail. And yet the system affords a profit. What is to prevent this plan being adopted, and the enormous loss which is constantly occurring being avoided? Our system of registration recently put in operation, instead of affording security or leading to the detection of depredators, it is said, actually points out the valuable letters for him to seize upon! If this be so, let the system be at once repealed and some better one adopted. It is certain some more secure method must be devised or the great risk now incurred will in a great measure put a stop to the transmission of money by mail.

The law for the compulsory pre payment of postage, especially by postage stamps, is opposed on various grounds, and double postage when not prepaid, advocated instead.

[This latter proposal is a bad one—prepayment is no hardship. No letter ought to be sent unless fully paid.]

There are many valuable suggestions in the book which should be carefully considered in connection with our postage system with a view to its improvement. We ought to have the most liberal and perfect system in the world, and we doubt not in time we shall have; but the people must look after it.

The last sentence is strictly true. Our present cheap postage was wrested from Congress by private mails, against the laws. We wish our present congress would abolish the franking privilege, root and branch,—for this is the great leak, and a great abuse besides. Uncle Toby advocated a uniform rate of two cents postage for letters, more than twenty years ago;—and was laughed at. Now he thinks three cents will do—though perhaps two may do better. But by all means abolish the franking. No franking privilege exists in England. Even the Queen is obliged to pay her penny postage.

SAD END OF A SPREE.—The Manchester Mirror of Wednesday evening says:—

There was a dance at Clark's Hotel, about four miles from this city, at which there was quite a large party last evening. Everything passed off quietly till between two and three o'clock. Some had already left. Charles Hurd, Joseph Whitford, and Josiah Blake went up from this city, and behaved well till the time spoken of, when an altercation arose between the hostler and them about the horse, and the pay for keeping. He said they slipped out unbeknown to him, got the horse out of the stable, harnessed him, and had some difficulty in picking out the wagon, when he discovered them. They said they found the horse in the shed, and that he had not been fed, and they would not pay for his keeping.

The hostler said that the horse had been fed and they should not take him away till the keeping was paid for. Some altercation ensued, the hostler knocked one or two of them down, when Clark senior came out, and said as the harness and wagon had been marked, the horse must have been put up. Soon the son, Stoughton R. Clark, who had been waiting upon the table, came out as he was in his shirt-sleeves, and told them that as they had been treated well and had had a good time, they ought to pay their bills. Upon that, two of them grabbed him, and the third stabbed him with a dirk in four places—one making a gash two inches long to the skull, on the forehead, another deep one back of the ear, another in the breast, and one in the back.

Drs. Crosby and Nelson, of this city, were sent for, and the wounds were dressed. The appearance of the wounds were, that they would not be fatal, but the feeble condition of Clark to-day makes his friends fear that he will not live. What will be done with his assailants is yet a matter of doubt. The dirk has a blade about four inches long.

Hurd and Whitford have been arrested, and the officers are in pursuit of Blake.

WOMEN IN KANSAS.—The Constitution framed by the recent Convention of the people of Kansas, contains the following provision:

Resolved, That the General Assembly shall have no power to pass any law whereby the separate estate of a married woman either in property real, personal, or mixed, shall ever be made subject to the disposal of the husband, or subject to the payment of the debts of the husband in any manner unless by the written consent of the wife first obtained, duly acknowledged and recorded, witnessed by at least two witnesses to be named by the wife. That the General Assembly shall have no power to pass any law depriving the mother of an equality with the father in the maintenance, education, and care of their children; and in no case shall the mother be deprived of her children except on account of insanity, intemperance, or other gross improprieties.

We should like to see the man who is capable of undertaking to show that this is not strictly according to reason and justice. Yet it is much in advance of what exists in the older States, and considerably more than many men are willing to advocate.

KANSAS AND PRES. PIERCE.—The New York Herald Washington correspondent telegraphs:

All that the Administration knows of the difficulties in Kansas is this: Governor Shannon has telegraphed to the President for authority to protect the Sheriff of Douglas County in execution of process. The President replied, on the occasion arising, he would exercise all the authority which he possesses. As the sheriff is not a United States officer, and could not serve any process under an act of Congress, the law, the execution of which has been opposed, must have been an act of the territorial legislature, and the President, in such a case, has no authority except that which the acts of Congress confer, to employ the militia of one or more States, and the land and naval forces of the United States, to suppress insurrection in any State or territory, upon proper representation of its Legislature or Governor. The representation as yet received does not present a case of actual insurrection, but only of riot, and does not therefore come under the law.

FURTHER FROM KANSAS.—*St. Louis, Dec. 6.*—The latest accounts from Kansas represent that 800 men armed with Sharp's rifles were assembled at Lawrence. They declared that they were willing the Sheriff should peaceably search for the escaped prisoners, and that they would not commence hostilities, but would act on the defensive to the last.

Pomeroy, who escaped from his captors, is now in Lawrence.

It is said that the pro-slavery party have 300 men in Franklin, and 200 in Lecompte and Douglas counties.

If resistance is offered to the execution of the writs, the Sheriff declares his intention to await the further orders of the Governor.

It is thought that a fight will ensue before the matter is settled.

The Cheltenham (England) Guardian, says the Leamington magistrates resolved to discountenance the prosecution of persons keeping houses of ill-fame, of which there are forty-seven in Leamington, on the ground *that it will drive all the gentlemen away*, and the town would be ruined.

We have seen a similar argument used in Boston, against some other prosecutions.

☞ Coburn, the gallant whipper and safe robber, in Boston, has been let out of jail on bonds of $5,800. It is supposed he will go off, and his father will pay the forfeit.

It would be far better to let him go to the States prison for a few years, and do a little real work.

☞ The London papers give the most deplorable accounts of the drunkenness of the British soldiery in the Crimea. Yet their government provide a spirit ration,—and do not, as they might, shut out strong drinks from their grounds by martial law.

LOCAL.

CITY LIQUOR AGENCY.—The city agent presented his quarterly account to the Board of Aldermen on Thursday evening, in substance as follows:—

Account of the Liquor Agency for the quarter ending Nov. 30, 1855

DEATHS IN NOVEMBER.—The whole number of deaths in this city, during the month of November, was 15; of which 6 were males, and 9 females. The ages of the deceased were as follows:

Males—6 yrs., 24, 36, 75, 75, 94.

Females—5 mos., 3 yrs., 6, 26, 55, 58, 58, 76, 78.

U. S. BUILDINGS.—The custom house in this city is now completed with its approaches, to the satisfaction of the government and the community. The builder, Albert Blaisdell, Esq., has, we understand, taken the contract to build the U. S. marine hospital at Chelsea, a building which will cost probably $150,000. He has also the contract to build a monument on one of the shoals in Boston harbor. No builder who has been in the employ of the government has given the bureau under which he has been employed more general satisfaction than Mr Blaisdell. The thorough and workmanlike manner in which his work is invariably performed, the accuracy of his accounts, the general kindliness of demeanor to those in his employ, and his courteous and gentlemanly bearing to all, have always secured him the high esteem of the officers of the government and of the citizens of the various places in which he has been employed. Mr Blaisdell has purchased a place at Greenland, N. H., his native state, where he has erected an elegant house, and where he spends such intervals as he can spare from his business.—*Bangor Mercury.*

THE ROPE-WALK.

BY HENRY W. LONGFELLOW.

[From the Little Pilgrim, an excellent Monthly Magazine for the young, edited and published by Grace Greenwood, (Mrs. Lippincott,) Philadelphia.]

In that building, long and low,
With its windows all a-row,
Like the port holes of a hulk,
Human spiders spin and spin,
Backward down their threads so thin,
Dropping, each, a humpen bulk.

At the end, an open door;
Squares of sunshine on the floor
Light the long and dusky lane;
And the whirling of a wheel,
Dull and drowsy, makes me feel
All its spokes are in my brain.

As the spinners to the end
Downward go and re-ascend,
Gleam the long threads in the sun;
While within this brain of mine
Cobwebs brighter and more fine,
By the busy wheel are spun.

Two fair maidens in a swing,
Like white doves upon the wing,
First before my vision pass;
Laughing, as their gentle hands
Closely clasp the twisted strands,
At their shadow on the grass.

Then a booth of mountebanks,
With its smell of tan and planks,
And a girl poised high in air
On a cord, in spangled dress,
With a faded loveliness,
And a weary look of care.

Then a homestead among farms,
And a woman with bare arms,
Drawing water from a well;
As the bucket mounts space,
With it mounts her own fair face,
As at some magician's spell.

Then an old man in a tower
Ringing loud the noontide hour,
While the rope coils round and round,
Like a serpent at his feet,
And again in swift retreat
Almost lifts him from the ground.

Then within a prison yard,
Faces fixed, and stern, and hard,
Laughter and indecent mirth;
Ah! it is the gallows-tree!
Breath of Christian charity,
Blow, and sweep it from the earth!

Then a school boy, with his kite,
Gleaming in a sky of light,
And an eager, upward look—
Steeds pursued through lane and field—
Fowlers with their snares concealed;
And an angler by a brook.

Ships rejoicing in the breeze,
Wrecks that float o'er unknown seas,
Anchors dragged through faithless sand;
Sea fog drifting overhead,
And with lessening line and lead
Sailors feeling for the land.

All those scenes do I behold,
These, and many left untold.
In that building long and low;
While the wheels go round and round,
With a drowsy, dreamy sound,
And the spinners backward go.

☞ The Fair is to be open for the children, at Jefferson Hall, this afternoon. Admission 8 cents. This closes the Festival.

☞ The Selectmen of Ward No. 2, will meet again this evening, at the City Rooms, to examine Naturalization papers.

The Eastern Railroad Company paid off $75,000 of their Income Bonds, and $25,000 in coupons on Saturday, without borrowing a dollar. This is an improving feature to notice in the consideration of our railways, and is suggestive of better times for the shareholders, the Newburyport Herald says.

AYER'S CHERRY PECTORAL.

For the rapid cure of Coughs, Colds, Hoarseness, Bronchitis, Whooping Cough, Asthma and Consumption, is universally known as the best remedy ever yet discovered for every variety of Pulmonary disease. So wide is the field of its usefulness and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the Lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the dangerous and distressing affections of the pulmonary organs which are incident to our climate. By its timely use many, nay almost all attacks of disease upon the Lungs or throat, are arrested and thus are saved many thousands every year, from a premature grave. No family should be without it, and those who do neglect to provide themselves with a remedy which wards off this dangerous class of diseases will have cause to deplore it when it is too late. Proofs of the surprising efficacy of the Cherry Pectoral need not be given to the American people,—they have living proofs in every neighborhood. But those who wish to read the statements of those whose whole health has been restored and whose lives have been saved by its use, will find them in my American Almanac, which the Agents below named have to furnish gratis for every one.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing; especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

XXXIV CONGRESS—FIRST SESSION.

THURSDAY, Dec. 6.

SENATE.—Mr. Hale's resolution calling on the President for information touching Kansas matters, was, at the suggestion of Mr Hunter, laid over, until after the President's message should be received.

HOUSE.—Humphrey Marshall was withdrawn by Mr Wheeler.

The members proceeded to the 16th ballot for Speaker, as follows :—

Whole number	222
Necessary to a choice	112
Lewis D. Campbell, of Ohio, repub.	79
Wm. A. Richardson, of Ill. dem.	72
Henry A. Fuller, of Pa. whig	20
Wm. R. Smith, of Ala. k. n. dem.	14
John Wheeler, of N. Y. dem.	10
Alex. C. M. Pennington, of N. J. whig	9
Nathaniel P. Banks, Jr. of Mass.	6
Scattering	12

The House went on to the 21st balloting, and then adjourned.

Twenty-first Ballot.

FRIDAY, Dec. 7.

SENATE.—Mr Weller gave notice of his intention to introduce a bill authorizing the construction of a railroad and line of telegraph to the Pacific. Adjourned.

HOUSE.—The twenty-second ballot for Speaker took place, with the following result: Richardson 73, Campbell 74, Banks 11, Fuller 20, Pennington 9, Wheeler 11, Zollicoffer 9, Smith of Ala. 3.

WASHINGTON, Dec. 6.—The members of the House are interchanging views to-night, and endeavoring so to arrange the matters that an organization may be effected without further delay, but their figuring does not promise them a favorable prospect. The Democrats resolve to stand firm on their platform recently adopted in caucus, in the hope of eventually succeeding, seeing that the majority of the House in opposition to them cannot unite; but some of the latter are comforting themselves with the assurance that after several of their number shall have been complimented with a heavy vote, an election of Speaker will easily take place.

It is expected that Mr Banks will show his strength to-morrow. In the event of his failing, Mr Pennington will be brought forward.

FROM TEXAS.—*New Orleans, Dec. 6.*—We have received Galveston dates to the 1st inst.

A bill was before the legislature, proposing a loan of $5000 for each mile of railroad built in the State, for which it was to retain a mortgage on the road.

Several newspapers are urging the legislature to instruct Senator Houston to resign, on account of his anti-Southern sentiments.

The weather was favorable for securing the cotton and sugar crops.

FIRE AT SING SING PRISON.—*New York, Nov. 7.*—A very extensive fire occurred in the workshops of the State Prison at Sing Sing last night, which at 9 P. M., the hour of our latest information, had not been subdued.—The loss thus far is estimated at $80,000. The origin of the fire is not known. When first discovered it was burning in the vicinity of the stove, in the State shop. It was surmised that it was the work of an incendiary, and fired for the purpose of affording an opportunity for the escape of some of the convicts.

FATAL RIOT.—*Dunkirk, Dec 4.*—A riot occurred here on Friday between some Irishmen and Americans, growing out of an assault of the former upon a Russian named Polerski. The Russian was killed. Two Irishmen were beaten so badly that they are not expected to live. Five Irishmen were arrested, and are in prison.

MAN FOUND DEAD AT WEARE.—A gentleman who came down on the Merrimack and Connecticut River Railroad, this morning, informs us that a man named Chase was found dead in the western part of Weare yesterday, Sunday. He had been missing about three weeks, and a jug of rum was found near him. Our informant had not ascertained the further particulars.—*Manchester American.*

Three magazines belonging to the French Artillery had blown up near Inkermann, killing 70 soldiers and two officers, and wounding 100 soldiers and 10 officers. The magazines contained 30,000 kilograms of powders, 600,000 cartridges and 300 charged shells, all of which were destroyed.

A terrific fire had occurred at Paris in the government bakery. 28,000 quintals of corn, and an equal quantity of flour and biscuits were burned.

The ship America, wrecked near Cabrito, had been sold by the underwriters, and gotten off by her purchasers.

The destruction of Russian grain on the coast near Gheiskeiran, was effected by an allied flotilla sent for the purpose. The grain was intended for the Crimean army, and was packed in six tiers, which extended two miles along the coast.

A man named W. G. Webster (a newspaper dealer) died on Sunday evening in New York, from the effects of a fall. He had previously suffered amputation of the legs, and the fall caused a rupture of the femoral artery. He was found lying dead in a pool of blood.

The Courier, published at Aspinwall, New Grenada, is a small but spicy sheet, bearing this appropriate motto :—"Lo, on a narrow neck of land, 'twixt two unbounded seas I stand."

Patents.
AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS.—The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers drawn and drawn. Engl. for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent. less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries: besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most competent and successful practitioners with whom I have had official intercourse.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor, and a knowledge of its ingredients severally considered, as regards their relative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the Cause, thus effecting a permanent cure. In fact so great it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs maintained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

HOUSEKEEPING.

The following letter from Mrs. G. to Mrs. A., first published in the Boston Transcript, is on a subject as interesting as the President's Message.

My dear Mrs. A.: I beg to acknowledge your kind invitation. Nothing would give me greater pleasure than to visit you; but just now my family affairs are in a state of transition, consequent upon a change of cooks, and I must consider myself home-bound for the present.

This house-keeping! what a brain-wearing business it is! No wonder that so many of our nervous sisters betake themselves to boarding. I have even thought of perpetrating the folly myself, after vainly struggling for home comforts under my own roof. Is it right to expend so much nervous energy, for example, on a careless cook, and an unfaithful chambermaid, when you have the responsibility of six children, with all their reasonable demands upon your time and strength.

My Bridget, as far as I can learn, is a representative Bridget. Impulsive and warm-hearted, but with reason and conscience only half developed. Her successor will, I dare say, be her counterpart. My husband tells me that I might as well keep the Bridget "which I have, as fly to others which I know not of;" but I have fully come to the conclusion, that Bridget and I can no longer be of service to each other, and therefore it is best that we part. She may find a more appropriate field of labor, and *perhaps* I may discover a new species of the class, more susceptible of culture.

Bridget is wasteful and untidy; not in the highest degree, perhaps, because prevented by constant oversight, but enough so, under all checks, to keep one anxious about the butter that is thirty cents a pound, and the beef that is twenty-five cents. I had hoped to conquer the untidy tendencies, the natural result of her early training, but have given it all up with the satisfaction of feeling that I have done what I could.

By no logic or rhetoric, can she be made to acknowledge a fault. She seems to be afflicted with a moral blindness which effectually prevents her progress in any direction, and to hear her talk, you would suppose she had already attained all that was attainable in her profession. She seems to have no idea of strictly following directions, the result, as I suppose, of a dim and indistinct idea of rectitude. "Be sure, Bridget, and not toast the bread till after we are seated at the table."—This has been the reiterated direction for six months. The first thing which greeted my eye upon the tea table this evening was the rack full of toast cooled down to most disagreeable toughness. "Indeed, ma'am, you know the childers are hungry, &c., &c." "We will have breakfast precisely at eight o'clock, Bridget." It does not appear on the table until twenty minutes after eight. It is useless to reprove, because she is sure she is "always in season."

Yesterday I sent for the gravy usually supposed to accompany roast beef. Her reply was characteristic: she "did not suppose we should want gravy with squash." Among the applicants for Bridget's situation, I find the *highest* wages are expected, without any reference to the worth of their services. This appears to me to be an absurdity which is allowed in no other department of labor. Who would not be willing, after testing a cook, to give her the highest market value for her services? But in these days, it appears, we must pay the highest wages for being imposed upon to the extent of our patience. It would seem that *my* rights (in this land of equal rights) ought to be considered as well as Bridget's. I want value received for my money—A bargain involves the rights of two parties, and a just bargain in no way interferes with the higher duties which as fellow creatures we owe to every member of our household.

You know I am always friendly to all educational movements, my dear Mr. A., and I want somebody to establish a school for cooks. We do not expect to change essentially the character of the Irish, but are they not capable of a training which will make them more useful members of the body politic? Can they not be taught to roast, boil, and bake according to our Yankee notions, and are there not those who for a proper consideration would teach them?

We, daughters of the Pilgrims have some traditionary notions of thorough house-keeping, and trust-worthy servants. We can even remember our mother's kitchen, as a model for imitation, —the clean and ample hearth, the shining yellow floor, the rows of brilliant tins, and the cheerful fire, made it one of the most attractive rooms in the house. Even the appendages of closets, from which I now so often shrink, were in the old homestead actually alluring. Every box, basket, and barrel, knew its appointed place, and on shelves of snowy whiteness were marshalled the miscellaneous articles comprising a store closet.

Then what a cellar! light, dry and airy, where Thanksgiving pies might repose in all their sweetness till their presence was required in the dining room.

Have these days of domestic comfort clean gone forever? Do give me the benefit of your counsels. I know I have your sympathy, but I must fly to the kitchen to save, if possible, the remnant of a beefsteak that is burning, instead of broiling.

OIL AND GAMBLING.—A prominent oil dealer in San Fransisco says that since the gambling law has gone into operation, thus dispensing with the lights used in gambling resorts, the consumption of oil throughout California has lesseend one-third.

The body of John Soule, a native of Becker Mass., and a shoemaker by trade, was found on Sunday, in the canal leading to a paper mill in Lee, Mass. A bottle in his pocket told the sad story. He was formerly a practising physician in Becket, and was an intelligent man, but given to habits of intemperance.

Morning Chronicle.

MONDAY, DECEMBER 10, 1855.

ARGUMENTS FOR SLAVERY.

Messrs. Wise and Mason, of Virginia, are not willing that Yankees shall discuss the merits of the blessed institution. Nevertheless, the Dover Gazette treats us with a column of discussion on the subject, from which we make a brief extract:

To any candid and clear-minded man there can scarcely be a doubt that the negro-race at the South is not in a condition for self-management and self-control. As a mass, the blacks, though greatly in advance of their ancestors in Africa, are not fit to take care of themselves. * * * * *

Are they yet ripe and ready for absolute freedom? The Israelites, when released from servitude in Egypt, went forty years in the wilderness, until their old men all died, and a new generation came upon the stage, before they were permitted to enter the land of promise, and govern themselves. And even then they had a theocracy, with institutions all fitted to their hands. Are the Southern slaveholders or Northern abolitionists to be the Moses, who shall give laws and institutes to the negro tribes on their immediate emancipation? * * * * In this country the Anglo Saxon race must take care of them.

The question is narrowed down, then, to a question, how shall this best be done? Not in slavery in its present form, and not in absolute emancipation. We have no time now however, to remark on this part of the subject, and must pass it over.

Oh, don't say so. Do take time immediately, by the forelock, if needful, and tell us *how* we shall take care of the poor helpless creatures.

It is not to be *slavery* as it is now, nor yet absolute *emancipation*.

What then, is the *better* way?

Bring it out, and the patriots, statesmen and christians, all over the country, north and south, will read and ponder.

But the man who has the panacea for an evil like this, should not hide his light under a bushel.

LYCURGUS.

Somebody, who signs himself Lycurgus, says, in the Dover Gazette:

It would be well for the Chronicle to remember, while claiming that *outsiders* should decide this case, and while as he says he condemns Judge Kane for political effect, that there is a much larger class of persons who sustain him.

We cannot remember what we never knew; —and we never knew nor believed that more persons sustain Judge Kane's arbitrary course than condemn it. We don't believe a word of it now.

If a Judge is not the Judge of what constitutes contempt of court, who or what is to decide it. Perhaps the Chronicle will decide who it shall be.

No sir! Congress has decided, long ago, by a positive law, what *is*, and what is *not*, contempt in the U. S. Courts.

If a Judge goes beyond his jurisdiction, he is amenable to the law.

Exactly: so he is. Kane has gone altogether beyond his powers, and ought to be impeached.

But the doctrine of invading his prerogatives, and making, not the public, but a political faction, for political ends, his rule of action, is a doctrine so destructive of the ends of justice that no candid man can for a moment doubt it.

A doctrine so *destructive*, that no candid man can *doubt* it!? He can't mean so: but that is what he says. But nobody has preached this doctrine.

Another position of the Chronicle is, that —— Courts must wait till they learn the popular voice, before they attempt to punish for contempt.

We have taken no such position.

But we do deem it un-Democratic and anti-Republican, for a judge, in defiance of a plain law to commit a man to jail for what *he* calls a false answer, and *miscalls* contempt.

The Royal Gov. Cranfield, of the *Province* of New Hampshire, used to do so—but when we rebelled against King George, and set up for ourselves, we made a law *defining* and *limiting* contempt,—on purpose that our judges should *not* do as they *pleased!*

Within the law the judge has privilege and right—beyond it he is a tyrant and usurper.

DR. KANE'S EXPEDITION.—The charts of the late Arctic expedition in search of Sir John Franklin, show a larger range of discovery than had been anticipated from the preliminary report. Many have been exhibited to the Secretary of the Navy, and subjected to the National Observatory and Coast Survey. Dr. Kane has evidently material in reserve The area of the open sea, by a careful revision of the work, has been found to exceed four thousand miles, or more than one thousand in excess of the original estimate. This large body was absolutely and entirely free from ice.

The scientific materials of the expedition will be published under the direct charge of Dr. Kane, who has been detailed for that duty by the Navy department. The Smithsonian Institution and Coast Survey have both volunteered their aid in furtherance of the object. —*Washington Union, Dec. 2.*

The number of children between the ages of four and 16 years who attend school in Connecticut, is 74,300.

BIDDEFORD.—The Union informs us, that in that city there have been indications of increased activity in the liquor business, since the important events of last September, viz. the elections.

On Saturday last, Marshal Hamilton, thinking that those engaged in the business should be asked to take in their signs from the gutters, which have been occasionally strewed round rather loosely called his assistants together and armed as the law directs with legal missiles, proceeded to call at various places in the city where the indications warranted the belief that the trade was carried on with a vigor not recognized by law. In the visits made by him and his assistants seizures of liquor were made by them at John Hughes, Dudley Block; Israel P. Scammon's, Central Block; George Ladd's; H. Goldthwait's, South St.: an officer waiting on Charles Gorham, in the Dudley Block, found the supply running "incontinently to waste." The same evening seized 1 bbl. of Gin and 1 of Rum, marked "I Levin," in the "Waterboro' Block," and a keg of about 20 gallons of Gin in the same place. This liquor was all very poor, so bad that the officers who took it, could find none who would take the credit of its ownership, though the "furriners" in whose premises it was found were very jolly in their requests to have "a good drink" or "a drap of the good crather," before it was carried off.

They also seized 2 casks from the Express, while it was being landed to the Maxwell House.

The Marshal, in addition to these seizures, took 1 cask of Gin about 20 gallons marked for John Wade; 2 bbls. Strong Beer, marked for A. Herrin, and one cask of brandy snugly placed in a dry cask, and marked for J. Johnson, all found at the depot. The casks of liquor seized at the "Waterbury Block" and taken from the Express wagon were all in flour barrels.

The Marshal was not received with the utmost cordiality at the premises of Mr Hughes, by Mr Hughes, Mrs Hughes and their sympathizing friends; but the Marshal having been endowed by nature, with good gifts, of a physical character, was enabled not only to find the way to the liquor, but to conduct Mrs Hughes to the Police Court Room on a charge of assaulting an officer, and the Judge, after hearing the case, ordered her to recognize to Court in the sum of $200. Mr Hughes, against whom a similar charge is made, has left town for a season.

Mrs Hughes and her friends were quite confident that tee Marshal had not been sufficently regardful of the idea involved in the Sept. election, and made liberal promises that at next Spring's election to bury him "so dape that he would never rise again," with various other pleasant pledges of a like character.

AN IMPOSTOR.—We have been requested to warn our readers against being deceived by a young German who has called on many persons, stating that he has been directed to them as charitable and wealthy, by a clergyman of this city. He has obtained in this way a considerable sum of money. The clergyman whose name he gives has never sent him to any individual, and knows nothing about him except that he has made the false statement alluded to above.

This impostor may or may not be an individual, who, we hear, has levied contributions on our benevolent citizens, by false representations, under the style of "Prof. Fischer."—*Boston Adv.*

Pass him round. He may visit smaller cities.

ANOTHER "CONFIDENCE MAN."—The Burlington (Vt.) Free Press gives a lengthy account of the doings in that town, of a swindler calling himself the "Baron de Percy," and professing to be the son of "Hon. Capt. Murray, of Queen Victoria's Household Guards." He professed to be a convert to Methodism, and asserted that he had recently come into possession of a fortune of forty-five thousand pounds sterling per annum. He went so far as to preach in the Methodist church, to a large audience, many of them doubtless attracted by the novelty of an English Baron in a Vermont pulpit. He was called upon by the first citizens, whom he invited to shoot game with him next year on the premises of his cousin, the Earl of Dalkeith, in Scotland, &c., &c., with other similar humbugs. The upshot of the matter was that he borrowed money, ran in debt, and then ran away, and people found that they had been egregiously duped.

STATE RIGHTS.—Judge Smith, of the Wisconsin Supreme Court, has given a recent decision, in a suit against the U. S. Marshal for an unlawful arrest, to the effect that the State Courts have a right to issue a writ of habeas corpus for the purpose of taking a person out of the custody of an officer of the United States, and having a hearing to ascertain if he be properly detained. This authority cannot be suspended except in case of rebellion or invasion. Some difference of opinion exists on this question, involving State sovereignty, but in Wisconsin, the Courts have formed and reiterated the opinion contained in this decision of Judge Smith.—*Portland Advertiser.*

A correspondent writes to the London Daily Telegraph—"When war was declared between the United States and Mexico, a placard appeared in the window of a gunmaker on Tower Hill, offering a bounty to all who would enlist in the Mexican service, or rather go privateering in English vessels against the commerce of the United States. I took the bill to George Bancroft, then United States minister. He at once sat down and wrote to Lord Palmerston, then in office, and the next day appeared in the Times an official notice from Lord Palmerston, that all such parties who enlisted here, and were caught, would be treated as pirates, and punished accordingly. The notice in the window was not shown afterwards."

It is understood that the dress-making business is about to be incorporated with coopering. A number of active coopers will be required to hoop the ladies' petticoats; the model of female elegance being now a molasses cask or beer barrel.—*Boston Post.*

We are glad to learn this junction of trades because we are satisfied that most of the ladies' who are *hooped* will need *heading*.—*Portland Adv.*

LOCAL.

A GOOD BUILDING.—The moderate weather has been favorable to the erection of our new High School House; and the exterior is now so nearly completed as to make it certain that the new structure is a great ornament and improvement to that part of the city.

It is of ample height, size, and strength; and if finished and arranged within, as fitly and thoroughly as it is without, it will be one of the best, perhaps the very best, school house in the State.

We were sorry to lose the old Wentworth house; sorry to lose an old landmark;—but now, the noble, costly, and elegant edifice erected there, more than supplies the deficiency. The old tree outside the corner is to stand. The corner is to be rounded, so that the access to St. John's Church will be more pleasant, and the view of the same much better from Daniel street.

The school house being of brick, with slated roof, will also add something to the safety of the neighborhood.

INK.—Among the numerous varieties of ink in the market, there is none superior to that manufactured by A. W. Harrison, of Philadelphia, and for sale in this city by Geo. W. Towle. Two kinds, Black and Blue-black, are manufactured. They flow freely, and are warranted fast colors.

☞ The Selectmen of Ward No. 2, will meet again this evening, at the City Rooms, to examine Naturalization papers.

TROOPS FOR OREGON.—The Government have contracted with the Pacific Mail Steamship Company to convey 800 troops to San Francisco, on their way to Oregon, we understand, at $150 per head. They are to be taken to Aspinwall in the steamer St. Louis, which has been chartered for that purpose, having been temporarily withdrawn from the Havre line, where her place is to be supplied by the steamer Union, R. Adams, Esq., commander. The latter vessel will leave for Southampton with the U S mails, on Saturday, the 15th inst., at 12 o'clock.

The object of sending these troops to Oregon, is, doubtless, to assist in *pacifying* the Indians, who are engaged in a cruel war upon the white settlements.

HON. JOHN APPLETON.—The Washington Union in noticing the return of this gentleman to the United States by the Atlantic which arrived last Friday, says that he brings important despatches and is now in Washington. "From the urgency of his private affairs, he feels compelled to relinquish the honorable career which has been opened to him abroad, and will not, therefore, return to London. While, however, his services will be lost to the country in Europe, we are gratified to know (says the Union) that he will resume his editorial duties at home, (in the office of the Portland Argus,) and that the democratic party will have the efficient aid of his pen and voice in the presidential canvass."

MORGANATIC MARRIAGES.—Several correspondents of the New York Times inquired concerning the nature of Morganatic marriages. They are thus answered by a correspondent, who signs himself "R."

They are quite common among the high nobility of Germany, being allowed by the laws of Prussia to the nobility and royal councillors, and in other German States only to the nobility. The difference in one of these "left-hand" marriages from the common kind is, that the wife is not raised by it to the rank of the husband, or the children placed in the line of inheritance of title or fortune. But no one can contract another marriage while bound by one of these. Archduke John, of Austria, married a country postmaster's daughter, whom he educated at his expense, and endowed with the title of a Countess. They have lived happily together for many years.—Prince Albrecht, of Prussia, is also thus united to a daughter of a former Minister of War, General Ranch. Likewise, the infamous Elector of Hesse Cassel found it convenient to marry a Countess thus. These couples very often live much more happily together than those married by the right hand. The former King of Prussia was united in this manner to a young Countess Hoag, about 1825, and raised her to the rank of a Princes de Lignitz. It was a very happy match.

A HUSBAND SOLD FOR $500.—The Cleveland Plaindealer says that a lady passed through that city a few days since in hot pursuit of her husband, who had been smitten with a smart attack of "passional attraction," and had ran away with another woman from Wyoming county, N. Y., to Loran county. She took a brace of officers from Cleveland and went to Elyria. The gentleman, snuffing the approach of danger, left his money with a nephew, to effect a diversion with the enemy, and took the cars for the South. On reflection, suspecting the honesty of his nephew, he took the next train back to look after his money. Here he encountered the pursuing party, and negotiations were opened. It resulted in the lady's selling out all her right, title and good will in and to her husband, and his purchasing a dishonorable peace for $500. The lady returned to Wyoming without a husband.

MURDER.—Mr Wm. H. Trone, one of the best known and most esteemed inhabitants of Mobile, was killed last night in front of the Battle House by a man named Banks, who, we understand, lives in Lowndes county, Miss. The unhappy man who has thus involved himself in the crime of murder, and taken without reason or provocation the life of a most worthy and respectable gentleman, was, it seems, well-nigh crazy from the effects of liquor. It appears that the parties were acquainted, and meeting casually at the door of the Battle House bar-room, Trone spoke to Banks, when the latter, with insane fury, fired a pistol into his bosom. Mr Trone lived but a few minutes, and Banks was promptly arrested and conveyed to the guard-house.—*Mobile Register.*

A Connecticut man named Alvah Harris, was fined twenty dollars and costs at Providence last week, for selling turkeys by balances that were so defective that he got pay for an extra pound on every fowl he sold.

AYER'S CHERRY PECTORAL.

For the rapid cure of Coughs, Colds, Hoarseness, Bronchitis, Whooping Cough, Asthma and Consumption, is universally known as the best remedy ever yet discovered for every variety of Pulmonary disease. So wide is the field of its usefulness and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the Lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the dangerous and distressing affections of the pulmonary organs which are incident to our climate. By its timely use many, nay almost all attacks of disease upon the Lungs or Throat, are arrested and thus are saved many thousands every year, from a premature grave. No family should be without it, and those who do neglect to provide themselves with a remedy which wards off the dangerous class of diseases will have cause to deplore it when it is too late. Proofs of the surprising efficacy of the Cherry Pectoral need not be given to the American people.—they have living proofs in every neighborhood. But those who wish to read the statements of those whose whole health has been restored and whose lives have been saved by its use, will find them in my American Almanac, which the Agents below named have to furnish gratis for every one.

Prepared by DR. J. C. AYER, Lowell, Ms., and sold by every respectable Druggist in New England.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,578 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by

d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

Grand Musical Festival.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

XXXIV CONGRESS—FIRST SESSION.

FRIDAY, Dec. 7.

HOUSE.—[Continued.]—Twenty-third ballot:—

Campbell	75
Richardson	73

Mr Campbell then rose, and, after thanking his friends for their support throughout the twenty-three ballots, declared that he had become convinced that it would be impossible for his friends to succeed in electing him unless he could perform one or two conditions, namely:—repudiate his well known opinions on slavery and Americanism, or in some way, —directly or indirectly, — make pledges as to the organization of committees, which would amount to a sacrifice of his self-respect, and make him in his own judgment a fit object for public contempt. Under these circumstances, and feeling that the interests of the country required the speedy organization of the House, and regarding those interests as paramount to every other consideration, he withdrew his name as a candidate.

Twenty-fourth ballot:—

The rest scattering.

WASHINGTON NEWS.

The Boston Advertiser learns, by its special correspondent, that Mr Buchanan has not announced the refusal of Great Britain to grant redress in the case of illegal recruiting of the foreign legion in this country. He also states that Mr Wheeler was not justified in officially recognizing the government of Col. Walker, in South America.

Lord Clarendon has made another argument which must be answered before our government can proceed. So the President's Message will not dispose of the subject, as anticipated.

It is believed that the vote to exclude Whitfield from a seat as delegate from Kansas will be much larger than the united Anti-Nebraska vote. A number of Nebraska democrats are expected to favor his exclusion, and the admission of Reeder.

Although it is universally admitted that neither Whitfield nor Reeder were chosen under forms of law, those who are in favor of Reeder's admission maintain their position by arguing that he presents satisfactory evidence of being the choice of a majority of the legal voters of the Territory; and that, as the House is the judge of the qualifications of its members, it may rightfully admit him upon being satisfied that he possesses the essential quality of being the choice of the constituency.

The cases of Michigan and California are cited, and it is claimed that the same principle which admitted their Senators and Representatives—notwithstanding they were elected under a Constitution for the framing of which Congress had passed no act of authorization—will cover the admission of Reeder.

Dec. 7.—The republicans are holding a caucus to-night to arrange their programme for to-morrow, when Mr Banks, it is thought, will nearly double his vote of to-day and there halt.

An election is thought to be improbable.

THE EUDORA MYSTERY.—*New York, Dec. 8.*—The mystery which has surrounded the schooner Eudora for some days past, has at length been partially cleared up. The vessel was raised yesterday, but after a thorough search, no trace of the missing captain and crew could be discovered. It is therefore believed that Wilson, the negro cook, sunk the bodies in the river, and measures have been taken to recover them.

ESCAPE OF A BANK ROBBER.—*Concord, N. H. Dec. 8.*—John W. Rand, the noted bank robber, broke jail a second time in this city last night. His escape was effected by sawing off the large iron bars of his cell and windows. A large dog in the yard was found poisoned, which indicates that Rand had an accomplice outside. Active measures are taken for his recapture.

THE MEMPHIS NAVY YARD.—On the 26th ult. a portion of the Memphis (Tenn.) Navy Yard embracing the rope-walk, the tarring house, the blacksmith shop, the officers' quarters, &c., together with a large space of open ground not yet filled up, was sold at auction for $100,000. It is said that the property sold remarkably well, considering the current prices of unimproved ground on the opposite side of the street.

CALIFORNIA JOTTINGS.—*A Brave Old Lady.*—A Mr Loyd, living at the San Jose Mission, recently sent a sum of money to his mother, in the Eastern States, an old lady eighty years of age, with the remark that she might use it for her private purse or for her passage to California. Nothing daunted by the formidable journey, the brave old heart took passage for California, on the steamer, entirely unattended, and arrived safely at her destination.

CLOCK MAKERS.—The paper of the Jerome Manufacturing Company, has been for some time past, freely offered for sale in New York, with the endorsement of P T Barnum, at unusual rates of interest. The fact, at length, gave rise to a rumor, as to the solvency of the parties in question, which has induced Mr Barnum to address the following to a New York paper:

"I am on their paper to some extent, though fully secured, and had myself feared that there was some truth in these reports. Theirs is the largest clock manufacturing establishment in the world, and although their assets I knew were full $250,000 above all their indebtedness, yet I feared, on account of the enormous amount of goods which they have on hand, (some $450,000 worth,) that they might be compelled to suspend for a time. I left New York for New Haven, determined to know the worst, and I am rejoiced to say that there is no truth in the report. They have made arrangements with some of their creditors to renew portions of their paper, and all the banks and capitalists here have done, and are ready to do, all that is necessary to enable them to swim along bravely. They are all right, and easy in regard to money matters, and always will be hereafter."

A SQUIRREL CEMETERY.—The editor of the Sacramento (Cal.) Farmer has had presented to him a mass of squirrel bones, taken from the hollow of an oak tree. The whole mass was many bushels, and by appearance had lain for ages. Many complete skeletons were among the relics.

FALL AND WINTER STOCK
MOSES & DOWNIE.
Merchant Tailors, at No. 37 Market Street,
Well known as the
LOW PRICED CLOTHING STORE,

HAVE just received the largest stock of Cloths and CLOTHING they have ever offered to the public, to which they invite the attention of purchasers. The Low Priced System has been practised by the subscribers long enough to assure them that it is better than any other, and customers may rely upon obtaining of them, as heretofore, *Good Clothing at the Lowest Prices.*—Their stock of
Ready-Made Clothing
Is very large, made under their own direction, by competent hands, in good style, and will be sold at prices that will defy competition. They pay particular attention to
CUSTOM WORK,
And warrant perfect satisfaction to all who favor them with their patronage. Good work, good style and a perfect fit is warranted, or the purchasers will not be expected or desired to receive the garments.

Their stock of Cloths, Trimmings and Furnishing Goods is very large and varied, and will be offered at sight advance from cost.

They also have a large assortment of
Boys' and Youth's Clothing.

Moses & Downie also keep on hand at all times a good stock of Boots, Shoes, Hats, Caps, Trunks, Valises, Umbrellas, and a variety of other articles for Gentlemen's use, all of which they offer at lower prices than they can be bought for elsewhere. For proof of this fact call and see

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs, and begs of those who are undecided what to use, first, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate infant. The numerous testimonials received daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine: let Mothers give it to their Children when they have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and apparently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the Cause, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the patient can rely upon a speedy and complete cure of the disease.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "Dr. Burleigh Smart's Cough Medicine, Prepared by Smart & Clark, Bingham, Me., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

HACKING.

BENJ. F. NUTTER, having had his Hacks in good order for the purpose of carrying on the Hacking business, takes this opportunity of informing the citizens of Portsmouth and the public generally, that he will be ready to wait upon them with as good a coach, and as cheap fare as any one in the city. He hopes, by strict attention to business, to receive a liberal share of their patronage.

Books kept at the Franklin House. All orders left on his books will receive the earliest attention. jy12

Interesting Trial and Verdict at Memphis.—A verdict has just been rendered in the Court at Memphis which will be viewed as right by some and wrong by others, and according to the preconceived opinions they are imbued with and the latitude in which they dwell. Several months ago a tragedy—a wild and fearful scene—occurred in Memphis.—Mary Moriarty, an Irish servant girl, attacked with a dagger and slew on the spot John Sheenan, her seducer. Sheenan had insidiously and basely insinuated himself into the confidence of his victim, destroyed her virtue and blasted her hopes under promise of marriage, and then brutally forsaken her. She sought him and reminded him of his solemn promise; she besought him by every consideration of honor to himself and justice to her to repair the great wrong done her as far as lay in his power by making her his wife, as he had promised. The seducer scornfully rejected the proposal, and added insult to injury by taunting her with her shame. She could not endure this. She went home, armed herself with a dagger, sought her destroyer again, sheathed the glittering weapon in his bosom, and then drawing it forth, reeking with retribution, brandished it aloft in fierce exultation over the bloody deed. She made no concealment of the act, did not seek to palliate it by the least denial of deadly intent, but justified it on the ground of the terrible provocation that incited her to the deed—on the ground that the slain man had injured her far more by destroying her virtue than she had him by destroying his life. The Jury took the same view of the case, and, without consulting longer than five minutes, rendered a verdict of "Not guilty."—*St. Louis News.*

Interesting Narrative.—Prof. Morse, the author of the magnetic telegraph, delivered a speech at St. Johns, recently, in which he gave an interesting reminiscence of his telegraph troubles. The bill for establishing a line, he says, was before Congress, had passed the House and was on the calendar of the Senate, but the evening of the last day had commenced with more than one hundred bills to be considered before mine could be reached. Wearied with anxiety of suspense, I consulted with one of my Senatorial friends; he thought the chance of reaching it so small, that he advised me to consider it as lost. In a state I must leave you to imagine, I returned to my lodgings to make my preparations for returning home the next day. My funds were reduced to a fraction of a dollar. In the morning, as I was about to sit down to breakfast, the servant announced that a young lady desired to see me in the parlor. It was the daughter of my excellent friend and college classmate, the Commissioner of Patents.—She called, she said, by her father's permission, and the exuberance of her own joy, to announce the passage of the telegraph bill at midnight, but the moment before the Senate adjournment.

This was the turning point of the telegraph invented in America. As an appropriate acknowledgement for her sympathy and kindness—a sympathy which only a woman can feel and express—I promised that the first line of telegraph from Washington to Baltimore should be indited to her. To which she replied: "I will hold you to your word." In about a year from that time the line was completed, and everything being prepared, I apprised my young friend of the fact. A note from her enclosed this despatch; "What hath God wrought." These were the first words that passed over the electric wires, on the first completed line in America. None could have been chosen more in accordance with my own feelings. It baptised the American telegraph with the name of its author. It placed the crown of success and honor where it belonged.

The magistrates of Gloucester, England, dismissed a complaint against some persons charged with mobbing, and ejecting from a lecture room a couple of Mormon elders. The court said they had no legal right to preach the doctrine of polygamy.

A Child's Idea of how Chickens should be Made.—A few days since the family of a city officer were seated at the dinner table, and among the viands before them was a nice pair of broiled chickens. The father, after seeing that each member of his family had been bountifully helped, entered into conversation with his little daughter, a child some five years of age, during which, something like the following occurred:

Child—"Where did this chicken come from, father?"

Father—"It came from the country, where it grew from a very little chick, and was raised by a farmer."

Child—"And did the farmer kill it and bring it to you?"

Father—"Yes, my dear."

Child—"Did it hurt the chicken to be killed?"

Father—"I presume it did hurt the chicken to kill it."

Child—"Did God make the chicken to be killed, father?"

Father—"Yes, my child, God made the chickens for our food."

Child—"Well, then, God ought to make the chickens so it won't hurt 'em to kill 'em."

At this point the subject of conversation was suddenly changed.—*Journal.*

The Chinese Dead.—The California Christian Recorder states that the Chinese have a regular system for collecting their dead and sending them back to the Celestial land. They forward to all the principal mining districts two inch pine planks for the purpose of making boxes for the dead. These boxes are forwarded to San Francisco, whence they are shipped to China. This useless practice is the result of two causes—first, a supercilious notion respecting the Celestial Empire; the second is in common with all who have either no religion or a religion based upon mere theological crudities of an unspiritual nature, they regard the body as all that there is of man.

Petrifaction of the Body of a Child.—On Wednesday the body of a child which had been buried about six years ago, in a private burying ground in Albany, was taken up for interment in the Rural Cemetery. The weight of the coffin attracted attention, and it being opened, the body was found to be petrified. It was white, bearing the appearance of a plaster of Paris cast, and perfect, excepting the head, which had fallen in, and the body was cracked across the centre, leaving an opening of about one-quarter of an inch in width. Upon slightly striking the body it appeared to be hollow. It has been conveyed to the Cemetery.

"Long Heels" was a favorite term of reproach which the Hunker rabble used to apply to the Free Soil party a year or two since. The appellation has been gradually coming into favor, and within a few weeks the ladies (the young ones *en masse*) have not merely theoretically, but *practically*, joined the "long heel" party. We always have believed that our party was sure to become popular in due season.—*Manchester Democrat.*

Morning Chronicle.

TUESDAY, DECEMBER 11, 1855.

KANSAS.

Fuller and more reliable accounts from Kansas, make the danger of civil war less imminent than the earlier and one sided despatches. The Boston Advertiser of Monday morning, thus sums them up.

We have full accounts from Kansas this morning, presenting a more intelligible, as well as more authentic description, of what has taken place there. The affair was briefly this: On the 21st of November, a man named Coleman, formerly of Pennsylvania, shot in cold blood, a man named Dow, formerly of Ohio. They had had a difference before, but no violence. After the murder Coleman fled, leaving Dow's body in the road, where it lay four hours, none of Coleman's friends who had witnessed the murder removing it. At last a man named Branson, with whom Dow boarded, hearing of the murder, came and took care of the dead body.

Meanwhile Coleman fled first to Missouri and afterwards to Gov. Shannon, at the Shawnee Mission.

The next incident in the drama is the appearance of the sheriff, who was put over the people for the term of six years by the quasi-legislature, and at night, he summarily arrested (of all the men in Kansas) the innocent Branson, who had done nothing except remove the body of his friend.

This mockery of justice, administered by an officer whose authority they do not recognize, aroused the people of Lawrence to rescue Branson; which was easily effected.

There is no evidence whatever of a disposition to oppose the lawful authority of the United States, or of the Governor appointed by the President.

The editor of the Advertiser, copying the accounts at length, makes this preface.

Our knowledge of the geography of the Territory, and the relative position of the places blindly mentioned in last week's reports —our experience of the incorrectness of Missouri despatches—our opinion of the character of Governor Shannon on the one hand, and the leading citizens of Lawrence on the other, —have satisfied us, every day, that there was no critical danger of "civil war" in Kansas.

It is doubtless true that the genuine inhabitants of the Territory will not submit to the government sought to be imposed upon them by the false legislature, aided by a mob from Missouri. They will not resist the lawful authority of the President, nor of the Governor appointed by the President, and unless the Governor and President are exceedingly unwise, there will be no possibility of the intervention of the United States troops. Such an intervention to aid the Missouri mob in their subjugation of the inhabitants of Kansas, would be an act so outrageous that the President will hesitate before he sanctions it. This appears from the tone of the Washington Union.

We also copy from one of the leading St. Louis papers, the Intelligencer of Dec. 5, the conclusion of an article which exposes the exaggerations of the false accounts, and coincides in the opinion that there little danger of "civil war."

There are significant facts here, that give assurance that there will be no "war" in Kansas. Let us note them:—

1. The extreme excitement is in Missouri—not in Kansas—the truth being, as we have said, that it is no new position in Kansas for the territorial sheriffs to be repudiated.

2. The Free State men are willing to be governed by the U. S. officers and to submit to them.

3. The militia of *Kansas* did not "respond" when Gov. Shannon called them! This is a remarkable fact. The question is, why? Did they sympathise with the Free State men? If so, then all Kansas is against those territorial laws— conclusive proof that the people of Kansas did not make and do not approve them.

4. The *Missourians* that were precipitated thoughtlessly into volunteering to march into Kansas, only hold themselves in "readiness to move." After they think a little, they will conclude it is their duty to "move' *home*.

5. Gov. Shannon has only '250 or 300 men' to back him, drawn from all sources. He is wisely waiting for a "greater force," before marching against "intrenchments," and "eleven hundred Sharpe's rifles" and "five pieces of artillery," all directed by a somewhat reputable and skilful leader, at the head of "1100 men." Gov. Shannon don't mean to get hurt if he can help it. That is obvious.

6. But, most grateful and gracious fact—most cheering and pleasing of all—"a meeting is being held" to "terminate the matter, peaceably if possible." Of course, it is possible.

7. "Unless the U. S. troops are furnished," the laws cannot be executed. This intimates that on sober, second thought, the Missourians desire to be "counted out" of the fight to "subjugate" the people of Kansas.

8. Nothing will be done, till the U. S. Government defines its position. Pres. Pierce will have a regard for peace, we dare say, and so will end the Kansas Civil War!

The various exciting telegraph despatches now afloat, are calculated to confuse the public mind; and we have thus taken the trouble to unravel the Kansas imbroglio. We think we have done it, and that the country can safely go about its business, undisturbed by visions of torch and torture in Kansas. We are cool and quiet in Missouri. As the winter draws on, it will be very cool in Kansas.

The SOMERSWORTH BANK, at Great Falls, N. H., went in operation on Saturday last, under the most favorable auspices in regard to its future success and prosperity. It opens with a capital stock of $100,000.

☞ The "Exeter Bank," at Exeter, N. H., incorporated at the last session of the Legislature, went into operation last week. John Sullivan is President, and James M. Lovering, Cashier.

SIR JOHN ROSS.

This gallant English navigator spent four years and more, viz. from May 1829, to October 1833, in a voyage of discovery and adventure in the Northern Seas, of which we copy a few interesting notes from the North American Review.

Ross sailed from England, May 24, 1829, passed Cape York, at the entrance of Prince Regent's Inlet, August 9, found the Fury's stores at Fury Point in a state of excellent preservation after four years' exposure, August 14, and was finally stopped by ice near the southern extremity of the inlet, September 30. The ship was housed in, October 27, and the usual preparations made for winter. The following summer he succeeded in advancing only about three miles, when he was again compelled to make ready for winter, after indulging in some speculation as to the time required to make the Northwest Passage at his rate of travelling. In the summer of 1831 he sailed four miles further. On Christmas day of that year, he informs us that the cabin dinner consisted of a "round of beef, which had been in the Fury's stores for eight years, and which, with some vegetables and veal, was as good as on the day on which it was first cooked." Early in the next season, it became apparent that the voyage could be prosecuted no longer, and that the ship must be abandoned. Early in April, accordingly, stores were pushed forward in the direction of Fury Point, by means of sledges, with immense labor, and on the 29th of May, 1832, the colors were nailed to the mast, and the Victory was abandoned. Fury Beach was reached July 1, and after building a house, and allowing the men a rest of a month, the boats of the Fury were taken, and an attempt made to escape from the long imprisonment. The 31st day of August found the party at Barrow's Strait, stopped by the ice, which was one solid mass. Nothing remained but to return to the house on Fury Beach, where they arrived, October 7, and prepared for another winter. This last winter was one of exceeding dreariness. The men were dispirited, the want of occupation and the general monotony of their life induced sickness, and the opening of spring was impatiently looked forward to. At last, on the 14th day of April, 1833, a beginning of exertion was made, by sending supplies forward. The boats were found where they had been left the preceding year, thirty-two miles from Fury Beach, covered with snow. This was on the 24th of May, and after several journeys between this point and the wintering station, for the purpose of bringing on supplies, all the members of the party were assembled at the boats on the 12th of July. After waiting till the 15th of August, they got under way, reached Barrow's Strait the next day, were fortunate enough to find a lane of open water, through which they sailed, and were picked up by the Isabella whaler on the 26th. Poor, starved, unshaven, ragged as they were, they presented an appearance of exceeding wretchedness. By the generosity of their brother sailors, they were provided with all things needful, and though they were at first "too comfortable to sleep," yet they soon resumed their accustomed habits of life, and thankfully rejoiced that there was once more an assurance of home and friends. On the 18th of October they landed on their native coast.

On this voyage, attended as it was by so much suffering, it is somewhat remarkable that very little sickness was experienced. The scurvy, that scourge of a long sea voyage, was kept off for two years, and during the whole time, out of a crew of twenty-three persons, only three died, and but one of those from diseases induced by the climate. This fortunate state of things was undoubtedly brought about by the systematic precautions adopted by the commander. Ross himself attributes it to the provision made for securing dry apartments on board the ship, plenty of exercise, good spirits, and particularly to *abstinence from intoxicating drinks*. It has been supposed that sailors, more than all others, need the stimulation of spirituous liquor; but Ross's evidence on the point entirely dispels this idea. His words are so explicit in regard to this matter, as to deserve quotation. They have the more weight, inasmuch as they are written by one who disclaims any respect for temperance in the abstract, and who indulges in the fashionable sneer at "paltry, pretending, fantastical ultra-philanthropy." He says:

"It is difficult to persuade men, even though they should not be habitual drinkers of spirits, that the use of these liquors is debilitating instead of the reverse. The immediate stimulus gives a temporary courage, and its effect is mistaken for an infusion of new strength.—But the slightest attention will show how exactly the reverse is the result. It is sufficient to give men under hard and steady labor a draught of the usual grog, or a dram, to perceive that often, in a few minutes, they become languid, and, as they term it, faint; losing their strength in reality, while they attribute that to the continuance of their fatiguing exertions. He who will make corresponding experiments on two equal boat's crews, rowing in a heavy sea, will soon be convinced that the water-drinkers will far outdo the others.

"It is not that I am declaring myself an advocate for temperance societies, whatever may be their advantage, nor that I am desirous of copying a practice lately introduced into some ships, under whatever motive; but were it in my power as commanding a vessel, I would exclude the use of grog on the mere grounds of its debilitating effects, and independently of any ulterior injury which it may do; reserving it for those cases alone in which its use may be deemed medicinal, or for any special reason useful."

Ross elsewhere speaks of the use of "grog" as causing inflammation of the eyes, and as aggravating snow-blindness, and of abstinence from its use as a preventive of scurvy. And this is pretty good evidence, coming as it does from one who had then seen forty years of service.

NOMINATIONS.—The Washington correspondent of the N. Y. Evening Post writes: "In the Executive session, this morning, a batch of nominations was received from the President, among which was not that of Lane of Oregon, as Brigadier General, which was predicted. Wilson Shannon was submitted as Governor of Kansas Territory, but no action was taken in regard to it."

LOCAL.

☞ On Wednesday evening last, New Hampshire Lodge No. 17, I. O. of O. F., on their part appointed a committee to make arrangements for a Grand Levee, to be holden at Congress Hall, early in January; and the committee was joined by brothers appointed by Piscataqua Lodge No. 6, on Monday evening. From the well known energy of the committee, we have no doubt that the affair will come off in good style. Of course all members of the order will attend.

☞ Dr. Solger, an eminent, able, and popular lecturer, is to be the orator this evening, at the Mechanic's Lyceum. His theme, The Anglo-Saxon Woman and her home—is one of the most attractive;—and in his hands it must afford an excellent lecture.

☞ "An Old One," a member of the Old Folks Choir, "for the purpose of awakening yet more interest in their concerts, suggests that each member of the choir that pleases, shall compose a fugue tune and hand in to the Secretary of the choir within two weeks; and that a committee chosen for the purpose, shall examine the same, and select the one which they think the best, and have published and performed at their first concert. There is a good share of musical talent in the choir, and if this suggestion meets favor it will be one step towards bringing out native talent. Let us see what the old folks of the present day can do."

THE MASSACHUSETTS MUSICAL JOURNAL.—Prof. B. F. Baker's new paper, which has been published a few months, is gaining a good circulation—and deserves it. The last number is the best we have examined, and worth half a year's subscription. Published semi-monthly at $1 per year, in Boston. Mr Pearson will receive subscriptions in Portsmouth.

Prof. Baker is now on a professional tour in the South. He held a Convention at Knoxville, from the 9th to the 13th ult., "the first thing of the kind ever held in the Southern States"—but it was entirely successful. Mr Baker says, "The style of that quarter is strongly marked with the characteristics of New England singing; but while the voices (particularly sopranos) are of superior texture there is still a want of development, which to the northerner, has the effect of feebleness."

Prof. B. writes from Indiana; and commences by stating that during his journey of eight hundred miles, "good luck has been his constant companion." Of course it has, and ever will be—for come what will, he rejoices that it is no worse, and being friendly, he has no lack of friends anywhere. He spent the Sabbath in Indianapolis, and happened into a Methodist church, where was a very large congregation. He says;—

We noticed that the eyes of all present were in our direction, and supposing our hair might be slick, put our fingers through it and gave it a thorough stirring,—but still they kept looking, then the thought occurred that the dickey was not all right, hence we examined, and re-examined, and made a careful adjustment of it,— still the gaze grew sharper. At length the idea suggested itself that our face was either too long, else not long enough; whereupon we seized upon the expedient, and began our fitting process with the greatest possible elongation of countenance, and while thus, as we supposed, successfully experimenting, the sexton came and whispered in our ear, saying, "you are sitting with the women!" which gave us a shock as well as a satisfactory solution of the matter, and we then took a seat with the men.

IRISH IRON.—The English officers in the Crimea, have been proving some iron cannon, which the Russians left behind them, and also some Russian shot. They find them to be much stronger and better than their own, made of English Iron. In Russia, the iron is manufactured with charcoal; which produces a better metal than the English pit coal.—It is said that Ireland abounds in iron ore, called bog ore, as good as the Russian; and that the peat bogs furnish an inexhaustible supply of turf, which when sufficiently compressed, makes charcoal as good or better than from oak; and sites may be selected convenient for the ironstone, for the charcoal, and for carriage. It has not, it is true, been actually done, and a certain amount of speculation as to the quality of the iron which will result must necessarily hang over the first attempt, and this is sufficient to deter moneyed men from incurring the risk in times like the present; but surely it would be wise for the Government of the Country to promote even the attempt at such a new and valuable developement of resources.

In Ireland there is no limit to the quantity of iron-stone; it is easily procurable, and its quality cannot be doubted, for we have it on record that the very best iron was at one time made there.

SPRINGFIELD, Mass., Dec. 9.—*Fatal Casualties.*—Henry Gayverd, a Russian by birth, and a cigar maker, residing at Feeding hills, while attempting to turn a corner rapidly, in this city, last evening, was thrown from his carriage, injuring him so severely that he died this morning from the effects of the injuries he received.

The afternoon train from Albany last night met with an accident at Huntington, by which Wm. Gage, a fireman, was killed.

☞ The Portland State of Maine is hereafter to be published as an evening paper.—That will be convenient; there is now no evening paper published in that city.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

XXXIV CONGRESS—FIRST SESSION

SATURDAY, Nov. 8.

SENATE.—On motion of Mr. Pratt, Wm. Hickey was appointed Chief Clerk, and J. H. Nicholson Reading Clerk.

Mr Sumner presented a petition from Commodore Smith, remonstrating against the action of the Naval Board in placing him on the retired list. Adjourned.

Mr Hale, *sotto voce*, looking at the Clerk—We have made over a dollar a minute to-day, the session lasting only seven minutes.—(Laughter.)

HOUSE.—The House resumed balloting for Speaker.

Thirty-third Ballot.—Banks 100; Richardson 73; Fuller 30; scattering 19.

The ballots, so called, it seems are no ballots at all, but *viva voce* votes, where every one must stand up, and show himself We recommend a real ballot.

A despatch from Washington, of Sunday, says:—

The caucus of the anti-Nebraska members last night, resulted in nothing important. A claim for 105 votes for Mr Banks to-morrow, was made, but the result is considered doubtful.

CONGRESS.—We have no ballotings on Monday to report, but the Tribune's correspondent on Sunday says:

If Mr Banks should not be elected to-morrow (Monday) the plurality principle will be adopted on Tuesday, and that will accomplish the result forthwith.

Fuller's friends urge him not to withdraw, and this temporarily embarasses the success of Banks.

ONE DAY LATER FROM EUROPE.

ARRIVAL OF STEAMSHIP ARIEL.

NEW YORK, Dec. 9.—The steamship Ariel arrived here at 9 o'clock this morning, having left Cowes on the morning of the 25th ult., bringing a copy of the second edition of the London Times of Saturday the 24th.

Consols were reported 88 3-8 to 88 1-2.

A letter from Kameish reports a trifling engagement at Kerch. The allies were hard pressed, and had called for reinforcements. It was feared that Kinburn would be attacked by the Russians when the river became frozen.—The place is protected by a squadron of frigates and floating batteries.

The rumored Swedish alliance was doubted at Berlin.

The failure of the harvest in Russia was confirmed.

The United States Government is said to have given large orders to a Rhenish house for the delivery next spring of bullet proof cuirasses.

Antwerp is to be defended by additional forts.

The garrison of Kars had received a supply of provisions from a captured Russian convoy.

A FAMILY POISONED BY EATING DISEASED MUTTON.—*One dead and five suffering.*—The family of Mr Fox, residing No. 149 First avenue, were recently poisoned by eating diseased mutton, purchased by Mrs Fox on Wednesday of last week, at Washington Market. It appears that the leg of mutton was boiled on Thanksgiving day, but not partaken of until the following Saturday, when Mrs Fox, her two daughters and a female visitor ate some soup which had been prepared from it on that day, and were soon taken sick. Doctors administered medicines, which gave relief, but the cause of the sickness was not attributed to the mutton. On the following Wednesday, the meat remaining was made into a hash and partaken of by the whole family, all of whom were immediately taken sick, and on the following day Mrs Fox died. Mr Fox, together with three of his children and the visitor in question, are now seriously ill from the effects of eating the meat.

MAYOR OF BOSTON.—Mr. Rice, the Citizens' candidate, received 4500 votes to Shurtleff's 3486; Rice's plurality at 2 1-2 o'clock Monday, 1114; and is doubtless elected.

SUICIDE.—We learn that Mr George W. Pillsbary, of South Hampton, hung himself in his orchard on Friday evening. His age was 55.

FLORIDA.—Gov. Browne of Florida, has transmitted his message to the Legislature.—The receipts into the State treasury for the year amount to $68,364, and the warrants issued to $85,365, showing a deficiency of about $17,000. The aggregate indebtedness of the State, including $73,000 contracted in the protection of the frontier from Indian depredations, is $181,872.

With a view to the extinguishment of this debt, the establishment of a sinking fund is recommended. The series of internal improvements provided for by the act of the 6th of January last, have inaugurated a new era in the history of the State, and the lethargy of former years has given place to energy and enterprise. Four new railroads have been projected and the routes surveyed, and everything betokens their speedy completion.

RICHMOND, (Va.) Dec. 8. *Choice of a United States Senator.*—Hon. James M. Mason was re-elected United States Senator to-day, over George M. Summers, American, by 58 majority on joint vote.

LIQUOR SEIZURE.—Some fourteen packages, 1500 gallons of liquors, in foreign made casks, were seized by Marshal Farnum at Bangor lately.—*Portland Argus.*

We suppose the packages were exactly 14 in number.

The steam fire engine "Joe Ross" was brought out for trial on Wednesday, at Cincinnati, and exploded, throwing the engineer, John Winterbottom, some seventy feet high, killing him instantly, and scalding several other persons. Just before the explosion the bursting of the hose had driven the crowd away from the engine, or a greater number would no doubt have been injured. The cause of the accident was a deficiency of water in the firebox of the boiler, which came from want of care on the part of the engineer.

The Yarmouth Register says that Mrs. Betsey Hallett, wife of Mr Reuben Hallett o East Barnstable, was found dead in her room, on Tuesday. On examination it was found that she died from the effects of gas from charcoal which had been burning in her room. No doubt exists that she deliberately planned self-destruction, as she had been laboring under aberration of incellect.

It is said, by some Yankee of course, to be an excellent plan always to measure a man's length before you kick him, for it is better to bear an insult than to make an unsuccessful attempt at thrashing a fellow and get your eye-teeth knocked out.

Try it! Try it! Try it!

G. W. STONE'S

LIQUID CATHARTIC,

—AND—

Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which for mildness, power, efficacy, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over existing Physics, in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels: *Dysentery, Diarrhœa and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs only the recommendation of a single trial to induce the most prejudiced to use it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my liquid Cathartic will cure you. Are you wish to be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors originated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

Patents.

AMERICAN AND FOREIGN OFFICE.

Agency for business with US Patent Office, Washington,

76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others), will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 40 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar. Assignments recorded in Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. R. EDDY,

Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and I do not know none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them as early and favorable consideration at the Patent Office.

EDMUND BURKE,

Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

DR. BURLEIGH SMART'S

Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Science, his great attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trial of its virtues, the testimony of hundreds of our citizens in its favor, and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength is speedily sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR BURLEIGH SMART'S COUGH MEDICINE, SAM'L CLARK, BINGHAM, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

THE IRISH INVASION.—*New York, 6th.*—A correspondent of the Philadelphia Ledger states the following to be the plan of the projected Irish Invasion:—A plan, I am told, has been submitted, to reach the heart of the British lion through his Canadian lungs.—5000 able bodied Hibernians are represented to be all ready for enrolment to march to Canada in order to co-operate with some Russian demonstration said to be organizing on the Northwest coast. Money sufficient to defray expenses, it is further said, has already been raised, and the only thing remaining to be done is to find a man in whom all have confidence as a leader. Secrecy being the one great thing needed now, pains are taken to keep out of the newspapers anything like a real record of what is in the wind. An agent of Russia is said to be the Financial Agent and Chief Engineer of the whole concern. It is thought to be something of an object to get up an invasion of Canada in order to distract the Allies at home—and possibly to compel England to transport a portion of her army in the Crimea to the North American Colonies.

The Irish Emigrant Aid Society closed its convention to-day after adopting a constitution and an address. They declare their purposes to be to fulfil the destiny of the Irish nation for which so many patriots have toiled and suffered, but in doing so, not to outrage the laws of the United States. They regard the present state of affairs in Europe as peculiarly their opportunity to call on the Irish people to pronounce that they will emancipate themselves from their thraldom, and promise that they shall not be left to struggle alone.

Resolutions were also adopted declaring that the laws of the United States do not prevent combinations of citizens from helping to shape the course of nations by word or action, and that the restoration of the sovereignty of Ireland would be an act worthy of American freedom.

PRETTY GOOD.—We have heard a good many stories of the strange notions of those who have been bred in climates where snow and ice are not known, when they come to our bleak dominions; yet we do not remember to have heard a better one than was related in our hearing a day or two since. A sea captain in this vicinity brought home a sable African who had never seen such a thing as "solid water." The other morning Sambo came in with a large piece of ice, exclaiming "O Massa, see what a big piece of glass me found" "So you have" replied the facetious mariner "but it is wet—take it to the fire and dry it." Down went Sambo to the kitchen fire—but soon returned with his eyes vastly dilated and great astonishment otherwise depicted on his countenance, vociferating, "why Massa, such glass I nober did see—the more I dries it the more it grows wet."

The North Adams Transcript gives a very different account of the affray at the Tunnel.—It says that the Messrs. Stanton, contractors, went to take possession of some work upon which Mr. Hull, a contractor, had been employed. Hull had in his employ a large number of Irishmen, and had left without paying them, and they were determined not to give possession of the work to any one until they were paid. The consequence was, that in the course of events, blows were struck, and a general fight ensued, in which Irish and Yankees mixed indiscriminately, and a general knock down followed. An Irish boy, 12 or 14 years old, had his skull broken, and is since dead. A man named Bulkley will also probably die.

VERY COMPLIMENTARY.—A minister in one of the towns of Massachusetts, in the course of his Thanksgiving discourse, in referring to our rulers, contrasted the American Presidents since the formation of government with the sovereigns of Europe during the same period, and compared the ruling men of Europe and America during the past five generations. He expressed the opinion, that had the English kings, George the Second and George the Fourth, lived in New England, and had the same moral characters they sustained at home, they would not have been deemed suitable persons for even *the jury box.* This is severe, but is it not true?—*Transcript.*

A COOL ENCAMPMENT.—The Portland papers of Saturday, told us of two men who were seen on Half Way Rock on Friday, making signs of distress. The Argus of Monday says,—

The two men were taken off Saturday morning by the Revenue Cutter, Capt Waldron, and carried to Harpswell, where they belonged. They were brothers, by the name of Douglass. They went on the Rock with guns to hunt, and anchored their boat outside, taking a small float with them ashore. The surf, however, prevented their getting off, and also prevented passing vessels from getting to them. They, consequently made a fire of the survey staff on the rock, and bunked down under cover of the float. Upon the whole, they were as comfortable as circumstances would permit. The Rock is about half an acre in circumference, and not a very pleasant place for a long residence.

Dr. Kane declines to accept the $1000 offered as a contribution by George Peabody, of London, toward a public testimonial for the Arctic expedition. Mr Peabody also offers $500 to begin a subscription for the sailors in the expedition.

Morning Chronicle.

WEDNESDAY, DECEMBER 12, 1855.

MAYORS ELECTED.

In Boston, on Monday, Alexander H. Rice, the Citizen's Union candidate, was elected Mayor by 7388 votes. Shurtleff, American, had 5890; and 64 votes were scattered.

In Lowell, Dr Huntington, Cit., was elected by 800 plurality.

In Newburyport, Cushing, Cit., was chosen by 825 votes. Pike, Amer., had 744; 11 votes were scattered.

In Worcester, Isaac Davis, Cit., was elected by 170 plurality.

In Roxbury, John S. Sleeper, cit. liberal union, chosen by 802 votes. J. Ritchie, cit., had 291: W. Ellison, Amer., 477.

It is said that the Mayor elect of Boston, is or was, a whig;—and that the mayors of Worcester and Newburyport were of the Democratic party. These elections seem to have gone on this ground, viz. that the K. N. or American party, holding its power in the State of Massachusetts this year, by a plurality, and not by a majority—the other parties combined, fused, and coalesced to turn them out of power in the city governments, and have done so,—showing, as Mr Sam Patch did, that some things can be done as well as others.

The other city officers have generally been chosen on the citizen's tickets. These are all to be regarded as victories of the democracy, wherein the sovereign people have exercised their sovereign power, without any platform; and so far as we can see, without any plan or principle, except to turn out something, and turn in something else.

We subjoin a few extracts from Boston papers, which tend to confirm these views.

First, from the Advertiser.

It will be observed in comparing the vote of yesterday with the vote at the State Election a month ago, that while there has been a diminution in the whole vote, as was to be expected, amounting to 1600 votes, Dr. Shurtleff has retained very nearly the whole strength of the know nothing party, falling only about twenty votes short of Gov. Gardner. The election of Mr Rice is therefore fairly a victory of the citizens without distinction of party arrayed against a corrupt and proscriptive partizan rule.

Second, from the Times.

Restoration to power of Federal Whiggery in the city of Boston. Triumph of Federal Whiggery, Abolitionism, Fusionism, Free Soilism, Maine lawism, and other Fanaticisms. Alexander H. Rice, Federal Whig, elected mayor by 2000 majority. Exultation among fossil Whigs.

As for the Times, we are satisfied that, in supporting Dr. Shurtleff, an old Jacksonian Democrat, for the office of Mayor, it pursued a course which will be sanctioned by Democrats and all other reasonable men throughout the country. Those who have been burthened with whig aristocratic rule like that which has flourished in Boston for many years, can appreciate the importance of a movement calculated to prostrate it. A majority of voters have decided in favor of that aristocracy, that burthensome whig rule—and they elect to make a renewed trial of it. Well, let it again be tried—but we shall set our faces against it, in any and all garbs, as we have for *twenty years past*.

After the result of the vote for Mayor had been declared, a number of the friends of Mr Rice repaired to his ware-rooms in Water street, to congratulate him upon his election. Here his opponent, Dr. Shurtleff, mounted a chair, and gracefully introduced him to the audience. The Mayor elect responded in appropriate terms, and stated that as he was elected by citizens at large, he should know no partizan relations in his conduct of the government.

Third, from the Chronicle.

The election cannot be claimed as a party victory; it was, on the contrary, the voice of the people, a popular expression of an earnest desire for municipal reform, for appointing to places of the highest responsibility and trust, men of sterling worth and ample qualifications, regardless of their private opinions upon matters of State or National policy.

Fourth, from the Courier.

Mr. Rice has received a great compliment from his fellow-citizens. His opponent is one of the most popular and respectable men in Boston, and he has defeated him by a majority much larger than was anticipated. On the other hand, Dr. Shurtleff received all the votes of his party—from the Chief of Police down to the doorkeepers of the lodges—which was all that he could expect under the circumstances in which he came before the people of Boston.

Mr. Rice owes nothing to the Know Nothings. They voted against him to a man.—He can, therefore, defy the dictation of the lodges, and call around him honest men to aid him in the discharge of his high trust.

The political complexion of our new city government is something like this—a Whig Mayor; five Whig, five Democratic and two Republican Aldermen; forty Councilmen chosen on the Citizens' ticket, which was made up of Whigs, Democrats and Republicans. The "Americans" have eight members of the Council, and about a dozen ward officers.

Fifth, from the Bee.

By a combination as extraordinary as it was determined, the American nominee for Mayor has been defeated by a small majority. The old political parties, Whig, Freesoil, and Democratic, backed by the entire foreign and liquor interest and influence, came together on common grounds for the purpose of defeating the American party. But has that object been accomplished? The American party was organized to reform political abuses, and to take from the control of the old, corrupt political organizations the affairs of government. And how triumphantly has it succeeded. There is now no political organization in existence that can compete with the American forces. The old parties, are dead, as the recent combination proves.—There never will exist again in Boston, with the smallest possible shadow of influence, either a Whig, Democratic or Republican party. Such organizations are of the things of the past. *Requiescat in pace.*

In yesterday's election we see no defeat of the American cause.

* * *

Our fortress has been stormed, *but not taken; it cannot* be taken in a fair fight.

The selection of Alexander H. Rice, Esq., as Mayor of Boston, is a good one. It is indeed a consolation to know that our excellent, high-minded, honorable and worthy candidate, Dr. Nathaniel B. Shurtleff, has been defeated (although by unfair influences,) by a gentleman of Mr Rice's ability and reputation.—Few men in this community enjoy the confidence and esteem of his fellow citizens to a greater degree. Had he been surrounded with other influences we should have hailed his nomination and election with the liveliest satisfaction and interest. We know that his sentiments are *right*, and if he will but carry those sentiments into his official acts, we think the American party will have little cause to regret his election. Mr Rice will make an able, popular Mayor.

Lastly, let us say, that it rejoices us, in the general wreck and ruin of *the parties*, as such, in Boston, to see *two men* run against each other, of whom their opponents speak well! It looks as if the people were something—the parties, not of much account.

A Row.—On Sunday afternoon a party of five young Irishmen went into the store of Michael Morrissey, at the corner of Napier and Leverett streets, Boston, and notwithstanding the remonstrances of the proprietor, took possession of the premises and commenced playing cards. At last they made a foray upon the bar, seized and drank the liquor, and began to shy the bottles and glasses at the landlord's head. The latter then sent for the police of the 3d station, who arrested three of the rowdies, named James Williams, and George and John Cowing. The other two beat a hasty retreat. The landlord was not very dangerously hurt. The same party were arrested at the South End on Saturday for riotous conduct, and it seemed were set at liberty before their blood had become properly cooled.—*Post.*

If the Police had let them all stay together, landlord and customers, we might have seen moral suasion acted out on a new stage.—Moral suasion for the young Irish rowdies, and also for the elder who keeps the Institution.

Effect of Brutality.—Mr William Sumner, the young man who was beaten in so cowardly and outrageous a manner, a short time since, in Shawmut avenue, by Edward O. Coburn, is dangerously ill at his home in Milton, from the effects of the injuries received on that occasion. His physicians consider his recovery quite doubtful.

We learn that Mr Sumner was last evening in so critical a situation that he was given up by his medical attendant.—*Boston Chronicle.*

P. S.—The Boston Telegraph of Tuesday evening informs us that Sumner died on Tuesday morning; and that Coburn and Dalton are arrested.

☞ The Ladies' Repository, for December, 1855, is just received from the publisher, Abel Tompkins, Boston. Contents:

Margaret; Autumn; Letters from the Hill Side; My Childhood's Pastors; The Old Grape Vine; Christianity and the Love of Nature; Evil and its End; Shall we all meet There? Letter from Switzerland; Close of the Year; The Quaker's Hat; Trust in Friends; Forest Leaves Gathered for the Repository; The Mourner Comforted; Virtue and Generosity; All Sigh for Rest; Mounting on Wings as Eagles; The Editor's Table.

A Hard Case.—A correspondent of the Philadelphia Pennsylvanian vouches for the truth of the following in relation to one of the Norfolk nurses;—

"Miss A******, a volunteer nurse, left her father's house in Louisiana—repaired to the scene of affliction and disease, and discharged the duties of a nurse with distinguished zeal and energy. Her health gave way, as the epidemic ceased its ravages, and she became seriously ill. She paid her own expenses from Louisiana, and deposited with a gentlewoman who died soon after, $100, which is lost. She was actually *charged with medicines which she needed*, and with *one day's board* at a hotel in Norfolk and with $190 at Richmond, whither she was removed when prostrated by disease.'

Prepayment of Postage.—In regard to the provision of the late law by which all letters sent between places within the United States are required to be prepaid, we understand inquiries are made at the department as to whether it applies to letters to be sent to foreign countries; and, if so, whether stamps or stamped envelopes only can be used in the prepayment of the latter class of letters. The answer is, that the late law in no respect affects letters for foreign countries. These will be treated as heretofore. Where prepayment on them is required, either stamps or money may be used. To certain foreign countries, as will be seen by the table of foreign postages in the hands of postmasters, prepayment is optional. The act of 3d March last referred to has no reference to printed matter.—*Wash. Union.*

Fire at Sanbornton Bridge, N. H.—About 11 o'clock on Thursday night the woolen factory of A. H. Tilton, Esq., was discovered to be on fire, and in about two hours was burnt to the ground. The dye and drying houses and out-buildings, almost adjoining the factory, by great exertions of the citizens, were saved. The loss of building, machinery and stock is about $17,000. Insurance $5000.

LOCAL.

☞ Some time ago we mentioned in a police court report, that some intoxicating liquors had been seized, which belonged to one Goodrich, or a person who has assumed that name. And shortly after, we mentioned in another report, that the liquors were by the court ordered to be returned to Goodrich, on the ground that *intent to sell* was not proved. Now we record the third act in the drama.—Mrs. G., the other, perhaps the better, half, of the dealer in contraband R. G., has complained to the police, of drunkenness in her house, and personal abuse of herself.

What the officers may see fit to do, we cannot say: but it strikes us that if there is not to be found in our community, enough either of moral or legal force, or of both combined, to shut up such a den—then we would not meddle with the inmates thereof, while they kept within doors, unless we could get evidence enough *outside*, to prove it a *disorderly house*, and so jail the inmates on that charge.

An officer who should go in among them alone, would be abused. And the inmates would probably every one of them swear there was no disturbance at all, when they came to be tried.

So long as we have such dens among us, just so long we must take the consequences.

☞ The Old Folks Choir have a rehearsal at Exchange Hall, this (Wednesday) evening, at 7 o'clock.

☞ The lecture of Dr Solger, at the Mechanics' Lyceum, on Tuesday evening, was the best of the season thus far.

His subject, as announced, was the Anglo Saxon Woman and her Home: and it was truly a most sensible and practical lecture on Woman's Nature and Rights, Powers and Duties.

Thr orator, with a strong foreign accent, yet made himself readily understood; and with a clear stream of pure and hearty thought he made himself felt, as he drew out in living character, his views of a distinctive sex in the mental woman, as real and as beautiful as her distinctive physical organization.

The lecture was about as free as it could possibly be, from cant, flattery and sarcasm. It contained some touches of genuine humor, others of great beauty; and it abounded in good sense. It was, moreover, of reasonable length, and was favorably received by discriminating minds.

☞ At a meeting of the members of the Rockingham Fair held at Exeter, Nov. 30th, the following officers were elected:

President—Henry F. French, Exeter.

Vice Presidents—James Hill, Greenland; Jacob T. Brown, Hampton Falls; Greenleaf Clark, Atkinson; James H. Butler, Nottingham.

Trustees—Zebulon Sanborn, Epping; N. Porter Cram, Hampton Falls; Benj. F. Clark, Stratham; John C. Evans, South Hampton; Silas F. Learned, Chester.

Auditors—John M. Weare, Seabrook; Aaron Coffin, Hampton.

Wm. P. Moulton, Secretary.

The Board of Trustees re-appointed Retire H. Parker, Esq., Treasurer.

Storm in New York.—About 8 o'clock Monday evening, a very heavy gust passed over New York, and extended to Williamsburgh, where considerable damage was done. The steeple of the Catholic church, corner of Lorimar and Remsen streets, was blown into the street. The roof of the house foot of South Third street was blown off, and some small buildings were blown down.

The brig Cape Fear, of New York, was picked up by the hands of the Williamsburgh Ferry Co, at the foot of South Sixth street, and made fast. No person was on board. The storm was occasioned by a gale from the Northeast meeting one from the Southwest over the city. During the gale, the western end of the new Railroad Depot and Ferry House, now being erected at the Ferry in Jersey City, was blown in, and the buildings considerably damaged.

Troops for Washington Territory.—In view of the Indian difficulties in Oregon and Washington Territories, the ninth regiment of infantry, now stationed at Fort Monroe, (Old Point Comfort) Va., have been ordered to Fort Vancouver, in Washington Territory. The troops are to embark from New York by the 14th inst., and will proceed by way of the Isthmus and California. The 9th is a new regiment, which has been drilled in Hardie's "Shanghai" tactics. The men are armed with the Minnie rifle, carrying a ball with accuracy one thousand yards, and are trained to travel all day at the pace of five miles per hour.

J. A. Savage, a returned Californian, who committed suicide in New York last Thursday, left behind the following warning: "Beware of the mischief maker. Beware of the woman with a long tongue."

Bridge on Fire.—The bridge over the Saugus river, Eastern railroad, caught fire, Saturday afternoon, and was so much burnt as to render passage over it unsafe. It was repaired with despatch. It caught from a spark dropped by the locomotive.

Fatal Accident.—A man named S. T. Jackson was killed at London Mills, N. H., a day or two since. He was cutting down trees, when one of them fell and caused his death almost instantly.

Speaker.—In 1849 the House of Representatives at Washington was three weeks in electing a Speaker.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

MONDAY, Dec. 10.

SENATE.—Nothing important transacted in the Senate.

HOUSE.—In the House, the thirty-fourth ballot resulted as follows:—Banks 100, Richardson 74, Fuller 31, scattering 15.

At the close of the thirty-fourth ballot, Mr Oliver made a motion that the House will proceed immediately to the election of a Speaker *viva voce*, and if, after the roll has been called three times, no Speaker has been elected, the roll shall again be called, and the member receiving the largest number of votes, provided it be a majority of a quorum, shall be declared the Speaker. This caused much excitement, several members moving to lay the resolution on the table.

At the earnest appeal of Mr Giddings, the resolution was withdrawn, when the House proceeded to the thirty-fifth ballot, as follows; Richardson 76, Banks 105, Fuller 29, scattering 15.

Thirty-sixth ballot—Richardson 76, Banks 106, Fuller 29, scattering 15.

Thirty-seventh ballot—Richardson 76, Banks 107, Fuller 28, scattering 13.

Thirty-eighth ballot—Banks 107, Richardson 75, Fuller 28, Zollikoffer 3, Carlisle 2, Messrs. Valk, Etheridge, Haven, Harrison, Harlan, McDuxen, Smith of Virginia, Williams, Orr, and Walker, one each.

Thirty-ninth ballot—Banks 107, Richardson 76, Fuller 28, Zollikoffer 3, scattering 12.

Necessary for a choice 114. Adjourned.

TUESDAY, Dec. 11

SENATE.—In the Senate, this morning, Mr Brodhead offered a resolution from the Committee of Finance, for an inquiry into the expediency of reporting the appropriation bills.

Mr Cass gave notice that he should, to-morrow, move the appointment of the Standing Committees.

HOUSE.—The balloting for Speaker was resumed.

Fortieth ballot—Richardson 74, Banks 107, Fuller 27, Carlisle 2, scattering 16.

THE SPEAKERSHIP.—*Washington, Dec.* 10.—By no process of figuring can politicians raise Mr Banks's vote over 107. Strenuous exertions will therefore be made, either to win over more help or to induce certain members to absent themselves, in order that Mr Banks's present strength may secure his triumph.

The members in opposition to him, excluding Mr Richardson's friends, appear to be fixed in their present firmness against Mr Banks, and considerable doubt is entertained respecting his ultimate success.

CALIFORNIA NEWS BY THE PROMETHEUS.—*New Orleans, Dec.* 8th.—The Prometheus left San Juan on the 3d inst.

The steamer Northern Light left San Juan for New York on the same day as the Prometheus.

Col. Walker was undisturbed in Nicaragua. Confidence was restored, and the citizens were quietly pursuing their usual occupation.

A fire occurred at San Francisco on the night of the 15th. Loss $25,000.

Gen. Richardson had been murdered by a gambler named Cova.

The southern part of the State was threatened by Indian disturbances.

The Know Nothing State Convention had appointed delegates to the Philadelphia National Convention, instructing them to vote for no man for President who was not in favor of the Pacific Railroad, and opposed to slave agitation.

LATER FROM KANZAS.—Mail dates from Kanzas are to December 6, which state that four or five hundred men, accompanied by artillery, and one thousand muskets, had passed through Independence with the purpose of assisting in the maintenance of order.

A despatch to the St. Louis Republican of same date (6th) says:—

"Last night about 11 o'clock the pro-slavery party encamped on the Wakarusa by the directions of Gov. Shannon, arrested General Pomeroy, as he was passing the camp on his way to Lawrence, and found important despatches from the East about his person.

They will probably hold him in custody until order is restored in the Territory. Threats have been made by a number of people in the neighboring towns to tear down the American Hotel at this place, under the impression that it belongs to the Emigrant Aid Society; but the citizens here will defend it as they know it does not. Two hundred men, three pieces of artillery, and 1000 stand of arms passed through Independence yesterday from Liberty and Lexington to join Jones' party.

FIRE AT DANVILLE, MS.—A fire occurred on Monday morning at the Danville junction, destroying about $6000 worth of property.—The At. & St. L. R. R. Company and the Androscoggin & Kennebec R. R. Company lose about $3000 each. The station house, sheds, and about 600 cords of wood were burned.

It appears that about the same time the Catholic church at Lewiston was found to be on fire; and when the engine attempted to play upon it, the hose was discovered to be cut in several places. It was, however, soon extinguished, without much damage.

Both fires were undoubtedly to work of an incendiary.—*Argus.*

THE MARTHA WASHINGTON AFFAIR.—Governor Clarke of New York has pardoned Kissane, who was last summer sentenced to the State Prison for his complicity in the burning of the steamer Martha Washington, near Cincinnati. The Governor has been assured by the Governors of Ohio and Indiana, that the ends of public justice would be subserved by the pardon of Kissane, and that without such pardon they would in all probability be defeated. Several District Attorneys in the former State, in their official capacity, certified to the Governor that they required Kissane's testimony as a witness in several important cases, which have excited a great deal of interest throughout the West. Among which were those growing out of the burning of the Martha Washington in January, 1852, by which much valuable property was destroyed, a gross fraud attempted on several insurance companies; and a number of lives lost. Their application was warmly seconded by many influential journalists in New York State and also in Ohio.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,578 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign Inks. It is at wholesale and retail by

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does not, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

G. W. STONE'S

Cough, Consumption, and Bronchitis

ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine. Let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

Try it! Try it! Try it!

G. W. STONE'S

LIQUID CATHARTIC,

OR

Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Purgative ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects we have given, but it removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual Costiveness—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

Patents.

AMERICAN AND FOREIGN OFFICE.

Agency for business with the U.S. Patent Office, Washington,

76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all other papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent. less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his relation to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were very many persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1854.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

DR. BURLEIGH SMART'S

Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trial of its virtues, the testimony of hundreds of our citizens in its favor, and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength is invigorated, or sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SEAR & CLARK, BINGHAM, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of RED enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

SUMMARY.

Total number of the House without the territorial delegates 234, of which 118 is a majority.

Administration democrats 78, opposition 156, of whom 117 (or just one-half of the House) are Republicans (or supposed to be good for the admission of Roeder as delegate from Kanzas, and of Kanzas itself with its people's free state government), and 39 Americans (or doubtful for Reeder and Kanzas.)

Of the 78 administration Democrats, 23 are from the free states, and 55 from slave. All the 117 Republicans are from free states. Of the 39 classed as Americans, but four are from free states, and 35 from slave states. The total representation of the free states is 144, of the slave 90.

Morning Chronicle.

THURSDAY, DECEMBER 13, 1855.

DR. CHANNING.

The Portland Argus has twice published, recently, a letter from Rev Dr. Channing to Daniel Webster, written in May, 1828,—which letter, the Argus says, "levels a crushing blow at the unkind and unchristian spirit in which the abolitionists wage their warfare upon our Southern brethren."

This letter was written when our old friend Lundy was operating to send free negroes to Hayti, as one of the means of reducing slavery. The letter contained these sentences.

I know of few objects into which I could enter with more zeal, but am aware how cautiously exertions are to be made for it in this part of the country. I know that our Southern brethren interpret every word from this region on the subject of slavery as an expression of hostility. I would ask, if they cannot be brought to understand as better, and if we can do any good till we remove their misapprehensions?

Channing and Lundy were both anti-slavery men;—earnest, but extremely mild. Yet both were persecuted, for their views, mildly as they were expressed.

The Argus also copies, as several other papers have, a number of extracts from Dr Channing's later work, on the same subjects.

The duty of the Free States in regard to slavery may be classed under two heads.—First, these states are bound to construe with the utmost strictness all the articles of the Constitution which in any way touch on slavery, so that they may do nothing in aid of this institution but what is undeniably demanded by that instrument.

* * * * *

We see the tendency of slavery to warp the Constitution to its purposes in the law for restoring the flying bondsman. Under this not a few, having not only the same natural but legal rights with ourselves, have been subjected to the overseer.

But a higher law than the Constitution protests against the act of Congress on this point.

The reader will please to take notice that Doctor Channing wrote these things against the *old* Fugitive Law, not the *new* Act now on the Statute Book.

Doctor Channing died before Daniel Webster made his last speech in the Senate.

The Doctor recognized a "higher law" than the Constitution, as every christian does.—Will not somebody be good enough to call him a fanatic, and thus crush his memory.

According to the law of nature no greater crime against a human being can be committed than to make him a slave. This is to strike a blow at the very heart and centre of all his rights as a man; to put him beneath his race. On the ground of the immutable law of nature, our government has pronounced the act of making a man a slave on the coast of Africa to be piracy; a capital crime. And shall the same government enact or sustain a law which exposes the freeman here to be reduced to slavery, which gives facilities to the unprincipled for accomplishing this infinite wrong? And what is the end for which the freeman is so exposed? It is that a man flying from an unjust yoke may be forced back to bondage, an end against which natural and divine justice protests; so that, to confirm and perpetuate one violation of the moral law, another still greater is left open and made easy to the kidnapper.

* * * * *

There is one point on which your moral influence may be exerted with immediate effect. Should a slave-hunter ever profane these mountainous retreats by seeking here a flying bondman, regard him as a legalized robber. Oppose no force to him; you need not do it. Your contempt and indignation will be enough to disarm the "man-stealer" of the unholy power conferred on him by unrighteous law.

Dr Channing, when he wrote these lines, had not seen the slave hunter as we have since seen him, in the streets of Boston. He had not then *heard* as we have since heard them, when at midnight, in Court square, "the officers of the law, in their sworn duty of arresting and delivering to his owner a fugitive slave," were swearing and blaspheming very like a gang of pirates who were stealing a negro and going to sell him.

Legalized robbers, indeed! Did Dr. Channing say such hard words at the mere *idea* of such men and such acts. How would his words have burned had he lived long enough to see the *actual performance*?

Slavery in Egypt has been abolished; not only the buying and selling of slaves forbidden, but all those in the possession of private individuals have been informed that they were free.

The darkness is fleeing away from Egypt. In the land of light—"the land of the free and the home of the brave," however, the buying and selling of slaves is not yet forbidden, and all have not yet been informed they are free.

So far from this, a good man who told one woman she was free, was put in jail by Judge Shallow, on a flimsy pretext of contempt.—A most contemptible business by the way—not tolerated in Egypt,—but in the United States a blessed, sacred institution, to which, if a man does not bow down, he must be crushed as a fanatic—a disunionist—a pestilent heretic—that is, if the crushers only had all the power. They have much, but not all.

A deaf and dumb boy being asked to define gratitude, said: "*Gratitude is the memory of the heart.*"

THE SENATE IN 1855.

WASHINGTON, Dec. 6, 1855.

"We all do fade as a leaf." That is the ultimate mundane result; prior and satisfactory to which, we are unmistakably growing old. I realize it nowhere more forcibly than on returning, after a prolonged absence, to the Senate Chamber of the United States. The first thought here is inevitably of the great departed—of Clay and Webster, Calhoun and Forsyth, Silas Wright and Poindexter, whom with younger and a fresher heart, a more hopeful spirit, I saw sitting here on my first visit, nearly twenty years ago. They have passed away from earth, with John Davis and Roger Huntington, J. T. Morehead, Phelps, Prentiss and many others who have since filled their seats; while Corwin and Ewing of Ohio, Tyler and Rives of Virginia, Benton of Missouri, Mangum and Badger of North Carolina, though still living, have gone into retirement, and no longer challenge the public regard. No, it is not merely that I look through dimmer eyes and regard with a calmer interest, a more languid pulse; I know that the Senate of 1835 tested by the most unswerving standard, was abler than that of 1855.

Perhaps this Senate is composed of younger men than of twenty years ago, but I doubt it. For here sits Gen. Cass, a veteran who has already passed the seventy years allotted to man, looking heavier and duller than when I first saw him, but still unwrinkled and healthy, a striking example of the conservative power of rigid temperance, even though confronted by the distractions and anxieties of political life. Here is Mr Crittenden returned again, after many vicissitudes, looking visibly older, and with a seeming scar on the right side of his face, which mars his physiognomy, but who seems as alert, as sanguine, as ready for a parliamentary tilt as when in his vivacious prime. As to John M. Clayton, who, I am confident, was sitting here twenty years ago—I know not how much longer—he looks better, heartier, brisker, and positively younger to-day, than he did when he left the Senate in 1849 to become Gen. Taylor's Secretary of State.—His circumference is still generous, but he looks as if there were many years' life and work in him. I trust there may be.

John P. Hale's rosy face lights up the Senate once more, and his humorous comments on whatever is going forward serve greatly to relieve the solemn dullness which habitually broods over this haunt of Fogyism. Hale used to threaten to resign when here before; but he seems now quite resigned to the dispensation which sent him back again. I think his resignation to this will prevent his resignation out of it. His new colleague, James Bell, is a pale, slim, elderly lawyer, who will command the respect of the Senate by probity and industry, without wasting much of its time in brilliantly useless speeches.

I had not thought, a few years since, ever to see Pitt Fessenden here as a Senator from Maine; but the change from the line of Shepleys, Fairfields and Bradburys which he succeeds, is very welcome. Nor have I yet quite "got the hang" of seeing Henry Wilson, the "Natick Cobbler," in the seat of Daniel Webster. As my eye lights on his round, full, earnest face, I am tempted to beckon him out and quietly inform him that the Senate is *very* particular in excluding outsiders from its seats: and then it flashes over me that he is there the accredited representative of State street, Harvard University, and The Daily Advertiser; so I hold my breath and only wonder what will turn up next. And practically, Massachusetts has not often had a more faithful or useful Senator than Henry Wilson. Mr Sumner has been longer here, and wears his Senatorial honors as a matter of course. Shall we not soon see Pennsylvania and New Jersey likewise represented in the interest of Universal Freedom?

You will have heard how the majority of the Senate have resolved not to recognize the Republicans as belonging to a National party, or entitled to consideration in the making up of Committees. So Messrs. Seward, Sumner, Hale, Wade, Fessenden, and others, will figure at the latter end of the Committees on Revolutionary Pensions, Enrolled Bills, &c., while the lead in the Committees on Finance, Foreign Affairs, the Judiciary, &c., will be assigned to statesmen of the grasp of mind and fullness of information of Billy Wright, G. W. Jones and Weller. I state this not by way of complaint, but of illustration. Dogberry long ago enunciated the stern truth that "When two ride a horse, one must ride behind," and I cheerfully accept the dispensation. But how is the majority to navigate, in view of the reported fact that Messrs. Fish, Pratt, Jones, Benjamin, and perhaps one or two other old line Whigs, have thrown down the weapons of their rebellion, and applied for admission, if not fully into the Democratic camp, at least into some limbo of neutrality, where they may be made welcome to a share of the good things dispensed from the majority table? These being stricken off on the one side, and the Republicans on the other, there will remain for a regular "National" opposition only Mr Crittenden aforesaid and his colleague, with John Bell of Tennessee—who first came into Congress some thirty years ago, and who begins to show on his dark, broad, anxious visage the furrows of age and care—and James A. Pearce of Maryland, the scholar and gentleman par excellence, who never discredited his place in the Senate by an angry, rude or impertinent observation, and whose sunny countenance bespeaks calm good-will and peace with all mankind. Rather a select "National" party this must be; but you might belong to one far more numerous yet a good deal less respectable.—*Tribune.* H. G.

The following is telegraphed from Washington by Mr Greeley:

"I am assured that the President and Cabinet recoil from the terrible responsibility of launching the Federal troops against the free settlers of Kansas. Gov. Marcy tells them that any movement of that sort will ruin the democratic party in all the free states, and cost at least the next Presidential election. Gen. Cass too, I hear, is prepared to take ground in favor of the free State men. Things are looking brighter."

A Maltese offered his services to a dragoman at Alexandria. "Know English well, sir," he said—"have served many English gentlemen; I'm English subject, sir; I get drunk, get drunk, sir."

SHAWMUT AVENUE MURDER.—Coburn and Dalton, the murderers of young Sumner, are in Boston jail. On the news of Sumner's death, on Tuesday, they were taken to the office of the Chief of Police and detained until a post mortem examination had been made of the body, and until the Coroner had inquired into the manner of his death. In due time, the doctors reported that the immediate cause of the death was inflammation of the throat and brain, superinduced by the severe beating received, and thereupon the Coroner inquired into the assault at the house in Shawmut Avenue. The jury found that Sumner died in consequence of injuries received at the hands of Coburn and Dalton, on the 13th of November, 1855, and, upon this finding, officer Ham committed the prisoners to answer to the charge of murder.

In addition to this serious accusation, the grand jury of the Municipal Court on Tuesday found a bill against them, alleging the assault on Porter, upon which they would have been called to plead, but for the death of Sumner.

The Boston Courier says:

So Coburn and Dalton stand to-day. The imitators of bullyism of the very worst kind—of bullyism which disgraces the school of Poole—who, two weeks ago gloried in the successful gratification of inhuman cruelty, are now in a prisoner's cell, with the charge of homicide preferred against them. With plain manners, plain habits, a discreet passage through the world, they might have lived for some purpose; but folly and pride and an overweening watchfulness of their wives' honor—and virtue that must be watched is not worth protecting—have hurled them into an abyss whence an escape is impossible.

Young Sumner was the victim of a pair of flirts, and it is to be hoped that the whole race of street coquets will take warning by the misery which this unfortunate couple have entailed upon themselves, their husbands, and their friends.

The Chronicle says:

The atrocity of the deed cannot be exaggerated. Tolled to the residence of the base men who meditated an assault, if not murder, and there assailed in a manner which would shame the most brutal outlaws that ever disgraced humanity; the attack upon a boy, a young man as innocent of offence as an unborn babe, the deliberate assault, the evident attempt to murder by the respondents thus placed at the bar of the community for trial, but happily not for the execution of a people's verdict, are reflections which create feelings of indignation which cannot be suppressed.—These assailants are now in the hands of the law, and the blood-stain upon their heads cannot be hidden by the handful of gold which they may be able to present as a guarantee of a future appearance for trial. A more deliberate assault has never been perpetrated, and the course of justice, we trust, will not be interrupted. Whatever may be the verdict of a jury, whatever the result of the charges brought against Edward O. Coburn and B. Frank Dalton, the community have judged of the conduct of their wives, and a just verdict has already been rendered.

ROBBERY—DRUGGING COFFEE.—Thomas Keehoe, who keeps an eating shop in the vicinity of the Kennebec Depot, in Portland, was brought before the Police Court in that city, on Tuesday, on a charge of robbing Elbridge B. Allen, of Newburyport, of $76.

From Allen's testimony, it appeared that on Monday night he was down to the Kennebec Depot to inquire about the time the train would leave for Augusta, whither he was desirous of proceeding. He went into Keehoe's shop for this purpose, and in answer to his inquiries Keehoe told him the watchman of the depot had been in there and would be in again very soon, and advised Allen to remain until he came. Allen then called for coffee and pie, but soon after drinking the coffee he felt an unusual sensation in his head, and asked Keehoe what was in the coffee. Keehoe replied nothing, it is pure Java. The disagreeable sensation continued and subsequently both Keehoe and Allen started for the United States Hotel, though for what purpose did not appear, but they soon returned, and Allen wished to go to the depot and remain about there until the cars would leave. This Keehoe resisted, and insisted that Allen should come into his shop and remain, and finally dragged him into the shop and shut and locked the door. He then demanded of Allen his money, threatening to kill him if he did not deliver it up. This, Allen declined to do, when Keehoe seized a club and threw it at him, when Allen attempted to escape through the window, but Keehoe pulled him back, and in this scuffle Allen alleges that Kehoe stole his money. Allen finally succeeded in getting out of the window, and making his way to the Police office informed Deputy Marshal Ring of the affair, who immediately went down to Keehoe's shop, found the back window stove in and Keehoe in the shop. On Mr Ring's attempting to get into the window, Keehoe told him to come to the front door and he would unlock it, but before Ring had got round there Keehoe was off out by the window and had scaled two or three fences. But Ring was soon after him and despite his threats of killing him if he attempted to take him, succeeded in hand-cuffing the fellow and conveying him to the lock-up.

He was ordered to recognize in the sum of $800 for his appearance at the March term of the Supreme Judicial Court. Failing in bail he was committed.

In Keehoe's shop were found cards, dice, liquor and such apparatus as become a gambling room.—*Advertiser.*

Land Warrants still declining—the following being the prices paid to-day, Dec 6, viz:

80's and 160's	95 cents per acre.
60's and 120's	90 cents per acre.

Dealers refuse to buy large lots even at the low rates quoted. The market has a decided tendency downward.—*Washington Star.*

The census returns gives the entire population of New York as 3,466,188. At the last census, in 1850, the population was 3,095,494. The population of New York city is 629,810.

THE TUNNEL FIGHT.—The party of North Adams citizens who got into the fight with the Irish employed on the tunnel in Florida, have been arrested to the number of fourteen, charged with assault with deadly weapons and with threatening to kill. Among those thus arrested is a Lawyer and justice of the peace and a deputy sheriff. Their examination is to take place next Monday. There were sixteen in all, in the party. The one who broke in the skull of the Irish boy, who has since died, has left the town. The funeral of the boy was attended at North Adams, and 200 to 300 Irish people made an imposing demonstration on the occasion. There is much excitement about the affair in North Adams, Florida and adjoining towns. The people of Florida sympathise with the Irishmen.—*Springfield Republican.*

According to the New Haven Register, the man who wrote "*kauphy*" for coffee, has sent his hat to the chap who dropped a letter into the New Haven post office, a day or two since directed to a person in "*St. Teveille.*" (Centreville.)

Three sellers of spoiled meat, at Memphis, were recently sent to the workhouse for sixty-four days. Served 'em right.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION
Will hold a
PUBLIC MUSICAL CONVENTION,
AT HANOVER STREET CHAPEL,
Portsmouth, N. H.,
Commencing on Tuesday, Jan. 8, 1856,
To continue three or four days, and close with at least one
GRAND CONCERT
of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of
Prof. B. F. BAKER, of Boston,
With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Hauke's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

FROM CALIFORNIA.

NEW YORK, Dec. 12.

The steamship Northern Light arrived at 4 o'clock. Gen. Wm. H. Richardson, U. S. Marshal for the Northern district of California, was assassinated at San Francisco on the night of the 17th ult., by an Italiam gambler named Corra.

Hon. Isaac B. Wall, Collector of the port of Monterey, was murdered near St. Louis Obispo, together with a companion named Thomas Williamson.

The murder of Gen. Richardson caused intense excitement in San Francisco, and strenuous efforts were made by parties to get the assassin out of the hands of the law for the purpose of "lynching" him, but their attempts were frustrated by the firearms of the Sheriff.

Mr Williamson, who was killed in the company of Collector Wall, was the Assessor of Montgomery county. The murderers of the latter gentlemen were supposed to be a party of Mexicans under Garcia. Pursuit was made by a party of Americans, under the direction of the Sheriff of the county. The murderers were overtaken at Salina, when a fight ensued, during which two of the Sheriff's party were killed.

Capt. Archibald McRae, of the revenue cutter McLean, committed suicide on board of his vessel during a temporary fit of insanity.

The banking house of Sanders & Brennan, in San Francisco, had failed. Liabilities $80,000; assets nothing.

Some rain had fallen, and there was snow in the mountains, but the winter rain had not set in. The miners were awaiting the rainy season, and not much gold was brought in.

Benjamin Loring, formerly of Worcester, was drowned near Sacramento.

The Indian Troubles.—Indian difficulties in the North continued. A battle was fought between 300 Indians and 400 regular troops, under the command of Capt. Smith of Fort Lane. The fight lasted nine hours, when the troops were obliged to retreat with the loss of 18 killed and 25 wounded. Gen. Wool had proceeded to the scene of trouble.

Salt Lake.—Dates from Salt Lake are to the 11th ult.

Difficulties had occurred between the Mormons and Utah Indians. Several Indians had been murdered.

Sandwich Islands.—Dates from the Sandwich Islands are to Nov. 3. There were forty whaleships at Honolulu and fifteen at Hinio. The ships had generally been successful.

Business was dull and money scarce. Exchange on the Atlantic states ranged from 15 to 18 per cent.

A difficulty had occurred between the government and the American Commissioner, arising out of the punishment inflicted on an American seaman by a magtstrate.

Nicaragua.—The intelligence from Nicaragua is not very important.

Parker H. French had resigned his seat in the Cabinet and been appointed Minister Plenipotentiary to the United States with extraordinary powers.

Col. Fabens had been appointed Director of Colonization.

Captains Rawle and Williamson had departed for New Orleans on government business. Col. Ewer had gone to California to raise money and men.

China.—Dates from Hong Kong are to Sept. 15.

An army of Imperialists, 40,000 strong, was defeated by the rebels near Canton on the 28th of August. Subsequently, another army of Imperialists, 10,000 strong, was defeated by the rebel chief with an army of 3,000 women.

The allied fleet in the China seas were inactive.

WASHINGTON, Dec. 11.—The conferences to-night were unsuccessful in securing additional votes for Mr Banks. The impression prevails that he has reached the highest point of support for Speaker, and that Mr Pennington or Mr Fuller will loom up in large proportions. Some Pennsylvania members hold a meeting to-night to arrange their programme for to-morrow.

Matters relating to the speakership are as confused as ever, nor can the most distant idea be now formed respecting the result.

Mr Vansant has served on Mr Harris a notice of his intention to contest his seat in the House of Representatives.

CONGRESS.—In the House, the last ballot before adjournment on Tuesday, was the forty-fifth—Banks, 106; Richardson, 74; Fuller, 27; Scattering, 16.

The Washington correspondent of the New York Herald says: "If soberness constitutes dignity, Banks must make a dignified speaker, in the event of his election. He has the air of a New England clergyman pacing the deck of a steamer which he expects every minute will blow up."

ST. LOUIS, Dec. 11.—The bill making large appropriations for the completion of the railroads in this state, recently passed by the Legislature and vetoed by the Governor, was passed to-day over the veto by a two-thirds vote.

UFFORD'S

CELEBRATED SMOKE

Consuming Patent

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does not, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids has eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

Copartnership Notice.

THE undersigned have associated themselves for the purpose of conducting the STOVE, TIN, SHEET IRON and HOLLOW WARE Business, and have this day entered into Copartnership under the name and style of SHATTUCK & BADGER. They have taken the late stand of Albert J. Badger, No. 9 Daniel street, trusting that they will continue to receive the custom of those who dealt with him.

Portsmouth, Dec. 4, 1855.

TIMOTHY F. SHATTUCK,
FRANKLIN O. BADGER

In retiring from the Tin and Sheet Iron Ware business, I take pleasure in recommending Messrs Shattuck & Badger, and would respectfully tender my acknowledgments for the very liberal patronage extended to me, and would solicit from my friends a continuance of their patronage to the new concern.

n5 ALBERT J. BADGER.

Notice.

HAVING this day disposed of my Stock, and given up the Store to Mr. O. F. GERRISH, I would respectfully request all persons indebted to me by note or account to settle the same on or before Jan. 1856. I have authorized Mr. Gerrish to settle my accounts, and would cheerfully recommend him to the patronage of my former friends. JOHN YEATON.

Portsmouth, Oct. 18, 1855.

The subscriber will continue the GROCERY BUSINESS at the Old Stand, No. 31 Market st., and respectfully solicits the patronage of his friends and the public.

d5 OLIVER F. GERRISH.

NOTICE.

THE subscriber having sold his STORE, STOCK and TRADE, (possession to be given the first of January,) would most respectfully say to his customers and the public generally that he will continue the business as heretofore until the above time.

All persons indebted to the subscriber are requested to call and settle on or before January 1, as it is his intention to leave the city as soon as his business can be closed.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received (in most daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine; let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Try it! Try it! Try it!

G. W. STONE'S
LIQUID CATHARTIC,
AND
Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowel "as nature." It expels all humors from the blood, to a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhœa and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in the United and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of Patent and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

H. R. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trial by the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who to unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is maintained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

THE WHEAT CROP OF CALIFORNIA.—From Dr. Trask we have obtained information in relation to the crop of the entire State. Dr Trask is the State geologist, and has just returned from a tour throughout the whole of the northern, central and southern portion of the State. He estimates the consumption of flour at 370,000 barrels a year; and from the investigation he has made, gives it as his opinion that the total yield of the present year will not exceed 390,000 or 395,000 barrels of flour, leaving 20,000 or 25,000 barrels for export, or five times that amount in wheat for seed.—He also states that there is only one county in the State which this year has produced a full crop, viz: Yolo. The yield in this county averages thirty bushels to the acre. Colusi comes next, producing twenty-eight bushels to the acre. The average yield throughout the State is estimated by Dr Trask at seventeen or eighteen bushels. Last year the average was twenty-eight or twenty-nine bushels. There was 15 per cent more land sown with wheat this year than last, and the falling off in the aggregate production is attributable to the inferiority of the yield, smut, rust, grasshoppers, &c. In Los Angelos and San Barnardino, the wheat crop proved a total failure, and the people as soon as it was found out, were forced to put in corn, and succeeded in raising a small crop. We give these statements for what they are worth, with the remark that the estimates made by Dr. Trask last year proved singularly accurate, though at the time a great many were found who doubted their correctness. — *San Francisco Herald.*

INTOXICATION IN THE ALLIED CAMP.—The Crimean correspondent of the Daily News writes:— Intoxication has greatly increased among the troops since the grant of the field allowance of 6d. per diem in addition to their former pay. Moreover the men are earning sums of money just now which are very considerable, if estimated in relation to the amount of intoxicating liquor which can be purchased by their means. These sums are obtained by them either from being employed as artificers, or as laborers in such public works as road-making, or from private contracts with the officers who are permitted to engage a limited number of soldiers to assist in building huts, stables, or to help in other camp occupations. It does not require to notice the increase of canteens in all directions, or to watch the clustering of half-tipsy men at the wine and beer-shops, to become aware that a great amount of this money is spent in drink. Some of the drunken scenes about the camps of late have been discreditable in the extreme. It is a mistake to suppose that the French soldiers are so temperate as they are generally considered to be in England: intoxication is nearly as common among them as among our own men, but is not usually carried to the same degrading excess. Indeed the French Zouaves, like our own Highlanders, have the character of being drinkers, men who can carry well a large quantity of liquor; and most of the line regiments who have been serving in Algeria exhibit a tendency to the same distinction. The native Algerian Zouaves, like the Turks, and other Mahommedan troops are examples of the opposite extreme of temperance.

A down east skipper, with a boy, was trying to manage a small sloop, when the master of a Liverpool packet, who had been dodging out of their way, incensed at their awkwardness, cried out—

"What sloop is that?"

"The Sally from Maine," responded the intrepid Yankee.

"Who commands her?"

"Well," replied the skipper, "I undertake to, but she's too much for me!"

CABALISTIC.—Rev. E. H. Chapin is a wit, as well as a divine and a lecturer. The Springfield Republican reports that on being asked what was his object in lecturing so extensively, he replied that he lectured for F-A-M-E, which is the short for *fifty and my expenses.*

STEAMSHIP VANDERBILT.—The new mammoth steamship Vanderbilt was launched on Monday from the yard of Mr Jeremiah Simonson, Green Point, Long Island. The Evening Post gives the following description of this vessel:

"The Vanderbilt is said to be the strongest merchant steamer afloat. Her frame is composed of large timbers, and she is thoroughly constructed in a very superior manner of white oak and locust. Sixty tons of bolts have been used in the flooring. She is strapped with ninety-four tons of iron. The bolts are of great size and thickness, and all of her timbers are thick and heavy. Her dimensions are as follows: Length on deck, 335 feet; breadth of beam, 49 feet; depth of hold, 33 feet; and 5100 tons burthen.

She will have two beam engines, of 90-inch cylinders and 12 feet stroke, made by the Allaire Works. She was launched with a portion of her machinery, consisting of the bed plate, cylinders and condensors. Her water-wheels will be 42 feet in diameter. It is not stated whether the Vanderbilt intends to run to Europe. She will not be ready for sea for some time."

FIVE TIMES MARRIED.—A few days since an old man of sixty-one years applied at the the office of the City Registrar for the fifth marriage certificate. His intended bride is but twenty-four, it being her first marriage.—This is the only case within the knowledge of the present registrar of a fifth marriage. Last year one man applied for his fourth marriage certificate. There is a woman in this City, of about forty years, who is now living with her sixth husband. She was first married at the age of thirteen, and when fourteen was a widow. At the expiration of the third year she was married to her third husband. She has but three children.—*Boston Traveller.*

A CLERGYMAN OF THE ENGLISH CHURCH MAY MARRY HIMSELF.—It was lately decided by the Irish Court of Queen's Bench, sitting in Dublin, in a case fully argued, involving the question of the legitimacy of the eldest son of a clergyman of the united churches of England and Ireland, whose parents were married by the father himself, in the usual form of solemnization, as set forth in the Common Prayer Book, that the marriage was legal. The decision was made by Judge Crampton, and two other judges concurred in it. The Chief Justice did not sit in the case.

The Baltimore American says that never before in that city have the absolute necessities of life been so hard to obtain because of the high prices, and with the scarcity of employment it will prove oppressive during the winter if a favorable change does not take place.

Morning Chronicle.

FRIDAY, DECEMBER 14, 1855.

MR. BUCHANAN.

Hon. John Appleton is about to resume the editorship of the Portland (Me.) Argus. The Advertiser says: "The Buchanan campaign in this State may be considered as fairly opened."

We suppose Mr Appleton *has* resumed his place and editorial duties. From the Argus of the 12th, we cut the following paragraph, credited to a paper in Lancaster, Pennsylvania, Mr Buchanan's state.

The Eastern Clarion, published in Paulding, Mississippi, has the name of James Buchanan, for President, at the top of the columns, with a long and ably written article in his favor. It speaks of the whole South uniting on Mr Buchanan, as the next candidate for the Presidency. The Clarion says—"We can say in relation to the views there expressed, that we, in the main, cordially approve of them, for we have always been friendly to the personal and political character of Mr Buchanan, and we believe he has always been favorably regarded in the South. Virginia, if we are not mistaken, and many of the other Southern States, went to the last Democratic Convention, pledged to vote for Mr Buchanan's nomination, and did do so, while any hope remained of securing it."

The Free Press, a newspaper of the Democratic party, in an article on "the Ingratitude of Office Holders," says:

It has been a matter of complaint on the part of the enemies of the administration that office holders under the general government have been too faithful to their party and too friendly to the administration. So far as our observation extends, we have seen no reason for complaint, except at the ingratitude of those who have received favors. We know of postmasters and others who begged for office, like a dog for a bone, and were successful at the commencement of Gen. Pierce's administration, and who are now ready to *desert* the *administration* with a coolness which generally characterizes the man who feels no obligation of gratitude. These men would fraternize with know nothings, abolitionists, or infected democrats, if they could profit by the operation; but the best thing they can do is to *resign* and resign forthwith. If they are now ready to *betray* the *administration*, they would betray any other, and we hope the President will not leave them in office as an heir loom to his successor, whether that successor be himself or any one else. They are traitors at heart and have the mark of Cain upon them. If you converse with them they affect to be for the President, but they will be careful not to speak, write or publish one solitary word in his defence. If he is attacked and accused of half the crimes in the decalogue, it will not do to say he is an honest man for fear it may aid him in some way. Still the political recipients of favor are very friendly to the President. O yes, they are very friendly to the President!! All such time servers, trimmers, and smooth faced hypocrites would best adorn a private station, and we hope the President will in due time see that they have it. Should they once more get out of office there is no danger of their being restored!

The Argus copies this, with comments, on this wise:

While we deem gratitude a very proper proper sentiment in an office-holder, we by no means attach so much importance to it, as does the Free Press.

* * * * *

While therefore we fully agree with the Free Press, that those who cannot sincerely render a cordial, hearty and dignified support to democratic *principles* and to the democratic *party*, should "*resign* and resign forthwith" the official positions which they hold under a democratic administration, or in due time be left to "adorn a private station;" we would go one step further, and include in the same category, those in whom "gratitude" has, for the reasons above stated, become the ruling motive of action, and whose conduct is therefore marked by an officious sycophancy and an overflowing *toadyism*, but ill comporting with that becoming self-respect, and dignified, *manly bearing* which distinguish the truly American office-holder; who, while acknowledging himself to be the servant, does not lose sight of the fact that he is also, or ought to be, the representative of the people and the true exponent, in a due degree, of their sovereign character and authority.

This reads like a Declaration of Independence—not at all like a Compromise, or a Fugitive Bill, or a bill for slavery extension.

It is worthy of remark, that while the Free Press speaks chiefly of deserting the *president* and betraying the *administration*—the Argus speaks chiefly of supporting the Democratic party and Democratic *principles*.

We do not know at whom the Free Press aims its hard hits. But the Argus sees fit to hit back.

How A. Rox gained his Freedom.—The following pithy story is from Putnam's Monthly for December:

"My friend asked Anthony Rox, a superb engine driver, on the Ohio river, how he came to get free.

"Why, Massa Vincent, my health was very bad when I was in Kentucky, I couldn't do no kind of work; I was very feeble; 'twas jes as much as I could do to hoe my own garden and eat the sess; and the missus that owned me see that I was a mis'able nigger—one of the mis'ablest kind. So I said to her: 'Missus, I'm a mis'able nigger and I aint worth nothing, and I think you'd better sell me, I'm such a mis'able nigger.' Now, Massa Vincent, I was such a poor nigger that missus agreed to sell me for a hundred dollars, and I agreed to try to work and earn the money to pay her, and I did, and my health has been getting better ever since, and I 'specks I made about nine hundred dollars that time out of that nigger! Wah, wah, Massa Vincent."

Poor fellow: what a pity he should get out of the patriarchal institution! Who will take care of him now he has no mistress?

DAILY PATRIOT.

The editor of the N. H. Patriot has recovered his health, resumed his pen, and now proposes to issue a campaign paper called the Daily Patriot, five times a week, from Jan. 9 until the election, at 37 cts. for 45 papers; 10 copies for $3. He says:

The Daily Patriot will be devoted *mainly to politics*, to the advocacy and defence of Democratic principles and the Democratic ticket.—

* * * And as its usefulness will depend in a great measure upon the extent of its circulation, we have resolved to put the price very low, a little *below* its actual *cost*.—As we shall therefore *lose* money upon it, and the larger the circulation the *more* we shall *lose*, we shall not be accused of mercenary motives in calling upon our political friends all over the State to aid us in giving the paper a very wide and general circulation. *

* * * If the people of New Hampshire shall sustain the corrupt factions now in power and endorse their dangerous principles and wicked policy, it will be an indication that they are *ready to abandon* our glorious Constitution and that inestimable Union, the palladium of our liberties and the prolific source of prosperity and happiness, of wealth and power and progress and glory to our nation and people.

It is *solely* with a view to contribute something to a right decision of this great question, and to aid as much as possible the cause of truth, justice and patriotism, of Democracy, the Constitution and the Union, that we propose to issue the Daily Patriot.

Washington Affairs, Dec. 12.—During the protracted struggle in the House for Speaker not the least sign of ill temper has yet been manifested. On the contrary the best feeling has characterized the proceedings.—Conferences were held to-night among the various members, but none in the most remote degree can fortell the events of to-morrow. Some appear almost to despair of effecting an organization. The friends of Mr Richardson have resolved to stand by him, nor is it probable that by dropping him they could concentrate a larger number of votes on any other Democrat, the anti-Know-Nothing and Nebraska platform being a bar to accessions.

It is understood that Mr Etherington will again offer his resolution for an election by a plurality vote, but it is not probable it will be adopted.

Mr Bayley of Virginia, a member of the House of Representatives, is on the eve of starting for Havana for the benefit of his health.

As this government has sent instructions to Minister Wheeler not to recognize the new Nicaraguan government, but which cannot have been received before he left, Parker H. French, it is reasonable to suppose, will not be received as its accredited minister.

The special despatches to the Boston Advertise say the friends of Mr Banks are encouraged by the steadiness of his vote.

The New York Tribune says:

"The members elected as Anti-Nebraska men who stood out against Banks, are John Wheeler and Bayard Clark of New York; Fuller, Millard and Edie of Pennsylvania; Scott, Harrison, Ball and Moore of Ohio; Dunn and Scott of Indiana; besides Fuller of Maine, Williams of New York, Hickman and Barclay of Pennsylvania, and Wells of Wisconsin, Anti Nebraska Democrats."

The correspondent of the Courier and Enquirer entertains the belief that Banks cannot be elected, and says:—

"The opposition to him now is almost exclusively sectional. The hostility which he encounters finds a pretext in the convenient assumption that he is inimical to the rights of the South. This objection is without a particle of foundation. Mr Banks is a conservative on the slavery question. There is a sort of tremulous fanaticism prevalent at the South which cannot be argued with on a point like this, and it can, therefore, hardly be hoped that Mr Banks will receive any open support from that section, but no Northern representative will be justified in withholding his vote from him on this ground.

Washington Rumors.—*New York, Dec.* 13.—The Washington correspondent of the Herald telegraphed last evening as follows:—"The question of the speakership remains in *statu quo*. There will be an attempt made to-morrow to advance Pennington, and if he fails, the opposition will then call a caucus, and the man who receives the largest vote shall be considered the caucus nominee, and as such shall be elected. This arrangement was proposed to-day, and has, I understand, the concurrence of all parties."

Mr Greeley of the Tribune, telegraphs from Washington, 12th: "There are the usual rumors this evening that several members will fall away from Banks to Pennington, to-morrow, but I do not credit them. Gov. Gardner has written here strongly urging adherence to Banks."

Escaped.—*Buffalo, Dec.* 12.—A letter in the St. Louis Democrat, dated Leavenworth, 1st inst., says that McCrea had escaped from prison, and had informed the territorial Marshal that he would appear at Tecumseh on the day of trial.

The Lawrence people say that Sheriff Jones never produced any warrant for the arrest of prisoners.

Fire at Francestown.—On Wednesday morning, 12th inst, at about 2 o'clock, a fire broke out in the dwelling house of William Bixby, in Francestown village, and was destroyed, together with two large barns and their contents. It spread to the well known hotel of Judge Parker, burnt that, the Hall, two stables, and out buildings, to the ground. It also burnt a brick store occupied by Starret & Downs. It then crossed to the east side of the street, burning the old Dane store and another building.—*Manchester Mirror.*

Judge Kane's trial, for false imprisonment, in the case of Williamson, is to come off in the Philadelphia district in February. Williamson claims $50,000 damages, which is at the rate of $13,333 per month, or $3000 per week.

LOCAL.

☞ Don't forget to secure tickets for the course of lectures before the Young Men's Christian Association. These lectures will be given by distinguished clergymen from abroad, and will be useful and instructive, differing, in this respect, from the generality of our lectures. The second lecture of the course will be given by Rev. Arthur S. Train, of Haverhill, in the Temple, on Sunday evening next. S. W. C.

"The True Merchant."—Rev. Dr. Huntington of Cambridge, Mass., delivered the opening lecture of the Boston Mercantile Library Association course, upon this theme, a few weeks since. It was spoken of by the press, as an elaborate and very beautiful effort, and the lecture committee of our Mercantile Association, believing that its repetition here would gratify all classes of ticket holders, have endeavored for some time past, to secure the services of the eminent gentleman for one evening during the present season. Dr. H. has at length consented to appear before the Society on the evening of Saturday, Dec. 22, that being the only evening at his disposal, and the committee being of the opinion that the interest manifested to hear the address will amply compensate for this deviation from the regular evening, have decided upon his appearance at that time.—He is to appear before the Christian Association on the Sunday evening following.

☞ At the term of the Supreme Judicial Court which is now in session at Dover, John W. Hard, Esq. of Dover has been admitted to practice as an attorney in the Courts of this State.

A convention of the friends of temperance in Rockingham county will be held in Chester on Friday of this week. Addresses by Rev. E. W. Jackson, J. W. Ray, Esq., and others.

WORDS FOR THE WORKERS.

Under this title, Crosby, Nichols, & Co of Boston, have just published a little volume containing Six admirable Lectures, or Essays, written by Rev. Wm. D. Haley, pastor of a church in Alton, Illinois.

The lectures are a connected series, and are addressed to Workingmen, Mechanics and Apprentices.

The subjects of the lectures are: 1 The Dignity of Labor; 2 Labor and Capital: 3 Self Education: 4 Reading and Recreation; 5 Character: 6 Appeal to the Workers, and to society for them.

The author in his preface says he did not write his book for the critics; but for the workers. Nevertheless we think he need not fear the former, in his earnest and well directed endeavors to reach the latter. It is a timely book; and may be read with benefit, not only by the classes to whom it is addressed, but also by every moralist and evangelist who wishes to make men better by showing them that the Kingdom of God is within them, or at all events within their reach.

For sale in this city by Jos. H. Foster.

A Holiday Book.—In a cover of green and gold, embellished with six colored lithographs, comes to us a new book, entitled, Love of Country, or Sobieski and Hedwig, compiled and translated from the French by Trauermantel.

The book is a stirring piece of Polish history, with the zest of romance and the instruction of truth. It is in a neat, attractive volume of 200 pages. Published by Crosby, Nichols & Co., Boston. For sale in this city by Joseph H. Foster.

☞ The "Veterans," a *large* military company of Manchester, start for Washington today, on a tour of camp duty. The general orders of Col. C. E. Potter, appeared in the Manchester American of Monday. They will return home again on Saturday, Dec. 22.

The company generally musters about 100 men, who measure not less than 600 feet, and weigh at least 20,000 pounds.

The Mesilla Valley.—A letter from Washington says—

"The reports from the Mesilla Valley are exceedingly interesting, and the private notes of the United States officials are worth their public reports twice over. The whole country is a vast ore field. Silver, copper, iron, platina, gypsum, and coal, in vast beds, abound in every direction, and are in the richest quantities in the region along the Pecos, and up to the twenty-third parallel, which had been thought the poorest section of the Rio Bravo valley."

Dr. Rogers' Syrup of Liverwort, Tar, and Canchalagua.—This safe, pleasant, and highly efficacious medicine has been fairly tested by our own citizens, who do not hesitate to pronounce it superior to all other *Expectorants* for any weakness or disease of the Respiratory Organs The *worst colds* are cured by it in two or three days. All Druggists keep it.

Horne Tooke ridiculed the practice of sea-bathing, and said, if any one of the seal species were sick, it would be just as wise for a fish-physician to order him to go on shore.—Porson declared that sea-bathing was only reckoned healthy because many persons have been known to survive it; but Sheridan's objection to salt water was the most quaint—"Pickles," said he, "don't agree with me."

In the French army, the soldiers, during the winter, wear wooden shoes. The result is, that the French army is less afflicted with toothache and rheumatism than any army in the world. A wooden-bottom shoe is always dry.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

ONE WEEK LATER FROM EUROPE.

ARRIVAL OF THE BALTIC.

NEW YORK, Dec. 13.

The steamship Baltic, with one week later advices from Liverpool, is below.

One of the passengers has come up to the city, bring papers in advance.

Cotton had declined 1-8 to 1-4d, closing firm. Sales of the week 49,000 bales.

Breadstuffs—Flour has declined 6d, Wheat 1 a 2d.

Consols advanced to 89 1-4.

The week's news is a variety of rumors that there is at last a prospect of peace.

One rumor states that Russia directly requested Prussia to make conciliatory offers to the Western powers. Prussia is said to have accepted this mission, and Austria also assents.

But the most definite form of rumor is that propositions had been submitted to Louis Napoleon on behalf of Russia, which can probably accepted, namely, that Russia will conclude peace with the Western powers without the intervention of either Austria or Prussia—Russia according the guaranteed independence of the Danubian Principalities and the freedom of the Black Sea; both parties to continue preparations for war, but no active hostilities to be entered upon to an agreed date.

All this is possibly premature, but hopes are strong that peace may arise.

Excitement respecting American affairs had almost passed away.

The Danish conference met 20th, but took no action.

The King of Prussia, in his speech to the chambers, announced decidedly the continued neutrality of Prussia.

Nothing from the Crimea, Asia or the Sea.

The King of Sardinia is the lion in England and France.

Medical Notice.

THE subscriber having completed arrangements with JN. MAFFITT HILL, an experienced Apothecary, in the superintendence of the Medical department of his business; and having also replenished and added to his former Stock of DRUGS, MEDICINES and CHEMICALS, respectfully solicits from his friends and the public generally a continuance of the patronage heretofore so generously bestowed.

As every article composing my stock has been selected with special reference to purity and freedom from adulteration, I can with confidence assure my patrons of entire satisfaction in their purchases.

In dispensing Medicines, and in the compounding of *Physicians' Prescriptions*, the greatest care will be used, guarding strictly against all errors.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,573 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign Inks. It is at wholesale and retail by

d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* on *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufacturers of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S INK, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

d10 GEO. W. TOWLE, 3 Congress Block.

Shaving, Hair Dressing, &c.

HENRY S. HARTSHORN would respectfully inform his friends and the public, that he has taken the spacious Room in the western corner of CITY HOTEL building, No. 20 Congress street, and fitted and furnished it in the best manner, as the

CITY HAIR DRESSING SALOON,

and will be most happy to wait on his patrons with less delay than has sometimes been necessary in his old Saloon.

His old place of business will be under his charge, also, as heretofore:

With his increased facilities for performing every operation pertaining to the removal or Dressing of the Human Hair, he feels prepared to give the fullest satisfaction to all who may call on him.

While returning most grateful thanks for the very liberal patronage with which he has ever been favored in Portsmouth, he would solicit a continuance of the same.

The weather, says the Rochester (N. Y.) American, continues to be the theme of constant remark. Seldom do we have a milder, week in December than the one just passed. It has been exceedingly favorable for operations on the canal. The crowd of boats which have collected on the levels in the Mohawk will no doubt be able to reach Albany, and a general closing up of canal business will have been effected before the ice shall have put a stop to navigation. The Commissioners have very judiciously refrained from drawing off the water, thus allowing vast quantities of produce to reach tide water, which otherwise would have remained in the canal.

FATAL CASUALTIES.—Monday evening, at half past five o'clock, as Mr Lucius D. Ashley, broker's clerk, of Boston, was getting upon the Waltham cars at the Fitchburg depot, he missed his step and fell beneath the wheels, by which both of his legs were crushed. He was taken to the Mass. General Hospital, where he died at a quarter before nine o'clock.

Mr John Cook, a butcher, residing in Brighton, went to Watertown Monday to have a tooth extracted. After the operation was performed, he arose from the chair to free his mouth of the blood, and almost immediately fell back and expired. He had been subject to disease of the heart, by which his death was undoubtedly occasioned.

IMPORTANT DECISION IN CONNECTICUT.—In the case of Blackiesslee vs. O'Neil et. al. in the Superior Court, Judge Waldo awarded to the plaintiff $150 damages. It was an action against a Catholic Priest and others, for interfering at the death-bed and performing Roman Catholic rites against the wishes of the plaintiff.

Judge Waldo also decided that the confession to a priest was not a privileged communication, but that he might be compelled to disclose it. He did not consider it necessary in the case before him, on account of its irrelevancy.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most distressing cough, and in a few hours completely cure the most severe Cold As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine; let others give it to their children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1836) is determined to present advantageous inducements to applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty,as paid back by others) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats,Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and Infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, generally about 30 per cent less than others in the profession, but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents.Copies of claims of any patent furnished by remitting one dollar. Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and of business none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

DR. BURLEIGH SMART'S
Cough Medicine.
DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:
"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and abundently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."
This medicine was first compounded and made use of by him, and with equally the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superlative. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."
Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates upon the Blood as to remove the Cause, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is maintained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.
To secure the public against counterfeits, we have the bottles made expressly for us, with the words "Dr. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, Me., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CAUTION.—LOTTERY FRAUDS.
THE Commissioner of the Maryland State Lotteries has deemed it his duty to caution the Public against the numerous Swindlers who circulate by mail and otherwise, fraudulent Lottery schemes, and profess to be agents for the sale of tickets in Lotteries which are wholly fictitious.
The only legal Lotteries in Maryland are those drawn daily under the superintendence of the Commissioner elected by the people of the State in der the new Constitution to examine and approve the schemes and attend to the drawings.
All the tickets in these Lotteries, and all certificates of packages of tickets have the lithographed signature F. A. Barnes, General Agent for the Contractors, Office of the Maryland Consolidated Lotteries, Baltimore, Md. All others are fraudulent. For full information on the subject of these frauds, address F. X BRENAN,

Morning Chronicle.

MADAME SUSANNE KOSSUTH MESZLENYI.—It is very true, that whatever may be the fortunes or the fate of reformers, their families are the real sufferers in every position, which calls forth great effort and stout endurance.—The brilliant reception which Kossuth experienced in the United States had no sooner passed by than the scene to him and his was changed, and the expatriated family were compelled to seek for the means of a bare support. Kossuth himself lives in London, where he edits the London Atlas; his two married sisters remained in this country; they have met with a variety of vicissitude of fortune—their lot has been a hard one. The sisters are now separated by death; the survivor, sorrowful and suffering, lingers here. Aided by kind hearted, appreciating friends, among whom are Mrs. G. S. Howe, Mrs. Bartol, the wife of the poet Longfellow, Mrs. Dall and other well known ladies: a subscription has been started towards the sale of a memoir of the deceased Madame Meszlenyi, out of which it is hoped funds may be derived for the relief of the sister who is left. The price of this little memoir is 25 cents. It was prepared, and is for sale by Miss Peabody in West street. The work is a touching narrative of a "shining light" now set forever; but from whose bright rays when up, some gleams of comfort are now sought to cheer the fading light of a noble woman and sister in exile.—*Boston Courier.*

CHIEF JUSTICE TANEY.—"Inspector," the Washington correspondent of the New York Courier and Enquirer, under date of the 9th, contradicts the statement that the Chief Justice is being detained by official business at Baltimore. Mr Taney is confined to his house by sickness, and on the 7th inst., his physicians were unable to state when it would be prudent for him to remove to Washington.

The age of the Chief Justice is advanced, and his present attack awakens serious apprehensions. Mr Taney has now presided for a period of twenty years over the Supreme Court of the United States. Speculations in regard to the successorship have already begun to be whispered at the capitol.

A DIVORCE CASE.—The Cincinnati Enquirer has the following report of a case decided before the Court of Common Pleas of that city:—Clementina Booth vs. Junius Brutus Booth.—The parties in this case are well known as stars in the theatrical world. The petition filed in August, 1854, alleged wilful absence and neglect of duty as the grounds for divorce. The parties were married in Philadelphia, in 1850, and lived together until 1851, at which time, it is stated, the defendant left the plaintiff in Boston, in company with another female, a decree was allowed, and alimony in $500.

ENGLISH TASTE.—London may become Rome, but she can never become Athens.—This, indeed, was reserved for Paris. In London there may be gold, power, material development in the highest degree of perfection, a gigantic exaggeration of everything that can be done with money, with patience and resolution—the useful, the comfortable—but never the beautiful. The English will excel in all that is possible to accomplish, and even that which is impossible. They will invent machines that will make six hundred thousand pairs of stockings in a minute, and will even discover nations to wear them; but they will never be able to make a bonnet which a French grisette would put upon her head.—*Gautier.*

A violent gale prevailed on the southern coast of Lake Erie on Sunday evening. At Dunkirk a very large quantity of beef, pork and flour was washed away. A brick house was blown down in Buffalo, and the Niagara Falls Railroad was caved in in five different places. The canal at Buffalo was full of floating lumber and much loss has been experienced by lumbermen and others.

The Abandoned Discovery Ship Resolute, taken possession of by Capt. Buddington and crew of the whaleship George Henry of New London, was boarded by them on the 17th September last off Cape Mercy, distant 35 or 50 miles, and was found in good condition, with about four feet water in her hold. Capt. Buddington's intentions were to winter with his prize at Whale Fish Island. The Resolute must have drifted in the pack from Melville Island through Barrow's Straits, Lancaster Sound, and down Baffin's Bay, where she was picked up, a distance of about 25 or 30 degrees. Capt. Stewart, of the British bark Alibi, (who conveyed the news to Scotland, having spoken the Resolute 17th October, midway between Cape Mercy and Cape Elizabeth,) received from Capt. Buddington Capt. Kellett's epaulettes, left on board the Resolute, to forward on his return home.

FOR EDUCATION.—The Hon. Henry Barnard, at the last meeting of the Connecticut Historical Society, presented a paper showing that the whole amount of land appropriated by the general government for educational purposes, to the 1st of January, 1854, was 52,970,131 acres, which, at the minimum price of such lands when first brought into the market, represented the munificent sum of $56,000,000, but which at this time could not be worth less than $200,000,000. The amount of the donations and subscriptions, by individuals far exceeds all that given by the state legislature. The same gentleman, from a table which he exhibited, showed that the donations and bequests made within the last fifty years by the citizens of Boston alone amounted to upwards of $4,000,000.

GLOUCESTER.—Two young men named Abraham Robinson and William Robinson were examined before the Police Court at Gloucester last Saturday, on a charge of larceny from the person of an elderly man named Jacob Andrews, who resides at Essex. Mr Andrews left Gloucester for Essex on the 14th ult., having in his wallet $114. It appeared from the evidence that the Robinsons had intoxicated Andrews for the purpose of obtaining his money. He was found lying on the railroad track by Mr Elias Stevens, where the cars were due in half an hour. Justice Trask ordered each of the defendants to recognize in the sum of $500, with two sureties, for their appearance at the Court of Common Pleas.

TIGER KILLED.—We are informed that Captain Somers, who resides eight or ten miles from this city, on the opposite side of the river, killed one day last week, near his place, a very large tiger, measuring 6 1-2 feet from his ears to the end of his tail, three feet high, and weighed between three and four hundred pounds. This is the second one that has been killed in this country within the last 14 or 15 months.—*Jacksonville (Fla.) Republican, Nov. 28.*

Morning Chronicle.

SATURDAY, DECEMBER 15, 1855.

SPIRITUALISM.—Mr John F. Whitney, the editor of the New York Pathfinder, who represented himself as having for months past been "at the head of the most extensive establishment in existence for the investigation of the phenomena, publishing one of the leading journals, devoted entirely to the cause, and employing about the premises no less than eight mediums, for public sittings, for investigation and instructions, and this establishment being carried on at an expense of over two hundred dollars a week," has published a strong article in which he unsparingly denounces the alleged danger of modern spiritualism. Still entertaining belief in the "undeniable evidences of the existence of disembodied spirits," these manifestations are regarded as inflicting incalculable evil wherever their influence is felt. Mr Whitney remarks:

"Now, after a long and constant watchfulness, seeing for months and years its progress and its practical working upon its devotees, its believers, and its mediums, we are compelled to speak our honest conviction, which is, that the manifestations coming through the acknowledged mediums, who are designated as Rapping, Tapping, Writing and Entranced Mediums, has a baneful influence upon its believers, and creates discord and confusion; that the generality of these teachings inculcate false ideas, approve of selfish individual acts, and endorse theories and principles which, when carried out, debase and make man but a little better than the brute creation. These are among the fruits of modern spiritualism, and we do not hesitate to say, that we believe if these manifestations are continued to be received, and to be as little understood as they are, and have been, since they first made their appearance at Rochester, and mortals are to be deceived by their false, fascinating, and snake-like charming powers, which go with them, the day will come when the world will require the appearance of another Saviour to redeem the world by its departing from Christ's warning to his followers to beware of wolves in sheep's clothing, and to try what manner of spirits ye were of."

And again he says:

"Seeing, as we have, the gradual progress it makes with its believers, particularly its mediums, from lives of morality to that of sensuality and immorality, gradually and cautiously undermining the foundation of good principles, we look back with amazement to the radical changes which a few months will bring about in individuals, for its tendencies are to approve and endorse each individual act and character, however good or bad those acts may be."

The article from which these extracts are made, concludes as follows:

"We desire to send forth our warning voice, and if in our humble position, as the head of a public journal, our known advocacy of Spiritualism, our experience, and the conspicuous part we have played among its believers, the honesty and fearlessness with which we have defended the subject, will weigh anything in our favor, we desire that our opinions may be received, and those who are moving passively down the rushing rapids to destruction, should pause, ere it be too late, and save themselves from the blasting influence which these manifestations are causing."

A correspondent says, respecting the above, that "Mr Whitney was editor and joint proprietor with Mr Conklin, of a paper professedly devoted to spiritualism. That paper acquired a circulation in ten weeks of less than two hundred copies, and died. He was at the head of an extensive establishment, hired mediums, and endeavored to lead off; but being disappointed in the *speculation*, has left it in disgust, after two years' investigation. It would seem that a less time might have been sufficient, if its tendencies are so obvious. No doubt there are men of mercenary and selfish motives engaged in the investigation, and the sooner they leave it the better. The sagacity of Prof. Hare has failed to discover all this evil, and a perusal of his work will contrast strangely with Mr Whitney's experience."

☞ Frank Leslie's Illustrated Newspaper, the first number of which we have received from the publishers, makes a fair appearance, and with a little more care in the "press work" will compare favorably with the best of the illustrated publications. The frontispiece is a fine picture of Dr. Kane and his brother explorers, clothed in their fur garments, which would seem to bid defiance to cold, and almost to motion. On a supplement, is a valuable bird's eye map of the seat of war in the East, embracing the peninsula of the Crimea, Turkey, the whole of the Black sea, Seas of Azof and Marmora, and the whole country within a circuit of about 20° square. Price 10 cents per number. $4 per annum.

☞ The Washington correspondent of the New York Evening Post says—

"Gen. Cass has announced his willingness to comply with the request of the free State men of Kansas. He has promised to take charge of and to present their petition for admission to the Union and the Constitution adopted by them. Whether he will vote accordingly, remains to be seen."

DAMAGES.—In Providence, on Wednesday Miss A. S. Pearce received $2000 damages in the Common Pleas Court, for injuries received from being run over by Harnden & Co.'s express wagon.

A DEAD LETTER.—The prohibitory liquor law in Massachusetts seems to be a perfect dead letter, and all because it makes jurors judges of the law as well as of the testimony, and no conviction can be had under it. Forty-five indictments were *nol pros'd* in Boston last week. Out of about one hundred cases only seven remain on the docket. In the mean time we doubt if the sale of liquor has been more open and general in Boston, for many years, than at present.—*Nashua Telegraph.*

And so far as the general sale of liquor is concerned, the Telegraph might have made the same statement with regard to New Hampshire, where jurors are *not* judges of the law. It is a fact which every observing man must be aware of, that liquor is now dealt out in this State, as a beverage, to an extent not before known.—*Cheshire (Keene) Republican.*

Ti is not a fact, in this part of New Hampshire, i. e. in Portsmouth and its vicinity. It is sold here, unquestionably;—but not dealt out to a greater extent than ever before. On the contrary, we well remember when there were *four times* as many liquor stores and shops in Portsmouth as there are now: when there were twice as many taverns; when there were drinking houses or shops in every town around us; and when from all the data we can muster, three or four times more liquor was drank than now, with a smaller population.

At no time within the last forty years has the sale been more limited and crippled than within the last few months; and never before within the same time has the business been so generally considered to be disreputable.

It is true that Boston, in this respect, is the cesspool of New England;—but it is not true of the State of Massachusetts, outside a few cities, that the law is a dead letter. To show that we do not speak at random, we copy the following item, as to *cases in Plymouth county.*

The December term of the Common Pleas Court commenced its session at Plymouth on the 4th inst. Seven liquor cases came up on appeal and were disposed of as follows:

James Gilson, sentenced in three cases.—Fined $10 and costs with 20 days in the House of Correction. Henry L. Thayer, sentenced in one case. Fined $10 and costs. George Donahoe; fined $50 and costs with 20 days imprisonment in the House of Correction.—Also ordered to give bonds in $1000, &c.—John McAlpine—verdict guilty—exceptions filed. Margaret O'Leary; fined $10 and costs with 20 days in the House of Correction.

So we see that juries *do* convict under the liquor law, out of Boston.

HORACE GREELY ON WASHINGTON.—Mr. Greeley, in one of his letters from Washington, says:

"New York is a smart village of its size, but not so favorable a location for the study of men and manners as this Washington.—Men are here more gregarious—more genial—the crust of etiquette and reserve thaws quicker, and one makes a dozen intimate acquaintances while he would be making two or three in a commercial emporium. There are sly people here, but they are very few, and not increasing—the atmosphere is not congenial. Even the office-seekers are communicative and confidential—they hope that awakened and satisfied curiosity will engender sympathy.—Washington is the spot whereon to observe American character in all its phases, and rapidly advance to proficiency in the study."

CHIPPEWA INDIANS.—A company of these native Americans are in Boston,—

A good anecdote is told of one of them.—He was asked why Indians do not copy the dress of our people. He replied—"Me tink we started your fashions; your men now wear blankets, as we do, and your women paint their faces and wear feathers." A good comparison.

SOUTH CAROLINA AND THE MASSACHUSETTS RESOLUTIONS — QUIXOTISM. — *Richmond, Dec.* 11.—The Committee on Federal Relations in the Legislature of this State, made a report to-day on that portion of the Governor's message relating to his returning the resolves of the Massachusetts Legislature. The committee agree with the Governor as to the conduct of Massachusetts, but claim that the Governor should have sent the Resolutions to the Legislature for action.

In the Senate yesterday, resolutions were offered authorizing the Governor to call out a regiment of volunteers to aid in suppressing the difficulties in Kansas.

ELOPEMENT AND MARRIAGE.—The Albany Knickerbocker tells an amusing story of the elopement of Miss W——, of Troy, who was invited by a "dry goods clerk" to take a ride to Albany, where they concluded to get married. On going back to Troy, the young woman went home as if nothing had happened. This was on Thursday. On Friday somebody exposed the secret. Parents were of course indignant, and insist that the bride shall not live with the clerk aforesaid. The young lady avers that she will. The old folks threaten to cut her off without a shilling. The young lady says she "cannot help it." She means to cling to her husband, "shillings or no shillings." We are inclined to think that the old folks will have to give in.

THE FOREIGN NEWS.—The news by the Baltic at New York amounts to this:—A talk of peace, which we have heard of before.—Rumors of the unsatisfactory feeling with regard to the money market in England, where money was *tight*. A slight rise in consols, incident upon the peace rumors. A fall in breadstuffs and cotton, a firm though unquiet market in provisions, and miscellaneous intelligence of little use whatever.—*Boston Cou.*

J. B. Gourlet aged 82, and the oldest member of the literary fraternity in France, lately died in an almshouse in Paris. At the beginning of the century he possessed considerable reputation as the author of a Latin poem, several romances in the Radcliffe style, sundry satires and some theatricals pieces.

LOCAL.

For the Chronicle.

Messrs. Editors:—Some writer in the N. H. Gazette seems to be unhappy on account of the city liquor agency. He asserts that it is losing money, and says:

There can be no excuse for keeping it open another day. Liquor is sold as freely as it ever was throughout the city, and no one will find any difficulty in procuring it for all needful purposes, as none is found now without patronizing the agency. Will not the citizens then demand the closing of this concern, now that it has become a source of loss to the city? And is it not the manifest duty of the city authorities to close it?

Please to say to all anxious inquirers, that it is not optional with the city government to keep such a place or not—but the law says explicitly they *shall* do it;—and they are liable to indictment if they do not. And there are some persons who prefer, when medicinal and mechanical wants occur, to buy where legal sales are made, rather than illegal.

The city government have just as much right to disregard this requirement, as they have to refuse to call the annual Town Meeting, and no more. And they are liable to the same punishment. AMICUS CURIA.

Messrs. Editors:—It is to be hoped that inside of the new and beautiful church edifice on the parade, the truths of the Gospel will be so proclaimed, so that, *if need be*, it shall even prove to be a "stone of stumbling and rock of offence" to thousands of souls, that under the bruising and grinding their opinions and prejudices may thereby receive, they may be led to confess that Jesus Christ is Lord to the Glory of God, the Father, and that 'broken hearts' may there be so skillfully treated that they shall be made *'better than new.'*

But concerning that edge "stone" outside, the hope that all the broken and sprained limbs which are likely to occur thereby, can be made even as *"good as new"* after the surgeon has done his best, will be "like the spider's web."

Such an arrangement of pavements is bad, and should not be suffered to exist for one day, for even an hour. Every citizen who is acquainted and on guard against such places can generally escape injury, but otherwise and for strangers they are dangerous. P.

We had a complaint against the same stone of stumbling, by Old Squaretoes, some time ago. For our own part we prefer the pavement as it was before, and as most of our crossings now are, viz.: on an inclined plane. But the crossings in Boston, hundreds of them, are like the new crossing, only more so: that is they have an edgestone six inches above the crossing. The pedestrian must lift his feet, or stumble and fall.

☞ The second Lecture of the Sunday evening course before the Christian Association, will be delivered to-morrow evening, by Rev. Arthur S. Train, of Haverhill, Mass., at the Temple. Tickets to the course 50 cts.

DEATH OF JUDGE JACKSON.— The Hon. Charles Jackson died at his residence in Bedford place, in Boston, on Wednesday night, aged about 80 years. Judge Jackson was a brother to Dr. James Jackson. He was born in Newburyport; graduated at Cambridge, in the class of 1793; and was for some years an Associate Justice of the Supreme Court of Massachusetts. He was a distinguished lawyer, and a gentlemen of many excellencies of private character. For nearly thirty years he has led a quiet retired life.

ALMOST FATAL.—A young gentleman and lady of this city, on Monday, went out to the Lights on Cape Elizabeth, to see the ocean beat upon the rocks—a very fine sight, by the way, in stormy weather. They proceeded, however, rather too far out, and were washed off The gentleman managed to get hold of a rock, when he discovered his companion floating by him seaward. He grasped hold of and succeeded in rescuing her. She was taken to the residence of the light-keeper in an insensible state, but was soon restored. It was an exceedingly narrow escape.—*Portland Argus.*

We regret to learn that Mr J. W. Randall, who was robbed and so barbarously used near the Turnpike, back of the city, a few months ago, died on Tuesday last from the effects of his wounds. He was doing well for a time, and left here for his home in Jay, Me., but his wounds afterwards became inflamed and caused his death. We have hoped that he would live to see his assailants captured and punished; but as yet nothing has ever been heard from these villians.—*Newburyport Herald.*

"Notwithstanding all the predictions," says the Albany Evening Journal, "of diminished revenue from the Canal, it now turns out that the tolls will exceed those of last year by about $75,000, if not more."

In the U. S. District Court, at Boston, Alfred M. Lunt, of York, Me., late master of ship Humboldt, of Boston, was arraigned, for an assault on Henry Fall, with a dangerous weapon. R. H. Dana and S. D. Parker, for defendant. H. L. Hallett for government.

It has become necessary to place an iron fence around the alcoves of the Congress Library, at Washington, in consequence of the constant encroachments of the multitudes who throng the capitol during the sessions of Congress. Many valuable works have been stolen from the shelves, and others ruined by constant handling.

A day or two since a train of ten eight ton cars arrived in Buffalo from Rochester, having as freight nothing but lost baggage, which has been placed in the lost baggage depot.

AMERICAN AND FOREIGN OFFICE

Agency for business with the US Patent Office, Washington,

76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of *twenty*, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability. R. H. EDDY,

Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,

Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,

Commissioner of Patents.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render this occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

55th Ballot—Banks 104, Richardson 72, Fuller 38, scat. 7.

WASHINGTON NEWS.—*New York, Dec.* 14.—The correspondent of the Tribune telegraphs: Fuller's vote was increased to-day at Richardson's expense. Fuller has been making some explanations in the K. N. caucus, which secures to him the entire vote of the Nebraskaites who are not Democrats. He now belongs to them.

The Herald correspondent says: "The proposition of Mr Pennington to-day was overruled. Banks will not, under any circumstances leave the field. I was informed this evening that one hundred of Bank's men have signified their intention to stand by him until an election is effected.

The Administration has not a working majority in the Senate. Some of the leading spirits have openly declared their hostility to it. It is the general opinion that the Union men cannot get the Senate printing.

WASHINGTON, Dec. 13.—The Speakership continues to be the all engrossing topic.—There seems to be a fixed determination on the part of Banks and Richardson men to adhere to their respective candidates. This being conceded, Mr. Fuller's supporters have the balance of power, and with them rests the responsibility of making the election. Should the three divisions remain firm, a proposition is talked of, to end the contest by partitioning the principal offices between them.

BAKER'S TRIAL.—*New York, Dec.* 13.—9.30 P. M.—The jury in the case of Louis Baker are still out, but with no prospect that they will agree upon a verdict.

LATE FROM KANSAS.—*Chicago, Dec.* 12.—Mr Parsons, of Mass., who left Kansas on the 3d inst., informs the Tribune that there are 700 men at Lawrence undervarms, and upwards of 300 Missourians at Waukesa Creek, seven miles distant, with rifles and cannon.

Mr Parsons also met a company of Missourians on the 4th, just over the border, with arms and baggage wagon stores. On the 6th he saw another squad of Missourians, with three pieces of artillery, which they had stolen from the Clay county arsenal. The squad was talking violently, and swearing they would burn Lawrence, and kill all abolitionists. Mr Parsons says that the stories about the free State men burning houses and committing other violence, are all false.

ARREST FOR SWINDLING AN OFFICER.—A man named Benjamin True was arrested in Boston, on Wednesday, for obtaining $30 of Mr Jailor Adams, of Springfield. He represented that he was a Boston police officer on his way West to catch a rogue, and that he had been robbed of all his money.—Upon these representations, Mr Adams, always willing to aid a fellow-officer, loaned him thirty dollars, but he has since ascertained that the representations of True were false. True was handed over to a Springfield officer and taken to that city for trial.—*Boston Times.*

THE NIAGARA A FAILURE—THE BAKER TRIAL.—*New York, Dec.* 13.—The U. S. propeller Niagara, being built by contract in New York, is pronounced a failure by the Naval Constructor. When completed she is to carry thirteen large Paixhan guns on pivots.

Yesterday Mr Whiting summed up in the Baker case on the evidence, and Judge Roosevelt charged the jury, who retired for consultation early in the evening, but up to two o'clock this morning had not returned a verdict.

KILLED ON A RAILROAD.—*Concord, N. H., Dec.* 14.—Charles Plastridge, a freight conductor on the Vermont Central Railroad, was run over by the engine and tender of a train near the depot in this city, about 6 o'clock this morning. He survived about an hour.—Deceased leaves a wife and six children at Northfield, Vt., where he resided. He was in the act of uncoupling the engine from the train when the accident occurred.

THE EUDORA MYSTERY.—On Monday a small piece of flesh, which a physician has declared to be human, was found on board the Eudora Imogene. A freshly dug spot on the beach on Hart's Island, from whence the negro was proceeding when arrested, has also been discovered, and it is thought these two facts may lead to a solution of the mystery.—Preparations are being made to search the ground.

GAMBLING IN CHICAGO.—O. T. Caldwell conductor on the railroad to Burlington, has beenconvicted of embezzlement in that city, and sentenced to a year's imprisonment in the Penitentiary. The railroad companies have resolved to discharge all their employees who are in the habit of visiting gambling houses, as it appears Caldwell lost his money in these places, and facts have come to light by which it appears that gambling in that city is carried on to an alarming extent

FROM VENEZUELA.—*New York, Dec.* 13.—We have news from Venezuela to the 7th ult. The Assembly met at Caracoas on the first, and elected Senor Bermudes President, by a large majority. The cholera was raging with frightful violence at Valentia, but at Laguayra and Caracoas it had considerably abated.

THE ROBINSON DIVORCE CASE.—Christopher Robinson, formerly of Lynn, Mass., obtained a decree of divorce on the 6th inst., at the Circuit Court in Owen county, Indiana.

The divorce was granted exclusively on the ground of incompatibility of character. The jury returned a verdict for the plaintiff after five minutes' deliberation. The decision is final and without appeal. Both parties being represented by able counsel, the case excited considerable interest.

A Miss Hume, of Williamsburg, Indiana, was on trial last week at Indianapolis, on a charge of robbing the U. S. mail,

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,573 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON the AMERICAN MANUFACTURER, and determine its great superiority over all foreign Inks. It is at wholesale and retail by
d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or *its coloring.* I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

BANGOR CITY AGENCY.—The sale of intoxicating liquors, by the city agent during the present municipal year, to Dec. 1st, was $4,808,53.

This was for home consumption, used for mechanical and medicinal purposes, within the city limits. Liquors amounting to $1834, 32 were sold to agents of other towns.

It is estimated that the sales would have been more than a thousand dollars better, had not Marshal Weaver ran an opposition to, and undersold the city agency. The Marshal had the tact to steal his brooms ready made. —*Eastern Argus.*

Call the sales for Bangor consumption $5000; and then add $1000 for Weaver: we have $6000 for 15,000 people who live in Bangor; or 40 cents a head for mechanical and medical purposes. Not an extraordinary outlay.

Mr Farnum, city agent for the sale of spirit in Concord, in a statement before the City Council recently, said that the whole amount of liquors bought since the agency went into operation in August last, was $2473,88; amount sold to other agents, $831,13; amount retailed, $1250; amount on hand, $700—total amount disposed of and on hand, $5781,31—thus making a profit of $307,25.

Those who denounce the people of Kansas and defend the Missouri borderers are capable of defending any proceeding of tyranny, however atrocious. Make them sure of "the consideration" and they will scruple at nothing. It is hardly possible to point out, under any government on the face of the earth, a more atrocious proceeding of tyranny than that which has been undertaken by the slave power against the people of Kansas. Certainly our colonial history has nothing to match it.—Nothing but a long experience of the most abject slavery, in which all manhood has disappeared, can qualify men to submit to such outrages.—*Boston Telegraph.*

G. W. STONE'S

LIQUID CATHARTIC,

—OR—

Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It nicely produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT—it will speak for itself the question. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with scrofula, salt rheum, or any humor? This will cure you. Would you be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from the same. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

DR. BURLEIGH SMART'S

Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilled in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been so lavishly bestowed, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs established. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and thus impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of azo enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unexpressed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1,25, For sale by G. N. CARLETON.

HOW TO RECEIVE A MINISTER.—A minister who has no agency in his own appointment, goes to the field of labor with peculiar feelings, not knowing whether his coming is pleasing or displeasing to the people he is expected to serve. Therefore the members of the church should rally around him, and give him a hearty welcome; call on his family, and show in ways not to be mistaken that they are glad to see him: by thus doing, you will lift a great weight from his shoulders.—Let the steward ask him for his bill of travelling expenses, and *pay it*, and put some of the *needful* into his hands to begin house-keeping with, that he may not be compelled to try his credit the first week among strangers. Save him from this mortification. In the next place remember that your new minister cannot call upon every member of his society the first week, and if his society is large, he will not the first month. If the minister should learn that the people, when hearing of his appointment among them, instead of praying for him, began to whisper about quite loudly, "he will never answer for us", it will be exceedingly unpleasant for the pastor to call upon those complainers. When your minister comes, do not salute him by saying, "I did not know that you were ever coming to see us, and I hope you will do better than our last preacher," as a sister said to me, the first pastoral visit I made her family, "for he did not call on us more than seven or eight times for the whole year."

It is a great cross for a minister to call on a family, especially when he is comparatively a stranger, if he has reason to believe the family will give him a serious reprimand for not calling sooner or more frequently; but encourage him by saying, "we are glad to see you;" invite in the members of your household, and ask him to pray with you; make his visit pleasant, and he will call again. Let the stewards, or any of the members inform him of those who are sick or in trouble as early as possible, that they may be visited. I have known some good men hedged up in their work for a whole year, by a *cold* reception the first month.

Let a minister be kindly treated, and if he is not faithful in his work, object to him at the Conference to which he belongs, and they will either correct the evil, or locate him.—*Olive Branch.*

Mr Walters, a passenger on the steamer Anthony Wayne, was taking from Chicago back to Philadelphia the remains of a fond and loving wife, to be buried among her relations and friends. During the trip the ill-fated boat exploded all her boilers, killing nearly all on board. Wr W. was lifted several hundred feet into the air, and fell into the water almost lifeless. The night was dark and dreary, and in his struggles to keep himself afloat he accidentally struck against a box, to which he clung all night with desperation. When daylight appeared he discovered that the box which had saved his life contained the corpse of his wife.

A friend who recently happened on the same car with Horace Greeley, tells the following:—Mr Greeley was trying to read a newspaper by the "dim religious light" of a car lamp. In order to see he raised the wick; but hardly had he done so, before the lamp trimmer came along and turned it down. The moment his back was turned, Greeley turned it up again. The Knight of the "Dark Lantern" presently came along again, and partly shut off the tight by which the Philosopher was reading. Greeley remonstrated The official thrust his lantern in his face, surveyed him with a contemptuous air a moment, and coolly replied: "Old fellow, you talk too much."

GRAIN FOR FRANCE.—The Rochester Union states that the agents of the French Emperor have been largely engaged this fall in purchasing wheat in the West, on his account. They have purchased 900,000 bushels, of which 650,000 came to Buffalo, and 250,000 to Oswego. All but 40,000 went down the Erie Canal. The same agents are still buying in Illinois and other Western states, to go down the Mississipi and out by New Orleans.

EXTORTION.—It is said that a majority of the members of the Missouri Legislature claim their per diem for the whole of the recesses which that body has taken, one extending from the 5th of March to the 31 of April, and the other from April 4 to November 4, making together nearly seven months. The State Auditor refuses to draw a warrant for the money, and a case has been agreed upon for the decision of the Supreme Court.

The Troy (N. Y.) Whig says that contrary to the usual custom, operations will be carried on at nearly all the iron manufactories in that city through the coming winter; and that it has not yet heard of one firm which intends to suspend.

INVESTMENTS IN THE GROCERS' BANK.—The following are the investments in the stock of the Grocers' Bank made by various Savings Banks in Mass:—Fall River, $20,000; Springfield, $15,000; New Bedford, $12,400; City(Lowell), $10,000; Worcester Co. (Worcester), $9,000; Danvers, $8,062; Wareham, $5,741; Salisbury, $4,085; Middlesex (Concord), $4,000; Cape Ann (Gloucester), $2,455. Framingham, $2,300; Blackstone, $2,000; Randolph, $1,513; Lancaster, $1,100; Abington, $1,000; Cohasset, $800. Total, $99,550. The capital of the Grocers' Bank is $650,000. The Savings Institutions named were the only ones in the State holding an interest in the stock of the bank when the returns for 1854 were made up.

VERY TRUE.—The Nashua Gazette, commenting upon the large importations of potatoes at Boston from the Provinces, remarks that "the Boston potato market ought to be supplied by Massachusetts, New Hampshire, and other New England states. What is the reason that it is not? Because a large surplus population prefer to neglect farming and rush to the large cities and towns, where they lead a precarious and vagabond existence, and are deprived of many of the necessaries of life, in order that they may *enjoy* the excitements of a city life."

Three or four times a couple appeared before a clergyman for marriage; but the bridegroom was drunk, and the reverend gentleman refused to tie the knot. On the last occasion he expressed his surprise, that so respectable a looking girl was not ashamed to appear at the altar with a man in such a state. The poor girl broke into tears, and said she could not help it

"And why, pray?"

"Because, sir, he won't come when he is sober!"

Morning Chronicle.

MONDAY, DECEMBER 17, 1855.

BIBLIOMANIA.—Under this title the American Publishers Gazette has an article giving the prices of many celebrated manuscripts and rare printed works—from which we extract the following exciting scene:

In the British Museum is a translation into Italian verse of the first letter of Columbus, relating his discovery of the West Indies, and of which it is believed that there is no other copy. It extends to only four leaves, and was bought for £75; probably the most costly typographical fragment in existence. But the glories of all similar rarities must yield to the famous Valdarfer Boccaccio. It was a small folio, in faded yellow morocco, of date 1471, which had long kept its station in the library of the great book-buying Duke of Roxburghe, and which was believed to be the only perfect copy of the famous story-teller. At the dispersion of the ducal collection, it was to be sold on the 17th of June, 1812; and it may amuse our readers to transcribe Dr Dibden's most enthusiastic account of the contest it occasioned:—

"The rain fell in torrents as we alighted from the carriage; the room was crowded to excess; and a sudden darkness which came across gave rather an additional interest to the scene. Mr Evans prefaced the putting up of the article by an appropriate oration, in which he expatiated upon its excessive rarity and concluded by informing the company of the excessive regret, and even 'anguish of heart,' expressed by M. Van Praet, that such a treasure was not at that time to be found in the imperial collection at Paris. Silence followed the address of Mr Evans. On his right hand, leaning against the wall, stood Earl Spencer. A little lower down, and standing at right angles with his lordship, appeared the Marquis of Blandford. My Lord Althorp stood a little backward, to the right of his father, Earl Spencer. Such was the ground taken up by the adverse hosts. The honor of firing the first shot was due to a gentleman of Shropshire, unused to this species of warfare, and who seemed to recoil from the reverberation of the report himself had made. "One hundred guineas!" he exclaimed. Again a pause ensued; but ance the biddings rose rapidly to five hundred guineas. Hitherto, however, it was evident that the firing wrs masked and desultory. At length all random shots ceased, and the champions before named stood gallantly up to each other. 'A thousand guineas!' were bid by Earl Spencer, to which the marquis added 'ten.' You might have e heard a pin drop. All eyes were turned—a l breathing well-nigh stopped—every sword was per home within its scabbard, except that which each of these champions brandished.—'Two thousand pounds are offered by the marquis!' Then it was that Earl Spencer, as a prudent general, began to think of a useless effusion of blood and expenditure, seeing that his adversary was as fresh and resolute as at the onset. For a quarter of a minute he paused, when my Lord Althorp advanced one step foward, as if to supply his father with another spear for renewing the contest. The father and son for a few seconds converse apart, and the biddings are resumed. 'Two thousand two hundred and fifty pounds!' said Lord Spencer. The spectators are now absolutely electrified. The marquis quietly adds his usual 'ten,' and there is an end of the contest. As the hammer fell, its echo was heard in the libraries of Rome, of Milan, and St. Mark."—(Dibdin's "Decameron," vol. ii., p. 64.)

It was said that the successful competitor afterwards Duke of Marlborough, was prepared to go as far as £5000.

While such rarities are bringing their weight in gold, it is pleasant to know that the most valuable books are the most attainable. The sum expended on a daily cigar would surround the young man who reads these lines with the best of the British classics; and the 'Book of books' may now be obtained for less money than a loaf of bread.

Portland contained about 21,000 inhabitants in 1850—and has since gained largely. In contrast with this our eye just now falls on an article in the Nemasket Gazette, from a correspondent in Canada, who, in describing the place where he lives, says:

The village contains ten or twelve hundred inhabitants, and that since the opening of navigation, which was about the last of April, there has been landed at this place three barrels of *good whiskey* daily; this, with the other spirits that are landed here, causes a great deal of rapping, not so much on tables, as on the ground, and each others' heads.

THE GOOD TIME COMING.—The Neal Dow Law, will go by the board, and Temperance and Sobriety will be the rule by choice, and not compulsion, reign in quiet, unheralded by pomp and noise, come without observation.—*Portland Expositor.*

Perhaps so. Total abstinents and strictly temperate men are generally quiet. But drinking men are apt to be noisy and pompous.

The following is from the Washington correspondent of the Boston Advertiser, by telegraph:

"Parker H. French will not be recognized by the President as Minister from Nicaragua. It is understood here that he will be arrested upon some charges pending against him for forging some letters of credit on Messrs. Howland & Aspinwall, and for defrauding a United States army paymaster and other parties."

ARREST OF A DEFAULTER.—In Boston during the present term of the Grand Jury in the Municipal Court, a complaint was laid before them charging Wm. S. Tuckerman, the late Treasurer of the Eastern Railroad, with embezzling the stock of that road to the amount of seventy shares. The officers of the road were summoned as witnesses, and the result was the finding of a bill of indictment. On this indictment a warrant was issued and placed in the hands of Constable Patterson, who soon ascertained that Mr. Tuckerman had proceeded to New York, where he has a brother residing. The officer proceeded to that city, and on Thursday arrested Tuckerman, as he was in the act of taking a letter from the post office. He appeared to be somewhat surprised, but said that he had no wish to avoid the charge, and willingly came to Boston, arriving there at about twelve at night. From the cars he was taken to jail, and Friday morning was brought before the Municipal Court. Tuckerman waived the reading of the indictment. The Court remarked that the offence was certainly greater when committed by a person of such intelligence, and who had occupied so responsible a position, but in fixing the amount of bail he could only consider the charge of the indictment. He therefore ordered Mr. Tuckerman to give bail in the sum of $7500.

☞ Hunt's Merchants' Magazine for December, 1855, has just come to hand. This number closes the 33d half yearly volume, and contains the title and Index. A new volume begins with January.

The contents of the December number are of various character, many of them of interest to the general reader; and all of them to the merchant, statesman, philosopher and moralist.

THE NEW DOME OF THE CAPITOL.—The Washington correspondent of the Baltimore Sun thus speaks of the new dome of the Capitol:—

"The old dome is fast disappearing. When removed, it will be superseded by one far exceeding in utility and magnificence even that of the celebrated St. Peter's.

The beautiful invention of Professor Walters will rise three hundred feet above the basement floor, and reach three hundred and eighty feet above tide water. It will contain one hundred and twenty-four windows, many of which will be eighteen feet in height; decorated with entablatures which will be emblematical of the most important events in American history; and such arrangements have been adopted that all visitors, from those in the springtide of life to the hoary-haired veteran, can easily ascend, and from the loftiest of our lofty eminences behold the extent and grandeur of our National Metropolis."

A DOUBLE MISTAKE.—A Washington correspondent tells this story—

Gen. Cass is at the National, which has been renovated by the new landlord, Guy, late of Baltimore. Curious enough, Mr. Guy is a living fac-simile of the great "Michigander," and they tell a story of a guest at the hotel, who rather astonished the senator by a demand for a better room. About an hour afterwards, as Gen. Cass was leaving the house for the senate, up came the man again, and this time he commenced his remarks by a familiar slap on the shoulder. "Now I've got you old Guy," said he, "and I want you to have me moved down a story or two. Confound it, I thought I asked you this morning, but it turned out to be *old Cass.* I was speaking to, and he looked as cross as a bear with a sore head." "Sir," replied the senator, in a stern tone, and with a pulverizing glance, "you are evidently liable to mistakes, for you are now talking to Gen. Cass a second time. Good morning, sir." The astonished victim rushed to the bar—paid his bill, and moved to Willard's without delay.

THE INVENTIVE GENIUS OF THE COUNTRY.—The intelligent Washington correspondent of the Evening Post, speaking of the forthcoming report of Commissioner Mason, says:

"Most of the inventions offered for the last twelve months have been stone-sawing machines. An advertisement having been published in the Scientific American, holding forth a reward of ten thousand dollars for the best contrivance by which two sides of a stone pyramid could be sawed at the same time, the inventive energies of the country were set to work, and in less than a month more than a hundred sawing machines were submitted to the Commissioner of Patents. It is curious to witness the alacrity with which the mechanical genius, so characteristic of the Yankees, responds to the slightest call upon its exercise. Not an accident by sea or land can happen, not a deficiency can be suggested in any art, but brings a score at least, of candidates for the honors of the Patent Office."

☞ Rev. George Fernald, aged 60, died at Brooklyn, N. Y., on the 11th inst. He was a native of this place, a son of Capt. Daniel Fernald, and a minister of the Methodist Episcopal Church.

A verdict has been rendered in the Common Pleas for Montgomery County, Ohio, against David Clark, for the sum of $13,700, being the amount with interest taken under the crowbar law from the Dayton branch of the State Bank, by the defendant, as Treasurer. The defendant was not sued in his official capacity.

Thirty-five liberated slaves from Kentucky were at Grafton, Ohio, recently, on their way to Oberlin. They were of all ages, and will be placed at the Oberlin School by their master, and their future welfare provided for.

LOCAL.

ACCIDENT ON THE EASTERN RAILROAD.—On Friday morning as the 8 1-2 train of cars from Lynn, was switching off at West Lynn on to the Saugus Branch, the rod of the switch broke. In consequence of this the baggage car was thrown off the track down an embankment some fifteen or twenty feet deep. The tender was also thrown off the track as well as the hind car, the tender being somewhat damaged. The baggage master was slightly injured, having a cut upon the head and hand. An Irishman, a laborer upon the road, and who was in the baggage car was hurt more seriously, his injuries were mostly internal, but the Doctor in attendance thought that he would recover from them: he was taken back to Salem. On account of the accident the train was an hour and a quarter behind time in reaching Boston.

SAD DISAPPOINTMENT.—We hear of a young lady in this city who was engaged to be married to a gentleman, a resident of Long Island, some time since, but the ceremony was postponed on account of the death of the brother of the intended bride. Again the day was appointed for the matrimonial ceremony to take place, when lo! the sudden decease of a sister of the bride occasioned another postponement. Again was the day fixed upon, and as the time drew nigh when she was to be called "wife," the mails brought the sad tidings of another interruption of the ceremony by *death*—her intended bad gone the way of her brother and sister, to "that bourne whence no traveller returns." What painful feelings must these sad events—the loss of a brother, sister and intended husband by death, occurring within so brief a space, too—occasion in the breast of her who was doomed to so many disappointments! How strongly do the circumstances show the uncertainty of life.—*Troy Daily Budget.*

A PROFITABLE COW.—During five days in the month of November, the milk of one cow, owned by Deacon Samuel P. Jewett, of Rowley, yielded 9 lbs. 6 oz. of butter; in twelve days 20 pounds 10 oz.; in 24 days 36 lbs. 8 oz. In addition to the milk set for cream, nearly one pint was used for other purposes each day. The cow had no extra keeping during this period. Such a cow is really worth having. With the feed of our pastures in the month of June, she will undoubtedly yield 2 lbs a day.

A NOISY FELLOW.—A curious point of law has just been decided in England by a county Judge in Exeter. The question was whether an inhabitant of a town was at liberty to keep animals whose noise proved a serious annoyance to their neighbors. It was shown, on the part of a Mr Abraham, that his neighbor, Mr Minty, had a cock which crowed one hundred and fifty times in twenty-five minutes. The learned Judge thought this was an amount of crowing which human nature was not bound to put up with, and awarded to the plaintiff one shilling damages.

The cause of so much disease and death among children is certainly, in part, owing to the fashion of dress. Look at the bare-legged innocents, martyrs to their mother's false pride, dressed only in a manner bacoming to Sea Islanders! They will take cold and die, but don't complain—it is not Providence that kills them; it is their own mothers. They do not dress them to withstand such a change in the atmosphere as this that is now upon us.

A London committee who have been engaged in the investigation of the cause of the outbreak of cholera, which was so remarkable in the Soho district of London last year, have come to the unanimous conclusion that the sudden, severe, and concentrated outbreak, was in some manner attributed to the use of the impure water of a well in Broad street.

Within a radius of five miles around Sebastopol, it is supposed that more blood has been spilt, more lives sacrificed, and more misery inflicted, in a year, than in any other equal extent on the earth's surface, in the same time, since the days of Noah's flood.

Rev. Dr. Wm. A. Smith, a distinguished divine of the Methodist Episcopal Church, South, is being tried by the Conference now in session at Petersburg, on the charges of falsehood, immorality, and slander. Dr. Smith's accuser is the Rev. Charles F. Deems, of the North Carolina Conference.

At the recent term of the U. S. Circuit Court for Rhode Island, the Court sustained the position that upon the death of a grandchild without children, intestate, his grandfather will take the ancestral estate, rather than the uncles and aunts, though the estate came into the family through the grand maternal branch, the wife of that grandfather.

The New York Tribune says that while the receipts of railroads in the United States, for the year 1855, have increased nearly fifty per cent over those of 1854, yet the fall in the value of their stocks has been nearly two hundred millions of dollars, with a prospect of its reaching three hundred millions.

Rev. Mr. Conway, the Unitarian clergyman at Washington, is attracting attention by the bold style of his preaching. His thrusts at slavery have stirred up considerable indignation among the patriarchs, which is not lessened by the fact that he is a Virginian by birth.

SETTING UP IN BUSINESS CHEAP.—Some women have been arrested in Saratoga, N. Y., for stealing goods, who it appears had opened a little shop at Glen Falls, where they sold the goods, consisting of silks, cloths, laces, &c., at less than half their value.

The New Lisbon Buckeye State says a full blooded negro was nominated and voted for by the old line Democracy of Butler township, in that County, for the office of Justice of the Peace, in opposition to the Republican candidate.

The Jury in the Baker Case, at New York at the last ballot stood nine for a verdict of murder, with a recommendation to mercy, and three for manslaughter in the second degree. They were discharged.

The story of the disconsolate widow, who left the body of her dead husband at the Chicago depot while she sought consolation for her bereavement in the arms of a new one, proves to have been slightly embellished, though scarcely more than the case would warrant. The dead body was forwarded to Troy, where it arrived on Saturday; the woman arrived with her new husband on Monday, when the appropriate solemnities were observed.

A FEMALE WITNESS.—"Facts are stubborn things," said a lawyer to a female witness under examination.

The lady replied, "Yes, sir-ee, and so are women, and if you get anything out of me just let me know it."

"You'll be committed for contempt."

"Very well, I'll suffer justly, for I feel the utmost contempt for every lawyer present."

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
70 State st, opp. Kilby st, Boston.
IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages, in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of *twenty*, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.
Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent. less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting *one dollar.*—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.
R. H. EDDY,
Solicitor of Patents.
"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.
EDMUND BURKE,
Late Commissioner of Patents."
From the present Commissioner.
AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION
Will hold a
PUBLIC MUSICAL CONVENTION,
AT HANOVER STREET CHAPEL,
Portsmouth, N. H.,
Commencing on Tuesday, Jan. 8, 1856,
To continue three or four days, and close with at least one
GRAND CONCERT
of Sacred and Secular Music.
ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.
The Convention will be under the direction of
Prof. B. F. BAKER, of Boston,
With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.
It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.
Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.
Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.
A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.
TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.
☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

WASHINGTON, Dec. 14.

SENATE.—Senate met and adjourned to Monday.

HOUSE.—Contest for Speaker resumed.

57th Ballot—Banks 106, Richardson 74, Fuller 41, scattering 4.

58th Ballot—Banks 106, Richardson 73, Fuller 41, scattering, 4.

Mr A. K. Marshall moved that when the House adjourned, it should be to Monday.

While the roll was being called, gentlemen now and then, instead of voting yea and nay, responded "Banks," and "Richardson," for the moment believing they were voting for a Speaker. This misapprehension occasioned repeated outbursts of laughter.

Mr. Marshall's motion was lost by a vote of 36 against 185.

59th Ballot—Banks 105, Richardson 74, Fuller 41, scattering 4. Adjourned.

Mr. Cumback of Indiana here announced a meeting of the anti-Nebraska and anti-Administration men for to-night. Loud calls for order followed, and in great confusion the House dispersed.

Mr. Washburn of Illinois, as the members were separating, said: There will be a meeting to-night of all the members opposed to the Administration. [Cries from the Democratic side, "you've dropped the Nebraska issue, then. Let's have the meeting now."]

CAUCUS IN REGARD TO THE SPEAKERSHIP.—*Washington, Dec.* 14.—The Anti Administration caucus met this evening in the Hall of the House of Representatives, Mr Washburn of Maine, in the chair. About ninety members were present. Speeches were made by Messrs. Ball of Ohio, Dunn of Indiana, and Eddie of Pa., in which they strenuously urged that the Republicans should withdraw Banks and try Pennington first and Fuller next, and see if an organization could not be effected. This drew out quite a number of speeches from the Banks men, after which Kimball of Pa., offered a resolution that the caucus should be governed by the majority, and that whoever received the highest vote should stand as the caucus nominee. Banks received fifty-eight votes, Fuller one, Pennington one, Campbell one. Previous to the vote being taken the Fuller men left the hall.

Two matters of some significance have taken place in Ireland during the week. One was the prosecution of a Roman Catholic priest, a Redemptionist father, Pecherine, for burning the English translation of the Bible at Kingstown, near the city of Dublin. The Rev. defendant did not enter on any defence, although his case was watched by an eminent barrister, Thomas O. Hagan, Esq., Q. C. It was proved to the satisfaction of the presiding magistrates that there was sufficient evidence to send the case for trial.

A strong police force, horse and foot, was in attendance to prevent any disturbance, should such be attempted. The affair has created intense excitement, and the Roman Catholic journals are vilifying the government for attempting to institute any proceedings on the subject.

Sebastopol will not be permanently occupied by the allies. Already the mining operations that are intended to blow up its docks, arsenals and public works are almost completed.

A letter from the Crimea, dated the 14th inst., says:

"The destruction of Sebastopol having been resolved on, each corps has received its position to work upon. The city presents, consequently, the most animated aspect. It is a demolition *en regle*, in which the four armies take part. The houses and public buildings are attacked at the base, and on all sides are heard the blows of the hammer and the crush of the rafters and timbers of the houses, which fall down amid clouds of dust.

The soldiers at once proceeded to the selection of all the materials capable of being employed advantageously for their use during the winter. Each man loads himself with objects the most wanted. Some carry off planks, windows, doors, presses, fire-irons, kitchen utensils, even to old chairs and old pots. Indeed, it may be said, that soon not a nail, nor a piece of wood, nor a tile, will remain in Sebastopol."

DEATH OF MRS. GOVERNOR WRIGHT.—The lovely and excellent wife of Governor Wright of Indiana—but last year a bride—died at the residence of her father, Mr Robert Burbridge, Scott county, Ky., on Saturday morning last, at 10 o'clock. Some six weeks or two months ago, she gave birth to two fine infants, (who are still alive and well,) and has never recovered from the illness of her accouchment.

A LONG WAY TO MILL.—The ship Adelaide arrived at New York on the 14th of October from San Francisco, bringing a cargo of California wheat, barley, &c., which paid a profit to the shipper of nearly 50 per cent., clear of expenses, the wheat selling at an average of about $2 per bushel. The same vessel is now up for California with 1500 brls. of flour on board, to go back to the same port from which she brought the wheat. 19,000 miles is a long way to come to mill.—*Boston Chron.*

REALLY TOO BAD.—The New York Journal of Commerce says that a lot of nearly two hundred firkins of butter, examined in that city on Thursday, disclosed a fraud in the tare of from three to seven pounds on each firkin. Similar results followed the testing of a lot of cheese casks and boxes.

Mrs. Betsey Leonard, widow of the late Capt. John Leonard of Keene, N. H., died in that place on the 7th inst., at the extreme age of one hundred years nine months and ten days. She retained the vigorous use of her mental faculties, and her sight and hearing, until within a few weeks.

AMOSKEAG VETERANS.—*Philadelphia, Dec* 14.—The Amoskeag Veterans, of New Hampshire, numbering 112 muskets, arrived here today. They visited Independence Hall, where they were welcomed by Mayor Conrad. A banquet is to be given them at Sansum Hall this evening, and tomorrow they will proceed to Baltimore and Washington.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does not, and other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have given paper where every letter written with English Fluids was eaten entirely through, and a delicate blue that changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. Try it! Try it! Try it!

G. W. STONE'S
LIQUID CATHARTIC,
—OR—
Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and sure Cathartic or Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. Its family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients several considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the tissue that the lungs are healed, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease eradicated, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the patient against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of an enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

UFFORD'S

CELEBRATED SMOKE
Consuming Patent
LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1,25.

SYDNEY SMITH.—Sydney Smith, in spite of his reputation and habits as a dine-er-out, gives some very excellent advice on the subject of temperance. In one of his letters he says he never knew a gentleman who ate or drank as little as was good for health. In the following epistle to Lady Holland, he speaks still more decidedly in favor of abstinence from all fermented liquors. His advice is sensible:

My Dear Lady Holland:—Many thanks for your kind anxiety respecting my health. I not only was never better, but never half so well; indeed, I find I have been very ill all my life without knowing it. Let me state some of the good arising of abstaining from all fermented liquors. First, sweet sleep; having never known what sweet sleep was, since childhood until this time, now I sleep like a baby or a plow boy. If I wake, no headless terrors, no black visions of life, but pleasing hopes and recollections — Holland House past and come! If I dream, it is not of lions and tigers, but of Eastern dues and tithes. Secondly, I can take longer walks and make greater exertions without fatigue. My understanding is improved, and I comprehend political economy. I see better without wine and spectacles than when I used both. Only one evil ensues from it; I am in such extravagant spirits that I must lose blood, or look out for some one who will bore and depress me. Pray leave off wine—the stomach quite at rest; no heartburn, no pain, no distension.

DICKENS' PICTURE OF THE TRUE WOMAN.—The true woman for whose ambition a husband's love and her children's adoration are sufficient, who applies her military instincts to the discipline of her household, and whose legislative abilities exercise themselves in making laws for her house; whose intellect has field enough for her in communion with her husband, and whose heart asks no other honor than his love and admiration; a woman who does not think it a weakness to attend to her toilet, and who does not disdain to be beautiful, who believes in the virtue of glossy hair and well-fitting gowns, and who eschews rents and ravelled edges, slip-shod shoes and audacious make ups; a woman who speaks low, and does not speak much; who is patient and gentle, and intellectual and industrious; who loves more than she reasons, and yet does not love blindly; who never scolds and rarely argues, but adjusts with a smile; such a woman is the wife we have all dreamed of once in our lives, and is the mother we still worship in the backward distance of the past.

OLD CHURCH.—The church of Cripple Gate is one of the oldest in London. It bears the impress of venerable antiquity, having been erected in 1055. In the yard is a portion of an old wall, some 30 feet long and 15 high, built by the Romans. I was shown the beadle's staff, on which was carved a model of the church, representing a double gate, a cripple in the centre, and a carriage entrance on each side. Oliver Cromwell and Ben Johnson were married in this church. About midway in the eastern aisle is the grave of Milton. There is a beautiful tablet inserted in the wall, surmounted by a marble bust of the poet, by Chantry. On either side of the altar are tablets in memory of Speed, the historian, daughter and grand-daughter of Sir Adam Luce, (the Justice Shallow of Shakspeare,) and Fox, author of the Book of Martyrs. He was an able defender of Protestantism, and his book was among the first to awaken attention to the dangers of the Roman hierarchy. Bunhill Fields, situate almost in the centre of the city, was the burial ground of the Defender. More than 100,000 persons have been buried in the yard, which contains only four acres.—*Newark Advertiser.*

EDITORS IN PARLIAMENT.—The press in England certainly cannot complain that it is not fairly represented in high places. The London Athenæum says:—"There are more proprietors, editors, and correspondents of public journals in the present House of Commons than at any previous period. Among leading debaters in that House are to be found some of the most powerful writers of the day. The Chancellors of the Exchequer are men who have occupied equally distinguished positions in Literature, and the Lords Lieutenant of Ireland are elegant essayists, pleasant versifiers, and accomplished authors of diaries. In fact, the distinction and antagonism between the worlds of politics and literature seem fast dying out, to the advantage of both, we would fain believe. While the one becomes more enlightened, it is to be hoped the other will gain in robustness and healthiness of tone."

The South Carolina Senate has passed a bill repealing the usury laws.

Copartnership Notice.

THE undersigned have associated themselves for the purpose of conducting the STOVE, TIN, SHEET IRON and HOLLOW WARE Business, and have this day entered into Copartnership under the name and style of SHATTUCK & BADGER. They have taken the late stand of Albert J. Badger, No. 9 Daniel street, trusting that they will continue to receive the custom of those who dealt with him.
Portsmouth, Dec. 4, 1855.
TIMOTHY F. SHATTUCK,
FRANKLIN O. BADGER.

In retiring from the Tin and Sheet Iron Ware business, I take pleasure in recommending Messrs Shattuck & Badger, and would respectfully tender my acknowledgments for the very liberal patronage extended to me, and would solicit from my friends a continuance of their patronage to the new concern.
n5 ALBERT J. BADGER.

Notice.

HAVING this day disposed of my Stock, and given up the Store to Mr. O F. GERRISH, I would respectfully request all persons indebted to me by note or account to settle the same on or before Jan. 1856 I have authorized Mr. Gerrish to settle my accounts, and would cheerfully recommend him to the patronage of my former friends. JOHN YEATON.
Portsmouth, Oct. 18 1855.

The subscriber will continue the GROCERY BUSINESS at the Old Stand, No. 31 Market st., and respectfully solicits the patronage of his friends and the public.

TUESDAY, DECEMBER 18, 1855.

HONEST PEOPLE.

"Our people are a reading and a thinking people; and they generally act, in political affairs, from honest and patriotic motives."—So says the New Hampshire Patriot; and so say we, heartily, most heartily. And we rejoice to see this declaration, so perfectly true, over against a world of trashy declamation against one party and another, as enemies to the country, dishonest and impure.

We have no doubt there are scoundrels in all parties: but yet we believe, with the Patriot as above quoted, that "*Our people generally act, in political matters, from honest and patriotic motives.*"

We do not believe that we have *one* man in New Hampshire who wishes to believe a *falsehood!* And there are not many, we think, who would wish to deceive others for the sake of the deception, without some motive of gain or power.

Scarcely any man, however wicked, would say to himself, I will do this piece of wickedness because it is wrong! No: even the worst men do not act thus. They steal and rob for gain; they murder for revenge or hate: they lie to get out of difficulty; they deceive to get power or pleasure, &c., &c.

When we rise upward in the scale of morals, from the vilest men, to those who are respectable, industrious and orderly, like "our people" in New Hampshire generally,—we still preserve the same freedom from foolish and *fruitless* dishonesty;—and we also come to a better view, a higher law, on the same subjects.

We have enjoyed a very widely spread and numerous acquaintance with men of all parties in politics, and we may as well add of all sects in religion, for many years. And we must say, as the result of much experience and some observation, that at the present writing, we think but little better or little worse of any man because he bears the label of this party or of that, or because he says Shibboleth with a stronger *Sh* than his neighbor.

Parties there must be; sects there will be. With them we need have no quarrel; and surely there is no need that we should know or wish to know to what parties our neighbors belong. We (Uncle T.) never yet questioned any man on his party relations,—never invited any one to vote this way or that,—nor ever found fault with those who did so.

Yet we have always voted when in this State, in our own way—never regarding one who differed from us, or who voted otherwise, as our enemy. We never could have any sympathy with that sort of cock crowing exultation over the result of a ballot or an election, which looks upon a minority party as men look upon a defeated foe in a battle.

The earliest parties in this country, whigs and tories, being rebels and loyalists, were sometimes engaged in deadly fights; and were generally enemies.

But there is surely no good reason why the modern parties, formed on men, on measures, or on principles, should be enemies, or haters, or maligners of each other—but rather friends, who happen to differ in opinion.

And aside from designing and crafty men who "sigh and groan for others' good, but mean their own,"—they would be so. To a great extent they are so now;—we rejoice at it,—and mean to do what in us lies to promote the harmony of men who agree to differ—of citizens who are not to have their friendship marred by diversity of opinion on a measure or a policy.

P. S.—The same No. of the Patriot from which we make the above admirable quotation, speaks of

"The knavery of Hindoo demagogues; the reckless and *unprincipled* conduct and *character* of the *factious* now in *control* of the State Government; their partisan, illiberal, *corrupt* and unconstitutional State legislation:"

And says—

"Those who believe *with us* that the *ruling factions* in this State are *entirely, utterly corrupt*, profligate, reckless; that their measures are dictated *solely* by the most *selfish*, mercenary motives, &c., &c.

In order to accomplish their objects the *black republican Hindoos* are willing "*to let the Union slide.*"

THE REAL ROGUE AT LAST.—About three years ago, says the Newburyport Herald, some glass was broken for the Oldtown Society, Rev. Mr. Withington's Church, and suspicion having fixed upon a lad as the transgressor, he was made, against his denial of all knowledge of the matter, to pay the damages. On Wednesday, a young man named Peavy was arrested f r stealing clothing, and brought back from Boston to which he had fled, who among his confessions to Marshal Brown, owns up to the glass breaking. The honest sometimes suffer for the guilty.

☞ The second number of Frank Leslie's Illustrated Newspaper is received from the publishers. It is an excellent and beautifully illustrated publication.

GROCERS' BANK.—The Boston Chronicle says the Grocers' Bank has again been brought into prominence by reason of its having suffered another robbery—this time to the amount of $10,000. Mr Francis Thayer, who was a bookkeeper under Mr Kinsman, and was promoted to the Cashiership on this officer's retirement, is a defaulter to the amount of $10,000, and, as he is not to be found in the city, it is presumed he has absconded. His father, Mr Gideon Thayer, and another gentleman, are his bondsmen, and the Bank will not suffer. It is surmised that Mr Thayer has been engaged with Mr Killburn in his financial operations. Nothing positive however, is yet known.

THE BRISTOL MURDER.—The evidence on the complaints against the several persons arrested for the murder of Edward A. Howard, of this city, was closed on Thursday in Bristol, R. I. On Friday morning Justice Munroe gave his decision as follows: Dennis Marah, Richard Quirk and Patrick Dyer, committed for trial at the next term of the Supreme Court in Bristol county on the charge of murder; Patrick Marah, Timothy Welsh and James Welsh, bound over in $500 each to answer for an assault, and Edward Quirk and Toby Burke discharged. The examination continued for four days, during which the court house was crowded with spectators.

A HARD CASE.—In Worcester, Mass., on Friday, the Attorney General entered a *nolle prosequi* in the case of Ann Jane Crowley, indicted for the murder of her child, by drowning, at Fitchburg, in October, 1854. The case is indeed a hard case. The poor woman has been in jail, (says the Boston Chronicle,) seven months awaiting trial, and it now appears that there is not a particle of evidence against her.

The Boston Mail accuses one Deputy Sheriff Kimball of prosecuting the woman for the sake of fees—but, says the Mail:

Kimball reckoned without his host. Sheriff Butterfield of Lowell, and some others heard of her case. They knew the woman well, and excellent counsel was procured. Sympathy ran high for her, and indignation at the author of the base business was loudly expressed at the Court House yesterday morning. A subscription was started, headed by a Lowell gentleman with $10, and a considerable sum of money was put into Mrs. C.'s hands yesterday afternoon. Kimball had the audacity to claim and get his witness fees yesterday in this case, even after the unfeeling and dastardly course which he has pursued, and sneaked off to Fitchburg in the first train of cars.

There are not a few other cases which could be brought against this Kimball. He was indicted last spring with several of his rowdy companions for an assault on a peaceable citizen of Fitchburg, and being an officer, the case was hushed up by paying *hush* money. He has accumulated considerable property by pursuing an unscrupulous course, but hereafter the finger of scorn will be pointed at him. Representations have been made to the High Sheriff of Worcester county, and it is expected that an immediate removal of this Kimball from office will be the consequence.

ARREST.—We heard last evening that Oliver King, formerly keeper of the Farmers' & Mechanics' Hotel in this city, was arrested yesterday in Lawrence, on charge of having been connected with the robbery of the $50,000 from Livingston & Co's. Express some time ago. No particulars.—*Lowell News, 15.*

THE GREAT ROBBERS TAKEN.—Our readers will recollect that some months since, $50,000 in gold, belonging to the United States government, mysteriously disappeared while in charge of Butterfield's Express, at Dubuque, Iowa, which the express company had to pay, and for the recovery of which, or the apprehension of the robbers, a large reward of several thousand dollars was offered.—Soon after that time several men— Sam'l White of Haverhill, who had been clerk of the express company in Iowa, Oliver King, who formerly kept a restaurant in Middle street, in this city, and afterwards a hotel in Lowell, Wm. Ayres and ——— Hesseltine, returned from the West to Lawrence and Haverhill, and by large purchases of real estate, and the deposit of large sums of money in various banks, excited suspicions of bad conduct.—Hon. Alfred Kittredge of Haverhill, undertook to ferret out the matter, and found that they were at Dubuque at the time of the robbery, and immediately left; and upon further inquiries it was ascertained that King had deposited since, $3,000 in a Haverhill bank, and 5,000 in Lawrence bank, and, as appears, brought it there in the very boxes in which the government officers had packed it. Thereupon, on Friday last, two of the parties, Ayres, who was formerly a broken merchant in Boston, and King were arrested in Lawrence, and conveyed to Boston, where they are waiting examination, which, takes place Wednesday. Attachments have been put upon a large amount of property that stands in their names. —*Newburyport Herald.*

BANQUET TO THE AMOSKEAG VETERANS. —*Baltimore, Dec. 16.*—Senator Hale attended the banquet in this city last night, to the Amoskeag Veterans, and made a Union speech.

Well: what of it? What sort of speech should he make?

The South Carolina Conference have resolved to sell their interest as individuals in the stock of the South Carolina Railroad Co., "because the Company would work on the Sabbath day, and they did not wish to partake in making money on the Sabbath."

Bets to the extent of thousands of dollars were made in New York upon the verdict in Baker's case. The jury has been discharged. He will be tried again in January.

LOCAL.

☞ The lecture before the Young Men's Christian Assocociation, last Sunday evening, was by Rev. Arthur S. Train, a baptist clergyman, of Haverhill, Mass. He gave us the beginning of a good lecture on the Baconian principle in Philosophy, viz. to look at facts rather than theories; and applied the principle briefly, but very happily, to common affairs in life. Then he turned to religion, and finished the discourse by a short sermon from "Be not deceived—that which a man soweth, that shall he also reap He that soweth to the flesh shall of the flesh reap corruption; but he that soweth to the spirit shall—reap life everlasting." This text he interpreted and illustrated as might be expected from an Evangelical minister who told us at the outset, quoting from Mrs. Partington, that he should not "dispense with the Gospel" in his lecture.

We should judge the orator to be a man of talent; and have no doubt he would be a pleasant lecturer on general subjects, to a miscellaneous audience, where he felt at liberty to "dispense with the gospel," as he did not feel in this instance.

The weather was quite unfavorable, and the audience consequently thin.

The next lecture before the Association is to be by Rev. Dr. Huntington, of Cambridge.

SWINISH.—At the livery stable of Messrs. C. H. Sides & Co., on Warren street, in the rear of the Rockingham House, we saw yesterday one of the largest porkers of the season. He resembles the Suffolk breed, except in being so large, and has the broadest back we ever saw on a hog. It is estimated that he will "dress" upwards of six hundred pounds,—that is, that he will weigh all this when *undressed*, literally. He is rather a comfortable item to think of, to fill sundry pork barrels and vacancies at dinner time, between this and New Year;—but another occurrence at the above stable yesterday, probably is not quite so agreeable.

One of the horses, that was left well in his stable on Sunday night, was found near the door on Monday morning, dead. On examination, it appeared that he gnawed off his halter in the night, ate nearly half a bushel of corn from a barrel standing near, drank liberally, laid down and died. Perhaps he was trying to "make as big a hog of himself," as his neighbor the porker; but he only made a similar failure to the frog in the fable. He was a good animal, valued at upwards of a hundred dollars.

☞ We have been credibly informed that a busy body on the Navy Yard, not a high officer, has attempted to stop the circulation of the Chronicle among the workmen, by threatening to have a man discharged if he persisted in distributing them. The threatened man very wisely desisted, not being disposed to risk his bread and butter for a consideration so paltry as the circulation of a few papers.

It is a matter of little consequence to us, in what way our papers go to the Navy Yard; for the working men will get the paper somehow. But it is a matter of some consequence to know, whether a petty officer, who has really no more business to control the workmen than to control the commodore, shall be suffered to say what papers any man shall read, and how he shall get them.

Do we live in despotic Prussia? in Imperial France? or in Republican America? Is the press free? and the people *not* free to read? May a mere meddler without any proper authority, thus tyrannize over workmen far better than himself, by merely pulling a wire which runs to Washington? If so, *are* we a free people? and what is *meant* by freedom?

☞ Those young *ladies*, who steal the Chronicle from the doors of the stores on Market Square, would greatly oblige us if they would discontinue so reprehensible a practice. It is unpleasant to us to hear the complaint so often from subscribers that they don't get their papers.

NAVAL.—*Launch of the Steam Frigate Roanoke—Slight Disaster.*—The launch of the Roanoke at Norfolk, on Friday, at 20 minutes past 12 o'clock, was a beautiful sight, and witnessed by an immense crowd, who cheered her as she moved gracefully and grandly into the water. The old slip was not entirely suitable for the launching of a vessel of such immense length; and when she was afloat, it was discovered that she had sprung several ribs and a couple of planks, and was leaking. The launch was, to all appearance, the most successful, beautiful and exciting ever witnessed at the dockyard; and Mr Hartt was congratulated by the Commodore and all his friends. The ship will be hauled into the dry dock, and the injuries soon repaired.

The Herald's correspondent at Washington telegraphs that it is rumored that the Roanoke has been injuriously hogged, or in other words broken her back by having been too severely "shored" upon the ways. The support thus afforded being taken away or injudiciously diffused when placed in her natural element, the ship has spread and opened to such an extent that she has become filled with water.

The quantity of wheat in store at Oswego, N. Y., is about 820,000 bushels. About one third of this amount is on millers' account. There is also in store nearly 100,000 bushels of corn for the Oswego starch factory.

ROBBERY.—The house of Mr Samuel Peavey, who lives on the road from Exeter to South Newmarket, was robbed on Tuesday evening of last week. The thief or thieves entered the front door, ascended the stairs, and took a trunk, which contained all his valuable papers, certificates of railroad stock, the deed of his farm, one or two notes, and money to the amount, as nearly as he can recollect, of $110 or $125. The sitting room, under the chamber from which the trunk was stolen, was occupied at the time it is supposed to have been taken, that is, somewhere between 6 and 7 o'clock, by Mr Peavey's mother, his three sisters, and by Mr McDuffie and wife, who were present as visitors. The robbery was not discovered till the next morning.—The trunk was found about twenty rods from the house. It had been broken open with a stone and rifled of its contents with the exception of a few papers of little value.—*Exeter News-Letter.*

OBTAINED BAIL.—William S. Tuckerman, the defaulting Treasurer of the Eastern Railroad was, on Saturday morning, bailed out of custody. His mother, resident in South Boston, and Mr Thomas Trask, of Salem, became the required sureties ($7500) for his appearance at the January term of the Municipal Court, Boston.

WASHINGTON, Dec. 16.—The prospects of the election of a Speaker to-morrow are apparently not more promising than they were when the House adjourned yesterday, though plans relative to an organization are privately discussed.

WORCESTER, Ms., TRIALS.—The Attorney General entered a *nolle prosequi* in the second indictment against Stacy for murder, and the prisoner was discharged. A *nol. pros.* was also entered in the case of Ann Jane Crowley, indicted for the murder of her child, by drowning, at Fitchburg, in October, 1854.

SUDDEN DEATH.—The wife of Mr William Tufts, confectioner: at 727 Washington street, died suddenly while sitting at the dinner table, on Friday—supposed from an affection of the heart. This is the ninth very sudden death that we have been called upon to report within the past two weeks.—*Boston Chronicle.*

SHIPBUILDING AT KENNEBUNK.—There have been built and registered at the Kennebunk (Me.) district, the past year, seven ships, two barks, one brig, and one schooner, with an aggregate tonnage of 7641 58-95 tons.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

THURSDAY, Dec. 13.

SENATE.—Some conversation occurred respecting the appointment of clerks to Congressional committees, and with regard to the arrangement of Senators on committees, and in the latter case it was decided that members should stand as placed by the Democratic caucus, and not according to the votes which they received in the Senate, which arrangement drew out some characteristic observations from Mr Hale, who said in reply to Mr Cass, the Chairman of the caucus,—

I suppose that the honorable Senator from Michigan, in making this move, as he intimates, to relieve the feelings of some gentlemen, must have had me in his eye, [laughter] for I find that I am put at the tail end of the Committee on Public Buildings. The chair will recollect that a few years ago the state of my political health was such that I was not fit to go on any committee.

Mr Cass (to Mr Hale.) You have improved since then. [Laughter.]

Mr Hale. Yes sir: I think it indicates progress; it shows that I am so improved that I am fit to be at the tail end of the Committee on Public Buildings. [Laughter.] I am perfectly content, and I hope I shall be allowed to remain there.

Mr Seward indicated that he was content with the Democratic arrangement, which was adopted.

SATURDAY, Dec. 15.

HOUSE.—Mr Hickman, Democrat, offered a resolution that no person shall be considered a candidate for Speaker who shall not be supported as such on the sixtieth vote, and after that time, all but the two highest candidates be dropped—a choice then to be made between them, and the one obtaining the largest to be the Speaker, provided he receives a majority of the quorum of the House.

Mr Letcher of Virginia suggested that the Clerk prepare a letter, to be signed by the members of the House, resigning their seats, in order that a new election be held in all the states and territories.

Some slight conversation ensued, and the proposition of Mr Hickman was tabled by acclamation.

There were two ballotings for Speaker, but no choice. Banks left off with 105, and an adjournment then took place.

FROM CALIFORNIA.

NEW YORK, Dec. 17.—The steamship Empire City, from Aspinwall, with the California mails and treasure, arrived on Saturday.

The Empire City brings the California mails, one million, seven hundred and fifty thousand dollars in gold dust, the South Pacific mails, and about five hundred passengers. She has later dates from the South Pacific, but no later accounts from California.

She left Aspinwall at midnight, Dec. 6, and brings the treasure brought down by the John L. Stevens.

LETER FROM RIO.—Advices from Rio Janeiro arrived to Oct. 18. During the latter part of September there was a violent gale at Montevideo, during which the English brig Maida, from Boston, bound to Buenos Ayres, was wrecked just outside of the inner harbor of Montevideo. No lives were lost. Political affairs in Brazil quiet. Cholera was still raging in Rio, carrying off daily from fifty five to seventy-five victims. It was also spreading in the country towns, and had made its appearance at Pretopolis, a city high up the mountains. Business dull. Coffee scarce, and held too high for shipment. There was forty American vessels in port, and some of those chartered for the round voyage were going home in ballast. The U. S. ship Savannah sailed on a cruise on the 5th inst.—The U. S. ship Germantown was at Montevideo. The U. S. brig Bainbridge sailed from Montevideo for Rio de Janeiro Sept. 25. The U. S. steamer Water Witch arrived at Montevideo from Martin Garcia Oct. 5.

THE ESCAPED SLAVES OF THE SHIP MIDDLESEX.—We published, from the Times, recently, a brief account of the picking up, off the coast of Florida, by the ship "Middlesex" at this port from New Orleans, of two colored men, supposed to be slaves. We learn that on the arrival of the ship at this port they were suffered to leave unrestrained, and in due season were provided by friends with suitable clothing, and left for the Northern asylum, Canada, where they now are. The fugitives did not make much unnecessary conversation, but when we add that small canoes cannot live a great while off the coast of Florida, that they can float easily upon the Mississippi near the Balize, that the negroes were kindly treated on board the "Middlesex" instead of being put in irons, that they were suffered to go at their pleasure upon arrival here, and moreover, that they are unusually shrewd and intelligent, it may be inferred what they did say, from whence they escaped, and who took an interest in getting them their freedom.—*Boston Chronicle.*

THE STEAMER VANDERBILT ON THE ROCKS ABREAST OF RANDALL'S ISLAND.—Between 7 and 8 o'clock this morning,—and though the sun was out,—it was so foggy that the Vanderbilt steamer run ashore abreast of Randall's Island.

When the officers of the boat discovered that they were in danger, they attempted to throw out the anchor,—but the chain caught in the windlass, which prevented the anchor from reaching the bottom, so as to hold her. The boat then, in the thick fog, immediately swung round on the rocks, and with the whole force of the strong tide, abreast of Randall's Island. They were afraid to use the steam to put her ahead, lest they should run ashore,—and they had depended on the anchor to hold her.

The passengers from Stonington, about 100 in number, were taken on board the Connecticut, the Norwich boat, which brought them to this city about 12 o'clock.

The Vanderbilt lies on the rocks, the tide receding,—and will be nearly high and dry at low water. If she is got off the damage will be perhaps $20 000 or $25 000. If she don't leak too badly,—she will doubtless get off, when the tide rises again.—*N. Y. Express 14th.*

EMIGRATION.—The New York Times computes the falling off of emigration, this year at about 50,000 from last year.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. Harrison's American, *made* by an American, and worthy the use of all Americans. It is wholesaled and retailed by

G. W. STONE'S
LIQUID CATHARTIC,
—AND—
Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectively upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual Costiveness? three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Science, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by his eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "Dr. Burleigh Smart's Cough Mixture, Shaw & Clark, Bromfield, Mass., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a neatly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

UFFORD'S
CELEBRATED SMOKE
Consuming Patent
LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used. I just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1,25.

INDEPENDENT CHURCH.—Such of our readers as remember an item about Fifteen Skippers surveying a new craft at Gloucester, a year ago, will understand the following note, which we copy from the Gloucester Telegraph of the 15th.

DISSENT.

MR. EDITOR:—Letters have been written to and received from the clergymen who disappointed us in not coming to the proposed Ex-parte Council.

At a meeting of the aggrieved members of the Evangelical Congregational Church, last Tuesday Evening, these letters were read; and in view of them, and of their experience in Councils, as also in view of their protracted but most unsuccessful efforts to obtain kind treatment for themselves and minister, and to secure a recognition of their Christian rights and liberties from the Church to which they now belong,—it was *unanimously voted* to have no more to do with ecclesiastical Councils in the settlement of difficulties; or with the Evangelical Congregational Church in Gloucester, as members thereof; but to signify to that church their *immediate* withdrawal, as a Dissenting body of Christians, and proceed to form a new Church and organize a new Religious Society and sustain Christian worship by themselves, in order to the enjoyment of that Liberty with which Christ has made them "*free*," and in which an inspired apostle bids them "*stand fast.*"

By publishing this, that the community may understand our present position, you will much oblige, Mr. Editor, yours,

In behalf of the Committee,
J. L. HATCH.

A TROUT FISH LIVING IN A WELL TWENTY-FIVE YEARS.—Mr F. Hoyt, a correspondent of the Country Gentleman, writing from South East, New York, Nov. 9th' says:—

"Can any one tell how long a trout fish will live? Twenty five years the past summer I came on the farm where I now am. Almost the first work that I did after getting in my spring crops, was to drain a bog swamp, the outlet of which leads into the Croton River. I had an old Scotchman to do the ditching. One day he brought up a trout fish about the size of a man's little finger, in his whiskey jug (by the by we used a little on the farm then, and *not since then.*) I put it in the well near the house, and it is there now, grown to a goodly size—say about a foot long, and large in proportion. It has been fed but very little: once in a while some one throws in a grasshopper or a cricket, to see him catch it. The well is thirty feet deep, and water hard, settles down nearly to the bottom, and then again rises to near the top. He has been taken out a few times to clean out the well, but not for the last five years.

Friday last I got a grasshopper, the last one I expected to see this fall, and gave it to him. The water is now twenty five feet deep, but it had hardly touched the surace before he had it. If any one has a fish older than mine I would like to know it.

ANOTHER TROUT STORY.—In connection with the item of the trout which lived in a well twenty-five years, the Bangor Mercury gives the following;—

"Many years ago a trout was caught by the keeper of the Augusta Dye House, and was kept in the dye-house in a half hogshead of water which was set over a living spring. The fish grew to be a foot long, and wondrous fat, and, what is true and perhaps not strange, always recognized his master, and one or two of his neighbors' children, and would come up to the surface to take food out of their hands and play with them. When strangers came in, and he had many visitors, he would go down to the bottom of his tub, like Diogenes, and remain there dignified and distant, but clearly visible in the limpid water. At the time of the great freshet in Augusta, the dye-house was completely overflowed, but the trout remained in his tub, and was found there by his gratified master when the water subsided. A year or two since some unknown wretch furtively caught him having broken into the dye-house for that purpose. His loss was regretted by many admiring friends.

Forefather's Day will be celebrated at Plymouth by the Pilgrim Society on the 21st instant, instead of the 22d, as the 22d falls on Saturday. Unusual preparations have been made. The oration at Pilgrim Hall, will be pronounced by Wm. H. Seward, of New York. A dinner and ball are to follow.

We hear that a pair of numskulls have been digging for treasure in Boston, in an arch way leading from Revere street. They said they were digging for buried treasure, under the direction of the spirits, and added that two or three times they had raised the treasure nearly to the surface, when an evil spirit caused it to drop down again.—*Charlestown Adv.*

TIME OF ADAM'S FALL.—Rev. B. P. Hildreth, in an article in the World's Crisis, says:

God first created all things in six days and rested the seventh; and on the eighth Adam fell; as appears from Gen. 3: 8; and it became necessary for Him to commence the work of new creating and restoring what was so speedily lost, on the eighth day; which He did by an unqualified promise, that the seed of the women should bruise the serpent's head. The work of redemption began on that day; the work of bruising was performed on the cross; but our redemption will not be completed till Christ comes, and brings us to our long promised inheritance, named by God himself as the purchased possession; which can be no other than the new earth.

To show the item fairly, we copy the verse referred to, viz. Gen. 3: 8.

And they heard the voice of the Lord God walking in the garden in the cool of the day: and Adam and his wife hid themselves from the presence of the Lord God amongst the trees of the garden.

"CLAP-TRAP."—A correspondent of the Notes and Queries asked the derivation of this term, to which the editor of that unique publication replied that it took its name from clapnet, a device for catching of larks; for, according to Bailey, "A clap trap is a name given to the rant and rhymes that dramatic poets, to please the actors, let them go off with; as much as to say a trap to catch a clap by way of applause from the spectators at a play."

EPIGRAM.—The following *jeu d'esprit* we find in the New York Evening Post:

As my wife and I sat the window one day,
Stood watching a man with a monkey,
A cart came by with a 'broth of a boy,'
Who was driving a stout little donkey.
To my wife I then spoke, by way of a joke,
'There's a relation of yours in that carriage;'
To which she replied, as the donkey she spied,
'Ah, yes, a relation—BY MARRIAGE!'

Morning Chronicle.

WEDNESDAY, DECEMBER 19, 1855.

The Universalists of North Carolina are having a controversy with Judge Manly, of that State, for his decision that no man who does not believe in a future state of rewards and punishments can be a competent witness in North Carolina. The Judge has written a letter in reply to some resolves passed by them, in which he fully sustains his opinion by quotations from the constitution. That provision is an outrage upon a large class of persons.

We have read Judge Manly's letter. His own view of the matter is, that the law ought to be so altered, that any man can be a witness. But as the law stands, he must administer the oath in one of three ways—viz; 1, the *usual* North Carolina form, which is a great imprecation: 2, a form prescribed for Quakers &c., in which the affirmer must say that he belongs to one of the sects therein named: and 3, the one which he offered to the Universalian witness, in which some reference is made to the Great Judgment Day in the future world—in which the witness frankly told him he did not believe.

The Judge was surprised, as he tells us in his letter, that he supposed all Universalists believed in a state of punishment in the future life, limited as to its duration.

The learned judge may probably have seen some works of Elhanan Winchester, who was a universalist of the Restoration school and lived in North Carolina long ago: but he is evidently not posted up in modern theology.

As the law stands, the Judge applied it correctly. But the law needs alteration, and so do the laws of all the States about oaths. First, nine-tenths of all the oaths should be abolished as useless: Secondly, the remainder should be reduced to a mere Quaker affirmation, "under the pains and penalties of perjury": and Thirdly these pains and penalties should be inflicted, as often as proof of perjury could be made out.

Blue Devils.—A few evenings since, one cold night, while sitting quietly in our chair, (says the editor of the Charlestown Advertiser,) we heard a series of unearthly groans, which came apparently from the room above us, and were suddenly impressed with the idea that some poor fellow had cut his carotid artery clean off with a jack knife. On arming ourselves with a couple of cards of matches and climbing up another flight of stairs, we stumbled upon a man wallowing and crawling on the cold entry floor like a frightened cur, and endeavoring, apparently, to hide himself from some fear unseen to our eyes, groaning and howling all the time. The sight was painful and appalling, and when holding a lighted card of matches down, the lurid glare revealed the features of one of our well known citizens, the full horror of rum's works almost overwhelmed us with amazement. Our voice only increased the man's fears, and when once got upon his feet he shook like an ague, and glared upon us frightfully, and made signs to us to keep off, and on our stepping aside he clutched at the bannisters, passed us down stairs and tottered away, still glaring at us over his shoulder.

We do not know the sequel, but a poor wife and children we do know must have experienced two fold ere this all our feelings for the present, mingled with heart broken sorrows and crushed hopes which the future fearfully opens to them.

And this is only one of the cases, alas so common, which took place in Charlestown. In the Portsmouth Watch House on Tuesday morning, we saw a man who had worked off his rum in the night time, by breaking every pane of glass in his cell.

Musical Anecdotes. — Mr. Samuel French, of No. 121 Nassau street, New York, has just published a neat, well printed and amusing volume, entitled "Crotchets and Quavers: or Revelations of an Opera Manager in America. By Max Maretzek." It is not *merely* an amusing volume; it contains a fund of information as to the life inside the scenes, of those who minister to the public taste, in music or anything else.—The Astor Place riot; the successful engagement of a Mexican lady singer, (who could not sing much,) in her native place;—and hundreds of other Musical Stories and Anecdotes, are well told.—It must be a saleable book: and it may be had of Mr J. F. Shores jr. in this city.

CONGRESS.

Monday, Dec. 17.

Senate.—In the Senate this morning, nothing of importance was done.

House—Mr Dunn of Indiana made a personal explanation touching certain strictures on his course published in the New York Tribune, intimating that he was not to be driven from his position by any outside pressure, but he was still ready, as he always had been, to acquiesce in the cause of anti-Nebraska, and surrendering all local and personal predilections, agreed to stand on equal terms. The trouble thus far has been that Cæsar has a party and Anthony has a party, and Rome none. Certain gentlemen had stood aloof, and the ballotings would show who and where they were.

Mr Banks rose, and amid loud cries of "fair play, hear him, no objection," &c., remarked that he was not accountable for what the New York press said of him, never having solicited their support. He relied on himself alone, and begged Mr Dunn not to hold him responsible for compliments or censure in the Tribune or Times.

Mr Dunn replied that he did not do so, but was opposed to him (Banks) on the grounds published in those journals in May, 1854, relating to the course of Mr Banks on the Nebraska bill; but he was willing to surrender the opposition the moment all the anti-Nebraskaites came together.

Mr Banks repeated that he was independent of the New York press in all respects, and further, in reply, insisted that he never yielded a particle on the Nebraska bill. He had since met the people face to face, and at the last election they gave him 7000 majority, the largest known in the political history of Massachusetts. He had acted as he thought regarding the Nebraska bill, and the people had sustained him.

Mr McMullen of Virginia offered, as a compromise, a proposition which he said was the production of his own humble imagination, (laughter,) but he begged gentlemen to consider that he did not, in submitting it, design to build up for himself a reputation of being popular at home.

The resolution was to the effect that after organization was effected, no business should be transacted except the passage of the necessary appropriation bills; the members then to resign and go home. A blank was left in the resolution, to be filled with the name of some gentleman to act as Speaker until the aforesaid purpose was accomplished.

Mr Dunn of Indiana suggested a modification of the resolution, providing for the repeal of so much of the Kansas-Nebraska act as destroys the Missouri Compromise. [Laughter.]

Mr Houston of Alabama—That is only a slight modification. [Merriment.]

Mr McMullen of Virginia could not think the gentleman from Indiana made the suggestion in good faith. On the adoption of his resolve all could return to the people on that very issue.

Mr Grow of Pennsylvania, referring to a remark of Mr McMullen, that he (Mr McMullen) would take Mr Richardson as a national man on a national platform, said that only seventeen Northern members had voted for him with the Southern members, so he supposed these seventeen Northern men made the National party.

Mr McMullen—How many Southern men voted for your candidate?

Mr Grow—Don't know.

Mr McMullen—None.

Mr Goode of Virginia—Have you seventeen members from the North who will vote for a Southern man, or that number from the South who will vote for a Northern man? You have shown that your nationalism consists of sectionalism.

Mr Grow stated that the members in opposition to the 17 from the North, who support Mr Richardson, represent three millions people living North of Mason and Dixon's line, while the 17 voting thus represented only 700,000 living South of it—"which, then," he inquired, "has the best claim to nationality?"

Mr Jones of Pennsylvania wished to know how his colleague could make it appear that 17 Northern men voting for the candidate of the Democrats, who is a Northern man, constitute a Southern vote. This simple arithmetical question he wanted his colleague to cipher out.

Mr Morgan of New York. I move that this Buncomb resolution be laid on the table.

Mr McMullen. If you say it is Buncomb, I say the assertion is false. (Sensation.)

Mr Paine of North Carolina said he came there to transact the public business and throw no obstacle in the way. Acting as a national man he thought the proposition of his colleague fair, i. e., for the South to select a Northern man, or the North select a Southern man.

Mr McMullen, interrupting. We on this side are acting on that suggestion. The South is voting for a Northern man.

Mr Paine, resuming. And we of the South have selected and voted for a Northern man.

Mr Fuller—We are in the situation of a sick man needing physic—[laughter] however nauseous it may be in any emergency, no man can refuse to take it, but I imagine no man can be so foolish as to have it forced down his throat.

Mr McMullen's resolution was then tabled, after which the House voted twice for Speaker, the second ballot resulting as follows:—Mr Banks, 105; Richardson, 73; Fuller, 38; scattering, 7.

Mr Broome of Pennsylvania here submittel a proposition by which he said the difficulty of an organization could be removed. The difficulty was, he considered, the question of the extension or non-extension of slavery in the territories of the United States. His resolution was that both Houses, and the President assenting, the question of the power of Congress over slavery in the territories be submitted to the Supreme Court. Their decision to be final and conclusive. [Laughter in some parts of the hall.]

Mr Broome said that the subject was one too serious for merriment.

Mr Humphrey Marshall inquired whether it was in the contemplation of gentlemen to wait for an organization until the Supreme Court shall decide. (Laughter.)

Mr Broome explained that it was not a joint resolution, because the House had not yet organized itself. If this question is determined we shall hear no more about compromise lines in regard to slavery.

Mr Smith of Tennessee thought that the difficulty was disclosed by Mr Campbell of Ohio, the other day, who intimated he could have been elected Speaker if he would make pledges in relation to the formation of standing committees, or modify his opinion on the subject of slavery. The difficulty then is as to the formation of the committees; remove this and there will be no difficulty in making an election. The Democrats will neither receive nor make propositions.

Mr Broome then withdrew his proposition, and the House resumed voting with the following result:

Banks, 106; Richardson, 73; Fuller, 38; scattering 2.

Messrs. Harrison, Winslow, Williams and Orr, one each. Necessary for a choice 112.

Mr Thorington then offered a resolution for the election of a Speaker by plurality, pending which the House adjourned.

LOCAL.

☞ The Mercantile Library Association's entertainment on Tuesday evening, consisted of an introductory performance on the Grand Piano Forte, by Mr. Meinerth; of a Poem entitled the Money King, by John G. Saxe, Esq.: and of an extract from another poem, on The Press.

Mr. Saxe has been sick recently, and has not so fully recovered as to give all the force he would, to some passages: nevertheless he showed the true poetic fire and the true adaptation of poetic thought to the popular ear.

The evening was pleasant; the audience large; and the entertainment well received.

The next lecture is to be on Saturday evening, by Prof. Huntington.

Mr. C. M. Meinerth favored the audience with a half hour's very creditable and acceptable performance on the Grand Piano, before the poem He played well, though with less force than if more accustomed to so heavy an instrument.

SUPREME JUDICIAL COURT.

The Supreme Judicial Court met at Dover on the 11th inst., and adjourned on the 15th. The five justices, Perley, Bell, Eastman, Fowler, and Sawyer, were present. It was the law-term, at which there were no jury trials. The first Judicial District embraces the counties of Rockingham and Strafford. There were about one hundred cases on the Rockingham and Strafford dockets, and a large number, including many libels for divorce, were decided. There were not many causes of great interest. The controversy between the Portsmouth & Concord Railroad, and the bondholders, for want of time, was postponed for a hearing and argument, to Thursday next, in Belknap county.

The cause of Waters of Cambridge vs. Emery, Haven and Peirce, in which the Plff. claims of the Defendants twenty thousand dollars, with interest, on their stipulation, in substance, to make good to the plaintiff to the amount loaned, 672 shares in the P. & C. railroad, which Mr Nott conveyed to the plff. upon a loan of $20,000 to him, was also postponed to Belknap county, Thursday next, when it is expected the arguments in the cause will be resumed. The shares were valued at $33, and in case the plaintiff should not realize the amount of his loan, he was to reconvey the stock. The late Chief Justice Parker, of Cambridge, made the argument for the plff. Mr Marston of Exeter will this week make the argument for the defts.

The controversy between Claggett and Simes, which has been in court a number of years, was brought before the court, on a motion for an amendment of the pleas, and a rehearing in respect to matters in which there had been some mistakes in respect to the pleas. The Court ordered the parties to file briefs in 60 and 90 days in order to a hearing at the next law term.

A short time ago we examined at the store of Stephen H. Simes, Esq., a pattern card of cloths, which he then had, and which were imported in 1720 by Sir William Pepperell.—These patterns, although very old, are still in good order and are superior to any that are imported at the present time, both in quality and color. We have also seen within a few days, at the same place, an assortment of buttons, twelve in number and assorted colors, which are said to be over one hundred years old. The samples of cloth and buttons are really a curiosity, and are well worth examining by those who would like to see the kind of cloth and buttons which were used by such men as Pepperell. S. W. C.

REMEMBRANCE OF S. R. C.

"Mortality's thick gloom
Hangs o'er a sunny world."

There comes unbidden to my eye a tear
Full-freighted from pathetic memory's shore;
There seems a voice, like one that oft was near,
Which tells my heart, *he* comes no more—no more!

O, spirit genial, ere thy sun had passed
Meridian splendor, darkness dimmed the sky;
Disease insidious stole upon thee fast,
And laid the casket cold and silent by.

How oft with mutual voice we've told the tales
So deeply writ in stones, and trees, and flowers;
And praised the fragrant breath of gentle gales,
With kindred hearts, at summer evening hours.

At Nature's altar we can kneel no more—
Alas! no more in life's fast closing page.
'T is hard to strand upon Death's icy shore,
Ere the full voyage is up of ripened age.

Mysterious fate! deep, trackless sea!
Ocean unfathomed by the searching brain!
Firm let us cling to *Immortality*,
And cherish hope, that friends will meet again.

Boston, Dec. 11th, 1855. Alphonzo.

Mrs. Gaines's Case.—*New Orleans, 17th.*—In the U. S. Supreme Court this morning, a decision was given in the Mrs. Gaines case, revising the decision of the Second District Court, and declaring that Daniel Clark's will of 1813 shall be probated, and Mrs. Gaines put in possession of the immense estates left by him.

If the slaves were not kept by their owners they would perish. They cannot take care of themselves.—*Speech of Stephens, of Ga.*

John Little, a fugitive slave, who went into the Canadian woods without a dollar, has this year raised crops that will bring him $2400; He thinks he will be able to "take care of himself."—*Albany Journal.*

Reading out Senator Hamlin.—The Washington correspondent of the Boston Post says—

"Mr Hannibal Hamlin has deserted the democratic party and its principles, and he should not be retained in a place (chairman of the Commerce Committee) where by its privileges he might defeat the vital policy of that party upon questions coming under the immediate purview of the Commerce Committee. Such, I discover, is the general opinion here."

Senator Mason.—The fugitive slave bill was a great help to Mr Mason of Virginia in the contest for the Senatorship. The radical Democracy had become a little truculent, and there were some cries of "rotation in office." But the friends of the other candidates were silenced by the remark that the author of the fugitive slave law must not be sacrificed, and thus the Senator was saved.—*Boston Courier.*

At a recent convention in Philadelphia, Mr Garrison made a dissertation upon the difference between the slave-holder and the apologist for slavery. He denied that there were any benevolent slaveholders, for the laws of slavery were Draconian, and forbade kindness. He considered the South as one vast graveyard, and argued that the Abolitionists desired to save the slaveholders themselves from the curse. The resolutions are eloquent upon the Passmore Williamson case, and are not at all complimentary to Judge Kane or the Supreme Court of Pennsylvania, excepting Judge Knox. —*Ibid.*

☞ The Boston Journal, on Monday morning, appeared in a complete new dress. The Journal is one of the best *news* papers in the country.

The Rochester Tribune says the cost of wheat now held by millers in that city (in store and in transit,) is over $1,000,000; and that the profits of the milling business for the past season already exceeds 500,000.

Grand Musical Festival.
THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION
Will hold a
PUBLIC MUSICAL CONVENTION,
AT HANOVER STREET CHAPEL,
Portsmouth, N. H.,
Commencing on Tuesday, Jan. 8, 1856,
To continue three or four days, and close with at least one
GRAND CONCERT
of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of
Prof. B. F. BAKER, of Boston,
With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choisters, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

SWINDLERS AND THIEVES.—The Boston Courier of Tuesday, says:

Our late highly respected fellow citizen, Josiah B. Kilbourn, Esq., who wrote a letter to his wife that he was "going over Cambridge bridge," and who, a day or two before his mysterious disappearance, stuffed his pockets with ten thousand dollars worth of bills of exchange on London, paying for them in checks, is in England. So he writes, in another letter to his wife, in which he invites her to come to him.

The Boston Journal states on good authority, that no information has been received respecting Mr Kilbourn—nor has sufficient time elapsed for communication with England since he has been missing.

No word yet, by spiritual or magnetic telegraph, of Mr G. Francis Thayer, the late Cashier of the Grocers' Bank, who transferred ten thousand dollars of the bank funds into some speculation, - but upon being discovered in the trick, restored $5500.

A new commotion was excited in State street yesterday, by the disclosure of the fact that $9500 had been stolen by somebody. It is the practice at the Suffolk Bank to place the bills of other city banks in special boxes, from which the packages are taken every morning by the paying teller and handed to the messengers of the other banks. On Thursday morning the messenger of the Washington Bank went, as usual, to make his exchanges. The box at the Suffolk was emptied as usual into his bag, and he proceeded to the Washington Bank, where, on counting the bills, the sum of seven thousand dollars was found to be missing. The Suffolk Bank contends that it delivered to the messenger of the Washington the full sum due that bank. The messenger replies that he delivered all that he received to the cashier of his own bank. A similar "accident" has occurred between the Suffolk Bank and the Merchants' Bank. The amount is $2500. The Suffolk Bank claims to be able to show that the bills were delivered. The Merchants' Bank replies that it never received them. Thus the matter stands at present. The whole affair is wrapped in a deep mystery, which all the efforts to solve have, thus far, been in vain.

Thomas Daly, who stole $16 in bills from Thomas Casey, was yesterday taken before the Police Court, tried and sentenced to six months in the House of Correction; and Julia Sullivan, who, while on a begging errand at the house of John Wolcott, stole five dollars worth of articles, was sent to the same establishment. That's the way the world goes.—Schuyler, who steals thousands, and men like him, enjoy the luxuries of Italian skies, and the refined society of the great in the Old World, while the mere mimics of criminals are hustled into solemn prisons.

VIRGINIA AND KANSAS.—*New York, Dec. 17.*—There was an exciting debate in the Virginia House of Delegates, on Friday, on Mr. Wellman's resolution to raise a regiment of volunteers to tender to Government, for the purpose of putting down the disturbance in Kansas. Mr Wiley thought that resolution too harsh, and proposed as a substitute, that a Joint Committee be appointed to consider the present troubles in Kansas, and to inquire what action Virginia should take in reference to the subject. Both the resolution and substitute were referred to a committee.

GOVERNOR OF WISCONSIN.—*Milwaukie, Dec. 17.*—The State Board of Canvassers at Madison, declare Mr Barestow, Dem., re-elected Governor of Wisconsin by 150 majority. There is much excitement concerning it, and his election will be contested.

DEATH FROM CHOKING.—An Irishman, in Exeter village, whose name we have not learned, was choked last Sunday week, while eating his dinner, by a piece of meat. The efforts made to relieve him were unsuccessful and he died after a few minutes.—*News Letter.*

FATAL COSMETIC.—Two ladies of fashion in St. Louis have recently died suddenly. Cause—arsenic taken in small doses to give brilliancy to the complexion.

LIFE IN THE LOCK UP.—The Portland Enquirer contains the following item:

"I TREMBLE FOR MY CHILDREN."

Such was the pathetic exclamation of Ex-attorney Gen. Clifford at a Ram Caucus called to oppose the election of Mr Dow as Mayor. "Under the iron rule of Mr Dow, I shall tremble for my children." It seems to us, that he may well tremble for his children, or one of them at least, on account of his habits of intemperance. Some young men last Saturday night had a good time at a supper at the U. S. Hotel, and in the small hours of Sunday morning, they proposed to take a walk to cool themselves, as the oysters had probably got into their heads. But they made such heavy weather, that the police picked up some of them—among whom was young Clifford—and put them in the lock up.

Here was a decided fix; in the *lock up* on *Saturday night*, to lie over until Monday! Oysters and Sham Pain, that will never do! So their friends tried to beg them off, but the officer of the night was inexorable, telling them he could not let them off without a written order from the Mayor.

They then went to the Mayor's house, as we learn, at about two in the morning, to get the "*sealing*," and gave the Mayor to understand that the "three" were much injured and persecuted individuals; that they were just taking a walk, not at all drunk or noisy (except a song or two, and a few gentle laughs—very gentle, so as not to disturb the city) when the police "nabbed" them without a moment's notice, and bore them off to the lock up, most ingloriously, just as they would so many drunken Irishmen. We learn that the Mayor gave them an order to the officer, that if the youths were not drunk nor noisy he should discharge them;—the officer did not let them go.

We are aware that in many cities, the practice is, to favor *oysters* and *champaign* under such circumstances, while Irishmen and bad rum are "*put through*." For ourself, we approve the course of our Mayor, who has, as we understand, one uniform rule for all.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who constitute the Farmers—all the country round. 644,—of this ink sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON the AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by

d20 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actually corrode steel pens, or *chemically decompose the paper* or *its coloring*. I have seen paper where every letter written with Harrison's Blue was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S INK is AMERICAN, made by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

DR. BURLEIGH SMART'S

Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician of great skill and success. His practice was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"He was an man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession. Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and efficacious medicinal agents combating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the System as to remove the Cause, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, and every secretion, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of tri-colored paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CELEBRATED SMOKE

Consuming Patent

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast supersiding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.

DEATH'S DOINGS.—The Boston Telegraph tells us that a woman twenty-nine years of age, named Jane McLellan, died in the Hospital at the House of Correction, in that city, 23d ult. She was in an extremely weak and debilitated condition when committed from the Police Court the Friday before. Coroner Smith summoned a jury to investigate the circumstances attending the death of the woman, and a verdict was returned that "the deceased came to her death from delirium tremens, having been, when committed on the 16th ult., in a state of great exhaustion from previous intemperance and exposure."

In Cincinnati on Tuesday, Archibald Baxter, the keeper of a drinking saloon, was killed by his son John, the two having quarrelled about opening a window, one insisting that it should be opened and the other that it should not. Christopher Reister, an aged schoolmaster, was set upon at St. Louis on Sunday night, by a party of rowdies who mistook him for a bar-keeper by whom they had been turned out of doors. The villains literally cut him to pieces with their knives.

The Ohio State Journal of the 29th ult., relates the following:

On Friday last, Judge Williams of Union county, at one time associate judge of that county, while in a state of intoxication, seated himself on the railroad track, in the vicinity of Urbana, and was knocked off the track by a freight train, and his foot was crushed in such a manner, that amputation had to be resorted to the same night. We learn that Judge Williams died last night from the effects of injuries received at the time. It is due to the engineer of the train to say, that when he found the person would not leave the track, he reversed his engine, and jumped off and endeavored to run ahead of his machine, to save Mr Williams, but missed it by no more than two steps. The judge leaves a wife and children to mourn his loss.

SPIRITS RUNNING LOCOMOTIVES.—The Old Colony Memorial, published at Plymouth, narrates an incident which is sufficiently marvelous to please the most ardent believers in "signs and wonders." It states as a matter of common notoriety in Plymouth, that during the last summer months, there was regularly and distinctly heard upon the railroad the whistle as of an approaching train. As it was well known however, that no train passed over the road at such a time in the morning, four gentlemen at the Samoset House determined to investigate the mystery. Accordingly, unknown to any one, they one morning about two o'clock stationed themselves on the railroad track, about a mile from the town, and awaited the arrival of the supernatural visiaor. They did not watch long nor wait in vain, for immediately they distinctly heard far off in the north the sound of a railway whistle, and presently "the distant clatter of wheels was heard—louder nearer, nearer still it came—the click of the rails in their chairs, the rush of steam was as plain in their ears as if the lantern glared before them—the shriek of a demon-whistle close at hand made them leap from the track, as the train thundered down the grade—the hot breath of the panting steed was in their very faces as it passed—as the unearthly scream ceased, they heard the brakemen screwing up their brakes, the tinkle of a bell and sound of meeting cars, as if the invisible spectre monster of the road had reached his journey's end."

About a month since, says the Memorial, one of the watchers visited a spirit circle in Boston, where he was an entire stranger to all present save one to whom he had never revealed the summer incident, when the engineer of the spectral train held spiritual converse with the astonished company. A protracted sitting was suddenly brought to a close, by the communicating spirit announcing that he must go.

"'Where and for what?' some one asked. 'To run the train,' was the prompt answer.—The sitters looked each upon the other, and 'what train?' was the universal exclamation. 'The Old Colony train,' was the reply. 'Do you mean for us to understand that at this hour of the night a train of cars passes over that railway?' There was a long pause.—Slowly and deliberately, as if making no common revelation, the arm of the medium moved at last, and the pencil wrote these words: 'In life I was an engineer upon that road. At stated intervals, a train, unseen of mortal eyes, takes the spirits of pious dead to the Pilgrim home they consecrated by their lives. Mr —— who is with you, will say whether he has ever heard or knows ought of that train. It is not for mortals to know more."

The Memorial vouches for the truth of this wonderful narrative. It is a little singular, we will simply hint, that spirits who can enter rooms with closed doors, and who are ever present at the call of mediums, should require a train of cars to transport them to Plymouth! *Boston Journal.*

USE OF SALT IN COOKING VEGETABLES.—Here is something everybody ought to have known long ago, and that everybody should now read and remember:

If one portion of vegetables be boiled in pure distilled or rain water, and another in water to which a little salt has been added, a decided difference is perceptible in the tenderness of the two. Vegetables boiled in pure water are vastly inferior. This inferiority may go so far, in the case of onions, that they are almost entirely destitute of either taste or odor, though when cooked in salted water, in addition to the pleasant salt taste, they have sweetness and a strong aroma. They also contain more soluble matter than when cooked in pure water. Water which contains 1-420th of its weight of salt is far better for cooking vegetables than pure water, because the salt hinders the solution and evaporation of the soluble and flavoring principles of the vegetables.—*Scientific Am.*

A German couple named Oswald and Lina Eldan, were arrested in Albany, on Thursday, charged with stealing silks, &c., from sundry stores in that city. The lady was noticeable for her remarkable beauty and a degree of *embonpoint* peculiar to females only, and upon being examined, by a female at the police office, her rather remarkable rotundity of figure was reduced to one of remarkable symmetry if not positive leanness, and no less than $500 worth of silks was delivered into the hands of the proper owners. Mrs. Eldan, having with the aid of hooks attached to her skirts and singularly contrived pockets, secreted that amount of property about her person. Upon searching Eldan, the sum of $200 in gold and $65 in bills were found. Upon searching their lodgings, more plunder was found, and they were committed to jail.

The Washington Sentinel informs us that "hundreds of office seekers, who hurried to Washington on the opening of Congress, have returned home, either their hearts being sick with hope deferred, or their exchequers not justifying a longer sojourn." This is one good result from the delay in the election of the Speaker.

THURSDAY, DECEMBER 20, 1855.

SENATORIAL DISTRICTS.—We have not paid the slightest attention to the relative fairness or unfairness of the new arrangement of Senatorial Districts in this State. We merely published the law without any examination whatever.

But we have just seen, in the New Hampshire Patriot, the following statement, from which it appears, that by *mistake*, the K. N. Legislature have made a perfectly *fair division* of districts.

The Patriot says:

It [the Manchester American] thus admits that it was the intention of the managers of the last Legislature to so arrange the Senatorial districts as to secure to themselves a majority of that body, while a majority of the people were opposed to them. But they made a *sad mistake* in their calculations. They evidently, as the Gazette says, based their calculations upon the vote of last year. But reckoning upon the vote of 1854, it will be seen that the Democrats carried six of the present districts, while in two others the majority against them was very small. It is apparent from this reckoning that with a popular majority of 2000, we can carry eight districts.

The Gazette's figures are very nearly correct, taking the Governor vote of 1854, when the Democratic majority was about 1600. That we can carry the State by a larger majority next March, we have great confidence; and if so, we can secure full control of both branches of the Legislature.

Now it is clear, that if a majority of 2000, in a vote of 58,000, would give the party having that small majority, 8 Senators out of 12, the division could not be very unequal as to voters.

A correspondent of the Boston Traveller, writing of New Hampshire politics, says of the liquor law, that it "has been rather worse than useless in most of the towns of our State. Liquor is as openly sold in Portsmouth, Dover, Exeter and Manchester as if there were no law in relation to the matter."

The correspondent of the Traveller either deceives himself, or means to deceive others. The traffic here has been considerably restrained and diminished by the law—and one of the most respectable ex-dealers said only a few days ago, I shall sell no more, until I can do it openly. This man's ideas of openness differ from those of the Traveller's correspondent: and so also do his ideas of the quantity brought here, which he estimates at less than half of last year's supply.

NO BANKS.—According to the Washington correspondent of the N. Y. Herald, there has been something like a spiritual manifestation in the House of Representatives. He says:

Some very imaginative Western member, from old Tennessee—(perhaps he was a medium)—avows that he distinctly saw the form of General Jackson hovering over the House during the excitement of the balloting, and could hear him exclaim, "By the Eternal, let us have no Banks." That member should be taken care of, though I am willing to concede that if anything could induce Old Hickory to quit for a while the spirit world and mingle again in the affairs of earth, it would be the subject of "banks."

CARE OF THE BABIES.—The editor of the New York Sunday Times mentions as a curious fact, that during the past week, on looking over his exchange papers, he counted no less than eleven infants, that have perished in the flames. He asks:

Are mothers becoming careless? Are children losing their domestic value? Or is it that the current means of household illumination among the poor are growing more dangerous? The latter, we suspect, is the chief cause of most of these unusual calamities.—Burning fluid, camphene, and rosin oil, are the common substitutes for gas in the dwellings of the laboring classes, and every one of these substitutes, unless handled with extraordinary care, are dangerous to life. The slightest carelessness and they explode; and what is worse, rarely does a victim to their explosion recover from the consequences.

☞ Mr John Neal, of Portland, has been writing and publishing in the State of Maine, some essays in favor of Life Insurance, especially of a life long policy. These essays are written with his admirable plainness, in which, when he aims at plainness, no man can excel him. He lays down the true principles of insurance, in the clearest manner possible.

☞ Harper's New Monthly, for January, 1856, has just arrived from Fetridge & Co., Boston, and is for sale by J. F. Shores, Jr., of this city.

The number opens with a rich article on January 1, 3000. It is embellished with about 20 queer illustrations, of men travelling in balloons, of a Jackal howling over the ruins of Paris, of a naturalist nursing a bear with a bottle, and so on. The next article is a chapter of Virginia illustrated. One of the illustrations is a Lynchburg Team, viz., a big ox, a little donkey and a fine horse, drawing a wagon, and driven by a deformed negro boy.

Baby Bertie's Christmas, not illustrated, needs no illustration. It is full of word-pic-

ONE WEEK LATER FROM EUROPE.

ARRIVAL OF THE ASIA.

HALIFAX, Dec. 18.

The Royal Mail Steamship Asia, Capt. Lott, from Liverpool Saturday 8th inst., arrived here this morning.

Ship Constitution of New York arrived at Liverpool Dec. 4th, and on the morning of the 5th, while at anchor in the river, was observed to be on fire. Assistance was immediately rendered, but she burned all day, and at night was scuttled in twenty feet of water, and burned to the water's edge. Part of the contents of the lower hold may be saved in a damaged state, otherwise the ship and cargo are a total loss. Cause of the fire unknown, but supposed by spontaneous combustion.—The passengers and baggage had landed, but the ship was not docked.

News by this arrival consists mainly of peace rumors, but the public have no means of estimating their truth, and probably they are of little value. It is a very noticeable circumstance that the assertions of the British press on the subject of negotiations are quite at variance with those of influential continental papers.

THE CRIMEA.—The Times correspondent writes from the Camp before Sebastopol, Nov. 24, saying there is nothing to write about, as nothing had occurred. Very little fire is exchanged between the north and south sides. The Russian works on the north side are rapidly attaining gigantic dimensions. Engineering operations to destroy Sebastopol docks are about completed. Stringent regulations are issued to keep spies and loafers out of the allied camp. Horse races are advertised in the British, and theatres in the French camps. The weather had been fine.

Deserters confirm the report that the bulk of the Russian army remains in its former position, namely the 11th, 12th, and 13th divisions on the Tchernaya, or north plateau. The 16th and 17th on Makenzie,s ridge, and the plateau of Koralez, keeping possession of the Belbec and the Katcha.

The French have been reinforced by Gen. Chasseloup's division, 12,000 strong.

The English and Sardinians also reinforced, and it is supposed, the Russians also.

The Russians have arched batteries to prevent landing in the rear of the North forts. The allies have connected the French and English camps by a bridge of boats.

Admiral Lyons continues to cruise near Kertch, as the Russians threaten an attack, and have fortified Arabet with 30,000 troops, and Genilski with 15,000 more.

The Imperial Commercial Bank of Odessa has suspended specie payments; premium on silver being 12 to 15 per cent. The timber rafts recently captured by the Allies have been lost, having been floated away and broken by a freshet.

THE BALTIC.—A telegraphic despatch from Nyborg, 6th, states that the Allied squadron, under Admiral Dundas, was then passing the Belt, homewards.

The British admiralty has published Lieut. Geneste's account of the late Hango Bay affair, but it contains nothing new.

Gen. Canrobert is said to have hinted that in the next Baltic campaign two Allied armies will be landed, one in Finland and one in Courland, and that he will have the command in chief.

The Russian Admiral Glassenapp's mission to Stockholm, which was supposed to have been with a view to counteract Gen. Canrobert, is stated to have had reference only to unimportant matters of finance and trade connected with Swedish ships to the ports of Finland.

ASIA.—There is a rumor on the authority of the London Daily News correspondent that the Russians have taken Kars. This may have arisen from a similar rumor of the capture of Kertch, of which a report says that the Russians made an unsuccessful assault on the 5th, but afterwards took the place. These reports, however, require confirmation.

Correspondence of Nov. 12th mentions that Omar Pasha had divided his forces into the three corps. He himself with the main body occupied Lachum Kale, and had detached twelve battalions of infantry, with two regiment of cavalry, under Ferhad, and Omar Pasha, to redoubt Kale, while the troops of Mustapha Pasha, with the Tunisian contingent, was at Batourn.

GREAT BRITAIN.—Parliament is prorogued till January 31st, then to meet for business.

The King of Sardinia during the week has been the guest of Queen Victoria. On Sunday he worshipped in the Sardinian Chapel, Cardinal Wiseman preaching. On Monday he attended military reviews. Tuesday he visited London, when the city was illuminated. Wednesday he was made Knight of the Garter, and inspected the camp at Addershot. Thursday he left London for France.

A public meeting held at London to consider the monetary crisis and the influence of the Bank charter act, passed a resolution condemnatory of the existing English currency laws, but the meeting was only preliminary.

The Duke of Newcastle is returned to England.

SPAIN.—Cortes have passed a vote of confidence in O'Donnell, by 130 against 8.

GERMANY.—Arrangements for the reciprocal circulation of paper money has just been made between Prussia, Bavaria and Saxony. The renewed conference on German coinage will be held in Berlin, not Vienna, on January 10.

PRUSSIA.—Distress exists in Prussia, from the scarcity of corn, and the disturbance of the usual course of traffic in consequence of an epidemic amongst the cattle. The importation of corn into Prussia from the Russian land frontier is prohibited.

AUSTRIA.—Sir Hamilton Seymour has arrived at Vienna. A private despatch says the Austrian Army will be further reduced by 80,000 men.

ITALY.—It is announced for the second time that France and England's mediation has adjusted the difficulty between Sardinia and Tuscany.

☞ The following resolution was adopted in the Texas Legislature on the 26th ult., by a vote of 73 to 8:

Be it Resolved by the Legislature of the State of Texas, That the Legislature approves the

AMERICAN STATE COUNCIL.—*Philadelphia, Dec.* 18.—The American State Council adhering to the national platform are holding a session here. It it well attended, and the members are enthusiastic. A resolution was adopted approving of the course of Messrs. Brown, Eddie, Millwood, and Fuller, of Pennsylvania in the House of Representatives, for refusing to coalesce with those who regard outside issues as more important than Americanism, in the contest for Speaker, and for the strong national ground assumed by them. A committee proceeds to Washington with the resolutions to-night.

COLLISION ON THE ERIE RAILROAD—LOSS OF LIFE.—*Buffalo, Dec.* 18.—Two trains of the Great Western and Canada, and Erie and Ontario Railroad, came in collision this afternoon. The engines and two or three cars were smashed, two lives were lost, and several persons wounded. Both trains were behind time.

LOSS OF STEAMSHIP CRESCENT CITY.—*Savannah, Dec.* 18.—The schooner Baltic, Captain Pruden, from Nassau, arrived here, and reports that the steamship Crescent City, from New York for New Orleans via Havana, 3d inst., was wrecked on the Mattevala reef, Bahama banks. The passengers, crew and baggage were saved and taken to Nassau by the wreckers. The vessel has bilged, and it was feared she would prove a total loss. The brigatine Alma had been chartered to convey the passengers and mails to their destination.

NEW YORK, Dec. 19.—There was last evening a serious riot at the City Hotel, arising from matters connected with the late Baker and Poole tragedy. A party of fighting men, friends of Baker, commenced the riot by an attack on Councilman H. N. Wilde, who was foreman of the coroner's inquest in the case of Poole. Other parties were involved, and the result was that one of the waiters of the establishment was so badly injured that it is thought he cannot live, and several others were badly hurt. The rioters escaped.

Sydney H. Stuart, the city judge recently tried and acquitted on a charge of taking a bribe, has, it is said, sent a letter of resignation to Albany.

Kossuth says, in a letter to the New York Times—

"I have the most positive information that the French and English army are on the worst possible terms in the Crimea. Neither men nor officers cultivate familiar intercourse. The French treat the English with supercilious haughtiness since the Redan affair, just as the English have treated the Turks from the beginning."

PROHIBITION IN RHODE ISLAND.—The Providence Daily Tribune says:—

"If more stringent legislation is deemed advisable—if the efficiency of the law can be increased, and its enforcement rendered more certain by any legislation within the bounds of the constitutton, this Legislature are prepared to give it to us."

☞ A ship is now loading at Long Wharf in Boston, with 11,000 barrels of flour, for Australia.

Sam Houston, who has not yet left Texas for his seat in the Senate, is stopping at home in self defence. The legislature almost unanimously have passed resolves endorsing the Nebraska law and disapproving his vote in opposition to the same. They will probably ask him to resign. Houston has made a speech in an American caucus, in which he came out against the ultra slave holders, and the administration. So far as Texas is concerned, Houston is right; and they had no reason to ask the repeal of the Missouri Compromise. It was in force when they came into the Union, and its terms were the basis of their admission. They agreed that slavery should be prohibited ever from a part of their own territory, lying north of that line. Houston has evidently lost caste in Texas, by leaving the democratic party; but yet they will find it difficult to break him down. If that State is indebted to anybody, it is Sam Houston; and he may awaken a spirit there that his opponents little care to meet.—*Newburyport Herald.*

WEDDED ON THE SPUR.—Rev. Mr Gillett recently united in "the holy bonds," Mr Chas. E. Adams to Miss Jessie M. daughter of the late Hon Thomas M. Woodruff, at the residence of the bride's mother. It was an unusually sudden, but we trust will prove none the less a happy move. Some friends, in the early part of the evening, challenged the maiden, with promises of sundry valuable "settings out;" to marry at once—and as she contemplated doing so "one of these days," she bravely accepted the challenge, and beau and parson were called in, and the whole affair was done up in the course of three or four hours.—*N. Y. Mirror.*

BISHOP DOANE.—The Catholic Herald, speaking of Bishop Doane's late Commencement theme, "The Child is the father of Man" —seems to anticipate that the Bishop will yet follow his son to Rome. It says:—While we think that the teachings of the Bishop have, by the grace of God, made him father of the child, we pray that the example of the child may, by the same grace, make him father of the man."

NEVER BET ON ELECTIONS.—By the official vote just counted in the Virginia Legislature it appears that Governor Wise's majority is but 9921. His friends who bet on 10,000 majority will lose, it is said, considerable money on the result.

Pat Hearns and Alexander Edgar, keepers of gambling house 587 Broadway, and Sherloch Hillman, in the same business, at 1 Murray street, New York, have been arrested at the instance of Oscar S. Jennings, who it appears, with other persons, has lost in the former place, by the game of faro, in two years, about $5000, and in the latter about $10,000.

REMEDY FOR SHORT DAYS—*very season.*—

ACCIDENT FROM BURNING FLUID.—While a daughter of Edward Gannett was engaged in lighting a fluid lamp, an evening or two since, it exploded, together with a second lamp she was lighting it from, and so badly was she injured that for some time her life was despaired of. We are happy to hear, however, that she is now likely to recover.—*Lowell News.*

Congreve made a hit in the following description:—

"Coquette and coy at once her air,
Both studied, though both seem neglected;
Artless she seems with artful care
Affecting to be *unaffected*."

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or *its coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent HARRISON'S AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and re-

AT HANOVER STREET CHAPEL,
Portsmouth, N. H.,
Commencing on Tuesday, Jan. 8, 1856,
To continue three or four days, and close with at least one
GRAND CONCERT
of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of
Prof. B. F. BAKER, of Boston,
With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

TUESDAY, Dec. 18.

SENATE.—The Senate met and adjourned.

HOUSE.—Mr Walker, rising to a personal explanation, defended the Southern Know-Nothings from the attacks of the Mobile Register, saying that they had not only been a target for the press of the country, but here also a battledore and shuttlecock for the Republicans on one side and the Democrats on the other. He said that the latter have with obstinate party exclusiveness nominated their candidate, and adopted a resolution which many of the more considerate of them admit was an insult to, and a stigma on, the members of this order. The fact must be realized, he said, that if, Southern Know-Nothings on the opening of the contest had thrown themselves into the ranks of the Democrats, the result would have been a Free-soil organization. He denied that the Democratic party was the national party, and claimed the nationality for the American party.

Mr Jones of Pennsylvania said that had it not been for Know-Nothingism, Pennsylvania would, to-day, instead of being represented by only six national Democratic votes, be represented by 17. Know-Nothingism in Pennsylvania, he contended, is perfectly synonymous with Freesoilism. The Democracy, he said, stand on what they believe to be principle, without compromise.

Mr Allison, in replying, endorsed the idea of his colleague, who is a national man. Had it not been for the fact that the people of Pennsylvania condemned the action of the last Congress there would now be 17 Democrats from that State on this floor, but the Freesoil and Know-Nothing parties united and Pennsylvania is now represented by men a majority of whom condemned the Nebraska bill.

Mr Walker replied. In the course of his remarks he said that the adoption of the Democratic caucus shows, what is by no means uncommon, viz., the proneness of all men to confound principles with party, seeming to forget that the two are essentially different.—All the present laws on the subject of slavery are favorable to the admission of new States with or without slavery. He was willing to unite in a general meeting, with a view to accomplish the election of Speaker.

Mr H. Washburn of Maine claimed that the party voting for Mr Banks is the only national party here.

Messrs. Campbell, Jones and Allison of Pennsylvania indulged in a lively triangular debate about politics in that State, involving the merits of the Speakership.

Mr Giddings delivered his views.

Mr H. Marshall defended the course of the Americans, stating that, like the Democrats, they have no terms of compromise to offer, and will accept none.

Mr Campbell of Ohio has the floor for to-morrow. Adjourned.

FROM WASHINGTON.—A dispatch to the New York Express says:

"The President to-day is turning the White House into a printing office. Printers are now there, with their cases, setting up the Message. The cause of this extraordinary case is the inability to trust any of his own agents, out of his own house."

The Advertiser's correspondent says:

"The Senate caucus to-day, (17th) nominated Mr Nicholson of the Union, for Public Printer. Only eighteen Senators were present, part of whom went out refusing to concur. Mr Iverson's platform resolutions were put to rest in the arm of a committee.

A dispatch to the N. Y. Express says:

"Bayard's proposition to elect for Senate Printer an outsider, having been voted down 15 to 17—Nicholson and Forney cannot be elected. Tucker (Sentinel) will get some 15 votes, it is said,—and the Union but 23.—Whigs and Fusionists hold the balance of power."

ARSENAL ROBBED.—A large quantity of arms was recently stolen from the Harrisburg (Pa.) Arsenal and sent to New York, where it is supposed they were to be sold to Filibusters, to be used in Nicaragua. The arms have been recovered, and certain parties who were concerned in the robbery arrested.

PERSONAL.—Professor Oliver Wendell Holmes has been an invalid for the past week, and has been compelled to give up a few of his engagements to address Lyceum audiences. He will be well again in a few days, we trust, and able to resume his labors in that field of service where his talents are in such great demand. The following letter of apology from his pen was read at the Cambridge Athenæum, on Monday evening:

BOSTON, Dec. 11, 1855.

My Dear Sir: You must excuse me to your audience in the politest way you can. I have been ill, as you know, for a fortnight, and have been practising reduction and substraction until there is a mere trifle left in the way of a remainder. I could stand up before an audience from long habit, but I doubt if I could sit down again without assistance. I am satisfied that if I were offered a fifty-dollar bill after my lecture, I should not have strength enough left to refuse it. I am unwilling to run the risk, and as you have inspected me, I trust you will give me a certificate of invalidism *not* of the kind called "indisposition."

Yours, very truly,
O. W. HOLMES.

Hon. Isaac Livermore,
Pres't Cambridge Athenæum.

JOICE HETH OCTOROE.—Officer Trout, of Station 1, last evening brought in a little old lady, with a big bundle, she having been wandering about the streets. On being questioned as to her name, age, and residence, she said that she was a citizen of the world; that she was 980 years old, and that her name was "Kill Time." On being asked her name this morning, prior to her departure after a comfortable night's lodging, she replied, "Kill Time," and left with a polite courtesy.—*Boston Transcript.*

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 20 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability. R. H. EDDY.

Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office, and he invariably conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them as early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,
Commissioner of Patents.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, nor recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine; let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and apparently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for any length of time his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trial of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as is nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "Dr. Burleigh Smart's Cough Mixture, Shaw & Clark, Biddeford, Me., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of azure enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

UFFORD'S
CELEBRATED SMOKE
Consuming Patent
LAMPS.
REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation effectually attest its merits.
We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press."
John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1,25.

THE GERMAN CATHOLIC CHURCH.—A German Catholic Cathedral was commenced on the corner of Canton and Tremont streets, Boston, a year ago last spring, but the work was suspended in the following autumn for the want of funds. The foundation was laid and the walls built to the height of about four feet. The material used is brown freestone, and the architectural design is quite elaborate. The building has a front of 200 feet on Tremont street, and extends about 125 feet on Canton street. Thirty thousand dollars were expended on the work before it was stopped. The priest went to Germany to raise the funds needed to complete the structure, last spring, and had not returned at the last advices on the subject. In the meantime the place is assuming the appearance of a church in ruins.

OPPUGNATION IN MAINE.—The Belfast Journal, a Democratic paper of the "Hard" stripe, and one of the ablest journals in the state, has come out most decidedly against the course of the President and Gov. Shannon, in Kansas matters, and in a scathing article is down upon them and their defenders—among whom is the Boston Post—in a savage manner. It calls for the impeachment of Gov. Shannon, if he has invited the border ruffians of Missouri to assist him, and says it trembles at the consequences of the shedding of the blood of the people by United States soldiers on the soil of Kansas. The journal is one of that class of journals which the Abolitionists call "pro-slavery."—*Boston Courier.*

RAINY SUNDAYS.—A clerical friend, who keeps a journal of the weather, informs us that yesterday was the fifteenth Sunday out of the last consecutive sixteen Sundays, which have been unpleasant and rainy during some portion of the day. If our friend is correct, and our memory confirms the general statement, we have had but one pleasant Sunday for about four months. A few years ago there were thirteen consecutive Sundays that were pleasant.—*Transcript.*

The transitions of fortune in this republic make foreigners stare. An instance fell under my notice, recenty, which is probably not uncommon. A friend moved into the country from New York five years ago, and relinquished his favorite cook to a gentleman living in the suburbs of Williamsburg. Her new employer advised the investment of her savings, amounting to a hundred dollars, in part of an adjacent farm which was sold at the time; two years ago a street was cut through the cook's lot; she sold out at a large profit, and is now living on her rents and in a house of her own.

CLOSING OF THE ERIE CANAL.—A large drove of canal horses have been taken during the week to the Central and Western parts of State. These animals belonged to the Combination Towing Company. The head quarters of this company are at Buffalo. It disburses upon the line of the canal more than half a million dollars yearly. It employs as drivers through the course of the season, one thousand boys. To them chiefly are entrusted two thousand horses and mules. Drivers are paid ten dollars a month and are furnished with board.

In the Arrison trial at Cincinnati (for the explosion of an infernal machine, which killed a man and his wife,) one of the gentlemen who was chosen as a juror, and who lives almost within a stone's throw of the place where the infernal machine exploded, stated in his examination, that he "never heard of the case;" and in excuse for this want of knowledge of what was going on, said that "he had a house rented to a lot of Irish, and they gave him so much trouble that he couldn't think of anything else."

DECIDEDLY CLASSICAL. — The Bangor Mercury has an excellent take-off on the famous illustrated journals. The Old State House in Boston figures as the "Cathedral of Mexico," but the illusion is broken from the fact that Mr. Charles A. Smith's sign is on the front of the *sacred edifice.* We were aware that our friend had considerable to do with *the cloth,* but it is news to us that he does business in a "cathedral."

TESTIMONY OF SLAVES AGAINST ABDUCTORS.—A proposition has been submitted in the Virginia Legislature to inquire into the expediency of so amending the Code as to admit testimony of negroes against white persons charged with the abduction or attempt to abduct slaves from the Commonwealth, when said persons so charged shall be citizens of such States as admit negroes' testimony in cases in which white persons may be parties.

An East India paper alluding to the ordination of a bishop, says, "he will have the care of seven souls, that being the number of the church of Englanders in the district, the rest consisting of Mussulmen, Scotchmen and *other heathen.*"

A late number of the Collegiate Mirror, published at Holly Springs, Miss., announces that the honorary degree of 'Mistress of Arts' has been conferred upon Mrs Hale and Mrs Sigourney, and publishes the letters of acknowledgment written by these ladies. This is a notable sign of the times, as indicative of woman's rights and titles.

The property found at Sebastopol has been divided into three equal parts, of which the French get two, and the English one. The commission, having examined the quantity and quality of the breadstuffs found in the magazines, declared them unfit for the use of the allied armies, and decided that they should be sent to Eupatoria for the support of the Tartars, to whom the allies furnish subsistence. The entire valuation of all the property taken at Sebastopol, was estimated by the commission at $750,000.

A man in a distillery at Richmond on Friday night, laid down upon a plank near the furnace and went to sleep. The plank, from its resinous nature, took fire and communicated to his clothes. He was so dreadfully burned that he died shortly after.

SOUTHERN EMIGRATION TO KANSAS.—In the Georgia Senate on Friday, a resolution was introduced for appropriating one hundred thousand dollars to aid Southern men to emigrate to Kansas, as an offset to Northern emigration.

There were but 95 American exhibitors at the Paris Exhibition, and of those 78 were successful competitors — a greater triumph than any country has before attained at any exhibition. The total value of the articles exhibited, was but $25,000, and the value of the recompenses awarded was over $11,000.

Morning Chronicle.

FRIDAY, DECEMBER 21, 1855.

COBURN AND DALTON.—At the examination of these men, in Boston on Wednesday, for the murder of young Sumner, Dr. J. B. S. Jackson, who made the *post mortem* examination of Sumner's body, testified thus:

I have formed an opinion in the case, after hearing its medical history from the physicians on the witness stand last evening. My opinion is, that had not extetnal violence been inflicted on the deceased, the inflammation would not have arisen, considering his previous good health; or in other words, that the severe flogging he received was the primary cause of death.

These declarations of Dr. Jackson, who is widely known as one of the profoundest medical men, made a great sensation in Court. The prisoners evidently felt the force of the testimony, and afterward exhibited more than usual anxiety.

Cross Ex.—The inflammation may have been produced by exposure and carelessness. Think exposure would not have produced the results from the chronic diseases found in the body. Those diseases were not an adequate cause of death.

Josiah Porter called—I never visited the saloon in West street with any other gentleman named Sumner than the deceased; he was my cousin; have seen the witness Agnes Keenan there; Mr Sumner was in my office on Thursday after the 17th Nov.; saw marks of violence under his eye and on both of his ears; he wore a transparent plaster under the eye, but quite a large spot appeared livid; the ears were bruised.

I was injured at Coburn's house about 12 o'clock on the 17th. Twice or three times previously Mr Sumner and myself had been in Pera's saloon in West street, in company with the wives of the prisoners.

R. Willard Sumner testified that on the night of the 17th of November, he saw his brother William and noticed that he had a black eye; a week after, he noticed a dark spot behind his ear. He appeared dull, and complained of pains in the chest and eye afterwards, (i. e. the 17th). On thanksgiving day, when kicking the foot ball, he was obliged to brace his chest with his arms, and I saw him on another occasion, in the shed, when he seemed to suffer from pains in his chest. I never remember any time when he seemed to be recovering—although we hoped he would. (Here the witness was moved to tears.)

Dr. J. B. Hill testified that he saw William Sumner at his office on the Friday after the 17th of November. He was dejected. I noticed that under the left ear, the skull was discolored, and also the bruises of his left eye. I placed my hand on the left side of his neck; he shrank, and I observed that I feared that he would suffer some pain. I pressed his left shoulder, as he lay on the lounge, and he shrank again, complaining of soreness in his chest. I noticed no indication of a cold. The witness said the statement of Dr. Jackson in the morning was so like a description of his own observations, that he was induced to come forward as a witness.

Mr Parker moved that the defendants be discharged on the ground that the complaint—alleging murder and the intent to kill—was not sustained. Whatever might have been the predisposing cause of the inflammation of which Sumner died, it was clear that he did not die from the *direct* effect of violence. The defence was anxious to know the view the bench took of the matter.

The Judge said—upon all the evidence—it was shown that Mr Sumner's death was the result of violence. He quoted Dr. Jackson's testimony, wherein the doctor said he was led to "believe that Sumner would not have had the inflammation if he had not been beaten," and said it went far towards establishing the case. Mr Sumner was identified as the person flogged—it was shown that the flogging was planned—and in view of these circumstances, he ordered the defendants to be committed to answer the charge of murder. They were committed.

RAILROAD WAR.—The Lowell Courier says: The Boston and Maine railway having been enjoined from using their regular track in Lawrence, just south of the Merrimac river bridge between that city and Andover, after the 18th inst., have made an agreement by which their trains from Boston to Lawrence and Manchester or Haverhill, Portland, &c., will at Wilmington Junction run on the Salem and Lowell track to the State alms-house in Wilmington, and thence over the Lowell and Lawrence track to their undisputed territory in Lawrence. This detour lengthens the route from Boston to Lawrence only two miles. By this operation Ballardvale and Andover are deprived of their hitherto very extensive railroad privileges. The new order of things must continue until Hazen's claim is purchased, or some legal decision adverse to him obtained; the latter is not considered probable by outsiders.

The Newburyport Herald of Dec. 20, states, that the County Commissioners were in session in that city 19th inst, for a hearing of the Boston and Maine Railroad on petition for leave to cross a county road in Andover, which they wish to do to avoid the land of Mr Hazen, who, after to-morrow, by a legal process, has power to stop their cars, and probably will do so.

INCENDIARISM IN CHELSEA.—The inquest held in Chelsea on the late incendiary fires in that town has resulted in nothing. There seems to be no doubt that a gang of ten or a dozen boys have been in the habit of setting buildings on fire occasionally, but it is impossible to obtain evidence sufficient to convict them.

CASE OF POISONING.—We learn from a correspondent, (says the Dover Enquirer,) that the wife of Mr Jeremiah Ricker of Farmington, near Merrill's corner, died some two weeks since under such circumstances as to excite unpleasant suspicions in the neighborhood that all was not right. A council of doctors made examination of the body and could find no symptoms of disease which would cause death. A coroner's inquest was held and such evidence came before them as caused the sending of the stomach of the deceased woman, together with some preserve of which she had eaten, to Boston to be analyzed. The result of the examination, it is understood, was the discovery of arsenic. Mr Ricker and a widow woman named Johnson, who sent the preserve to Ricker's wife, have been arrested and an examination commenced on Tuesday of this week, which has just concluded. There are many reports in circulation alleging improper intimacy between the parties arrested. The result of the coroner's inquest concluded Tuesday, was that Mrs. Ricker came to her death by taking poison administered in preserve or food sent by Mrs. Jane Johnson, through her husband.

NOT MURDERED AFTER ALL.—The Newburyport Herald says:

The report which we published of the death of Mr John W. Randall, the robbed man, which we gave upon the authority of a person who had taken particular interest in his case, we are glad to learn is not correct. He has been near unto death, but as the following extract from a letter received will show, is likely to recover:

"I take this opportunity to say, that he "still lives," and that there is a fair prospect for him to recover from the injuries received. He recently had an attack of erysipelas in the face, which for some days strove hard for the mastery, and at one time seemed to have gained the victory. But John with a last and desperate effort, threw off his antagonist, and is now doing well with a fair prospect of a speedy convalescence.

MUSICAL CONVENTION.—A recent Musical Convention in Bangor, under the direction of Prof. B. F. Baker, was closed with a collation, address on music, &c., interspersed with singing.

The editor of the Daily Mercury being called upon, made a few remarks, commenting upon the fine impression made by the public exhibition of the members of the Association, who had been for so short a time under the direction of Prof. Baker. The excellent performance of the music of the choruses, the harmony of the voices, the clear vocalization, admirable time of the several parts, demonstrated that the performers had received their brief instruction at the hands of a master.—He was pleased, in meeting Prof. Baker, to find in him a presence which did not dwarf the expectation that his high reputation sent before him. His demeanor and bearing were equal to his ability in his profession, which was a high compliment, and the class should congratulate themselves upon having had an instructor of skill in his art, and as well carrying in his high presence the clear attributes of the well cultivated and kindly gentleman.—With such masters, and the generally awakened zeal and improving taste in the community, it must come to pass that the tone and character of our choral music, which was after all the highest form in which the art spoke, would be elevated, and music among us put upon the path to the highest efforts.

SOCIAL MUSICAL SOIREE.—A splendid entertainment was given at the spacious and elegant wareroom of Messrs. Hallet, Davis & Co, on Washington street, Boston, on Monday evening, by Ole Bull, the unrivalled violinist, and Gustave Satter, the distinguished pianist. The character of the programme was in keeping with the character of the artists, and the selections were felicitously made from the highest order of classic music. Mozart's Sonata in A Major, a charming duett for the violin and piano forte, was most exquisitely given. The music of Mozart, breathing from the soul of Ole Bull, finds its true medium, and in the hands of the eminent performers of the evening, the duett was given in all its beauty and true properties. The evening's entertainment called together an audience of our highest musical talent, and every one seemed to be delighted with the performances, and well might the true lover of music appreciate such a tribute. The liberality of Messrs. Hallett, Davis & Co., in arranging this concert will not be forgotten, and no one will fail to commend the silvery notes of their grand piano forte, which spoke volumes of praise to their skill.—*Boston Intelligencer.*

Exhausted, on her couch a *sick girl* lay,
Pale as a White rose withering. Fitfully
Her fragile form shook with the frequent cough,
Like a frail leaf, which the November blast
Is loosening on the bough.

PICTURE SECOND.

Full of Life,
Joy in her eyes, and on her cheek the tint
Of roses when they open, that young girl
Moves with elastic step among her friends,
Who late had thought her dying. Swift relief
In *Dr. Rogers' Peerless Remedy* [tion her,

And eagerly the rescued will reply,

New York is believed by many persons to be deeply concerned in the slave trade, and it is said that a certain Portuguese captain, who has just covertly landed six hundred and fifty slaves in Cuba, left Havana on the 23d ult., in the Crescent City, to renew his labors in that and other Northern cities.

LOCAL.

TREASON, SEDITION, ASSAULT AND BATTERY.—Who of all our readers does not know the jolly, good natured old Coalman, who for a score or two of years has driven his old horses over Piscataquog Bridge, but who now that the Bridge has gone away, comes round via New Market to bring us the Carbon, good measure and well burnt?

Every body knows him: but what of him? Why he has met with a collision, or a concussion, or a contusion, or with all of this dreadful concatenation. Going towards his home the other day from this city, he made it late, as he often does; and he had been drinking, as he always does—no less and probably no more than usual—when he found himself—No: somebody found him—on the ground, bruised and bloody as if from a fall or half a dozen falls. But those who found him deemed him a drunken man, and not supposing him so badly hurt as he really was, loaded him into his wagon again, and started his horses on their way again. The faithful beasts carried him to his door, but as the evening was cold, he arrived there almost frozen as well as seriously hurt by his falls.

His neighbors tell him it was the liquor that knocked him off the wagon: but he says, No, No; somebody must have struck me and beat me. I have taken the same Old Coon this forty years, and he never bit me before: I don't believe he bit me now.

The good old carbonier does not pretend to know who knocked him off, and gives altogether a confused account of the accident by which he got many sad bumps on the frozen ground: but it is manifest that there must have been some *drugged liquor* employed by some seditious person who treasonably plotted the ruin and death of our old honest coal merchant; and that this drugged liquor committed the assault and battery.

We don't think the law can reach this: but we would suggest to all our old hard drinking friends from abroad that the liquors sold at this day are said to be very impure and poisonous. So, if they don't wish to be knocked off,—touch not, taste not, handle not!

☞ The "busy-body on the Navy Yard," to whom we referred a few days since, as trying to stop the circulation of the Chronicle there, was "*not* a high officer," nor any officer in the line of promotion, but the incumbent of a petty office, clothed "in a *little* brief authority," who deems it especially his duty to meddle with other people's business. We make this statement, (which to us seems unnecessary,) at the request of workmen on the Yard, who would not have the slightest imputation rest upon the present popular and gentlemanly officers there in command. The Captain has publicly given unrestricted "liberty of the Yard" to circulators of papers and books, out of work hours.

BOTH SIDES.—While it gives us pleasure to contradict the false and exaggerated statements respecting the unlawful sales of liquors in this state and city; it is our duty, in common fairness, also to state that some of those persons who at first suspended their sales, have resumed their practice in a private and clandestine way: and that one effect of this illicit sale, is the diminution of legal sales at the Agency in this city, which diminution is correctly stated in the N. H. Gazette of last Saturday.

REQUISITION.—Deputy Sheriff Smith, of Dover, N. H., arrived here on Wednesday with a requisition from Gov. Metcalf, for the arrest of Seth W. Rowe, for an aggravated assault at Dover. The requisition was put into the hands of Deputy Sheriff Davis, who had him in the lock-up in ten minutes, and on Thursday morning he was taken to Dover for trial.—*Essex (Haverhill) Banner.*

Rowe originally passed a counterfeit half dollar upon one John Brown in payment of a debt, for which he was arrested and imprisoned. When he obtained his liberty he gave Brown a flogging to pay off scores, and fled to Massachusetts. He was arrested, as above stated, and brought back to this city, when Brown fearing probably a repetition of the "higher law" with which he had once been visited, failed to appear as a witness against him and he was consequently discharged.

NEW YORK, Dec. 19.—The Constitution, burnt in the Mersey, was valued at $70,000, and was hardly covered by insurance. Her cargo consisted of cotton, flour, wheat, naval stores, &c., and was valued at $100,000, and her freight money at $25,000. The ship belonged to Messrs. Grinnell, Minturn & Co.

The Crescent City was 1800 tons burden, was built in 1847, and belonged to Messrs. George Law and Roberts—ship and cargo valued at $100,000, not insured. Offices would not insure her.

The Steamer Unicorn, bound to New Orleans, with a cargo of 2500 bales of cotton, caught fire on the morning of the 10th, when about twenty miles below Yazoo City, and both vessel and cargo were destroyed.

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

WEDNESDAY, Dec. 19.

SENATE.—In the Senate to-day Mr Clayton presented a memorial praying for indemnity for French spoliations prior to the year 1800.

Messrs. Brodhead and Crittenden presented memorials from certain officers, complaining of the action of the Naval Board.

Mr Jones of Tennessee offered a resolution calling for the proceedings of that Board. A discussion ensued, when the resolution was laid over.

HOUSE.—Mr Thorington withdrew his resolution providing for the election of Speaker by a plurality vote, as members desired to vote viva voce; but he gave notice that he should renew it to-day or to-morrow.

Mr Barclay (Democrat) of Pennsylvania explained his position. He said he never had the slightest sympathy with the Free Soil heresy; he and his party friends regarded it as they do the Rosinante of Cervantes, namely: a long, lean, miserable jackass of a horse.—[Laughter.[In the last canvass he was opposed to the repeal of the Missouri line, because he believed agitating the question involved a mere abstraction. If a bill was introduced to restore the line, he would be found in a solid column with the Democrats, voting against it.

Mr Campbell of Pennsylvania asked his colleague whether he was not elected as an anti-Nebraska man.

Mr Barclay replied he was regularly nominated as the Democratic candidate, and was opposed as much to the restoration of the Missouri line as to its repeal, because the latter gave occasion for agitation to break down the Democratic party, and damage the Union.

Mr Whitney of New York defended the American party at the North.

Mr Trafton of Massachusetts thought he did not represent it truly, as Massachusetts and other Northern states have anti-slavery principles.

Mr Whitney responded that the Free Soilers of Massachusetts rallied falsely under the banner of the American party. In conclusion he submitted a resolution to the House to elect a Speaker by ballot. The resolution was laid on the table by a vote of 213 to 7.

Mr Cadwalader (Democrat) of Pennsylvania congratulated the country upon this condemnation of the recent principles relied on by the Know Nothings.

Mr Fuller of Pennsylvania explained his position as being opposed to the further agitation of the slavery question. If he had been in the last Congress he would have opposed the territorial legislation, but he would not now vote for the restoration of the Missouri Compromise, and would admit Kansas with or without slevery. He was in favor of leaving that question to the decision of the people of Kansas.

Mr Todd of Pennsylvania said if he had known this before he would have suffered his right hand to wither before voting for Mr Fuller.

Mr Kelly of New York replied to Mr Whitney, saying the basis of Know Nothingism in New York was Free Soilism, and the latter would not have been elected to Congress had it not been for divisions in the Democracy.

Several other gentlemen explained their positions.

Messrs. Walker, Lake and Ready were satisfied with Mr Fuller's position.

Mr Ball of Ohio was not, and would vote for Mr Banks.

Mr Campbell of Kentucky defended the American party, and was severe on the Free Soilers.

During the proceedings there was much excitement; speakers were applauded, and there were some hissed. Another vote was then taken:—Banks 106, Richardson 75, Fuller 35, scattering 9. Necessary for a choice 113. Adjourned.

INTERESTING FROM WASHINGTON.—*New York, Dec.* 20.—The Times correspondent telegraphs: Senator Toucey is expected to receive the appointment of Minister to London, *vice* Mr Buchanan.

Edward Butler of Louisiana was to-day confirmed as Secretary of Legation to Berlin.

The Judiciary committee has reported favorably on the nominations of the Kansas Judges appointed during the recess of Congress, which were laid over for the discussion of the constitutional question of the executive power to remove territorial judges.

The Herald Washington correspondent telegraphs: A court martial has been ordered for the trial of Brevet Col. Blake, of the 1st Dragoons, for unofficerlike conduct. It is also stated that the President will prefer charges against Gen. Garland, of the 9th military Division, for neglect of duty.

I learn that an order has been issued that none but Americans be shipped for the new steam frigate Merrimack, now receiving her crew at Boston.

All the officers of the Army now in Washington are invited to the President's, this evening, to meet the Amoskeag Veterans.

THE ELECTION OF BANKS TO THE SPEAKERSHIP CONSIDERED CERTAIN.—*New York, Dec.* 20.—The Herald's Washington correspondent telegraphs as follows: "To-day's proceedings have changed the whole aspect of things, and it is conceded on all sides that Banks will be elected: it may be to-morrow, but surely this week. Col. Richardson informed him to-day he considered it settled.—Mr Fuller's nationality killed him.'

Patents.

AMERICAN AND FOREIGN OFFICE.

Agency for business only in United States Patent Office, Washington, **75 State st, oppo. Kilby st, Boston.**

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice in the business of Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting *one* dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agency of the highest respectability.

R. H. EDDY,

Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office as Solicitor of Patents. There never, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,

Late Commissioner of Patents."

From the present Commissioner.

ANNEX 17, 1856.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

G. W. STONE'S Cough, Consumption, and Bronchitis ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours complete cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine: for it will ever give it to their Children when they have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir with the words Boston, Mass. are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is prepared substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our own citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is maintained, tone and vigor given to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that remedy can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, Bingham, Me., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. On the inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CELEBRATED SMOKE

Consuming Patent

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.

TO THE WORKERS.

The ingenious and earnest author of Words to the Workers, says:

"Extravagance and intemperance are the working-man's greatest enemies. It is a very common thing to denounce the extravagance of the rich; but what do we mean by the term evitravagance? Is it not a relative term, signifying a useless, an improper expenditure,—the waste of capital upon articles which could be dispensed with? If, however, we say this with reproach of the wealthy, with what accumulated condemnation may it be charged against those who live by their toil! A workingman, or a workingman's wife, may be quite as extravagant in the purchase of tea and silk, as a rich man in the purchase of diamonds and pictures. When tea at fifty cents is good enough, it is shameful extravagance for a poor man to pay a dollar; when a coarse garment is sufficient for decency and comfort, it is extravagant to pay three times its price for a fine one; when homespun is the best material for his use, the workingman is a spendthrift who it ashamed to wear anything less fashionable than broadcloth; and when calico is more appropriate, it is wasteful folly to purchase silk. I know that the rich, or the comparatively wealthy classes, have much to answer for, in inciting to extravagance those whose ruin it is to copy their example, but who will ape them. I know the mercantile and professional classes of society have a responsibility; and in due time—so far as my voice will reach—I shall be found reminding them of it. But what a poor, unmanly plea it is, that because others do wrong, we, like patient sheep, must follow our leaders. What a disgrace to manhood it is, to avow our thorough want of independence, when following foolish customs will make us servants all our lives.

Intemperance has been so much agitated, that one runs the risk of talking in vain when remonstrating against it. But depend upon it, there is a great work yet to be accomplished by the working classes for themselves, before we may cease to speak of the wrong done to them by their too frequent over indulgence.—Something like one hundred and fifty thousand dollars are annually expended in the bar-rooms of this small city.* Where do you suppose that sum comes from? From whom is the iniquitous license fund of this city pilfered?—Do you dream that the low dram-shops of the place are kept from motives of benevolence? Do you think there is a man connected with the bar-rooms who will make a personal sacrifice, for the purpose of swelling the ill-gotton Pauper Fund? No, my friends, this money is wrung from the honest toil, and filched from the hard work, of the laboring men.—It is money which ought to build their houses, and clothe and educate their children, and furnish their own minds with that equipment of knowledge which will make their work a thing of soul and religious significance, instead of a dull routine of mechanism. Nor only so, but one may be intemperate without entering a bar-room. I know of men who are fierce enthusiasts upon the temperance question,—who will scarcely countenance religion, if it does not weave a temperance lecture into every sermon,—and yet these philanthropic hobby-riders are themselves guilty of the worst form of intemperance, in the excessive use of tobacco and snuff. They need the soul of temperance,—that spirit of self-denial which purifies, not alone a single quality, but the whole interior man; which labors at the fountain-head, and sets up duty and right as the paramount principles for life guidance, and the invariable governors. Let any workingman set resolutely about a retrenchment of his needless expenses, and an abandonment of his injurious habits, and, instead of wasting his capital, let him place it in the keeping of a Bank or a Savings Institution, and a very few years will suffice to assure him of the fallacies of agrarianism.

*Chicago.

WHEAT.—The Chicago Democrat says, the agent of the French government, Mr Haddock, still continues his purchases in that and other Western markets. He has paid out already at Chicago, over $1,200,000 through the Marine Bank, of that city. The large quantity taken by him has done much to keep up prices during the stringency of the money market. His purchases have been mostly spring wheat, and he is now paying for it $1,30 a bushel at Chicago.

In a single tow which went down from Albany, on Monday, of this week, there were 180,000 bushels of wheat—the largest lot that ever left Albany at one time. This 180,000 bushels possessed a value of $400,000. In addition to this were some $600,000 worth of flour, pork, &c., forming together one of the most valuable shipments that ever drifted down the Hudson.

The Richmond Whig of the 14th, states that the receipts of wheat in Richmond during the past two weeks have exceeded 141,000 bushels.

The Halifax (N. S.) Sun, says that in consequence of the Reciprocity Treaty, upwards of $200,000, solid cash, will find its way into the pockets of the Nova Scotia fishermen.—The trade of New Brunswick is going to receive a great impetus from the very same cause.

A sale of twenty-five hundred barrels of superfine flour was made on Tuesday, at Alton, Illinois, at $8 50 per barrel, to be shipped for Rio Janeiro.

The National Intelligencer learns that Dr. Francis Lieber has resigned his chair as Professor of History and Political Philosophy and Economy in the State College of South Carolina, at Columbus. The reasons of this change have not reached us.

SENATOR DOUGLAS.—A Washington letter says that Mr. Douglas will not arrive at the Capitol until spring, as he has gone to Cleveland to try the cold water cure. He is suffering under a severe ulceration of the throat.

SATURDAY, DECEMBER 22, 1855.

ROME AND AUSTRIA.

The Austrian Concordat, as the late treaty between Francis Joseph and Pius IX, is termed, has excited the surprise of the world. While Sardinia and Spain were showing signs of independence, Austria all at once and suddenly, has rolled back a whole century, into the arms of despotic Rome. In remarking on this retrograde movement, the Newburyport Herald says:

This is not the only evidence of the dominance of the Catholic spirit in the world. We have had others; the affirmed miracles and the immaculate conception, which any time within a hundred years, till now, would have been treated with ridicule and contempt.—These evidence only spiritual delusion and power; and so long as a church of any name, confines itself to that province, it is endurable, with all its follies; but in the treaty named, Rome shows her old thirst of temporal control, that renders her dangerous. As a system of religion we care nothing about Romanism. It is better perhaps, that men should believe in winking pictures and worship Madonnas, than neither to believe or worship any thing; and for some classes the government of the priesthood is necessary—it renders them far better as citizens than any other religion would; but though we have no fear of its political ascendancy in this country, yet when it stretches its sceptre over nations of thirty and forty millions of people, entirely subjugating them, as recently it has Austria, we are not surprised that a party should show itself in our politics firmly opposed to its advancement in any form among us.

In the terms of the treaty referred to, are those making the religious hierarchy absolute—above emperor, nobles or people—above laws, above courts. No one is allowed to revile or bring into contempt the church or its ordinances. It matters not what humbugs are started at Rome; no young Sutkers are allowed to bring their immaculate conceptions into contempt—it he does he may be punished as Rome knows how to punish offenders. The jurisdiction of the "livings" and the control of church estates are given entirely to the church; the government cannot interfere with the property it holds. Then, while priests may be brought before civil or criminal courts for offences, the Bishop must at once be informed of the matter, and sentence cannot be executed till he has been informed; and then, the priest condemned to imprisonment does not go to the jail with common scoundrels, but must be confined in a monastery or religious house. By this treaty, too, all sources of information and education are to be controlled in Rome. The Bishops have the right to proscribe all irreligious books and publications—nothing that does not suit them can be read; and to them is given the superintendance of all public and private schools. None but Catholic teachers can be appointed, it matters not what is to be taught. The Emperor may appoint inspectors of schools; but the Emperor himself can only appoint from among persons nominated by the bishops. Thus in every respect, over emperor and peoples, over laws and churches, over courts and schools, in things great and small, is Romanism supreme. Probably the young debauchee, Francis Joseph, by the will of the Pope Emperor, is allowed a women; but if he is, that is all that remains perfectly Austrian.

When a church, four thousand miles away, sets up such monstrous claims to power, it is not wonderful that even here it should not only be viewed with distrust but with abhorrence. In Austria it will prove disastrous. The liberal Catholics are distressed at their loss of freedom; the Jews are alarmed for their money bags and their safety; and the Protestants look towards tolerant Prussia and free America for escape. The very first step towards persecution, if one shall be made, will involve the empire in revolution. A treaty that any other country would have scorned to make, showing what Rome claims and is prepared to assume, cannot long be endured in Austria itself.

Row and Death.—On Wednesday evening, in Providence, R. I., Joseph S. Wheaton, a young man of respectable character and well connected, was passing by the "New York Saloon," kept by O. D. Day, a drinking and gambling house, attracted by the noise of a fight then going on between Day and William Edwards, better known as "Bill Deadeye," a notorious bully, went in. Just as he entered, Day drew a pistol with the intention of shooting Edwards, but most unfortunately its contents entered the breast of Wheaton on his right side. He ran into the street, exclaiming that he was shot and fell into the arms of a friend, who, with others, took him into a house where he soon expired. He was about twenty five years of age. Edwards was severely wounded in the affray, having been cut in various parts of the body with a knife. Edwards, Day, and Day's son, have been arrested.

It must be perfectly *constitutional* to have such fights, as long as we have such places: but it is supposed by some learned men to be *unconstitutional* to break up such dens. Can't a man sell what he pleases? and fire pistols where he pleases? If not, alas for our liberties, alas for the union, boo-hoo, boo-hoo!

George A. Fiske, professing to be worth $30,000, and to reside at Richmond, Va., eloped last week with a lady from Boston.

More probably his cash, it may be stolen, falls below $300.

Thomas Lawson, an Englishman, who was sentenced, about three years ago, to twenty years imprisonment in the State Prison at Wethersfield, Conn., for the forgery of pension papers, has been pardoned by the President.

On what ground?

Liquor Cases.—At the Court of Common Pleas, now in session in Bristol County, Massachusetts, says the Boston Telegraph, the following persons were found guilty: Patrick Gallagan of Taunton, common seller; Mary McManus of Taunton, single offense; Wm. Lawrence of New Bedford, single offense, and Henry Stackpole of New Bedford, single offence. Francis Collins, a witness in a liquor case, was defaulted. Other cases are ready for trial. The juries seem ready to convict, without any trouble, when the evidence is sufficient.

In Franklin County, Hezekiah Green of Greenfield, was lately indicted for selling liquor contrary to law. The trial was continued till March. Green left town last week, but has since been brought back and given up by his bondsmen, and is now safely lodged in jail.

A professional beggar named Mrs Shaw, who is so well known to our citizens for her pertinacity in soliciting charity, has accumulated property in this city by begging, for which she has recently been offered $10,000. She came to this city about ten years ago from Mercer, Pa., and since that time has industriously pursued her profession through all kinds of weather. Her perseverance has been well rewarded.—*Pittsburgh Post.*

She ought to have been committed as a vagrant, nine years and a half ago. She would have been, had the Pittsburg people then had a faithful and vigilant City Missionary, who would have been as useful in defeating this she hypocrite, as he could have been in giving alms to the really needy.

☞ My First Season; By Beatrice Reynolds,—is a new Novel, of more than common in crest, ingenuity, and purity of thought.—The Morning Post call it "a very well-written story, ingenious in its construction, bold and vigorous in its delineation of character, graphic in its descriptive passages, and 'as full of spirit as the month of May.' The interest of the book is sustained by the rapidity and subtlety of the dialogue, by the flash and sparkle of a poetic fancy, by the graphic pictures of life and manners, and, above all, by the skillful portraiture of human character."

Published by Fetridge & Co., Boston, and New York. For sale in this city by J. F. Shores, Jr.

☞ Godey's Lady's Book for January, 1856, contains three steel engravings, one of them a splendid colored Fashion Plate, with four figures; a beautiful lithograph, printed in blue and gold; 100 pages; 12 full page plates; 43 engravings; 66 articles.

The Tapestry Carpet; and My Wife's Portrait, are capital articles.

The engravings, These are my Jewels; Mother and Child at Prayer; Fashion Plates, colored and uncolored, are beautiful.

Day of troubles, is a spirited and graphic illustration.

Joseph P. Morse will supply subscribers and purchasers with the Lady's Book.

Latest from the South.—The Texas Democrat and Planter has the following important piece of intelligence:

It is supposed that four-fifths of the sugar sold at retail in Boston, is sold as "free labor sugar." A sign offering this kind of sugar for sale may be found in nearly every grocery in the city.

What sort of nonsense will come along next? And who ever saw half a dozen signs of that sort in Boston, or in all New England?

Rare Fishes.—A rare fish was found upon the beach a few days since, which was entirely unknown to all who saw it. In length it was about a foot, in form, something like a mackerel, though with considerable less bulk; in color it was dark bluish green upon the back, and the sides and belly were white. The head was long and tapering, and ended in a bill resembling that of a snipe and about the same length. It was sent to Professor Agassiz.—*Newport Mercury.*

The fish described above is what is termed by the Cape Cod men a "bill fish." During the first frosts in the fall of the year, they come ashore all along the whole coast of the Cape, sometimes in great numbers. Their average size is about eight inches. Their body is a little stouter than the smelt, and their head terminates in a perfect bill of a horny substance, of about one half inch in length.—*Charlestown Advertiser.*

We have seen cartloads of them drawn up on the Cape from Brewster harbor, where the sea left them at half tide, lying nearly a foot deep.—Cooked when fresh, they are delicate, well tasted fish.

Where is Nick Corcoran?—This inquiry is suggested by the fact that in the Roxbury Post Office are two letters, bearing the following superscriptions:

"To Nick Corcoran
of Boston State
of Roxbury
New York."

"this same is intinded for brither Jon or his son pat wisconsin State of Massachusetts to be put into the care of His ankle and his Ant."

The Spanish Cortes has just adopted, by an immense majority, the sixth article of the new constitution, which declares that no title of nobility shall be required as a qualification for the discharge of any office in the gift of the crown or of the people. This is a great stride towards the reformation of Spain, as it extinguishes the last of the privileges of the Spanish nobility, and places the people of all ranks upon an equality.

LOCAL.

For the Chronicle.

Mr Editor—One Economy, who replies to my note on the Agency, says, "To be sure the law says that rum agents *shall* be appointed, and grog shops established to operate on public account."

Permit me to assure Economy that the new law does not give any authority to establish *grog shops* at all. The old license laws did. I stated the law truly; it says towns *shall* establish agencies, for certain purposes only.

As to Economy's great question, suppose it (the law)—had said towns must establish distilleries—would the municipal authorities be bound to obey? &c. &c.,"—I would reply that I will answer that question when the Legislature passes such an act.

No sound lawyer and good judge will decide a law question till it comes fairly up in the case. Amicus Curia.

☞ Rev. Professor Huntington, of Cambridge, Mass., is to preach in the Stone Church in this city, to-morrow. He is also to deliver the Mercantile Library Lecture this evening at the Temple; and address the Young Men's Christian Association to-morrow evening, in the same place.

Christmas.—We understand that there will be religious services in the St. John's Church on Christmas morning, for which occasion the house is to be decked with the Christmas evergreen.

We make use of this occasion to say that we, the Chroniclers, intend to *keep Christmas* as in former years, that is, to publish a paper on Christmas day, but none the day after.

☞ We learn that Hon. John Van Buren, Col. Aspinwall, late Consul at London, and Mr J. Howard March, Consul at Madeira, are passing the Christmas holidays with Mr Chas. W. March in Greenland.

N. H. Agricultural Society.—We are indebted to the officers of the Society for a copy of the "Transactions of the New Hampshire State Agricultural Society, for 1854, with condensed reports of the County Societies." It is a handsome book of 400 octavo pages, with several illustrations; and contains much interesting and valuable matter for agriculturists, especially those in New Hampshire.

Successful Dentistry.—It will be hard to find a more complete or efficient establishment for every thing that pertains to the care or remedial treatment of the teeth, than that of Dr. J. A. Cummings, 25 Tremont street, Boston. Dr. Cummings has recently associated with himself, in business, Dr. G. H. P. Flagg, a successful and experienced dentist, in order to meet the constantly increasing demand for his professional services. The business will hereafter be conducted by Drs. Cummings & Flagg. Lately enlarged, their establishment now embraces five spacious and tastefully furnished apartments, having three distinct operating rooms, and a laboratory unsurpassed by any in the country for the manufacture of teeth, plates, and all the modern improvements in the art. By improved apparatus, they are enabled to furnish the most thorough and finished description of work at quite moderate prices.

Even the extraction of teeth, which has heretofore been considered so painful and difficult, is improved in their hands, by long practice, superior instruments, and the judicious administration of ether.

Dr. Cummings, does not, however, confine himself to surgical skill. A painful tooth may sometimes be saved to good purpose, by proper medical treatment, and for this reason he has prepared a *Nervo Anodyne*, which often saves the use of the forceps, and restores the tooth to tolerable health. The great popularity of, and demand, for this article, sufficiently testifies its utility. We have probably said enough to convince any one who suffers from "toothache" that a call at 25 Tremont street is the shortest and surest road to peace and quietness.—*Boston Traveller.*

Reported Death of Robert Schuyler.—The *Courrier des Etats Unis*, of New York, publishes an extract from a private letter from Paris, stating that Robert Schuyler died of grief and mortification about the middle of last month, at his residence near Genoa. He was not enriched by his frauds, but received from America the funds necessary for his subsistence. It is also stated that the place of his residence would have been made known, "if certain persons occupying important positions in the management of several railroads, and especially of the New Haven Railroad, had not been deeply interested in securing his silence and absence from the country;" and it is intimated that several eminent New York financiers will not be sorry to hear of his death. Also that he has left papers which will be published. The whole story is a doubtful one.—*Boston Telegraph.*

Philadelphia, Dec. 19.—Schooner H. H. Gould, of Orleans, Mass, while coming up the river this morning lost a sailor named Martin Finlay, who was drowned. Captain Gould leaped into the boat to save him, when the boat swamped and he also was drowned.

There have been 1,343 British ships built during the present year. We suppose this means all descriptions of vessels, as ships is a common term employed by the English, oftentimes to designate barques, brigs and schooners, as well as ships proper.

The Paris correspondent of the New York Times says that by the use of the newly invented gun boats Cronstadt will be destroyed, and Louis Napoleon feels so confident of the fact that he is ready to head the expedition in the spring.

An Impostor.—A girl about 16 years of age, calling herself Emma Lewis, representing herself as from Baltimore, destitute, without clothes, having lost her trunk, and wishing a place to live, is making a tour through our cities. Three weeks since she was here, last week in Newburyport, Sunday in Portsmouth. In some places she uses the name of the minister at large, in Lowell, with some address as a passport to kind reception and favor. The police in Lowell want her.—*Lowell Journal.*

Grand Musical Festival.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION
Will hold a
PUBLIC MUSICAL CONVENTION,
AT HANOVER STREET CHAPEL,
Portsmouth, N. H.,
Commencing on Tuesday, Jan. 8, 1856,
To continue three or four days, and close with at least one

GRAND CONCERT
of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of
Prof. B. F. BAKER, of Boston,
With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

THURSDAY, Dec. 20.

SENATE.—On motion of Mr Cass, the protest of members of the Illinois Legislature against the election of Mr Trumbull, was referred to the Committee on the Judiciary.

Mr Trumbull submitted evidence of the regularity of his election, which was referred to the same committee.

HOUSE.—The contest for Speaker was resumed, with the following result:—

Whole number of votes	221
Necessary for a choice	111
Banks	104
Richardson	73
Fuller	34
Scattering	10

Mr Banks lacked seven votes.

Mr Smith of Alabama made a proposition to appoint two standing committees, one on Ways and Means, and the other on Foreign Affairs, in order to proceed to some kind of business. These committees to select their chairmen by a majority vote, and the chairmen to preside over the ordinary business of the House alternately till a Speaker is elected.

Mr Smith further proposed that one hour be devoted to the introduction of bills to be hereafter referred to the appropriate committees. Members then to be sworn in by the Chairman of the Committee on Ways and Means. The House next to proceed to the election of a Clerk, Postmaster, Sergeant-at-Arms, Doorkeeper, and last, but not least, a Chaplain, through whose prayers, perhaps, some oil may be thrown on the troubled waters. This is no time, he observed, for crimination and recrimination. We want harmony and concession.

Several gentlemen objected, as the plan specified in the law of 1789 prescribes that a Speaker and Clerk shall first be elected, and members sworn in by the Speaker before proceeding to any other business.

Mr Smith remarked that unless some such plan was adopted public business must suffer.

Mr Cadwalader (Democrat) of Pennsylvania counselled his Democratic friends to adhere to their position and platform.

Mr McMullen (Democrat) of Virginia, warned the Seward Black Republicans that if the government of the country should ever pass into their hands, and the Missouri restriction be restored, and the Fugitive Slave Law repealed, this Union must and will be dissolved—the declaration of that fanatical greyheaded man, Giddings, to the contrary notwithstanding.

Mr Zollicoffer (Know Nothing) of Tennessee assigned the reason why he could not support either Messrs. Richardson or Banks, saying that he and his friends stand on a middle and national ground, which all might occupy without compromising their principles.

Mr Wright (Democrat) of Tennessee contended that however patriotic the American party here may be, they are, by their votes, making the extension of the naturalization laws paramount to every other consideration.

Mr Cox (Know Nothing) of Kentucky recognized no one as a member of the American party who does not stand on the twelfth section of the Philadelphia Platform, and said the Speaker could be elected immediately if the Democrats came over to his side, but the Americans have no power to carry over all their force to Mr Richardson. Adjourned.

FRIDAY, Dec. 21.

The House is still engaged in a personal discussion relative to the Speakership.

The Shoe Business in Amesbury village is growing in importance, and a greater number of shoes are manufactured, and a larger amount of capital employed than we had any idea of. There are six firms engaged in the business. These give employment to about three hundred persons, and manufacture 230,000 pair of shoes annually, at a cost of about $150,000. Seventeen sewing machines are employed by them.—*Villager.*

FOOD FOR MAN AND BEAST.—Within the past 40 hours, the following provisions have been received at Boston, viz.: 11,802 barrels flour, 23,074 bushels corn, 16,279 bushels potatoes, 4700 bushels oats, 10,000 bushels shorts and 9000 bushels paddy. The harbor is full of vessels laden with "more of the same sort."—*Traveller.*

LIBERAL UNCLE SAMUEL.—The *yearly* expense of maintaining our twelve military posts and two thousand men in New Mexico, is said to be about one a half millions of dollars, or seven hundred and fifty dollars per man.

The English copy of No. one of Dickens' Little Dorrit, occupies thirty-two pages, but it is accompanied by no less than seventy-six pages of advertisements.

Over 3,000,000 gallons of lager beer are 'worked down' annually in New York city.—It costs $3 to $5 per barrel, and retails at an advance of 100 per cent.

The Allenstown, Pa., Democrat says that the barns of the farmers in that section are absolutely breaking down under the weight of grain, and yet they will not send their supplies to market.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK OF the country. 648,573 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON the AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by

d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids do destroy the *points* of gold pens, actively corrode steel pens, or *chemitally decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent HARRISON'S Is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in the United States and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct records of patents granted in this and other countries: besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

CHARLES MASON,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a preventive and Cure for Consumption, it has no equal.—It purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine: let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little pets. Price 50 cts.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and a clearly developed tact in his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been more thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. The formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the Cause, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is exercised, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as is nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

OFFICE OF THE MARYLAND CONSOLIDATED LOTTERIES,
Baltimore, Maryland, 20th June, 1855.

CAUTION.—LOTTERY FRAUDS.

THE Commissioner of the Maryland State Lotteries has deemed it his duty to caution the Public against the numerous Swindlers who circulate by mail and otherwise, fraudulent Lottery schemes, and pretend to be agents for the sale of tickets in Lotteries which are wholly fictitious.

The only legal Lotteries in Maryland are those drawn daily under the superintendence of the Commissioner elected by the people of the State under the new Constitution to examine and approve the schemes and attend to the drawings.

All the tickets in these Lotteries, and all certificates of packages of tickets have the lithograph of signature of R. A. Brent, General Agent for the Contractor. Office of the Maryland Consolidated Lotteries, Baltimore, Md. All others are fraudulent. For full information on the subject of these frauds, address F. X BRENAN,

The Best Oil in the Market

IS THE
EXTRA WINTER BLEACHED LARD OIL.

IT is very white, burns equal to Sperm, and is very much cheaper, and will not congeal in the coldest of weather. Sold at wholesale by S CLEAVES & SON, and can be had at retail of La Fayette Laighton, Samuel Donnell and A. A. Payne.

THE NEXT BEST ARTICLE IS THE
Extra Winter Bleached Polar Oil,

CAUGHT only in the Polar Seas by New Bedford Whalers. It is received every week fresh and newly manufactured from New Bedford.

Sold at wholesale by S. CLEAVES & SON, and can be obtained at retail of James Junkins, Joseph Hayes & Son, A. A. Payne, La Fayette Laighton, Chas. E. Laighton, Samuel W. Moses, and Robert McCay. Persons wishing good lights—by being particular in purchasing either of the above Oils, of the persons named, can rely upon pure oils and will not be disappointed in their light.

S. CLEAVES & SON have been agents and sold New Bedford Oils for the past six years, during which time the Oils sold by them have given the best satisfaction.

UFFORD'S
CELEBRATED SMOKE Consuming Patent LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press."

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.

Try it! Try it! Try it!

G. W. STONE'S

LIQUID CATHARTIC,

AND

Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigoratES the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhœa and Cholera Morbus* yield at once to its magic influence Again we repeat, TRY IT—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand Are you suffering with Scrofula, six bottles of my Liquid Catharitic will cure you. Would you be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles In short, if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

MONDAY, DECEMBER 24, 1855.

CHRISTMAS.

We honor the New England Thanksgiving, the great and almost the only Family Feast of the Puritans,—the American Harvest Home. But we cannot cherish the puritan hatred or fear of Christmas, Christmas Holidays and Christmas Ceremonies.

Christmas, the natal day of Jesus, who should save his people from their sins,—is kept by the Greek, Roman, Abyssinian and English Churches,—and we rejoice to keep it with them, in all good fellowship and christian sympathy—raising no curious question about the day or date. They agree in it, as Dec. 25—and we will not dissent, where we can propose no day more probable. Enough that it is consecrated by the observance of ages, and that it is appointed to celebrate the most blessed event which the world has ever known.

It is the religious thanksgiving day, the annual feast of the Christian world. We will rejoice on that day, in the things wherein all Christians agree; and forget if we can, all heresy and schism.

Would to God we could forget, in a speedy peace, the bloody, heathen, inhuman war, now raging between the three great European powers which represent the Greek, Roman, and Anglican Churches. But we cannot forget it now—for the war goes on: and so we look forward and upward away from these bloody scenes, to that life and immortality brought to light in the gospel of Jesus, whose birth day is on the morrow.

The Boston Chronicle says, Well may it be anticipated with gladness, and crowned with associations which shall make the hearts of all leap for joy at its coming. Well may we bring in the fir-tree, the pine, and the box, together, to beautify the sanctuary, and brighten our dwellings, when we celebrate his coming who has brought us the hope of an undying life. Well may we gladden all hearts with our cheering gifts of friendship, when we are centering our thoughts upon God's unspeakable gift. Well may our warmest wishes pass from lip to lip, when we think of that marvellous display of love which we commemorate, and of the way now open for our best wishes to be realized. Well may our happy circles be gathered around the friendly board, when we think of the provision which has been made for an everlasting re-union in our Father's house above.

The Christian Witness, in noticing the approaching natal day of our Saviour, remarks: "But the proper business of a Christian festival, it has well been said, is religious joy manifested in all those ways which may express and deepen the glad emotions of a devotional heart. It is this to which we are especially called. Our highest anthems fall far below the exalted theme, and every rolling year should only add to the gratitude and love with which we dwell upon its transcendent wonders. They greatly misunderstand this blessed season who look upon its external demonstrations of gladness as all. If there are any of our readers who have never known the happiness of celebrating the Savior's coming with the deep-felt consciousness that he has become their Savior, we would urge them with this preparation to celebrate the approaching Christmas, and they will find it a glad day indeed."

THIEVISH BOYS.—The Newburyport Herald states that two boys, named George E. Burns, and Wm. H. Dyer, 11 and 14 years of of age, who have been financiering to a considerable extent, purchasing coats, pants, boots and shoes, and other articles under false pretences, were arrested Monday, by Marshal Brown. They visited the stores of Messrs. Sweetser, Little, Geary, Piper and others, stating that their parents sent them, and they wished to take them home to see if they would answer, &c. Having secured quite a large stock, they took the cars for Salem, thence to Gloucester, and back to Beverly. Marshal Brown traced them on their route, and they were brought back and held in custody until released by their friends, who paid for the goods purchased. They were not arraigned before the Court on account of age, which was taken into consideration, but received some wholesome advice which we hope will prove beneficial not only to them, but to other boys who may be tempted to do wrong.

☞ The Rival Beauties. A Novel, by Miss Pardoe: in the cheap form, price only 50 cents; is just published by Fetridge & Co., Boston; and for sale by J. F. Shores, Jr., of this city. The admirers of Miss Pardoe's novels, and they are many, will find her reputation well sustained in this book.

☞ The Good Time Coming, by T. S. Arthur, has just reached us from the publisher, J. W. Bradley, Philadelphia. It is one of Arthur's best Moral Tales. 300 pages, handsomely bound. No parent need hesitate to give this book to his children.

☞ Dickens's Household Words, for January, 1856, just issued by Dix & Edwards, New York.

SCHOOL CELEBRATION.—The twelfth anniversary celebration of the Female High School in Newburyport, on Wednesday afternoon, was one of great interest. The exercises consisted of some hymns composed by members of the school, Prayer by Rev. Mr Spalding, Report by the Principal, Address by Rev. Lyman Whiting, of Portsmouth, and concluding prayer by Rev. Dr. Withington.

The Herald says:

Mr Whiting commenced his address by a vivid allegorical picture of a school, which he described as a building. He painted study as a chariot; as a bird; as the arrow of Alcestes. He then passed to the subject of prayer as related to study—as the highest employment of the intellect and the heart—as the distillation of all culture—the crowning grace of all beauty—the seal of all excellence. His remarks were fresh and original, and the æsthetic attractions of the illustrations would draw even those who did not appreciate the practical value of the subject.

After the address, the past and present members of the school, with their friends, assembled in the school room. Remarks were made by the late Principal, Mr Case; by Rev. Dr. Withington, the first orator at the Anniversary in 1844; Rev. Messrs. Pike, Lane, Whiting, Fisk, and Spalding; after which, according to custom, the whole company joined in singing "Auld Lang Syne"

The young ladies of the school entertained their friends in the evening, by a Levee at the City Hall, where Tableaux and social greetings closed the day very pleasantly.

COLUMBIA, S. C., Dec. 20.—The South Carolina Legislature adjourned *sine die* last night. The bill to give the election of President to the people was lost. The bill relating to the imprisonment of negro seamen was not reached. The meeting called to consider the affairs of Kansas declined to act for want of reliable information. A meeting of the members of the Legislature, called to appoint delegates to the Cincinnati Convention, did not act for want of time, but it is understood that over fifty of the members are in favor of having the State represented in the Democratic National Convention.

Our readers may not *all* know that in South Carolina, the *Legislature* appoint the Presidential Electors. This is the fact, however.

FOREFATHER'S DAY.—The Sons of the Pilgrims kept their high day at Plymouth on Friday, Dec. 21. The Boston papers and many others, are filled with the eloquence of Messrs. Seward, Boutwell, Phillips and others.

FROM LAWRENCE.—*Lawrence, Dec.* 6.—To Col. D. Veitch: Our forces convened at Franklin and Lecompton are 1200 pro-slavery men, eager to demolish Lawrence, and are hardly restrained by Governor Shannon, who is on the ground; and unless their arms and provisions are surrendered this evening, Lawrence is razed to the ground to-morrow.

Pomeroy, Dr. Mott, and several other persons are under arrest in the pro-slavery camp. The pro-slavery party commands seven pieces of artillery—six pounders. The probable force in Lawrence, from personal observation, numbers 400—that is, 400 soldiers armed with 300 Sharp's rifles, one piece of artillery certain, and probably more. The north end of Main street ditched and redoubts thrown up to bear on the hill, in case of attack from that quarter. Flag of truce on the hill, raised this morning, and two United States flags in the city.

The informant was in Lawrence at 9 o'clock this day; rode through and saw 250 soldiers on parade. He met about thirty guards in different portions of the prairie, but was permitted to pass. The difficulty will doubtless be settled to-morrow morning—most probably by a fight! E. R. H.

—*Lexington, Missouri, Express, Dec.* 8.

LATEST FROM KANSAS—THE WAR ENDED.—The following dispatch from Independence, Mo., indicates that the border ruffians have retreated from Kansas without venturing to attack Lawrence. Most of the exciting dispatches which the leaders of these fellows have sent over the country have come from Independence. This is from the same source and seems to be intended as their account of the retreat:

St. Louis, Dec. 19.—A dispatch from Independence of the 18th inst., says that the trouble at Lawrence, Kansas, has been settled by the people promising to deliver up the offenders, obey the laws of the territory, recognize the Governor as such, and conduct themselves in future as law abiding people. They refuse, however to give up their arms. The volunteers have disbanded, and returned home.

It is quite likely to be true that the Missouri villains have backed down; but it is not likely to be true that the Lawrence people have promised to deliver up any body, much less "offenders," when there are no persons in the place answering to what is meant by this term. They have never refused to acknowledge Gov. Shannon, nor interfered with any law of the United States. The truth appears to be that the bucaneering scoundrels have been scared from their purpose by the resolution of the Free State men, supported by Sharpe's rifles.—*Boston Telegraph.*

NEW YORK, Dec. 21.—Dr. Oliver Wendell Holmes's oration before the New England Society to-night, created a great sensation. He denounced the Abolitionists of New England in good round terms as 'traitors to the Union,' and was hissed, which was met by repeated rounds of applause. He also denounced the Maine liquor law as a remnant of Puritan intolerance and fanaticism.

INDIANAPOLIS, Ind., Dec. 20.—*The Liquor Law.*—The opinions of the Judges of our Supreme Court, in a case involving the constitutionality of the prohibitory liquor law, has been decided. Judges Perkins and Davidson are against the law in toto. Judge Stewart sustains it, except the manufacturing, search and seizure, confiscation and the agency clauses. Judge Gookins sustains the whole law.

LOCAL.

POLICE COURT. Saturday, Dec. 22.—On Saturday forenoon Andrew Goodrich of this city was before Justice Odell on complaint for selling seven glasses of brandy to Bickford L. Rand Jr., on the 3rd inst. The complaint was proved as alleged, by Rand and six other witnesses, who accompanied him and drank each a glass of brandy. The respondent plead not guilty, and set up a defence that Rand and the others had combined against him maliciously, because he prosecuted a boy by the name of Moran for assaulting his wife on the 12th inst. His Honor bound the respondent over to the Supreme Judicial Court to be holden at Exeter on the second Tuesday of February next, in the sum of $200.

S. H. Goodall for State, W. H. Y. Hackett for deft.

On Saturday afternoon Andrew Goodrich above named, was again arraigned before the Police Court on complaint for "unlawfully and criminally keeping for sale a large quantity to wit, one quart of brandy" against the Statute, &c., on the 12th inst. It was proved on the part of the prosecution that Mrs Goodrich wife of the respondent, sold in the shop of the respondent three glasses of brandy on that day; that the brandy was kept in a decanter under the counter and that the respondent was not present at the time of the sale. The counsel for the respondent in defence contended that unless Goodrich himself was then and there present at the time of the sale, or in the absence of testimony showing that he authorized and allowed the sale of said brandy by his wife, that he could not be held under this complaint. His Honor stated that he considered Mrs Goodrich as the agent of the respondent and he was of opinion that the case should go up to the Supreme Court and accordingly bound Goodrich over in the sum of $200. Goodall for State; I. B. Claggett for deft.

Mrs Ellen Goodrich, wife of Andrew, was arraigned for selling two glasses of brandy on the 19th inst. She plead not guilty. It was proved by a boy named Goodwin and one other witness for the State, that they went into Goodrich's shop on the 19th, and called for brandy; that Mrs Goodrich was the only person in attendance, and sold them two glasses of brandy, as alleged. On the part of the respondent it was contended that she could not be held on this complaint—relying upon the judgment of the Court in the last case—"that Mrs Goodrich was acting as the agent of her husband"; that the principal and not the agent was liable. His Honor, however, decided to send the case up, and ordered the respondent to recognize in the sum of $200 for her appearance at the Supreme Judicial Court. Goodall for State; Claggett for deft.

☞ Prof. Huntington, of the Divinity School at Cambridge, lectured on Saturday evening, at the Temple, on as well as *before*, the Mercantile Library Association. Taking these three words of the Society's name as a text, he discoursed 1 of honesty, 2 of intelligence, and 3dly of mental, moral and spiritual culture, in the merchant and man of business: and in so doing gave us at once a beautiful lecture and a faithful sermon.

He pointed to Wilberforce, Hopper, Lawrence and others as examples and illustrations—and urged fidelity, heartiness, and benevolence, with great force and unction.

He would have the good merchant take care of his ledger—but yet he would make him pause, with his finger on the column of figures, to listen to the call of the poor man, the desolate widow and the hunted fugitive.

He would have him understand the laws of trade and respect the laws of the land; but he would have him obey and reverence the higher law, the law of God, without which there can be no other law that deserves the name.

He would have him cultivate that noble charity which, while it looks abroad, is not blind to woe and want, to oppression and misery at home: and he would have him so alive to Christianity that while he could hear and pity the mutterings of the slave in his cabin and of the criminal in his cell, he could feel himself a christian freeman, and labor with hope of a better time coming, for them as well as for himself.

The lecture was well attended and well received.

The Music on the Grand Piano, was by Mr Meinerth.

☞ Prof. Harrington, the celebrated ventriloquist and Magician, is to perform at the Temple on Wednesday and Thursday evenings of this week, as will be seen by his advertisement. The Professor was here about a year ago, and his performances were received with the utmost satisfaction by crowded houses. His performances are entirely unexceptionable, and no doubt the house will be crowded.

☞ We understand there will be the usual Christmas Eve services in the Stone Church, this evening. The Church has been neatly trimmed with evergreen, for the occasion.

OPENLY AND FREELY.—A considerable amount of quibbling has been expended over these words.

The N. H. Gazette says, in reply to a paragraph of Rev. Mr Jackson:

In Portsmouth, liquor is sold freely and openly, and we challenge the Rev Mr Jackson or any one else to deny the fact.

An article in the same Gazette, signed Q., says:

The Chronicle is very desirous to make it appear that liquor is not sold here openly. Most of our dealers have never sold liquors without proper caution as to the purchasers, and many persons who are known to be improper persons to sell to, are and always have been, refused by the dealers. Probably Uncle Toby would have some difficulty in buying the stuff.

Well: probably he might: but what does this prove? Does it show that liquor is sold *openly and freely?* No, indeed; on the contrary it goes to show that it is under *restriction*, and therefore not free and open.

To proper persons, the judicious dealer will sell, but never without proper caution.

But *improper* persons, such as Uncle Toby, would probably have difficulty, or be refused! Why? We can think of but two reasons, viz. 1, because those improper persons might get drunk, and thereby expose the shopkeepers to disgrace and prosecution: and 2, because they might, though sober, become informers, complainants or witnesses, and so the worthy sellers get fined or sent to jail.

Now let any of these *improper* persons, say Uncle T. if you will, go to the bakers to buy bread, to the butchers to buy beef, or the grocers to buy tea and sugar—they will have no difficulty at all, nor be refused, if they have the money. The dealers will exercise no caution at all, except the very *proper* caution to make them buy as much as possible. That is what we call an *open and free sale*,—where there are no sneaks nor lies, no cautious nor perjuries, no tricks nor shams.

If any body chooses to call restriction by the name of freedom—or say that a thing is done openly, when it is done under false colors, and denied whenever charged, very well: so be it: only do give us a new dictionary: Webster's definitions will be an obsolete idea.

Now we say, that in an illicit way, liquors are sold in this city, and we know it, for we see the drunkards; and we are sorry that it is so. But the fact, if it be a fact, as stated by Q. that a class of persons of whom Uncle Toby is a representative, might not get *the stuff* if they wished to drink it, which they do not wish—shows clearly that the trade is hampered and clogged with more or less fear of the law, is conducted with some darkness, and when attacked, defended by all sorts of crooked pleas.

CHRISTMAS.—For several years past most of the dry goods dealers in this city have closed their several places of business on Christmas, thereby enjoying a day of recreation for themselves, as well as for those in their employ. An effort has been made to have the stores closed to-morrow, but a few hold back, thinking it for the good of the place to be at their post on that day. We understand, however, that the principal dealers in Dry Goods have decided to close their stores and do no business on that day, hoping that others may follow. It is to be desired that the day may be generally observed; for we have not, as a New England people, too many holidays; nor can there be any valid objection to a proper observance of this. *

☞ The Chronicle will be printed on Christmas morning—but we shall issue no paper on Wednesday.

Grand Musical Festival.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

THE subscribers have formed a Copartnership under the firm name of WALDEN & CO., and will carry on the GROCERY BUSINESS, as heretofore, at the old stand, No. 9 Water street.

Portsmouth, Dec. 17, 1855.

JACOB WALDEN,
AUGUSTUS WALDEN.

All persons having demands are requested to present them, and all persons indebted to the subscriber are requested to call and settle the same.

d11 JACOB WALDEN.

LOST—supposed to be lent, a year ago, a copy of Zundel's Melodeon Instructor. Also, a copy of the Boston Handel and Haydn Collection of Anthems, with the following names written on a blank leaf or cover: Cyrus Smith, Ichabod Bartlett trustee, Wm Claggett, T. H. Miller. Also, sundry other Music Books with the latter name.

They are probably lying useless somewhere.—Will the holders please return them to the Chronicle Office?

CONGRESS.

CONGRESS—WEDNESDAY.—In the Senate several petitions were presented from naval officers who consider themselves aggrieved by the judgments of the late Naval Board, and who pray for such relief as may be thought proper by Congress in cases supposed to demand special legislation.

A suggestion from Mr Bell that the President's Message might throw some light on the matter, induced the Senate to await the reception of that document. Mr Clayton, in presenting some memorials for French spoliation claims, took occasion to remark that the Veto Message of the President on this subject was based on the erroneous impression that the claims were paid under the treaty of 1803, known as the Treaty of Louisiana. So far from it, he said, there is evidence in the Department of State to show that none of the names of the present claimants were on the list. Mr Foot moved a resolution of inquiry into the expediency of granting pensions to the officers and soldiers (their widows or minor children) of the war of 1812. The Senate then had a brief Executive session.—*Wash. Union, 20th.*

THURSDAY, Dec. 21.

HOUSE.—Mr Cox debated the question of slavery, and defended its existence under the Constitution.

Mr Etheridge differed from that gentleman, and claimed that the South held their slaves in contempt of the Constitution.

Mr Cox, after giving several gentlemen opportunities for explanation concerning the Kansas-Nebraska bill, concluded his three hours speech in advocacy of the recognized principles of the American party.

Mr Cobb defended his democratic friends from the charge that they are responsible for the failure to organize the House, as being in the minority they are powerless, without a union with those with whom they cannot sympathize. The proscriptive principles of the Know Nothings he said formed an impassable barrier to a union with them. He implored the friends of Mr Richardson to stand firm and not to waive the democratic organization, especially at a time when it is purged of the last vestige of free-soilism, and is entering upon new triumphs of principles.

Mr Foster replied by saying, that the democrats had wedded themselves to a measure, and not to a great principle, for it had come out to-day, that the Nebraska bill is understood differently in one section of the country from what it is in another. If principle is the test let it speak but one language. He condemned the Democratic caucus resolution.

Adjourned.

WASHINGTON ITEMS.—The Washington correspondent of the Courier & Enquirer telegraphs:—

It having been discovered that Messrs. Nicholson and Forney would be rejected as printers to the Senate, a caucus was summoned to reconsider their nomination. Mr Forney sent in an affecting letter declining the nomination. A mournful debate ensued. Party insubordination was deplored. The nomination was rescinded, and the whole subject postponed to January 2. The administration organ is repudiated, and the party broken up.

WASHINGTON, Dec. 21.—Hon Wm. Smyth member of Congress from Va., and Mr Wallace, editor of the Star, had a severe personal rencontre on Pennsylvania avenue to-day, arising out of some strictures in that paper on Mr S's conduct.

The debate in the House to-day widened the breach between the Richardson and Fuller parties.

PHILADELPHIA, Dec. 20.—*Incendiary Attempt.*—An attempt was made at an early hour this morning to set fire to the Northern temporary home for friendless children in this city. The fire was kindled in the lower part of the building, but was, fortunately, speedily extinguished. One hundred children were in the upper portion of the building.

NEWSPAPER SUSPENDED.—We have just learned that the Kanzas Tribune has been suspended. Mr Joseph L. Spear, one of its editors, was lately assaulted by a gang of Missourians, and most shockingly beaten. His face and head were horribly mangled; his face was cut open from mouth to ear and his neck was partially cut off. He was rescued before he was quite killed.—*Cleveland Leader.*

We are satisfied from information in our possession that the so called President Rivas of the new democratic government of Nicaragua, is in fact a mere *prisoner* of Walker's, who signs his name to documents only by Walker's order, the penalty of death by command of that individual at all times hanging over him, for refusing to obey the commands of those who hold him really in custody, rather than sustain him at the head of the new government as professed.—*Washington Star.*

Harrison's Columbian Ink, Black.
FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,573 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON the AMERICAN MANUFACTURER, and determine its great superiority over all foreign Inks. It is at wholesale and retail by
d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.
PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

Patents.

AMERICAN AND FOREIGN OFFICE.

Agency for business with U S Patent Office, Washington,

76 State st. oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, resigned in the fall of 1857) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty as paid back by others) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in the United States and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and in infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent. less than other offices in the profession, but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded in Washington, and patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability. R. H. EDDY,

Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office, and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,

Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1854.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,

Commissioner of Patents.

G. W. STONE'S Cough, Consumption, and Bronchitis ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to the sick that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal. It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received, at most trifling expense, have been carried by it, fully justify the assertion that no family should be without this Medicine: let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cents.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs established. In consequence of its great cure is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of ash-enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CELEBRATED SMOKE

Consuming Patent

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press." &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of Table Lamp, $1.25.

"BAPTIST BIGOTRY."—Winchell, a writer in the Lowell Christian Era, says:

This phrase meets the eye, and strikes upon the ear with much frequency. The Circular Letter of the Boston North Association has brought out a tide of abuse which is poured upon our denomination. That letter, in strong, unequivocal tones for which the author is distinguished, and for which he should be commended, *condemns* Pedo-baptism, with the monstrous ideas of baptismal regeneration, educational conversions and the other no ions which gather around it. For this the author is abused, and the denomination charged with bigotry. But has not this been our position from the first? Do we not endorse the position of Gill who *proves* infant sprinkling to be "a part and pillar of Popery?" and have we not from the outset considered "baptismal regeneration," believed in, and taught by Episcopalians, and *inclined to* by all who hold to infant sprinkling, as a *soul-destroying error?*—Are not the views of the Circular of the Boston North Association the views of the denomination? If they are, let us defend them, and not for the smiles of Pedo-baptist ministers, and the complaints of Pedo-baptist papers, denounce them. * * * *

A Circular Letter is the expression of the body. It is first prepared by a brother appointed by the Association; it is then carefully examined by a Committee; then read to the body publicly; then adopted by a formal vote; then printed and sent to the churches as the voice of the Convocation. * * *

The Boston Letter was committed to three of the most careful men in the denomination, Rev. Messrs. S. R. Mason, S. B. Swaim, and N. M. Williams. This Committee reported that they "had read the Letter, approved it, and recommend that it be read." When the hour came it was read, and by a formal vote the Association approved it, and ordered it to be printed in the Minutes, without a dissenting vote.

There is no cause for avoiding the responsibility. The case is a plain one; we must repudiate the sentiments of the Circular, or manfully avow them.

VENERABLE CLERGYMEN.—The Boston Advertiser adds four more names to the previously published lists of Massachusetts clergymen upwards of 70 yeais of age, viz.:Rev. Alpheus Harding of New Salem, aged 75—a graduate of Dartmouth in the class of 1805. Rev. Ephraim Abbot of Westford, aged 76—a graduate of Harvard in 1806. Rev. Luther Wilson of Petersham, a graduate of Williams college in 1807. We copy the following notice in full:

Rev. Samuel Willard of Deerfield, aged 79. Born in Petersham 1st September, 1776; graduated at Harvard in 1803; ordained at Deerfield 23d September 1807; resigned September 1829. He is a remarkable and beautiful example of the power of Christian faith to make old age and infirmity pass for cheerfulness, united with usefulness and mental vigor. His health is excellent, though he has been totally blind for many years. He weeds his garden, trims his apple trees, saws his wood, knows all the current intelligence in the weekly newspapers, secular and religious; hears many books read; amused himself a few years ago by demonstrating all the propositions in the first four books of Euclid, with the *mental conception* of the diagrams carried throughout; is now committing to memory the *very words* of the New Testament, to have in mind in *exactis verbis* when the time may come when his *hearing* shall fail; still preaches occasionally.

A young man named Everson, only 20 years old, and well known as a theatrical dancer, has been arrested and sent to jail in Baltimore, for robbing the house of Aaron Hoffman of $17,000 worth of money, notes, jewelry, watches, &c. Everson left a mark in the house, by means of whice he was detected, but he has since acknowledged the crime. He was in the habit of visiting Mr Hoffman's house, and in one of his visits he carried away a key, by means of which he entered the house the same night and committed the robbery. He went into the room where Mr H. and his wife were sleeping, and took from his pocket the watch and some money, and afterwards went into a room where two daughters were sleeping and took the other property from a bureau; and no one in the house was disturbed. The property with the exception of fifty dollars, has been restored.

DR. KING'S CLAIM ALLOWED.—The New York Observer says:—

It gave us great satisfaction to be able to say last week, that after so many years of delay, vexation and loss, the claim of Rev. Jonas King, D.D. upon the kingdom of Greece, for pecuniary damages sustained by him, has at last, through the interposition of our government, been allowed. Although Dr. King has been paid far less than he was in equity entitled to, it is a source of gratification to him and his friends, that the difficulty is at length adjusted amicabl,yby the payment to Dr King by the Greek government, of $25,000 in full of all demands.

In the Superior Court, at Norwich, Ct., last week, Miss Ellen R. Wheeler, daughter of Ephraim Wheeler, deceased, recovered a verdict of $500 damages against Mr Ralph Coates, for killing a fine Newfoundland dog belonging to Miss Wheeler, and for injuring her in her efforts to save her pet. The Norwich Courier says that by the violence with which the dog was dragged from her, she was thrown to thefloor, and, still maintaining her hold upon the animal, was dragged out of the house and down the stone steps of the door, her arms and head were severely bruised and lacerated, and her feelings, as may well be supposed, greatly shocked. This outrage was caused by Mr Coates's suspecting the dog to be guilty of entering his barn, and eating part of a quarter of veal. Both are residents of North Stonington.

LIVE FUR.—It is stated that one of the furgatherers on the Penobscot arrived in town last Sunday with a large lot of furs, among which were seventy-six live cats in a large box. The music was great and the party was constrained to remain in the suburbs of Brewer lest the people going to church should discover the strange character of his freight.—*Bangor Mercury.*

"In Cork," said O'Connell, "I remember a supernumerary crier, who had been put in place of an invalid, trying to disperse the crowd by exclaiming, with a stentorian voice, 'All you blackguards that isn't lawyers lave the presence of the court entirely, or I'll make ye, by the powers.'"

A miserly German, so mean that he has been known to chaffer about the price of a horse shoe he had picked up in the street, recently died in Sandusky, Ohio,from the effects of exposure, not being sufficiently clothed. He left a fortune of $50,000, but no relatives.

CHRISTMAS.

A Merry Christmas to you! or if you dislike the word Merry, because it has, like merriment itself, been perverted and abused,—let us wish you a Happy and Joyous Christmas! not free from thought and care, for that is neither desirable nor scarcely possible:—but free from needless fears and unprofitable anxieties—full of faith and trust in the God and Father of Our Lord Jesus Christ, who sent his Son into the world, not to condemn the world, but that the world through him might be saved.

Let every body do his best to make every body happy. Let our celebrations illustrate a Christianity without cant, a piety without commotion, a benevolence without show; let existing affections be strengthened, the sins of the past be forgiven; but, above all things, don't forget the poor.

Let us do what we can to-day, the greatest of the anniversary days,—to make others happy; by the interchange of civilities, little gifts and such tokens of appreciation as shall give encouragement: let the faithful servants and those who do the drudgeries of life be first rewarded, for they put just values on such favors; then the children; then friends and lovers.

KANZAS AFFAIRS.—The mail accounts of the peaceable settlement of affairs at Lawrence,—a notice of which was received by telegraph some days ago—came to hand on Saturday, and they confirm the truth of the latter, though each side has its own version of the mode of settlement. Thus, the St. Louis Democrat (Benton) says:—

The propositions of peace came from Atchison and Shannon, at a council held in Lawrence last Friday and Saturday, at which a treaty of peace was concluded. To the demand made upon them to obey the laws, and deliver up their arms, the people of Lawrence responded by professing their constant willingness to do the former, but flatly refusing to yield the latter point.

On these terms, hostilities were terminated, and the Missouri troops received orders on Sunday morning to disband. The Missourians were armed with revolvers and double-barrelled shot guns, and were, for the most part, mounted. They were encamped at Wakarusa, on the road from Lawrence to Westport, six miles from the former place, and at Lecompton on the Kanzas River, ten miles west of Lawrence, being at no time more than six hundred strong at Wakarusa, or more than two hundred at Lecompton. The free state men amounted to seven hundred in Lawrence, all armed with Sharpe's rifles, while two hundred more could easily have been gathered from the adjoining country, and were, therefore, in no fear of the result, had a collision unfortunately arisen.

The St. Louis Republican has another account in a despatch from Independence, which says:—

The whole affair terminated according to the Governor's wishes, by a promise, on the part of the Lawrence people, to deliver up the offenders to justice—to obey in future the laws of this territory—to recognize the Governor as such, and do all other such necessary acts as a law-abiding people should do.

Both accounts state that the Missourians were much cowed at being disbanded.

FLORIDA.—The delegates from Florida to the Cincinnati Convention of the Democratic party are instructed to insist on the Kanzas Nebraska principle; on the Missouri Compromise; and the prompt and faithful execution of the fugitive slave law, and its permanent continuance upon the statute book. If these propositions shall not be in substance incorporated in the platform adopted by the Convention, the delegates from Florida will be instructed to withdraw.

CRIME.—On Friday night officer Stevens found the dead body of Joanna Gullivan, 21 years of age, in the house of her parents, at 193 Congress street, Boston, and informed Coroner Smith, who took charge of the body. From the fact that the deceased had stated, just before her death, that she had been beaten by her father, and from some other circumstances, the father, Michael Gullivan, was arrested, and locked up to await the result of an autopsy and inquest on the body.—*Boston Courier.*

This is most or badly the work of a drinking father. Total abstinents do not beat women.

GEN JACKSON AND F. P. BLAIR. Those who have read the letter of Mr Blair against the extension of slavery will get an idea of what a demurrer he used in be cons dered, from the following exclamation of Old Hickory:—

"*What does Frank Blair think! for I'd give one to his opinion than for the whole Cabinet's, with the Supreme Court thrown in!*"

It is doubted now, as a black republican.

BLUNT.—Dr Baillie, (who was not more famed for medical skill than for his common-sense mode of displaying it,) being called to attend an eccentric individual, styling himself Dr Jones, the dramatist, during a nervous attack, which he was subject to, the fertile indi- [illegible] "No," [illegible] doctor, "but you do for your reputation!"

COL. FREMONT.

The Boston Chronicle has a leader on Col. Fremont's prospects for the Presidency; from which we make the following extract.

His character is pure. His name is most honorably connected with some of the most daring and useful occurrences in our history. He has a reputation at once for coolness and for "dash," such as no other American possesses. He has the mind to plan and the will to execute, long ago admitted, through their union, to constitute the true right divine. He has never been mixed up with the dirty politics of the age, but could come into the arena with a spotless shield, and lead the people on to a splendid victory over the remnants of ancient fogyism. He has no obligations to this, or to that, or to t'other political clique, and would owe his success to the people alone. He could be independent in his action, which has been the case with no President this many a year. He occupies a position very like that of General Jackson, when that gentleman was first nominated for the Presidency. Although the General ultimately became the chief of a great party, and no other result of the Jackson movement was possible he was drawn forward by men who desired to get rid of party rule. The republicans and federalists of those times had run together, just as the Democrats and Whigs of our day are doing. A corrupt, unprincipled, centralized party was the consequence of that fusion.—Just such another party has come into existence through the fusion of Whigs and Democrats which we have seen partially accomplished, and which is in a fair way to be perfected. The people then looked about them for a leader, and wisely selected Andrew Jackson for that station. The first battle they lost. The hosts of party were too strong for them. The work of a generation could not be overthrown in a day. The politicians triumphed, but only to make their fall the more remarkable at the next election. So may it be now. Those who are desirous of getting rid of party rule, as exhibited in its present shape, might place Col. Fremont at their head, and, if they should not succeed in their first attempt, might do so at the second. We think their chances of immediate success would be excellent.

P. F. DEGRAND.

This eminent and honorable man of business; we perceive by the Boston Courier, is apparently near his death, with dropsy. We well remember him as the editor and publisher of Degrand's Report, near forty years ago, when that paper was the leading price current of the town of Boston.

He was born in the south of France, about seventy five years ago, and has resided in this country, chiefly in Philadelphia and Boston, for more than half a century, actively engaged in business during the whole period. Extensively known as an ardent friend of internal improvements, and the founder of that great and successful enterprise, the Western Railroad, he has very appropriately been called "the De Witt Clinton of Massachusetts."—Honorable and prompt in all his dealings, and possessing uncommonly clear intellect, combined with the most agreeable suavity of manners, he could not but be popular with all who knew him. These qualities have also been crowned with success in a pecuniary point of view, which has enabled him to perform many acts of kindness and liberality to others who have been less favored with this world's goods. One who has known him well and long, cannot refrain from bearing this testimony to the virtues and usefulness which have distinguished the long life of a good citizen, whose mission on earth is about drawn to a close. He will soon depart from among us, and "the places that have known him will know him no more."

P. S.—Mr Degrand died on Sunday evening.

BIOGRAPHICAL, BUT NOT FLATTERING.—The Newburyport Herald gives the following first rate notice of the Hon. Parker H. French, the newly arrived minister for Nicaragua:

French is a man of great activity and energy, and it is fortunate that we have new territory and inviting neighbors around us, to occupy such as he and his associates, the Kinneys and Walkers, or we might occasionally have more trouble with them at home. If they are successful in business they make our first men; but if they fail there is little restraint upon them. About the last legitimate business French did in this country, was to attempt ship-building at St. Louis, Mo. He built a vessel, called the Matilda, the first and last constructed in that place, which proved an unfortunate speculation. Then he went to Texas and turned up as a leader of parties overland to California, where being out of provisions and out of funds, he purchased cattle of the Texas farmers paying them in forged drafts on New Orleans. The planters finding themselves cheated, pursued him, and regained a part of their property. He afterwards fell out with his own men, who stripped him of all he had. Next he appeared in northern Mexico, as the Capt-in of a border company of filibusters, but was taken by the Mexicans and reported to have lain in prison a year. How he escaped does not appear; but soon he is a prominent citizen of California, the publisher of a paper, a member of the legislature, and a daring speculator; but California was tame, and he went down to Nicaragua with Walker, helped settle matters there, and, probably on account of the financial shrewdness displayed in Texas, he was placed at the head of the Treasury department. If there had been any fun in their treasury he would have stopped for a while; but shortly he was the accredited minister to the United States; and possibly his future by its brilliancy may hide the deformities of the past, since we judge all by successful results, and it may no more be remembered that French was a swindler and forger than that Louis Napoleon did not pay his washer woman and his board bills in New York. Any way, they will find French to be one of 'em.

John Betram, owner of the Water Witch at Salem, personally administered to the comforts of fifteen shipwrecked seamen of the ship William, of New York, who were rescued and brought in by the Water Witch, and he gave each of them a suit of clothes. The grateful tars passed free over the Eastern Railroad.

LOCAL.

☞ To-day being Christmas, no paper will be issued from this office on Wednesday morning.

☞ Rev. Dr. Huntington delivered his fine lecture on Chrysostom, whom we delight to call Saint Chrysostom, before the Young Men's Christian Association on Sunday evening at the Temple. The evening was favorable, and the audience large and attentive. We regard such lectures as peculiarly valuable;—and wish we could hear *all* the lectures on the several Christian Fathers, as given to the Boston Society. We are to have one on Augustine, from Rev. Mr Hall.

The music on the occasion was by a Union Choir, accompanied by the Grand Piano, played by Mr Pearson.

ADDENDA.—It should be added to our Police Court Report on the liquor cases of Andrew and Ellen Goodrich, (which was furnished by one of the counsel,)—that not giving the needful bonds, they were locked up in jail to wait for February Court.

It should also be stated, that they sold to very *improper* persons, viz. to seven conspirators, whereby they are deprived, for the present, of the chance for a free and open sale of drams.

INSTALLATION.—Rev. D. B. Bradford was installed pastor of the Congregational Church at Raymond, on Wednesday, Dec. 5. Invocation and reading of the Scriptures by Rev. U. W. Condit of Deerfield. Prayer by Rev. C. Dame of Brentwood. Sermon by J. P. Cleaveland, D. D. of Lowell. The subject was, *The power of the Gospel doctrines.* Consecrating prayer by Rev W. D. Herrick of Candia. Charge by Rev. Mr Parker of Haverhill. Right hand of fellowship by Rev. W. D. Herrick. Address to the Congregation by Rev. U. W. Condit. Concluding prayer by Rev. J. H. Melish of Kingston.

The congregatoin was large, and the services listened to with attention.

FATAL CASUALTY.—We are pained to announce the sudden death of Mr Dwight R. Perry of this city, formerly of Fairhaven.—Yesterday afternoon, Mr Perry called at the horticultural nursery of Mr John B. Burgess on Maxfield street, and while engaged in the selection of some plants, he unfortunately leaned against a door opening into another part of the building, thus forcing it open, and precipitating himself backward a distance of some five feet into a subterranean apartment upon a rock. His neck was dislocated by the fall, causing instant death.—*New Bedford Mercury, 22d.*

MANY RICHMONDS IN THE FIELD.—The Newburyport Herald says:—

The opposition in the United States Senate to give the printing of that body to the Union newspaper, has led the publishers, Messrs. Nicholson & Forney, to decline being candidates for that patronage. Forney, the leading editor, is from Pennsylvania, the same State with Buchanan, and is a zealous advocate of making Mr Buchanan the Democratic candidate for the Presidency. It is said to be on that account that some members of the democratic party were opposed to giving him the printing. Almost every act in Washington now, has a look to the presidential contest, and the aspirants for the highest national honors are numerous and active. Mr Buchanan has the lead of the expectants, and naturally his rivals will do any thing to weaken his chances. Mr Hunter of Virginia has pleased himself with the idea of the nomination, but he has a rival in Mr Wise of the same State, and none of them are so able or in any way so well qualified, as Mr Cushing: but possibly some man yet unknown to fame, may be put over the heads of them all.

The jury in the case of Samuel Sprague, tried last week in New York, for the murder of Margaret Fertig, failed to agree, and were discharged. The evidence showed that the deceased got between her husband and the prisoner, as they were quarreling together, and attempted to strike the prisoner, and that during the altercation the pistol went off, shooting the deceased in the breast. It was further shown that the husband subsequently said, that if his wife died from injuries she received, he would be $2000 better off than if she survived.

A jury in New York, last week, informed the Court they "had agreed to disagree." The judge instantly fined each $20 for contempt of Court. Nine apologized, and their fine was remitted; the others are bound to test the judge's authority in the matter. Warrants have been issued for their arrest.

SINGULAR CAUSE OF DEATH.—We learn from the Woonsocket Patriot that about three months since, Mr Eleazer Brown, of Uxbridge, stuck a small blackberry thorn in his finger, inflicting a slight wound which grew worse, and finally mortified, causing his death on Saturday last. He was 32 years of age.

A NEW MOVE IN REGARD TO THE SPEAKERSHIP.—*New York, Dec. 24.*—The Tribune correspondent telegraphs from Washington—Should the resolution in favor of the adoption of the plurality principle to elect a Speaker be pressed, an amendment will be proposed embodying the proviso that no person heretofore voted for shall be eligible to the office.

A correspondent of the Washington Union, who describes himself "An Old Whig," says:

Let not the Whigs be humbled because their party has been swallowed. The whale swallowed Jonah; Jonah was heard of afterwards, the whale never.

CONGRESS.

SATURDAY, Dec. 22.

HOUSE.—A resolution was adopted confining every member in debate to ten minutes. Mr Slaton offered a resolution to elect a Speaker by a plurality vote. The vote was called, and the resolution was tabled by a vote of 114 against 107. Mr Sapp of Ohio offered a resolution that after to-day the House shall meet at 10 o'clock, A. M., until the election of a Speaker. Rejected by two majority.

Mr Perry of Maine said that the House had decided to-day not to elect a Speaker by plurality, therefore he offered a resolution that after to-day no debate be in order till the Speaker was elected. He thought this plan, if adopted, would result in the speedy organization of the House.

Mr Keitt of South Carolina offered, as an amendment, that after to-day, all balloting for Speaker be suspended until the third day of January, the reason assigned being that a majority of the Senate have left the city, and it will be therefore impossible to obtain a quorum for the reading of the message, even if the House should organize before that time.

Mr Bocock of Virginia suggested that, acting under ordinary parliamentary usage, a majority might reverse the resolution, and then, proceeding to ballot, an undue advantage might be taken.

Mr Keitt said it would be base and infamous to do so.

Mr Sherman of Ohio maintained that the first business to be done was to elect a Speaker, and the House cannot postpone that duty.

The House refused, by a majority of ten, to lay the whole subject on the table.

Mr Keitt's amendment was rejected, and the consideration of Mr Perry's resolution postponed until Monday, when the House adjourned.

MONDAY, Dec. 24.

The Senate met and adjourned over till Thursday.

In the House there was a continuance of the discussion and personal explanations in reference to the Speakership, but no vote had been taken at 2 o'clock.

NEW YORK, Dec. 23.—The Washington correspondent of the New York Herald telegraphed to that journal on Saturday evening as follows:—"To-day's proceedings in the House are both indicative and significant. The plurality proposition was voted down by a combination of the Fuller men with the friends of the administration. In every instance, when a test vote was required, Mr Fuller's friends voted with the administration, and I was informed this evening that should the alternative be presented, they will vote for a Southern man in preference to Mr Banks."

Another correspondent says:—I am assured that it is the purpose of Mr Fuller to withdraw on Monday from the contest of the Speakership, and that another candidate will be put forward by the National American party.

Major Harris of New York takes the post of the late Col. Miller at the Philadelphia Barracks, with the rank of Lieut. Col. of Marines.

NEW YORK, Dec. 23.—The New England Society celebrated the fiftieth anniversary of their organization by a festival at the Astor House last night, at which some 500 of our most noted citizens participated. The orator of the Society this year, Oliver Wendell Holmes, delivered a poem, and the poet, Rev. John Pierpont, made a prose oration. Among those present were representatives from all the benevolent societies of the different nationalities having organizations in this city.

ALBANY, Dec. 21.—*The Prohibitory Liquor Law Sustained.*—The Supreme Court of the Seventh Judicial District has just made a decision sustaining the constitutionality of the prohibitory liquor law, as far as brought before them. This decision overrules the decision of Judge Parker on the fifth section of the law, on both points. Prosecutions under the law will be commenced in Rochester immediately.

FILLIBUSTERS TO BE HEADED OFF.—*New York, Dec. 24.* The Northern Light has engaged to take out to Nicaragua a company of 500 fillibusters, who have been enlisted and drilled in this city, under the auspices of Parker H. French. District Attorney McKeon has protested against the movement, and telegraphed to President Pierce for instructions for further proceedings. Among the freight of the Northern Light is a considerable quantity of war munitions.

The land under cultivation in Prussia is about 60,000,000 of acres.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all the Farmers—the GREAT INK of the country. 944,578 bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by
d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids do destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

The Salem Register says that an affray occurred in Salem on Monday evening between three Americans and three Germans, and that Wm. Clark, a young sailor 16 years old, was knocked down and stabbed in the back, and now lies in a critical situation. The Germans were arrested.

Among the crew of the ship James Ray, at Philadelphia, a Lowell girl has been discovered. She is only 17 years of age, has been married, and has a child two years of age. She is said to be as expert as many of the "old salts," and has been to sea before. The captain intends to send her home.

SINGULAR DEATH.—On the 13th inst., as Mr. Frederick Couch, a wealthy farmer in North East, New York, was sawing wood at his door with a circular saw, run by horse power, the saw *exploded*, and a piece about six inches square struck him in the head, passing entirely through to his chin, killing him instantly.

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty as paid back by others) will be presented by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 20 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.

Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the more reliable and successful practitioners with whom I have had official intercourse.

CHAS. MASON,
Commissioner of Patents.

G. W. STONE'S Cough, Consumption, and Bronchitis ELIXIR.

THE Proprietor would respectfully call the attention of the public to his valuable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXER a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine; let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., is well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extensive practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who join in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength is maintained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S Cough Mixture, SAW & CLARK, Kennebunk, Me., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of and enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CELEBRATED SMOKE
Consuming Patent
LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' Patent Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press." &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.

MISSOURI LEGISLATION.—A session of the Legislature of Missouri, more than ordinarily vital in its action to the honor and the highest interests of the state, has just come to a close. Of the results achieved, the Daily Democrat of St. Louis says—

We rank as foremost the defeat of the aspiration of Gen. Atchison to a seat in the Senate of the United States. The significance of this is plain and marked. Missouri abhors the policy pursued by Atchison in proposing the repeal of the Missouri Compromise. She puts the seal of reprobation on the agitation of the slavery question, which has grown out of that breach of compact, for which Gen. Atchison glories in being primarily responsible. The violence and frauds practiced in Kansas, and the excitement fermented in Missouri on the same subject by means of the Lexington Convention and other assemblages, were intended to operate on the Missouri Legislature, to secure Atchison's election and the endorsement of the Kansas-Nebraska bill Six weeks of incessant plotting and scheming failed to bring about either the one or the other of these measures. A sanction of the Kansas bill was strongly urged upon the Legislature by the Governor in his regular message. Happily there was a majority possessing the nerve and the probity to resist and crush this effort to compromise the state, and commit it to the corrupt designs of a factious cabal, here and elsewhere. The resolutions were voted down, and with them the last hopes of the nullifiers to sustain their cause in Missouri.

As a most conclusive proof of the reaction of the public mind of the state upon the Kansas question, the Democrat proceeds to say that the "University Bill," which failed to pass at the last session, was passed this year by an "overwhelming m jority."

Seven hundred and seventy acts were passed at this session. Amongst them were one to loan to the Pacific Railroad Company the sum of $250,000 for four months, to meet the immediate wants of the company; and another which prevents the selling or giving away of liquor on Sunday, on penalty of forfeiture of license and inability to obtain a new one for two years.

MUNIFICENT BEQUESTS.—The New London Star gives the following list of public bequests made by the late Jonathan Coit, Esq., of that city:—

First Congregational Church,		$6,000
Second "	"	6,000
Episcopal	"	3,000
First Baptist	"	3,000
Second "	"	3,000
Third "	"	3,000
First Methodist	"	3,000
Second "	"	3,000
New London Seaman's Friend Society		2,500
The Cent Society		6,000
Poor in the Alms House		10,000
		$48,500

The income of that bequeathed to the poor at the Alms House is to be applied to the benefit of only those who seek refuge there—and not to any poor outside of the institution.—The income of that bequeathed to the different churches to be applied to the benefit of the clergymen connected therewith, and managed by the officers connected with each institution. The remainder of the property is mostly bequeathed to female relatives. Mr Coit's entire property amounted to $300,000.

ALMOST ON FIRE.—The proprietor of a clothing store on Middle street, Portland, after having lighted his gas on Thursday evening, locked his door, and went to tea. During his absence, a vest hanging over the light caught fire, which communicated speedily with other articles. A gentleman passing saw the condition of things, and, without waiting for ceremony, made a flying leap through a large square of glass, and extinguished the flames. In a few minutes more, the whole store would have been on fire, and probably an "unknown incendiary" would have been charged with the act.—*Argus.*

A BELL TUMBLE.—Last Sunday, in Hartford, while the church bells were ringing for the morning service, the heavy iron yoke sustaining the big bell in the Centre Church steeple gave way, and the bell—a heavy one weighing 3,500 pounds, fell upon the timber frame, which had been built, a few feet below, to receive it, in case of any such emergency. It is possible that, had it not been for this heavy timber work, the bell might have crashed down through the the floors, demolishing everything in its path.

A bill has passed the senate of South Carolina, by a vote of 23 to 19, by which it is provided that, instead of the whole legislature appointing presidential electors, such members of the house of representatives as shall meet on the day fixed for the election shall appoint them.

LIFE AND DEATH.—The Christian Chronicle thus refers to the death of Mr. Bullard of St. Louis, who was slaughtered in the great massacre on the Pacific road awhile ago:—

The sudden death of Mr. Bullard, on the Pacific Railroad, at the Gasconda Bridge, was the subject of a discourse by Rev. Mr. Beman, at his church, Troy, N. Y. It will be recollected he was present at the dedication of Mr. Bullard's Church in St. Louis, on the Sunday before the accident occurred. He remained some days afterwards, and received as did many other distinguished strangers, an invitation to participate in the excursion.—Both Mr. Beman and Mr. Bullard accepted, but a correspondent, writing to the Boston Journal, says:

"The daughter of Mr. Beman refused to go; she was anxious to return home, and to her earnest solicitations her father yielded, and on the morning of the fatal excursion he and his daughter took the conveyance for the East. At the cars he took leave of Mr. Bullard, who said to Mr. Beman, 'Farewell, we shall never meet again in this world.'

"'Oh yes, we shall,' said Beman, 'I may visit the West again, or you may visit the East.'

"With great solemnity, Mr. Bullard replied, 'I have a strong presentiment, brother Beman, that we shall never meet again—farewell.'

And so they separated—the one to his home and parish, the other to the awful death awaiting him only a few hours ahead. Death swung his red lantern on the track, and "destruction wasted at noon day."

A million and a half of money is waiting for owners in the County of Armagh, Ireland.—John White emigrated to this county in 1814 or '15, and is believed to have left two sons, Abner and William. Their descendants can claim the property.

THURSDAY, DECEMBER 27, 1855.

DR. OLIVER WENDELL HOLMES.

The following sketch of Dr. Holmes's Pilgrim oration in New York is taken from the Courier & Inquirer:

A glimpse of the outer and inner life of New England, sketched with much fervor, served to introduce questions affecting the morals and politics of her people. In the remarks which followed, the Maine law and slavery were somewhat woven together. Mr Holmes passed a warm eulogium upon the self sacrificing devotion which has been exhibited by people in Southern cities in attending upon the dingy wants of victims of epidemic, and said that the people of New England had got to be tried by the same high standard. An example had been set them by the South, which is too often mentioned with opprobrium, that New England has yet to show her willingness to follow.

There is, he continued, something to fear about New England's present position and future destinies. The Maine law, he argued, is a remnant of that intolerance and fanaticism which undeniably characterized the Pilgrims—it originated in the same spirit which peopled Rhode Island with Baptists.

Just stop a moment, Dr Holmes, and let us see how this is. The Puritan fanatics of Massachusetts two hundred years ago and more, passed blue laws against the Baptists,—and presto, Rhode Island was filled with Baptists.

Now the fanatic puritans of New England pass intolerant laws against intoxicating liquors,—and therefore, we suppose—to carry out the parallel—New York and Pennsylvania will overflow with refugee tipplers, martyred tapsters, and persecuted drunkards, who sigh over the wreck of their liberties lost,—leaving nobody behind but sober men, who will neither people the jail, the almshouse, nor the lock-up. What a doleful prospect! No street fights; no midnight brawls; no interesting police reports:—everything will seem just like Sunday, only more so!

And then, look at the solemn procession! Driven out by the cold water fanatics, see the caravan of liberal saints and martyrs, as they sweep on from Eastport and Bangor, through Portland and Portsmouth, through Boston and Providence, increasing at every city; kneeling round the tomb of Roger Williams in sack cloth and ashes; and finally shaking off the blue dust from their feet, as they leave the bourne of fanaticism. Their horses are lean and shabby, their harnesses ragged; their chariot wheels squeak for lack of grease; their jugs and bottles all empty; their casks and throats as dry as the bones in Ezekiel's Valley of Vision. They arrive in New York; and like true pilgrims kneel down and kiss the holy ground; then rising, they snuff the the fragrance of the distillery, as its aroma floats in the perfumed air, and guided by its pillar of smoke they rush forward to slake their burning thirst in its lethean waters.

They fill their tin pots and glasses with a grand libation to Bacchus—and pour it—not out, but down their throats. Three cheers rise up—another drink; another, and another! Cheers multiply; three times three—three times three hundred—nobody can count them. Joy turns to delirium—they foam; they fight—they reel, and stagger, and fall;—many to rise no more till the resurrection at the last day.

The sacrifice is complete. On the monument of these poor pilgrims be it written—"Died Martyrs in the cause of Bacchus, and victims to the persecutions of cold water fanatics."

Even nature cries out against it; the vintages of Ohia and the hills of New Hampshire proclaim that the law of Maine will never take effect as long as the law of fermentation remains among the statutes of heaven. This remark excited a good deal of mirth.

We should think so;—when granite calls for fermentation, and Nature cries out in behalf of the grog-shops.

The same conscientiousness which reveals itself on other questions shows itself in the deep feeling on the subject of slavery. It was a question if the people of New England cherish the right spirit on the subject.

Quite a question, we think. They are angry sometimes, when trod upon too much; but they lack firmness.

Mr Holmes then proceeded at some length, discussing the position of New England towards the rest of the Union. He eulogised her morals, learning, and general prosperity, but condemned in very decided language, the feeling manifested by her people in their intercourse with those of other States. He took ground that politically they had no right to denounce a man for being a slaveholder or polygamist, and inclined to the opinion of a radical distinction among the races of men—the white standing at the head.

Doctor! Doctor!! you forgot all about the *pilgrims* when you took up the cudgel to defend those two equally blessed and patriarchal institutions, Polygamy and Slavery. Doctor Holmes put these two beautiful things together, and he can never sunder them. They are two of the leaves of his literary chaplet.

Don't laugh, reader; finish the sketch.

He denounced the abolitionists of New England, and their disloyalty to the Union, with all the strength of language, and his remarks caused a lively sensation. They were hissed and applauded with great vehemence, and prolonged for several minutes.

Mr Holmes concluded his oration with a few generalities, gracefully expressed, and sat down amid general applause.

The Doctor no doubt thinks he bears the Union on his Atlassean shoulders;—and ought to hasten to Washington, where a host of such giants are wanted just now, to keep the locomotive steady on the track.

CONGRESS.

MONDAY, Dec. 24.

SENATE.—Met and adjourned over to Thursday.

HOUSE.—Mr Leiter of Ohio, having received from time to time two votes for Speaker, stated distinctly that he had never been a candidate for the office and never would be. He stated this lest it might be suspected that there might be something wrong in his position. He had, he said, as regularly and constantly voted for Mr Banks as any other man in the House.

Mr Stewart of Maryland, in explaining the reason why he had been voting for Mr Richardson, said that his, (Mr Richardson's) position, as well as Mr Fuller's, had been explained distinctly and explicitly, but that of Mr Banks had not. He inquired of Mr Banks whether he ever said, in a speech in Maine, "Let the Union slide."

Mr Banks replied that in that speech he said there might be such a state of things in which he would consent to such a proposition. He had reference to future contingencies, such as the prostration of the gigantic power of government to the support of a single institution, slavery. He was for the Union as it is, and would meet its enemies in a fair field. He was for the Union as the guarantee of the rights of the states, and the main prop of our government. He would have the Union stand on the records of history, in the language of Washington, "Crowned with immortal Fame."

Mr Smith of Virginia.—I am not satisfied with the answer of the gentleman. Did you say, "Under certain circumstances, you would let the Union slide?"

Mr Banks.—I have said all that I desire to say.

Mr Smith.—I wish it to be distinctly understood, that those who sustain Mr Banks are voting for him with the knowledge that, in a certain contingency, he would "let the Union slide."

Mr Grow of Penn.—I ask the gentleman, and every member who has been here for the last four years, whether such a declaration has not been repeated from time to time by some of those who are now voting for Mr Richardson, namely, that they are willing to dissolve the Union, and "let it slide," in a certain contingency. We stand here to support the compromise of the Constitution as it is explained by the fathers of the republic and contemporaneous reports for over sixty years. We say we are not willing to take any other construction, or to consent that slavery shall go whe ever our flag floats.

Mr Rust of Aakansas said he believed from the beginning that all debate was out of order as the first business before the House was the election of a Speaker.

The proposition pending, namely, that no debate shall be in order till after the election of a Speaker, was tabled.

Mr Stewart of Maryland submitted a proposition declaratory of the national principles on which the Speaker of House should stand.

Mr Colfax of Indiana stated that if Mr Stewart would accept as a substitute a proposition for the annexation of Cuba, and appropriating by annexation that part of Oregon surrendered to Great Britian by Mr Polk he might vote with that gentleman. [Laughter.]

Mr Bocock of Virginia raised a question of order, saying that law required that a Speaker be elected and members be sworn in before the transaction of other business.

Mr Boyce of South Carolina, among other questions, asked Mr Banks as follows:—

Are you in favor of recognising Hayti, and receiving a black Minister?

Do you favor the abrogation of the Fugitive Slave Law, and the abolition of slavery in the District of Columbia?

Cries from the friends of Mr Banks—Call the roll. [Confusion.]

Mr Banks replied to Mr Boyce, and said he distinctly recollected Mr Richardson (being a candidate for Speaker) declining to give answers to questions propounded to him. [Laughter, and cries of "Good—good—call the roll," &c.]

Mr Florence of Pennsylvania here made an ineffectual attempt to have the House adjourn till Thursday, for the purpose, as he said, that members might participate in the religious and social observances of Christmas. (Laughter.)

Mr Brooks of South Carolina, said he was willing to let the Union slide. If the gentlemen on the other side, who support Mr Banks, have that fixed determination, he wanted his constituents to know it. He desired the issue made here, that it might be frankly met, if necessary.

Mr Shorter of Alabama, although voting for Mr Richardson, was willing to unite on some other conservative candidate, who believes that the Missouri compromise line should not be restored,—in order to effect an election.

The House then voted, with the following result: Banks 101, Richardson 72, Fuller 31, Pennington 4, scattering 7. Necessary to a choice, 108.

Mr Nichols of Ohio offered a resolution, that a Speaker be elected by a plurality vote. Tabled, by 116 against 101.

Mr Orr of South Carolina moved that when the House adjourn, it be till Thursday.

Mr Giddings of Ohio—We have no power to adjourn; if the motion was agreed to, a majority may come here to-morrow, reverse the order, and elect a Speaker.

Mr Orr—If a Speaker were elected under such circumstances, the majority would find Jordan a hard road to travel. [Laughter.]

Mr Florence—And it would be a very pretty example for Christian men to set the country. [Merriment]

Mr Orr's motion was then negatived, and the House adjourned until Wednesday.

LOCAL.

☞ The Lecture before the Mechanics' Lyceum, on Tuesday evening, was by Hon. Mr. Keyes of Dedham, on the West; and a poor lecture it was. It contained facts and statistics enough, just such as we get from the gazetteer and the census; but it did not exhibit one new thought, nor scarcely an old one in a new dress. We have forty men in this city who could write as good a lecture; and twenty who can write one a vast deal better.

For the Chronicle.

OBITUARY.—Died in Rye, of consumption, December 23d, 1855, John W. Seavey, aged 27 years, son of the late John L. and Sidney S. Seavey.

The subject of this notice married Emily, daughter of Joseph and Sarah Seavey, April 30, 1854.—After they had been married a few weeks he met with a sad misfortune. As he was leading a young horse with a long rope he became entangled by it, and the horse dragged him about a quarter of a mile, injuring him very severely, from which he never fully recovered. In the month of December, next after, he took a severe cold, which threw him into consumption. His wife was taken sick but a little while after, with the same disease, and will probably survive but a few days. His disease was distressing. He became gradually resigned to his fate, and was ready and willing to depart. He was a young man of retentive memory, and could repeat nearly a whole speech or discourse *verbatim*. He leaves numerous relatives to mourn his loss. May they have grace to sustain them in this their bereavement. J. W.

SIR JOHN FRANKLIN.

A letter from Saint Paul's, Minnesota, Dec 12th, says:

Mr Stewart arrived from Red River last evening, on his way to Canada, bearing dispatches from Sir George Simpson, containing information of the discovery of the point where Sir John Franklin perished. It was on the coast opposite Montreal Island. Their bones lie buried in the sand within an extent of twelve miles. This is the fifth winter since they perished, and the drifting sands of that barren region (being in latitude 68° N) have piled in successive layers on the bones of these noble and ill-fated men.

Mr Stewart describes the region as being dreary in the extreme—not a blade of grass nor a stick of timber met the eye. No game of any kind could be found. He was informed by the Esquimaux, that they had reached the spot just in time to see the last man die of hunger. He was leaning against some object when discovered; he was too far gone to be saved.

Mr Stewart brought home the remains of a boat, having the name of Sir John Franklin on it, a hammer, kettles, part of a blue flag, and other articles belonging to the unfortunate vessel.

The same mail brings an item from New London, Conn., of the arrival there, Dec 23, of the British discovery ship Resolute, abandoned in the Arctic ice. We have already mentioned the fact of her discovery by the crew of an American Whale ship, who, with their captain, abandoned their own ship, and brought home the Resolute as a prize. She was brought by Capt. Bedington into New London with all her armament, stores and equipments. She is a new and handsome bark, and worth $100,000. When found she had drifted over one thousand miles from the place where she was abandoned.

TEN YEARS AMONG THE MAIL BAGS.—This is a large and handsomely bound 12mo. volume, just published, and towarded to us by Shepard, Clark & Co., Boston.—and is for sale in this city by Jas. H. Head, 14 Pleasant street.

It is beautifully illustrated. The author is Mr J. Holbrook.

The above volume was undertaken with the sanction of the Post Master General, and other principal Officers of the Department. The author has long been, and still is in the service of the Post Office Department, and is known to the public as one of its most successful agents.

It consists, in part, of a series of interesting narratives of Mail Depredations, with some of the secret modes adopted in ferreting out and bringing to punishment the authors of such offences against the law of the land. While these narratives embrace many interesting adventures and thrilling incidents, both of a tragical and comical character, it has been a leading object throughout its pages, to enforce sound and wholesome principles, and to aid those in places of responsibility and public trust in withstanding temptations incident to their positions, and to improve the mail service generally.

Descriptions of ingenious frauds, carried on through the mails, are also given. In fact the work is intended to illustrate almost every phase of post-office life and experience. It contains, in addition, much practical information on postal matters, never before made public in a popular and convenient form.

☞ The steamer Northern Light, with a cargo of 400 fillibusters for Nicaragua, was headed off in New York harbor on Monday, by three revenue cutters, and is now detained by the U. S. officers.

☞ Christmas was kept as a holiday, this year, at the Mills in Manchester, N. H., for the first time. The mills have always run on that day, hitherto; but the holiday once established there, will always be observed hereafter.

MARRIED,

In this city, Dec 25, by Rev Mr Lamson, Mr William Travers to Miss Ellen Dolley.

—By Rev Mr Fanton, Mr William Horrocks to Miss Elizabeth Jones.

DIED,

In Rye, Dec 25, Mr John Hunking Ham, aged 65 years, a native of this city, and only son of the late Hon Wm. Ham. He died in consequence of being choked with a piece of meat at breakfast.

Grand Musical Festival.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

FROM KANSAS.—We learn from Mr. J. Willets who arrived yesterday from Lawrence, K. T., which place he left on the 10th inst., that Gov. Shannon had discharged his army of Border Ruffians, who had returned to their homes, and that peace and quiet once more reigned in Kansas. The ruffians were very much exasperated at the Governor when they learned that he had concluded not to use them in an attempt to reduce the people of Kansas to the vassalage of Missouri. They charged his Excellency with perfidy and threatened to visit him with their particular vengeance.

Thomas Barber, a worthy citizen residing near Lawrence, and formerly from Gov. Shannon's neighborhood in Ohio, was killed by Clark, the U. S. Indian agent, on the 6th inst. Mr. Barber, in company with a couple of young men, was riding out on horseback unarmed, when the party were met by Clark, who was in a carriage with Dr. Wood. The party in the carriage fired on the others without provocation, hitting Mr. Barber in the back, and killing him instantly. The horse on which one of the young men was mounted was also shot. Clark is said to have boasted of this dastardly act when he reached the ruffian camp, saying that he had killed one d—d abolitionist, that he saw the wool fly, &c.

Coleman, the murderer of young Dow, is still at large, and during the invasion was promoted to office in the camp of the marauders. Governor Shannon excuses himself for the ridiculous figure he has been cutting, by saying that he did not understand the position of the Free State men—in other words the people of Kansas—that the state of things had been grossly misrepresented to him or he never would have issued his proclamation, &c.

The story extensively circulated in Missouri and the East that the people of Kansas had receded from their position as a condition of being let alone is utterly untrue and without foundation; but the story had to be told as a cover for retreat by the Governor and his party. Indeed, there were decided signs of mutiny in the Missouri camp until the rabble were assured by their leaders that the people of that territory had made all concessions demanded of them. The people of Kansas occupy precisely the ground they occupied before the raid, viz: that of law-abiding citizens; but they do not recognize as laws the atrocious acts of the sham Legislature forced upon them by the Missouri invaders, nor will they recognize as law officers the appointees of that ruffianly body. Governor Shannon is said now to be disposed to side with the people of Kansas, and will probably take up his residence at Lawrence.

FINANCIERING.—William Dorothy, who was committed to jail on Friday night, (says the Washington Star) for obtaining money under false pretences, is a genius in his way. His mode of financiering was to enter a store, and presenting a couple of half dollars, to beg the favor of having them exchanged for a gold dollar; this done he would instantly return a three cent piece, and ask rather indignantly, "do you call this a gold dollar?" and in several instances the persons to whom he applied, thinking that they had really given him a three cent piece by mistake, would hand him over a second gold dollar. At the restaurants he would throw down a dollar and ask for a drink, and when his change was given him, he adroitly concealed a portion of it and complained that he had not receive the right change.—*New York Sun.*

The Louisville Courier says that seven negroes, three men, three women, and one child, all slaves except one of the men, made their escape from Millersburg, Bourbon county, Ky. They were in Mr. MacMiller's splendid carriage, driven by a white man, who represented to the toll-gate keepers that he had a runaway couple on their way to be married. They reached the Ohio river, but in attempting to cross, the skiff leaked and sunk, and the three women and the child were drowned. The men cried for help, and were 'rescued' by a market man, who, "not being an abolitionist," lodged them in Maysville jail. The free negro and the white man escaped.

CURIOUS PHENOMENON.—The Knox county Courier relates that Cedar Lake, in Knox county, Ky., in June last, rose suddenly several feet above its banks, without any apparent cause, and so remained until the first day of August, when the water commenced falling gradually, and by the 1st of September reached a point ten feet below low water mark, and has so remained ever since. The most remarkable fact, which was incidentally developed by a land surveyor, is that the banks of the lake have actually been *drawn together* over thirty-seven rods.

THE Amoskeag Veterans reached home on Saturday evening, and were received with great honors.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the core and flex of the country. 644,578 bottles sold in 1854; is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring.* I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all AMERICANS. It is wholesaled and retailed by

Elegant Jewelry.

MR. WENZEL has just received from the manufactory of Messrs. Herr & Wolf, Newark, N. J., a very select and beautiful supply of

LADIES' JEWELRY,

Consisting of

BRACELETS, BRAIDS, BROOCHES, PINS, RINGS, &c.

Manufactured from PURE GOLD, in the most fashionable styles.

We have much pleasure in calling the attention of our friends to this new feature in our trade, as we are confident that our articles in this line have never been equalled in Portsmouth, and because we are enabled to offer them on very reasonable terms. Let those who wish to purchase choice Jewelry at low rates, call and examine. d7

Gothic Bronze Lamps.

MR. WENZEL wishes to call the attention of the ladies especially to a new GOTHIC BRONZE LAMP, designed for Oil or Fluid, and the most recherche and unique of any Lamp ever introduced to the public. As he has been able to obtain but few of these Lamps, owing to the great demand for them in the large cities, those desirous of obtaining this novelty would do well to call at once. d1

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty as paid back by others) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about $3 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his whole time to the business, and an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries: besides being saved a journey to Washington, the usual great delay there, as well as personal trouble in obtaining their instruments. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. I have reason to feel, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them as early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1853.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,
Commissioner of Patents.

G. W. STONE'S Cough, Consumption, and Bronchitis ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal. It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine: let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extensive practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to the profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skillful in every branch of the Medical Sciences, his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, Nothing being apparently proved with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "Dr. Burleigh's Sure Cough Medicine, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

UFFORD'S
CELEBRATED SMOKE
Consuming Patent
LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attests its merits.

We have kindly been permitted to perusa a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press." &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister and her husband, and present I could make her." Price of the Lamp, $1.25.

Morning Chronicle.

FRIDAY, DECEMBER 28, 1855.

LYCURGUS ON KANE.

Lycurgus, not the ancient lawgiver, but a modern Lycurgus in the Dover Gazette, defends Judge Kane, and thus corrects an error, which we pointed out:

What I meant to say was:—The doctrine of invading his (the Judge's) prerogative, and making, not the public, but a political faction for political ends, his will of action, is a doctrine so destructive of the ends of justice that no candid man can for a moment *entertain* it. "But," says the editor, "nobody has preached this doctrine."

Well, let us see:—The Chronicle said, in reference to the Gazette's article, "This is the first defence of Judge Kane we have seen!—It amounts to this:—The outsiders, the common people, don't know what contempt is.—We believe, on the contrary, that no Judge is, or aught to be, beyond the reach of public opinion. Certainly, we have undertaken to condemn Judge Kane for *effect*—for *political ends*."

(The italics are his, not mine.) If this language does not imply the construction I placed upon it—if it does not convey the idea of making a Judge dependent upon a political faction—if it does not imply the right of such a faction to dictate to him his will of action, within the scope of his efficient duty, then words do not convey the meaning I have been accustomed to attach to them.

Lycurgus is wasting his powder and shot here, by firing into a bush where there is no Indian. When we speak of *political* ends, we never mean *partisan*. When we mean *partisan* we say so. We care nothing about the parties or factions in Pennsylvania or elsewhere.—And here is where Lycurgus misleads himself, by misunderstanding us. He probably deems the safety and welfare of the country to be bound up in the success of some party; while we believe no such thing, and look very calmly on the fusion and confusion of all the parties.

The *political effect* at which we aim, is watchfulness over our liberties, jealousy of encroachment, whether by tyrannical judges, crafty priests, or slimy pettifoggers who fancy themselves statesmen.

We never knew any thing of Judge Kane's party connexion; and until recently knew nothing of him but his acts. These, in the famous Contempt case, showed him to be at heart a slave and a tyrant—and in intellect a blockhead.

If all the allegations in his first decision were true, they no more made Williamson guilty of contempt, then of burglary, but of falsehood, which Judge Kane said would be perjury, if the Grand Jury saw fit to indict him. But they didn't.

But says Lycurgus,—he is the Judge of the Law.

So he is—and he judged wrong! and therefore we bring him before the people, before the democracy, for the outrage on common sense in laying down the law,—and the outrage on *liberty* in imprisoning a better man than himself, *without trial*, and without limit.

Lycurgus labors very hard to prove this to be legal, and constitutional, and according to the usage of the Courts, and especially sanctioned by the Supreme Court of Pennsylvania.

But he does not say whether it is Democratic or Republican, for a Judge first to say that a certain offence is a *contempt*, when we have a law that says expressly *it is not*,—and then to put a man in jail and keep him there as long as he pleases, for this constructive contempt.

We call this *despotism*. It is certainly *not freedom*: It is not liberty: It is *not democracy*.

If it were law, (as it is not,) let the people alter the law. If it were constitutional, (as it is not,) let them alter the constitution.

But it is illegal—unconstitutional—foolish—contemptible—and he ought to be impeached.

BANKS.—The personal explanation made by Mr Banks on Monday, does not seem to have diminished his vote, although he acknowledged that he had declared that under certain circumstances he might consent to a dissolution of the Union. The speech which has given occasion to the charge, that Mr Banks was in favor of a dissolution of the Union, was made at the Republican Convention in Maine. The Post quotes the following, as a correct report of the obnoxious remark of Mr Banks:

"Although I am not (said he) one of that class of men who cry for the perpetuation of the Union, though I am willing in a certain state of circumstances *to let it slide*, I have no fear for its perpetuation. But let me say, if the chief object of the people of this country be to maintain and propagate chattel property in man, in other words, human Slavery, *this Union cannot stand, and ought not to stand*."

This is probably the report which has been circulated at Washington, "but we believe it (says the Boston Journal,) to be incorrect and unfair. The following is the spirit of what Mr Banks said in this connection, derived from the notes of one of our reporters who was present at the convention, and furnished a report which was published in the Journal of Aug. 14:

"He loved the Union: but if it was to have for its great object only the perpetuation, propagation and maintenance of chattel slavery, it cannot, and he was free to say it ought not to, stand."

SUPERSTITION AND FOLLY.

We look back on the Dark Ages with pity perhaps with scorn. But let us look around us on a dark people, who, in the midst of the light that shines for all, close their eyes and say "We see,"—and their *sin* remaineth; aye, and their folly and fanaticism and madness.

In a suburb of New Haven, Conn. one Justus Matthews, himself a believer of the nonsense, was murdered in a den of fanatics, last Sunday night. He was found next morning with his throat cut and wrists tied. He was in the house of Rhoda Wakeman, and had been connected with a band of people who followed her as a prophetess or almost a goddess,—and who met at her house on Sundays to perform their incantations. Seven of his brethren have been arrested on suspicion of having had a hand in the murder, and are now in prison. The persons arrested have all been considered inoffensive people. Matthews' neck was shockingly mangled. It is said that he consented to be sacrificed, in order to hasten the millenium. The woman at whose house the deed was done is about 70 years of age. She represents herself, it appears, as Jesus Christ, and has having the power to raise the dead to life again.

The following extracts from the testimony before the Inquest, show a superstition as pitiable as that of the lowest and most debased pagans in Africa or elsewhere.

Josiah Jackson, colored, sworn—I went to the house about 6 o'clock in the evening, with the intention of going to another meeting, but remained until 8 o'clock in the morning.—Found there Samuel Sly and Miss Abby.—About 8 o'clock Mr and Mrs Sanford came in. Justin Matthews came to the house about 10 o'clock. Israel Wooding was there when Matthews came. Matthews was in the room below, and we were in the room up stairs.—Mr and Mrs Sanford, Sly, Wooding and myself, went down and found Matthews in the lower room, blindfolded. I told Matthew he was killing the old woman, and that I would not let him into my house sooner than I would a mad dog. I asked him if he had a bad spirit in him, and said that he ought to renounce this evil spirit. He said in the name of God he *would* renounce it. Amos Hunt gave the old lady (widow Wakeman) some poisonous cakes, with arsenic in them, and wanted to make way with her. I think Matthews got the evil spirit from Hunt. Widow Wakeman is a woman who professes to have died and rose again, and came on earth to teach the way to Heaven. I believe that she is a prophet, and is what she professes. The second time we went down into the room was about after we went down first. I went down and told Sanford to take Matthews away from the house or Mrs Wakeman would certainly die. I soon heard a noise in the room, and heard Sanford beating the outside door. Sanford and his wife then came up stairs, and seemed very much excited. I heard some of them say that Wooding had gone home. I did not know until this morning that Matthews was dead. I believe that if the widow Wakeman should die the Millenium would come, and the world would be destroyed.—When I came up the second time Sanford said "he has murdered himself," and there was great confusion in the house. I then heard some one ask where "Uncle Sammy" was, and they said he had gone after Wooding.—When I went down the second time, he was sitting in a rocking chair, and I told him he had better give up that evil spirit, and he said he wanted to do so. He said he would give up that spirit if he could, and did not know that the evil spirit that he had was hurting Mrs Wakeman. I believe that he was hurting Mrs Wakeman and his sister by *enchanting them*. His sister blindfolded him last evening to prevent this enchantment, which is always done by the eyes. Nobody but his sister dared to blindfold him. His hands were also tied behind him to prevent his enchanting with his evil spirit. The general impression was that he had made way with himself during the night. His sister, Mrs Sanford, told us that she believed that he had killed himself. Wooding left the house before this noise was heard; Mrs Hersey left him at the back door. I went back to the house this morning, and while there I heard Matthews' son come running into the room saying "father is dead, father is dead, in the other room." When I went down the third time I told Mr and Mrs Sanford to get Matthews out of the house, or it would kill Mrs Wakeman. Mr and Mrs Sanford then went into the room where Matthews was, and in about three minutes I heard a noise in the room.

Almeron Sanford sworn—I went to the house of Mr Sly with my wife about dark on Sunday evening—got to the house about two hours after we started. We got there and found Josiah Jackson, Wooding, Miss Hersey, Miss Abby, Julia Davis and Samuel Sly there. Justus Matthews is my wife's brother. I found them in the chamber singing and praying.—About 11 o'clock Matthews came to the house. Widow Wakeman said she was hunted by Matthews—the "man of power" with an evil spirit. When Matthews came he went into the front room where there was a fire. Rhoda Wakeman wanted Matthews to come to the meeting, so I went to see him and he seemed willing to come. When he came my wife tied a handkerchief over his forehead, and they tied his hands behind him the same as they would the devil. I told him he had a bad spirit and he wanted to give it up. Jackson and Wooding were with him and talked with him about the evil spirit. Widow Wakeman said he was drawing a terrible power over her. Wooding told Matthews that *he ought to be killed, and Matthews said he was willing to die to quench the evil spirit*. Wooding and Jackson said Matthews must be got out of the way.—They told him he must die. It was about 1 o'clock when I heard a noise. Wooding, Sly and Miss Hersey were up stairs praying with us, but dodged down stairs, and soon I heard them say down below, "he's killing the messenger, he's killing the messenger" I heard a noise and several blows follow, and started towards the door, but they pulled me back saying, "if he's killing him elf he'll be raised." I heard a gurgling noise and cries of "oh, oh, oh." I then went up stairs to sing and pray. When I reached the door I found it fastened and something braced against it inside. I could not get into the room below. This occurred about 12 o'clock, and I left the house twenty minutes past four. I walked home to Hampden, about six miles last night. I have not changed my clothes since the murder.—As Wooding and Sly dodged out in such a manner I think they might have helped kill Matthews. I think Matthews was willing to die. Sly said he thought he ought to die.—After I heard the noise and cries below Sly came running up stairs and kneeled down and seemed to be praying. I thought he could not pray much for I thought he would not feel like it then. They believed that if Widow Wakeman (the prophetess) should die the *world would be destroyed*. If they (Wooding and Sly) killed Matthews it was to keep him from enchanting Widow Wakeman who was disturbed by his evil spirit. When I went back to Hampden I saw Matthews' son and told him that something had happened to his father and that he must be looked up.

At the session of the jury on Wednesday, Samuel Sly confessed that he beat Matthews with a hazel stick, and then cut his throat with a knife,—to remove the evil spirit from Matthews, and to disenchant his sister, Mrs Wakeman, so that she might not die. They believed that her death would be followed at once by the general judgment without any millenium. Sly was taken to prison after his confession. He is 50 years of age.

POISONING CASE.—A spectator of the examination of Jeremiah Ricker and Mrs. Johnson, at Farmington, N. H., for the murder of Mrs. Ricker, writes to the Dover Enquirer,—

The prisoners wear the look of innocence. Mrs. Johnson is a handsome young widow of 35 or 40 years, perhaps not so old—she is intelligent and lady-like—has three small children whom she supports by her labor. Mr. Ricker is a man of perhaps 55 or 60 years of age—a man very ordinary looking, and one who would not be very likely to fascinate a handsome young widow. He is a harmless and inoffensive man and has always been considered an honest, laboring man. Both of the accused have for the past year worked with a wealthy quaker at Merrill's Corner, Timothy Hanson. Ricker and his wife lived alone about a quarter of a mile from Hanson's.—Mr. Ricker went home every night to stay with his wife, but took his meals at Hanson's. About a fortnight before the death of Mrs. Ricker she had complained of being very unwell, with frequent pain in her stomach. Mr. Ricker communicated the fact to Mrs. Johnson, who sent her some pear sauce in a two quart pail. Mrs. Ricker before her decease had eaten frequently of the sauce without injury. On the morning before her death she was taken violently vomiting and some of the sauce was found in a dish upon her breakfast table. It is rumored that arsenic has been found in the preserve which was in the dish. As to what now remains of the pear sauce, Mrs. Johnson has offered to eat it if they will bring it to her, so confident is she that there is no poison in it.

The matter is yet involved in mystery and will have a thorough investigation. Of course there are various and vague opinions. Some suppose that the accused are guilty—others that Mrs. Ricker committed suicide—others that some other one put arsenic in the preserve found on the table.

THE FEAR OF THE DEVIL.—The editor of a Kentucky paper, who was present at the recent know nothing gathering at Louisville, and heard all the adresses, remarks thereon as follows:

"The speeches were all about the pope.—If the leaders of this order were half so much afraid of the devil as they pretend to be of the pope, they would be better men than they are."

That is gospel according to the Kentucky paper,—we suppose;—and an odd sort of Gospel it is. We had the idea, derived from an old book called the Bible, that the fear of the Lord, (not the devil,) was the beginning of wisdom, made men better: and we had also got the notion from the New Testament, that "the goodness of God—(not the fear of the devil)—leadeth to repentance."

But there are various new fashions in this age of progress. Probably this new gospel is one of them.

☞ The whaling bark John Henry, of New London, the only American whaler in the Arctic seas, has arrived at home, safe, after dividing her crew to bring home the British ship Resolute.

Almost the same time the last overland party has reached St. Paul's, from a search after Sir John Franklin.

So that there is now supposed to be no expedition party, either by land or sea, in the high northern latitudes, from Europe or America. Those desolate regions are given up to silence, solitude and frost.

CONGRESS.—We have a portion of the proceedings of Wednesday in Congress, but no progress was made towards the election of a Speaker. Mr Knight offered a resolution that the House continue to vote for a Speaker *viva voce* without debate, and if no choice be effected before the first trial on Friday, another vote then be had, and the person having a majority of a quorum be declared Speaker.—The resolut on was tabled by 11 majority; as was also one providing that until a Speaker is elected the House continue voting from 12 M. to 6 P M. without discussion.—*Boston Jour.*

The storm of Tuesday almost demolished the telegrapl lines south of Boston, and they have not yet been put into working order for the transmission of despatches.

☞ The Mills in Newburyport did not run on Christmas Day this year;—for the first time since factories were built there it was kept as a holiday.

LOCAL.

LOOK OUT FOR THE UMBRELLA MEN!—Three umbrellas were taken from the entry of a house on Islington street, some time last week.

"Life 's like a country dance, or Pop goes the weasel; an eccentric laughing song, a la buffo:" "First Love, a romance composed for the piano, by Gustave Satter." These are pieces of new music just received from G. P. Reed & Co., Boston, publishers, through J. S. Harvey & Son in this city,—who are constantly supplied with the newest music, musical instruments, &c.

Grand Musical Festival.

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

The Kansas War is ended by the disbandment of the border ruffians who had assembled for the destruction of Lawrence. A St. Louis paper of the 19th inst. says:—"The disbanding gave rise to general murmurs and execration of Shannon among the Missouri troops. Most of them reached Westport on Sunday night, having suffered intensely during the previous night from a terrible storm of rain, snow and wind, which terminated in piercing cold. They lost many horses, some having been stolen by the Indians, some having strayed away, and others having died at Westport from fatigue. They also lost many of their arms."

Poor fellows; with a zeal and devotion worthy of a better cause, they suffered and toiled for whiskey, riot, slavery and bloodshed. But they got no further than the first degree, viz. Whiskey. Gov. Shannon backed out, or compromised with the armed fanatics, who, like Oliver Cromwell, trusted in God and kept their powder dry,—worshipping doubtless, every Sunday, leaning not exactly on a staff, but every man on a Sharp's rifle.

The Kansas Herald of Freedom says the immigration into that territory is very great, and estimates that the population will nearly equal 70,000 by the first of December, which the spring immigration will bring up to ninety or a hundred thousand.

A Kansas emigration society has been formed at Gainsville, Miss., at a public meeting there which adopted resolutions thanking the Missouri borderers for what they have done in Kansas. The object of the Society, as stated by the resolutions, is to raise money to defray the expenses of emigrants from the South to Kansas, "to meet their foes at the ballot box, and, if neccessary, with rifle balls"

TIRRELL AND WATSON.—The Boston Bee of Thursday says:

The Police Court, yesterday afternoon, was a decided "object of interest." The case on the tapis was that of two notorities named Albert J. Tirrell and Benjamin Watson, alias Gov. Dorr. They were arraigned on two counts with cheating John S. Wattles of $100 by the game of three card monte, and robbing him of $60 addiional, by threats of personal violence. Wattles is from Newton Upper Falls, a little raw in the making, but of good ore. The game was played at the "Gem," a *drinking saloon* in Sudbury street, and resulted in Wattles losing a cool $100. On this charge they were held each in $800 for trial. On the charge of robbery Watson was held in $1000, and Tirrell discharged.

During the examination the game of three card monte was explained; Mr Deputy Chief of Police Ham first testifying. He was followed by a well known sportsman, Hiram Pierce, who fully illustrated the game, showing how the flats are gulled, and white made to appear black. In answer to questions, the witness stated that the game was no more dishonest than other games of cards, but that in the hands of a keen player it could be turned to some profit—a point the Court did not seem inclined to doubt. Mr Pierce also said that the chances of winning by those who bet on the game—the man being raw—were *two in a hundred*. Gov Dorr also volunteered the remark that few persons ever bet "honest" after they had once been bitten. We suppose not. Among the witnesses in the case was "Little Spunkey," fresh from the House of Correction; and others, graduates of that institution and the State Prison. The case occupied nearly the whole afternoon, and was listened to by a large and much pleased assembly.

STOUGHTON, MASS.—The following liquor sellers were arraigned before Luther Swan in Stoughton, a few days since, on complaint of Calvin Howland: Thomas Higgins, found guilty—fined $10 and costs and sentenced to twenty days in the House of Correction. Appealed. After lying in jail two days the requisite bonds were given. Mary MacDonald—guilty—sentenced to the House of Correction and is now serving out her time with the other prisoners. Daniel Jannison—fined thirty dollars and costs and sentenced to the House of Correction—committed. John Haly—fined twenty dollars and costs, and sentenced to the House of Correction—committed. John McManning—guilty. Appealed.

IMPORTANT CASE.—It is reported that the whole subject of slavery will be brought before the Supreme Court of the United States this winter, in the case of Mr. Booth, the Wisconsin editor who was convicted in the United States District Court of aiding in the escape of a fugitive slave, and was subsequently liberated by the State Court on a habeas corpus.—*Boston Journal.*

THE KANE TRIAL.—It is rumored that an effort is to be made in Pennsylvania to have a special act of assembly passed to remove the trial of Judge Kane upon the suit of Passmore Williamson from Deleware county to Philadelphia.—*Boston Journal.*

GREAT COUGH REMEDY.—*Dr, Rogers' Syrup of Liverwort Tar and Canchalagua* is a scientific remedy for CONSUMPTION in all its various stages, and is especially efficacious for a *common Cold or Cough*. When taken according to the directions, it gives relief almost *immediately*, and in a few days effects a permanent cure. For sale by Druggists everywhere.

☞ The Prisoner's Friend (Magazine) for November, contains interesting articles, on prison abuses in New York; the amount of drinking in Philadelphia, &c., &c. Charles Spear, editor, Boston.

☞ The Unitarian Society at Dover has given an unanimous call to Rev. George A. Carnes, of West Cambridge, to become their pastor.

A man by the name of White was convicted of perjury in New Haven, Thursday, in having sworn that the liquor, with which he became intoxicated, was purchased of a Mr Shelly—the latter having proved conclusively that he was not in New Haven at the time.

Try it! Try it! Try it!
G. W. STONE'S
LIQUID CATHARTIC,
—AND—
Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of Families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every intelligent person. It operates more immediately and effectually upon the system, and at the same time is more agreable than any other medicine, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual Costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as
RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual Costiveness?—three bottles will effect all that you desire. If you are afflicted with Rheumatism, Neuralgia, or other bad pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short, if you require a physic for any purpose, this is the most reliable, safe and agreable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS.—The Subscriber, late Assistant of the U. S. Patent Office, under the Act of 1837, determined to present advantages in applying for Patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, EITHER PATENTS (instead of merely as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can here avail themselves of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting *one dollar.*—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agent of the highest respectability.
R. H. EDDY.
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as a solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity, and success. I regard Mr. Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.
EDMUND BURKE,
Late Commissioner of Patents."

From the present Commissioner.

AUGUST 17, 1852.—This may certify I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, and no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion, that no family should be without this Medicine; let Mothers give it to their Children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me. was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and undeviating devotion to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its power—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties

Copartnership Notice.

THE undersigned have associated themselves for the purpose of conducting the STOVE, TIN, SHEET IRON and HOLLOW WARE Business, and have this day entered into Copartnership under the name and style of SHATTUCK & BADGER. They have taken the late stand of Albert J. Badger, No. 9 Daniel street, trusting that they will continue to receive the custom of those who dealt with him.

Portsmouth, Dec. 4, 1855.

TIMOTHY F. SHATTUCK,
FRANKLIN O. BADGER

In retiring from the Tin and Sheet Iron Ware business, I take pleasure in recommending Messrs Shattuck & Badger, and would respectfully tender my acknowledgments for the very liberal patronage extended to me, and would solicit from my friends a continuance of their patronage to the new concern.

n5 ALBERT J. BADGER.

Notice.

HAVING this day disposed of my Stock, and given up the Store to Mr. O F. GERRISH, I would respectfully request all persons indebted to me by note or account to settle the same on or before Jan. 1856 I have authorized Mr. Gerrish to settle my accounts, and would cheerfully recommend him to the patronage of my former friends. JOHN YEATON.

Portsmouth, Oct. 18 1855.

The subscriber will continue the GROCERY BUSINESS at the Old Stand, No. 31 Market st., and respectfully solicits the patronage of his friends and the public.

d5 OLIVER F. GERRISH.

Tin and Sheet Iron Work, &c.

THE subscriber having leased and fitted up the Store No. 28 Daniel, and 5, 7 and 8 Penhallow street, nearly opposite the Post Office, for the Stove and Tin Ware business, is now prepared to execute all orders for the manufacture of Stoves, Funnel, Coal Hods, Shovels, Sifters, and all descriptions of Tin and Copper Ware.

All kinds of SHIP WORK in this line done in the most thorough and substantial manner.

Also, TIN ROOFING, making and applying Copper Gutters, Goosenecks & Conductors promptly attended to, at the Sign of the Big Coffee Pot.

SATURDAY, DECEMBER 29, 1855.

NEW LAW IN MAINE.

The State of Maine newspaper, in Portland, the leading *straight* Whig organ in the late election, brings out the following programme of its new liquor law. We give it in full; but divide it into paragraphs, with notes:

"The coming Legislature will have a delicate but agreeable duty to perform. They will at once repudiate the infamous doctrine of prohibition, while they will no doubt enact a wise and conservative *law* for the promotion of temperance."

Please to observe, reader in New Hampshire, that in Maine, in the new era, temperance may be promoted by law!

"Recognizing the natural rights of every man to the product of his own labor, and protecting the fruits of that labor when applied to lawful ends, they will we trust, pass a law that shall *restrain* the abuse of intoxicating drinks."

Then the sovereign people may not do as they please, after all. Who says, Down with the tyrants?

"The manufacture of ale, beer, cider, domestic wines, and spirits of all kinds are not only lawful, but the *right* to sell them under suitable conditions should be *allowed*, for all *lawful* purposes; while the evils resulting from their improper use should be carefully guarded against, by suitable *restrictions*."

Rights, we thought, were to be claimed and held; they may be asserted or admitted by a legislature. Privileges are granted or allowed. However, the principle of *restriction* here alluded to and defended, is the same on which nearly all liquor laws have been based; only in some it has been carried further than in others.

"Public houses, for example, must be allowed to sell liquors of *all kinds* to their guests, but restrained from giving any encouragement to drinking by keeping an *open bar*, or by selling by the *glass or at retail*."

That is, gentlemen may drink, in the genteel hotels, according to law.

"Tippling shops and groggeries of all kinds must be suppressed as nuisances,"

That is, the loafer and the ungentlemanly man may not drink in the groggery. Look to it loafers; look to it gentlemen. Is it a *good* thing to drink in a hotel? and a *bad* thing to drink in a shop? Is the dram of a poor man to be illegal? and the dram of the richer to be legal? and is this to be the fruit of a democratic and liberal victory?

"And the *selling* of liquor to any person of known habits of intoxication should be made a *penal* offence."

Who shall be *judge* of those habits? And if a penal law is right, to prevent sales to a drunkard,—how is it wrong to impose a penalty on sales to create such habits?

"The licensing of the sale by retail, for *lawful purposes*, should be made peremptory on the municipal authorities of every town and city."

Our law does this now, in the shape of agencies.

"While sale by the quantity in original packages cannot be interrupted until the revenue laws of the United States are changed."

No remark.

"All that the law can do to promote the cause of temperance in drinking is, to break up the haunts of dissipation, shut up the groggeries and tippling shops, and *license* the sale under suitable restrictions, by persons of upright life."

The old license laws in a new dress—do with one hand, and undo with the other.

"We must leave to the influence of example, and to moral and religious instruction the reformation of the weak and the erring."

Amen! so be it. Let as *set* the *example*—and let ministers, lecturers, and all sober men, editors among others, use this moral and religious suasion; plying it constantly.

"Such we believe to be in brief the just expectations of the people of Maine in regard to the action of the Legislature on the subject of temperance.

In our estimation the atrocious principle of prohibition will be discharged from the statute book, and the proper discrimination made between the use and the abuse of stimulating and intoxicating drinks."

Well: we shall soon see—what we shall see.

☞ Frank Leslie's New York Journal for January, is before us, with a fine table of literary contents, and over 30 illustrative wood cuts.

Leslie now issues three valuable periodicals, viz. the Journal, the Gazette of Fashions, and the Illustrated Newspaper.

They are afforded cheap, to clubs.

APPOINTMENT.—Hon. C. W. Woodman of Dover, has been appointed Commissioner of the Court of Claims for the State of New Hampshire.

☞ A poor intemperate young man, named George Lefavor, who had sometimes been deranged by drink, died on Wednesday evening, in Boston, by an overdose of laudanum, (2 oz) to quiet his shattered nerves, and keep off the horrors. He was 27 years old, and unmarried.

The receipts of Galena lead at St. Louis this year show a falling off of 94,000 pigs as compared with last year.

THE UNDERGROUND RAILROAD.—The negro in this country is a great "institution," and so are railroads; but of all railroads there is none like the underground railroad, and of all negroes none like the fugitive.—There is one singular thing about this underground railway—there is never a share of its stock in the market, nor any official report of its doings in the papers; and yet it is said to be one of the best conducted roads in the country, with a constantly increasing business. Rev J B Smith, missionary among the colored people of Canada, said in New York the other day, that there were 40,000 fugitives in the Provinces at this time, and they were coming in a steady stream. More than half of these were passengers on the underground; and of late the travel by that route has so increased, that they carry them free, and find them board and lodgings on the way. The greatest travel is in January, when other roads are not doing much. The reason of this is, that colored people are directly the opposite of whites, not only in complexion, but habits and tastes; and while the whites visit Niagara in summer, they find it most convenient to leave their usual occupations about the time of the Christmas and New Year's holidays, which is the hiring season for slaves, when they are indulged in some liberties. This underground railroad is producing about the same effect in Kentucky, Virginia, Maryland and Deleware, that the Pacific railroad would in the region of the Rocky Mountains; that is, it carries off colored inhabitants and makes room for free white laborers!

We would rather see the negroes going to Liberia; but if they won't, it is no loss to the nation to have them leave for Canada. It would be better to build a railroad to the Gulf Stream, and "dumb" them all into that, than that 25,000,000 white people—of the best blood on the earth, should be ruined for 3,000,000 negroes.—*Newburyport Herald.*

The philosophy, the ethics, and the statesmanship of the last sentence, are about equal in weight—and not very heavy in the aggregate. The remedy suggested is so practical, and the danger of ruin so imminent, that it's a wonder somebody don't try it.

NARROW ESCAPE.—Yesterday morning, two track repairers on the Eastern Railroad took a hand car at Beverly, and with a female companion went to Salem to celebrate Christmas. On their way back, they met, on Beverly bridge, a passenger train going towards Salem. The two men and woman jumped from the hand car just as the locomotive struck it, and escaped injury. The car was exactly on the draw at the time, and was cut in two by the collision, half being thrown on one side, and the other portion being caught under the forward truck of the engine, and hanging there until the engine could be stopped which was not until it had run thirty rods.—The sleepers of the bridge were cut, and the car completely demolished. It seems almost a miracle that the locomotive was not thrown off the draw. If it had it would have made a plunge of at least forty feet.—*Boston Traveller, 26th.*

DEATH ON A SLED.—On Wednesday evening, a Mr Pierce, in Roxbury, while coasting, struck his head against a stone post, at the corner of Edinborough and Turnpike streets, and was instantly killed. His wife was upon the same sled, and escaped without injury. The parties were in company with many others, enjoying the sport of coasting upon the slippery crust of ice.

WANTED, A NEW "FLURRY."—The one about our foreign relations is threadbare,—and that other one, about civil war in Kansas, like the Yankee's horse, is "kinder 'gin out." Border Ruffians need not apply.—*N. Y. Express.*

BEEF IN NEW YORK.—A glance at the total receipts during the year just closing shows a total number of about 172,000. These, at an average of 650 pounds to each animal, give full 111,000,000 pounds. The average price of 9 1-2 cents per pound makes the city beef bill over $12,000,000.

AN EXTRAORDINARY ROBBERY.—The Chicago papers report an extensive robbery in that city. A young man by the name of Hickox, who has been employed for a number of years in the establishment of Isaac Speer, of Chicago, has been in the habit for years of perpetrating systematic robberies on his employer, and deliberately investing the avails in real estate in the city. He had thus purchased, among other property, two valuable lots of land, on each of which he paid $6000 down, and mortgaged the land for the remainder, and had even begun to build a large hotel on one of these lots which was to cost from ten to eighteen thousand dollars.—He had been kind enough to loan his employer about $2000 of his own money, and had also purchased and sold again, at an advance of $5000, a house and lot of land. He had, in fact, stolen a handsome fortune from Mr. Speer; and all this time, it would seem, retained his confidence, and received pay for valuable services rendered to his employer.—The roguery was finally discovered, but not in season to arrest the rogue, for, becoming suspicious, he had suddenly converted some of his real estate into money and fled.

THE KANZAS WAR.—The Washington correspondent of the New York Commercial Advertiser, in his last letter, says:

The Kanzas war has terminated for the present, but not through the exercise of any courage, sagacity or honesty on the part of Gov. Shannon. All in the Senate will probably unite in throwing out his nomination.

THE TUNNEL FIGHT.—The Springfield Republican says that the examination of the sixteen persons arrested for the fight with the Irish at the Hoosac Tunnel, occupied nearly the whole of last week in the Williamstown Police Court. The charge against them was the general one of riot. Seven of the number, including the magistrate and Deputy Sheriff who accompanied the party, were unconditionally discharged, while the remaining nine were held in $1000 bail each, to stand trial in the Court of Common Pleas at Lenox, next month.

☞ The Anniversary of the Portsmouth City Missionary Society is to be held to-morrow evening at the North Church; the report of the City Missionary will be read at that time.

DEMOCRATIC MEETINGS.—*Ward One.*—The Democrats of Ward One met at the Ward Room on Wednesday evening, 26th inst.—Samuel Rowe, Esq., was chosen Chairman, and Nath'l K. Raynes, Esq., Secretary. The following gentlemen were chosen to represent the Ward in the various Conventions, and as a Ward Committee for the ensuing year:—

Councillor Convention.—Augustus Jenkins, John M. Davis, Charles L. Woodbury, Theodore F. Rowe.

County Convention.—William Rand, J. P. Trefethen, Oliver F. Gerrish, John S. Akerman.

Senatorial Convention.—M. H. Goodrich, A. S. Marden, N. D. Miller, N. K. Raynes.

Ward Committee.—Augustus Jenkins, Wm. Rand, J. Garland, Wm. H. Dennett, J. P. Trefethen, J. S. Akerman, Geo. Hayes, Sam'l Spinney, Jabez Dodge, Geo. Woods, Theodore F. Rowe, A. Todd, Samuel Rowe.

The delegates to the several conventions were authorized to fill vacancies.

Ward Two.—At a meeting of the Democrats of Ward Two, at the Piscataqua Hopse on Monday evening, Dec. 24, Capt. Israel Marden in the Chair, the following named gentlemen were chosen delegates to the several Conventions:—

Councillor Convention.—Richard Jenness, E S. Wendell, William Pettigrew, Freeman G. Beal, Thos. Norton, James M. Sheldon.

Senatorial Convention.—Israel Marden, John R Hill, Richard Pickering, Rodnia Hadley, Geo. W. Drake, John S. Dodge.

County Convention.—J. G. Hadley, A. B. Mudge, John Grant, James Dodge, Jere D. Goodrich, E. N. Fuller.

The following gentlemen were chosen a Ward Committee for the ensuing year:

Richard Jenness, John R. Hill, William Frye, Albert Hayes, E. S. Wendell, Wm. Downs, Kittredge Sheldon, Alfred Hill, Thos. Norton.

Ward Three.—At a meeting held in the Vestry of the South Meeting House on Thursday evening, Dec. 27th, Wm. B. Russell' Esq., was chosen Chairman, and Charles F. Adams, Secretary. The following Delegates were chosen for the several Conventions:

Councillor Convention.—Richard Walden, Thomas H. Odion, Samuel Langdon, G. H. Rundlett.

County Convention.—Wm. Marvin, Abraham Q. Wendell, Oliver P. Tucker, James W. Goodwin.

Senatorial Convention.—Wm. B. Russell, James Janvrin, Aaron L. Rand, Stephen D. Scriggins.

The following gentlemen comprise the Nominating Committee:

Daniel Marcy, Obadiah Stoddard, Albert R. Hatch, Thomas H. Odion, C. W. Marden, Richard Walden, Oliver P. Tucker, Samuel Clark, A. L. Rand, Chas. F. Adams, G. H. Rundlett.

S. J. COURT.—The reporter who gave us some sketches of the proceedings of the Supreme Judicial Court, at Dover, offers the following item of correction and addition. We have no means of judging between the two accounts, as to their accuracy.

A writer in the Portsmouth Journal thinks that the statement in the Chronicle of a few of the cases before the S. J. Court at Dover was not entirely correct, and that the bill in chancery between the bondholders, (held by some to be, virtually, mortgagees,) and the holders of the property, or the trustees of the P. & C. Railroad, is not a *suit*. No one, well versed in legal science, will deny that a bill in chancery is a suit. He also says that in the action of Watris vs Emery, Haven and Pierce, the argument of the counsel was "finished," and the cause continued. After the Hon. Joel Parker concluded his argument for the plaintiff on the evening prior to the adjournment on Saturday morning, Mr Marston, for the defendants, requested time to make his argument, and he made none before the Court adjourned, unless he replied by a written argument. The statement in the Chronicle, in respect to material points, was correct. There was one decision in respect to a matter which should be generally understood. In the case of the indictment, the State *vs* Locke, for larceny of a gold watch valued at $100, which was returned to the owner, and a breast pin, the jury returned a verdict of guilty, but assessed no damage. The case was transferred, and argued by Goodall for deft., and Hatch for the State. The Court decided that the jury should assess damages, in order to warrant a sentence to the State Prison, and set aside the verdict and discharged the deft.

DEATH BY THE ABSORPTION OF POISON FROM FURS.—We learn from the Albany Knickerbocker, that Andrew McGuire died on Wednesday from the following singular cause: "He burnt his hand a week ago, while finishing up a hat for his employer, Mr. Cotrell.—The wound being slight, he paid but little attention to it, and continued his work. Last Thursday he was at work on a lot of furs.—He continued at this during the day. When he went home he found that his hand was much worse. From the hand the swelling passed into his arm, and from his arm into his body. For the last two days he suffered terribly. The poison was doubtless obtained from a piece of fur—the skin of some animal which had been "preserved." Such skins are saturated with arsenic and other deadly poisons; for this reason they should never be sold for the purpose of being made up into wearing apparel."

An extraordinary bear was recently caught near the head of Pilot Creek Ditch, California, which was perfectly white, except the feet, all four of which were black. He was very ferocious.

A SHARP CHILD.—Young Miss America, a baby yet of five years, sat playing with her doll, while her clerical father with a dull razor tore at his beard. "Pa," asked the innocent, "do dolls go to heaven when they get smashed to pieces?" No, dear; dolls haven't souls," answered father. "Well, then, I don't want to die." "Why not?" "Why," answered she, "I s'pose I should have to go to heaven if I died, and I don't want to go anywhere that they don't have dolls."

The New York Herald's Washington correspondent says—"Some disclosures of an interesting character will soon be made in the Senate touching the piety and pugnacity of a member of the Cabinet."

PROFITABLE FARMING.—The Alexandria (Va.) Sentinel says: "A farmer in the Northern Neck of Virginia, from an estate which only seven years since cost $13,000, has, during the present year, thrown into this market its products, yielding him the very handsome nett sum of $10,500.

Singer's Sewing Machines.

THESE Machines have long sustained the highest reputation in the United States.

The First Prize—A Gold Medal,

Has recently been awarded to them at the Palace of Industry in Paris, and thus they have the WORLD'S VERDICT OF SUPERIORITY.

The inventor has just added to these superior Machines an improvement whereby they can work on any kind of

FAMILY SEWING,

From a coarse Cotton fabric to the finest Linen Bosom. In such a perfect manner as no other Machine professes.

They will also Bar and close all kinds of Kid Boots and Shoes, and stitch the finest Gaiter Boots in every part without a skip—making them the most desirable for girls to use at home, or for any who wish to do more than one kind of work.

These Machines are warranted to do all kinds of work in a manner far superior to any other machine in use.

They run without noise, with ease to the Operator, and at double the ordinary speed, so that

Twice as much Work can be done in a Day.

The greatest Shoe Manufacturing and Clothing Establishments in the country use these Machines exclusively, having tried other Machines and found them entirely unfit for their use.

They are simple, and cost scarcely anything to keep them in repair; and can be operated by a child twelve years old.

These Machines may be had at Menufacturers' prices, of

THOMAS S. NOWELL,

Local Agent for New Hampshire, at his Shoe Manufactory, McDonough street, Portsmouth, where they may be seen in operation. d29

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer support of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

CONGRESS.

On Wednesday, Mr Sage's proposition that until the Speaker be elected no motion for adjournment shall be in order until 4 P. M., was, after some discussion, then adopted, 116 to 86.

Apprehensive of a continuous session, the House at half past 4 o'clock P. M., pending the resolution inviting Mr Orr to preside, took a recess until 10 o'clock Thursday.

There was no ballot for Speaker during the session of the House on Wednesday.

The debate was only a species of chess-playing, on the game of Speaker.

THURSDAY, Dec. 27.

SENATE.—The Senate had a brief session, but transacted no business of public importance, and adjourned until Monday.

HOUSE.—The House rescinded its resolution for a continuous session until a Speaker should be elected.

Mr Campbell withdrew his proposition to elect Mr Orr as Speaker pro. tempore.

Three ballots for Speaker took place, the last resulting as follows:—Banks, 103; Richardson, 67; Fuller, 31; Scattering 9.

Adjourned.

TWO WEEKS LATER FROM SAN FRANCISCO.

NEW ORLEANS, Dec. 26.—The steamship Daniel Webster arrived here yesterday, bringing San Francisco dates to the 5th Dec.

The steamship Star of the West left San Juan on 20th ult for New York, with a freight of half a million dollars in treasure.

The news from California by this arrival presents no feature of importance.

The rainy season had set in, and miners were very actively engaged in their operations.

The Indians continued troublesome in Oregon and elsewhere, and serious apprehensions of them prevailed.

The markets were generally very quiet.—Provisions were dull and of a declining tendency.

Nicaragua.—Intelligence from the state of Nicaragua represent matters there to have acquired a settled aspect. General Walker had received a further reinforcement of 100 men by the steamer Sierra Nevada from San Francisco.

Mexico.—Vera Cruz dates are to the 22d, and from Mexico to the 18th inst. Alvarez had resigned the Presidency, and was succeeded by Gen. Comonfort. The new Ministry had assumed an organization. It was reported that ex-President Alvarez had gone South.

THE NEW HAVEN MURDER.—The jurors in this case report that Matthews came to his death by the hands of Samuel Sly, and they also find Thankful S. Hersey accessory before and after the death. Miss Hersey admitted that she was knowing to the crime. Mr. and Mrs. Sanford, Mrs. Julia Davis and Mr. Wooding, have been discharged, but the "propheress," Misses Sable and Hersey, Jackson, and Sly, still remain in prison. The knife, club and fork used by Sly have been recovered; also the shoes, covered with blood, which he wore at the time of the murder.—Mrs. Wakeman told the jury that on Tuesday night she had a revelation from God that if she was convicted in the case, the world would be immediately destroyed She afterwards told Sheriff Parmalee, that if any charged with the crime should be convicted, the same result would ensue. God revealed to her that Matthews was killed by her brother, who committed the act that the world might be saved.

WASHINGTON, Dec. 27.—Mr Clayton of Delaware, in answer to a request which had been made for him to allow his name to be mentioned at the American Convention, as a candidate for the Presidential chair, says he prefers his present position as United States Senator, and declines to become a candidate for the Presidency.

ALMOST ON FIRE.—The proprietor of a clothing store on Middle street, Portland, after having lighted his gas on Thursday evening, locked his door, and went to tea. During his absence, a vest hanging over the light caught fire, which communicated speedily with other articles. A gentleman passing saw the condition of things, and, without waiting for ceremony, made a flying leap through a large square of glass, and extinguished the flames. In a few minutes more, the whole store would have been on fire, and probably an "unknown incendiary" would have been charged with the act.—*Argus.*

THE MURDER IN WEST GREENWICH, R. I.—Shubael Baker, who was arrested on the charge of having murdered General Arnold Lewis, of Exeter: has confessed himself the perpetrator of the crime. Fifty dollars was the paltry sum that lured him to the deed, which was consummated by beating his victim on the head with a stick of wood. He is only 18 years of age, and is fully committed for trial.

The Washington correspondent of the New York Post says that Mr Marcoleta, the Nicaraguan Minister, denies that he ever approved of Walker's government, but admits that he offered to resign if Parker H. French would pay the arrearages of his salary as Nicaraguan Minister.

A Washington letter says that Colonel Nicholson, of the Union, has left for Tennessee, to assist in securing for General Pierce a re-nomination, with himself as the candidate for the Vice Presidency. He hopes to be able to pack the 8th of January Convention, at Nashville, so as to accomplish that object.

FRUITS OF THE LAW.—It was stated at the meeting of the Howard Benevolent Society in Dover last Sunday evening, by Joshua Banfield, Esq. that the applications for relief from the poor of this city during the months of November and December, were at least THIRTY PER CENT. LESS than in the same months last year. Mr. Banfield is Overseer of the Poor, and having the whole charge of them, is of course thoroughly informed on the subject. This difference he attributes to the operations of the new liquor law, which has enabled hundreds to live comfortably who formerly were dependant on the town for relief.—*Enquirer.*

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,573 Bottles sold in 1854, is significant that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON the AMERICAN MANUFACTURER, and determine its great superiority over all foreign Inks. It is at wholesale and retail by

d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or its *coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S is AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

Try it! Try it! Try it!
G. W. STONE'S
LIQUID CATHARTIC,
—AND—
Family Physic,

The most important discovery ever made in Medical Science, being a compound of Barks and Roots, which forms the most powerful, safe and agreeable Physic ever offered to the public.

THE necessity of such a Medicine has long been felt both by the heads of families and Physicians. Its advantages over cathartics given in the form of Pills or Powders, must be obvious to every reader, since it operates more immediately and effectually upon the system, and at the same time is infinitely less difficult to administer, being quite agreeable to the taste. It not only produces all the effects where physic is required, but completely removes habitual "costiveness, leaving the bowels perfectly free. It expels all humors from the blood, is a certain cure for the Piles, regulates the action of the Liver, frees the Stomach from Bile, invigorates the whole Nervous System, and removes the cause of all local pains, such as

RHEUMATISM, NEURALGIA, TIC DOLOREUX, GOUT, PAIN IN THE HEAD, SIDE, STOMACH, &c.

It may also be relied upon in all diseases of the Bowels; *Dysentery, Diarrhea and Cholera Morbus* yield at once to its magic influence. Again we repeat, TRY IT!—it needs no other recommendation. No family will be without it after they have properly tested its merits. Reader, if you have tried other remedies, without success, despair not—relief is now at hand. Are you suffering with Scrofula, six bottles of my Liquid Cathartic will cure you. Would you be relieved from habitual "costiveness"—three bottles will effect all that you desire. If you are afflicted with Rheumatic, Neuralgic, or other local pains, two bottles will free you from them. All humors will be eradicated from the blood by the use of from one to six bottles. In short if you require a physic for any purpose, this is the most reliable, safe and agreeable to the taste that has ever been placed within the reach of the public.

PRICE $1.00.

Patents.

AMERICAN AND FOREIGN OFFICE.
Agency for business connected with US Patent Office, Washington,
76 State st, oppo. Kilby st, Boston.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for Patents, superior to those offered heretofore by others, and made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal fee returned within thirty days after the rejection. Caveats, Specifications, Assignments and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringement of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent less than others in the profession,) but can have several years of the experience of 20 years' practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries to guide him, and saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting *one* dollar.—Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability. **R. H. EDDY,**
Solicitor of Patents.

"During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office, as Solicitor of Patents. There were few, if any persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, diligence, and success. I regard Mr. Eddy as one of the best informed and most faithful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their application in a form to secure for them an early and favorable consideration at the Patent Office.

EDMUND BURKE,
Late Commissioner of Patents."
Prince, the present Commissioner.

AUGUST 17, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq. of Boston, has been extensively engaged in the transaction of business at the Office, as a Solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse.

G. W. STONE'S
Cough, Consumption, and Bronchitis
ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for such complaints, to give and recommended for such complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion that no family should be without this Medicine; let Mothers give it to their Children who have the Whooping Cough or Croup, and they will relieve at once the sufferings of their little ones. Price 50 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without—which none will be genuine.

DR. BURLEIGH SMART'S
Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extensive practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and abundantly devoted to his profession, Dr. Burleigh Smart was eminently worthy of the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by him, and is substantially the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an extensive Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of our citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately allays the Cough, and so operates on the Blood as to remove the *Cause*, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength is patched up, it sustains tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR BURLEIGH SMART'S COUGH MEDICINE, SHAW & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of red enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

UFFORD'S
CELEBRATED SMOKE
Consuming Patent
LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a Light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; (also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Ufords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press." &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Friend to the Lamp, $1 ea.

JOB AND CARD PRINTING promptly executed

MISSOURI LEGISLATION.—A session of the Legislature of Missouri, more than ordinarily vital in its action to the honor and the highest interests of the state, has just come to a close. Of the results achieved, the Daily Democrat of St. Louis says—

We rank as foremost the defeat of the aspiration of Gen. Atchison to a seat in the Senate of the United States. The significance of this is plain and marked. Missouri abhors the policy pursued by Atchison in proposing the repeal of the Missouri Compromise. She puts the seal of reprobation on the agitation of the slavery question, which has grown out of that breach of compact, for which Gen. Atchison glories in being primarily responsible. The violence and frauds practiced in Kansas, and the excitement fermented in Missouri on the same subject by means of the Lexington Convention and other assemblages, were intended to operate on the Missouri Legislature, to secure Atchison's election and the endorsement of the Kansas-Nebraska bill Six weeks of incessant plotting and scheming failed to bring about either the one or the other of these measures. A sanction of the Kansas bill was strongly urged upon the Legislature by the Governor in his regular message. Happily there was a majority possessing the nerve and the probity to resist and crush this effort to compromise the state, and commit it to the corrupt designs of a factious cabal, here and elsewhere. The resolutions were voted down, and with them the last hopes of the nullifiers to sustain their cause in Missouri.

As a most conclusive proof of the reaction of the public mind of the state upon the Kansas question, the Democrat proceeds to say that the "University Bill," which failed to pass at the last session, was passed this year by an "overwhelming m jority."

Seven hundred and seventy acts were passed at this session. Amongst them were one to loan to the Pacific Railroad Company the sum of $250,000 for four months, to meet the immediate wants of the company; and another which prevents the selling or giving away of liquor on Sunday, on penalty of forfeiture of license and inability to obtain a new one for two years.

LIFE AND DEATH.—The Christian Chronicle thus refers to the death of Mr. Bullard of St. Louis, who was slaughtered in the great massacre on the Pacific road awhile ago:—

The sudden death of Mr. Bullard, on the Pacific Railroad, at the Gasconda Bridge, was the subject of a discourse by Rev. Mr. Beman, at his church, Troy, N. Y. It will be recollected he was present at the dedication of Mr. Bullard's Church in St. Louis, on the Sunday before the accident occurred. He remained some days afterwards, and received as did many other distinguished strangers, an invitation to participate in the excursion.—Both Mr. Beman and Mr. Bullard accepted, but a correspondent, writing to the Boston Journal, says:

"The daughter of Mr. Beman refused to go; she was anxious to return home, and to her earnest solicitations her father yielded, and on the morning of the fatal excursion he and his daughter took the conveyance for the East. At the cars he took leave of Mr. Bullard, who said to Mr. Beman, 'Farewell, we shall never meet again in this world.'

"'Oh yes, we shall,' said Beman, 'I may visit the West again, or you may visit the East.'

"With great solemnity, Mr. Bullard replied, 'I have a strong presentiment, brother Beman, that we shall never meet again—farewell.'

And so they separated—the one to his home and parish, the other to the awful death awaiting him only a few hours ahead. Death swung his red lantern on the track, and "destruction wasted at noon day."

A BELL TUMBLE.—Last Sunday, in Hartford, while the church bells were ringing for the morning service, the heavy iron yoke sustaining the big bell in the Centre Church steeple gave way, and the bell—a heavy one weighing 3,500 pounds, fell upon the timber frame, which had been built, a few feet below, to receive it, in case of any such emergency. It is possible that, had it not been for this heavy timber work, the bell might have crashed down through the the floors, demolishing everything in its path.

A bill has passed the senate of South Carolina, by a vote of 23 to 19, by which it is provided that, instead of the whole legislature appointing presidential electors, such members of the house of representatives as shall meet on the day fixed for the election shall appoint them.

A million and a half of money is waiting for owners in the County of Armagh, Ireland.—John White emigrated to this county in 1814 or '15, and is believed to have left two sons, Abner and William. Their descendants can claim the property.

The editor of the New York Mirror has seen an opal breast pin, set in a circle of diamonds, to be given to a lady as a Christmas present, which cost between $4000 and $5000.

MUNIFICENT BEQUESTS.—The New London Star gives the following list of public bequests made by the late Jonathan Coit, Esq., of that city:—

First Congregational Church,		$6,000
Second	" "	6,000
Episcopal	"	3,000
First Baptist	"	3,000
Second "	"	3,000
Third "	"	3,000
First Methodist	"	3,000
Second "	"	3,000
New London Seaman's Friend Society		2,500
The Cent Society		6,000
Poor in the Alms House		10,000
		$48,500

The income of that bequeathed to the poor at the Alms House is to be applied to the benefit of only those who seek refuge there—and not to any poor outside of the institution.—The income of that bequeathed to the different churches to be applied to the benefit of the clergymen connected therewith, and managed by the officers connected with each institution. The remainder of the property is mostly bequeathed to female relatives. Mr Coit's entire property amounted to $300,000.

Within a week or two past, says the St. Louis Republican, fifteen or twenty citizens of the city and country have had acts of emancipation recorded—taking opportunity to do so before the law just passed by the legislature prohibiting emancipation shall go into effect.

Morning Chronicle.

MONDAY, DECEMBER 31, 1855.

The Portsmouth (N.H.) Chronicle, copies an extract from the Pilot of October 31, 1844, in which we, at that time, exposed the intolerance of that arch-bigot, Theodore Frelinghuysen, who was put forward by the whigs in order to secure the votes of the Evangelicals. But the trick failed, and we then had the pleasure of putting a nail in his political coffin. This was not "Catholic hatred to Protestants," as the Chronicle alleges. If so, why have Catholics voted for Protestants at every election before and since? Henry Clay would have been elected President in 1844 were it not for Frelinghuysen.—*Boston Pilot.*

We give the Pilot the benefit of its denial, and its argument also, by publishing the above paragraph. Most of the *Protestants* for whom the Pilot says the Catholics have voted, for President and Vice President, did not happen, when so voted for, to be members of any church whatever.

Mr Frelinghuysen did happen to be a member of a Presbyterian church, and an officer of the American Bible Society,—in which facts we suppose, chiefly consisted his bigotry and intolerance. At any rate, we have, as above, the plain assertion, that "We, (the Pilot, as a paper of the Roman Church,) then had the *pleasure* of putting a nail in his political coffin."

This seems to be something like mingling religion and politics, of which many people are terribly afraid.

New Sedition Law.—The Portland State of Maine newspaper, speaking of the Maine Legislature, says:—

"We trust also that a law will be passed making *secret political associations*, and extra judicial oaths unlawful."

Such a law once existed in Spain, against secret societies; and we think it likely there may be such an one in Austria now; but in this country it will be a novelty—when we get it!—not very soon we fancy.

Massachusetts *had* a silly law levelled against extra-judicial oaths—but it was repealed last year, we believe. New Hampshire has no such law, unless the law which fines a man one dollar for a *profane oath* be so considered.

An extra-judicial oath is a simple nullity, of no more *legal* force than any profane oath in a bar-room.

The *moral* quality of an oath is quite another thing. It is a promise or an appeal, made to God;—whatever may be the place, form, or circumstances.

We have altogether too much legal swearing—and would recommend that nine-tenths of it be abolished—and the remainder changed into solemn affirmation, under the pains and penalties of perjury.

The Northern Light.—The steamer Northern Light has been allowed to sail from New York, as no arms were found on board her, and as her cargo of fillibusters had landed and scattered.

The police appear to regret the detention of the steamer Northern Light. They believe that had she been permitted to sail with her steerage passengers their duties would have been greatly lessened—for some time at least. Captain Halpin, of the First Ward, in speaking of the fillibusters, says "they consisted for the most part of pocket-book droppers, sneak thieves, runners and vagabonds of the worst class in the city, and it was a great pity that they were not to be so easily got rid of."

At the trial of the persons arrested on board of the Northern Light on Monday, five of them were held to bail in the sum of $5000 each, to answer to the charge of being engaged in a conspiracy against Nicaragua. The principal information in this case was given by a Mr. Wm. H. Allen of Brooklyn, who had engaged to go out upon what he supposed to be a peaceful expedition. When he learned its true nature, he at once withdrew from it; but the fibustiers fearing his treachery, as he says, visited him in the middle of the night and attacked him with deadly weapons. He escaped from them, however, and on learning that legal proceedings had been instituted against them, came forward and gave the necessary information to secure their arrest.

☞ Rev. Dr. King's claim on the Greek government, for which they have just paid him $25,000, was founded on a lot of land, which he bought in Revolutionary times.—When the King and Court came there, they built a palace close by,—and then seized Mr. King's lot, Jezebel fashion, only they did not murder the owner. After all these years, the Kingdom pays him.

Evangelical religion in Holland is at a low ebb. Rationalism is dominant in the government, in the pulpit, and in the Universities, and the prospects are disheartening to the friends of practical piety.

If we only knew who said this, we should know better how much it means, than we do now.

The reported death of the wife of the late Louis Philippe is contradicted; she is now recovering.

CONGRESS.

Friday, Dec. 28.

House.—The House voted four times ineffectually for Speaker. The last vote stood as follows:—

For Banks 101, Richardson 68, Fuller 31, Pennington 3, scattering 5. Necessary to a choice 105.

Mr. Seward of Georgia offered a resolution appointing Mr. Richard on Speaker, his object being to unite all the national members on the doctrine of non-intervention as set forth in the Nebraska act. After debate, the resolution was withdrawn.

Saturday, Dec. 29.

The House has voted for Speaker twice this morning. On the second vote Banks had 103 votes, Richardson 68, Fuller 32, Pennington 3, scattering 5.

New Church.—A mutual ecclesiastical Council convened in Portland, Dec. 26, consisting of Rev. Drs. Dwight, Carruthers and Chickering, of Portland, and Rev. Mr. Adams of Gorham, with four lay delegates, among whom was Ex-Governor Parris.

This Council unanimously agreed to dismiss 22 members from State street church, Rev. Mr Carpenter's, to join a new Congregational church under the ministry of Rev. H. D. Moore, late of this city.

This number will be augmented to perhaps fifty. The new church is to be Orthodox Congregational—not *Independent*, as was inadvertently stated by us a short time since. The prospects of the new church and society are flattering, and it is intended in the spring to commence the erection of a substantial and splendid edifice for worship. The movement is smiled upon by the congregational pastors and churches, and is welcomed by the sympathizers of the community at large.

American Railroads.—Carey's pamphlet on the "present situation and future prospects of American Railroads," concludes as follows:

Were the tariff of 1842 now re-adopted, the effect would at once be that of stopping the export of gold, and money would be abundant at the legal rate of interest; old railroad stocks would then be worth twice their present selling prices, and every new enterprise would readily obtain the means required for carrying it through. Is it not, then, important for all concerned in railroads, old or new, to unite in bringing about so desirable a state of things?

Washington, Dec. 28th.—A Democratic Caucus was held this evening. 53 members were present. Hon G. W. Jones, of Tenn. in the Chair. An exciting debate was had.—Mr Shorter of Ala. urged a compromise with the National Americans; he would merge party in country, and organize on any national conservative basis.

Howell Cobb, of Ga. made the principal speech of the evening, urging that any compromise would ignore their principles. "Are you," he said, "to go before our constituents and acknowledge you trailed in the dark the banner they placed in your hands? My counsel is to stand firmly by your principles and your candidate."

After passing the subjoined resolution, the meeting adjourned.

Resolved, That we will adhere to our platform and nominee, and that we recommend that no democratic member offer any proposition with reference to a Speaker, without previous consultation in caucus, and that the Chairman be requested to call them together.

BIGAMY.

The Albany Argus of Dec. 25, says:

In the Spring of 1832, Elijah Presby, then a young and athletic farmer, residing in northern New Hampshire, was married to Matilda Wheat, a blushing maiden. The second night of their marriage they quarrelled and so continued to do daily, though they lived together till the year 1849, when Presby suddenly disappeared—no one knew where.

They had four children, the eldest of which, Millard, was the main stay of his mother and her little ones. During these long six years the mother and son managed to gain a subsistence, and one day last week business calling the son to this city, he met in the street a person who accosted him, enquiring if his name was not Presby? He replied that it was, when his interlocutor said, "Well, I suppose I am your father!" Much explanation and natural inquiries followed, when the father invited the son to his home. "What home?" said the son. "Oh," replied the father with an unblushing effrontery, "I forgot to tell you I was married again. I married a woman (?) that I got acquainted with at Lowell, in 1849." Smothering his indignation, the son repaired with his father to his home. He remained there three days, but on Monday met his mother at the Boston Railroad Depot—he having informed her by mail of his adventure and discoveries here—and with her visited Squire Cole at the Police Court. A warrant for desertion and failure to support his wife as he was able to do, was served upon Mr. Presby, by police officer F. Smith, and the truant husband and bigamist was brought before the magistrate, who after examining the case required bonds for the protection of Mrs. P., but as "my lord" could not produce them he was sent to jail where he now remains.

Missionary advices state that the fall of Sebastopol has quieted the adherents of the old Armenian church, who before had hoped that the triumph of Russia would annihilate Protestantism in Turkey. Another most extraordinary sign of the times, which is referred to in every recent letter, is the readiness of Mohammedans to read the Bible.

The Baltimore papers announce the mysterious disappearance of Mr John W. Bell, one of the heaviest flour dealers in that city. It is feared that there has been foul play.

Apt Humor.—Alluding to the recent glorious winter scenes, a friend remarked "that he had been living for two days *like a fly in a chandelier.*"

LOCAL.

☞ Some strolling thief entered a house in Vaughan street on Saturday evening, and stole an overcoat and shawl which were hanging on a hat-tree in the hall. Citizens should be on the lookout for such rascals. It is unsafe to leave street doors unfastened.

Our readers should bear in mind, that after the first of January, by the postage law, all letters are not only required to be prepaid, but to be prepaid by *stamps*. Every family should provide themselves with a supply of stamps, or stamped envelopes, which can be always procured at the various Post Offices.

Suicide.—A young man 18 years old, named Henry Magan, committed suicide by hanging himself in a cooper's shop in this village, on Sunday evening last. He came into the shop and remarked to a couple of boys who were there, "that if he had a rope he would hang himself," and asked the boys if "they knew where there was one." The boys supposing him to be in jest directed him where to find one, which he took and first adjusted it around his neck, and then attached it securely to a truss hoop, and stepping upon a shaving horse, threw the hoop over the end of a plank that was lying in the upper part of the shop, and then kicked the shaving horse from under him. On seeing him swing, one of the boys was so frightened as to be incapable of action, but the other gave the alarm, and he was cut down after being suspended from five to ten minutes. He gasped a few times, and then expire . Some entertain the opinion that he did not intend to commit suicide, but only designed to "go through the motions" for the purpose of scaring the boys; while others think that he was led to perpetrate the act because his love affairs did not run smoothly.—*Onondago Gazette, Baldwinville, N. Y.*

Suicide of an Artist.—James W. Glass, an Englishman, and an artist of considerable reputation, committed suicide in New York on Saturday last, by shooting himself through the head with a pistol. He was a man in easy circumstances, and returned from England a few days since. While abroad, Prince Albert purchased two of his pictures. No cause is assigned for the rash act.

Dangerous Sport.—The Boston Chronicle states that one day last week two young ladies in a neighboring town undertook to see which could eat a hard sea biscuit in the shortest time. One of them in her haste ate so fast that the dry, hard bread become clogged and swelled in her throat, causing such distress that a physician had to be sent for; when, by administering emetics and other powerful remedies, she was with great difficulty restored

A Treacherous Friend.—Laughlin Mc Ginnis, fresh from the Provinces, while tarrying a short time at the Commercial House, in Boston, made the acquaintance of one Joseph Burke, who pretended to be a shipbuilder, and offered to get McGinnis a boarding house and into business at East Boston. They went on board the ferry boat, but when McGinnis was leisurely walking up the drop after arrival, his "friend" Burke, who had kindly taken charge of his carpet-bag, containing notes for £150 sterling on the Bank of England, seized his opportunity to take the boat back to the city, and has not since been heard of.

Horse Influenza.—*To the Editor of the Boston Transcript:* I notice an article going the rounds in the papers, informing the public that the City of Boston have lost four horses from the prevailing influenza. This is not the case. Out of fifteen horses attacked at the city stables, all have recovered except one. I find that the proportion of deaths in my own practice is only about three per cent.; hence, unless the disease shall assume a more malignant form, there is no occasion for the alarm that in some quarters now prevails. If the disease be treated in its early stages, it generally yields; otherwise it may run on to the typhoid stage.

George H. Dadd, M. D.

46 Salem street, Monday.

The above notice from Dr. Dadd, the editor of the American Veterinary Journal, is calculated to allay the alarm which so extensively prevails among the owners of valuable horses. We learn that a similar disease of a more malignant form is prevailing more extensively in New York State.

A bag named Ellen Hayden has been fined fifty dollars in Buffalo, for purposely pouring a dipper of boiling water down the back of a pretty little girl who was playing before her door.

The inventor has just added to these superior Machines an improvement whereby they can work on any kind of

FAMILY SEWING,

From a coarse Cotton fabric to the finest Linen Bosom, in such a perfect manner as no other Machine professes.

They will also Bar and close all kinds of Kid Boots and Shoes, and stitch the finest Gaiter Boots in every part without a skip—making them the most desirable for girls to use at home, or for any who wish to do more than one kind of work.

These Machines are warranted to do all kinds of work in a manner far superior to any other machine in use.

They run without noise, with ease to the Operator, and at double the ordinary speed, so that

Twice as much Work can be done in a Day.

The greatest Shoe Manufacturing and Clothing Establishments in the country use these Machines exclusively, having tried other Machines and found them entirely unfit for their use.

They are simple, almost scarcely anything to to keep them in repair; and can be operated by a child twelve years old.

These Machines may be had at Manufacturers' prices, of

THOMAS S. NOWELL,

Local Agent for New Hampshire, at his Shoe Manufactory, McDonough street, Portsmouth, where they may be seen in operation. d29

THE ROCKINGHAM COUNTY MUSICAL ASSOCIATION

Will hold a

PUBLIC MUSICAL CONVENTION,

AT HANOVER STREET CHAPEL,

Portsmouth, N. H.,

Commencing on Tuesday, Jan. 8, 1856,

To continue three or four days, and close with at least one

GRAND CONCERT

of Sacred and Secular Music.

ALL Singers and Players, whether living in Rockingham County or not, are cordially invited to attend and join in the exercises. Those who play well are requested to bring their Instruments, as it is designed to form an Orchestra.

The Convention will be under the direction of

Prof. B. F. BAKER, of Boston,

With able Assistants; though it is designed to have all the exercises, including the Concert, carried through as far as possible, by the volunteer members of the Convention.

It is designed to impart such information and instruction as shall tend to the improvement of Singing, especially Sacred Music; and *all*, at home or abroad, are invited.

Clergymen, Choristers, and others interested in music, in the neighboring towns, are respectfully urged to aid in securing the attendance of a delegation from each town.

Half-price will be charged to Members of the Convention on all the Railroads leading into Portsmouth—those having certificates of attendance being passed free on their return home during that week.

A Chorus of two or three hundred is expected; and no effort will be spared to render the occasion one of social and musical enjoyment and improvement.

TICKETS, admitting gentlemen to all sessions of the Convention, and the Concerts, $1 each, will be sold at the Chapel door, to pay the necessary expenses. ☞ Lady singers admitted free of charge.

☞ The Book used at the Convention, will be "Baker's Church Music," copies of which may be had of Mr. Pearson, or at the Convention. Those having copies of the old Carmina Sacra, are requested to bring them.

FROM EUROPE.

NEW YORK, Dec. 28.—The steamship Pacific, Capt. Nye, from Liverpool, 15th inst., arrived about 4 o'clock this afternoon.

The City of Kars has at length fallen into the hands of the Russians. The particulars are not yet received, but it is believed that the garrison were compelled to surrender through famine. Their numbers did not exceed 8000 men, and they were so much reduced in strength as to be incapable of cutting their way through the enemy's ranks.

Omar Pacha was near Kutais, which the Russians held with considerable force.

In the Crimea, the Russians had attacked the extremity of the French lines, with about 3000 men; but after an hour's sharp fighting, withdrew.

The Russian government has opened a new loan of fifty millions of roubles, 5 per cent., at Berlin, Hamburg and Holland.

The Austrian army was being reduced to a peace footing.

The Government of Naples publishes the result of a convention with the United States, defining the rights of neutrals.

The Bank of England is authorized to issue £475,000 in notes beyond the amount specified in its charter.

Cotton, at the commencement of the week, advanced 1-8c, but was unable to maintain it, and, at the close, the gain was lost. Sales of the week 50,000 bales, of which 9500 were on speculation and export.

Breadstuffs were quiet and unchanged. Provisions unchanged. American securities—stocks were unchanged, and less active.

Business was generally very dull, and the prices of most articles had greatly declined, although at the close a slight reaction was perceptible, closing rates being for Haxall flour $12; mess pork 37 1-2c; crushed sugar 11c; spirits of turpentine 85c; butter 32 1-2 to 35c; lard 20c.

The only intelligence of importance received from France by this arrival is the announcement that the assistance of the Bank of France alone prevented a considerable financial embarrassment at the last settlement day.

Respecting the prospects of peace, there is a mass of crude and contradictory statements, but made on such feeble grounds that they have ceased to influence even the Bourse. Meanwhile preparations for a continuation of the war do not at all appear to slacken.

The English Parliament opens on the 31st of January.

Considerable misunderstanding is said to exist between Lord Palmerston and his colleagues. Lords Palmerston and Panmure continue to urge the war, while the remainder of the Cabinet are desirous of embracing the present opportunity of concluding a peace, and to their peace views the Emperor Napoleon is said to incline. Lord Palmerston is understood to hold the threat of a dissolution of Parliament over the heads of his colleagues.

In the Crimea both armies are comfortably housed and provisioned.

Correspondence from the seat of war states that the Russians continue to pour a very heavy fire of artillery against the southern side, the Allies replying but little, their engineers continuing their work within the town.

The British army is said to be over-supplied with equipments now.

English writers admit that the Russian army is well supplied for the winter, having large supplies at Simpheropol and Davenkoi.

St. Petersburg advices say that a vast train of sleighs had entered the Crimea, by the Perekop road, with provisions, stores, &c.; also that the Allies have 26 batteries ready to attack the northern forts, and 360 guns in position on the Tchernava.

FROM CALIFORNIA.

NEW YORK, Dec. 28.—The steamship George Law, arrived here about 4 o'clock this afternoon. She brings 275 passengers and $1,400,000 in treasure, on freight.

The war in the northern part of California was progressing with much violence; nearly all the Indian tribes of the North were arrayed against the whites.

A true bill has been found by the Grand Jury against Cora, the Italian murderer of General Richardson.

At San Francisco a festival was celebrated in honor of the fall of Sebastopol, which ended in a general row. 10,000 persons were present. At the close of the celebration, a large procession of Americans marched to the Russian Consul's residence, and several spirited speeches were made. Amongst the speakers was Ex-Governor McDougal.

Murders were on the increase, the papers teeming with them.

The steamer Georgiana burst her boiler at Petalumne, killing two persons, and wounding several others. The cause was, undoubtedly, to be attributed to carelessness. The officers of the boat have been arrested and indicted before the Grand Jury.

On the 30th of November the United States frigate Independence saluted the French flag of the corvette Embuscade, as a reparation for the arrest of Mr Consul Dillon, who then raised his flag.

The Indians at Puget Sound have entered into an alliance to wage war upon the whites.

Oregon dates are to November 29th. Several engagements had taken place between the volunteers and the Indians, in which the latter were worsted. The United States troops had returned to the dales to await the orders of General Wool, who was expected to arrive and assume their command.

At the mouth of the large river Mendocim, on the 28th of October, a tremendous swell of the ocean broke in and wrecked the American brigs Kingsbury and North Bend, also a Chilian bark, in which six lives were lost.

DROWNED BY COASTING.—*Portland, Dec. 28.*—This evening, two young ladies, daughters of Mr. Joseph Haskell, formerly of this city, and a young man named Coffin, were coasting in a field in Falmouth, near the Presumpscot River, on nearing which they found it impossible to stop their headway, and went over the embankment, about forty feet high, into the water. The young man and one of the girls were drowned, their bodies not being yet recovered. The other girl was dashed upon the ice, injuring here so severely that it is feared she cannot recover.

Such is the demand for ships in Baltimore that there is not an unemployed ship in that port.

Harrison's Columbian Ink, Black.

FOR the National Government, State Legislatures, Courts of Record, Banks, Railroads, Post Offices, Insurance Offices, Editors, Authors, Lawyers, Doctors, Clergymen, Commercial and Business men of every sort, Colleges, Academies and Schools, and that great class who sustain all, the Farmers—the GREAT INK of the country. 644,573 bottles sold in 1855, is sufficient that the AMERICAN PEOPLE appreciate THE AMERICAN INK, made by HARRISON THE AMERICAN MANUFACTURER, and determine its great superiority over all foreign inks. It is at wholesale and retail by

d10 GEO. W. TOWLE, 3 Congress Block.

Harrison's Blue Black Writing Fluid.

PROGRESS in the arts has revealed a Writing Fluid which does *not*, as other Writing Fluids *do* destroy the *points* of gold pens, actively corrode steel pens, or *chemically decompose the paper* or *its coloring*. I have seen paper where every letter written with English Fluids was eaten entirely through, and a delicate blue tint changed to a dirty yellow. The best make of gold pens have been condemned for losing their points, and the best manufactures of paper returned upon the dealer, where these Fluids were extensively used. Harrison's Fluid is subject to none of these evils. It writes a beautiful blue, and soon turns a jet black, and remains permanent. HARRISON'S IS AMERICAN, *made* by an AMERICAN, and worthy the use of all Americans. It is wholesaled and retailed by

d10 GEO. W. TOWLE, 3 Congress Block.

Cough, Consumption, and Bronchitis ELIXIR.

THE Proprietor would respectfully call the attention of the public to his invaluable Remedy for all Affections of the Throat and Lungs and begs of those who are undecided what to select, from the numerous medicines advertised, and recommended for each complaints, to give his ELIXIR a trial. Having done so, they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the relief and cure of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold. As a Preventive and Cure for Consumption, it has no equal.—It is purely Vegetable, and no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, fully justify the assertion, that no family should be without this Medicine: let Mothers give it to their Children who have the Whooping Cough or Croup, and their will alleviate at once the sufferings of their little ones. Price 25 cts.

Call for G. W. Stone's Cough Elixir, and see that his name, and Cough Elixir, with the words Boston, Mass., are blown upon the Bottle, without which none will be genuine.

DR. BURLEIGH SMART'S Cough Medicine.

DR. BURLEIGH SMART, of Kennebunk, Me., was well known throughout the New England States, as a Physician whose treatment of Lung Diseases was attended with almost miraculous success. Very few Physicians ever enjoyed a more enviable reputation, or acquired a more extended practice. The Medical Journal, in speaking of him soon after his death, says:

"A man liberally educated, of acute perception, superior judgment, untiring perseverance, and ardently devoted to his profession, Dr. Burleigh Smart was eminently fitted for the enviable position which he held in the estimation of the Medical Faculty at the time of his death. Although skilful in every branch of the Medical Sciences, for many years his attention was given to DISEASES OF THE LUNGS, in the treatment of which he proved himself the most successful Physician who ever practiced in New England."

This medicine was first compounded and made use of by Dr. Smart himself, and is only the same great agent by means of which he accomplished so many wonderful cures of Pulmonary Disease. Its efficacy having been most thoroughly tested, in thousands of cases, by an eminent Physician, all we can say in its praise must, of course, be superfluous. It is offered to the public in its present form, with the most implicit confidence in its powers—a confidence based not wholly upon the above, but upon actual trials of its virtues, the testimony of hundreds of his fellow citizens in its favor and a knowledge of its ingredients severally considered, as regards their curative properties. Its formula has been submitted to several of the most distinguished chemists in this country, who unite in pronouncing it "A beautiful combination of the most reliable and valuable remedial agents used in treating diseases of the Lungs and other Respiratory Organs."

Unlike all other medicines of the same nature, it immediately relieves the Cough, and so operates on the Blood as to remove the Cause, thus effecting a permanent cure. In this respect it is infinitely superior to all other preparations. By its use the strength of the patient is sustained, tone and vigor imparted to the system, the blood purified, disease subverted, and a healthy action of all the organs attained. In compounding it, the greatest care is observed, every bottle being separately prepared with chemical accuracy, of uniform strength, and in strict accordance with the original recipe. No poisonous drugs are used to give it a beautiful color, and impair its virtues, as in nearly all other Cough Medicines, and in every instance the patient can rely on its doing all that medicine can do.

To secure the public against counterfeits, we have the bottles made expressly for us, with the words "DR. BURLEIGH SMART'S COUGH MEDICINE, SACO & CLARK, BIDDEFORD, ME., U. S. A." blown in the glass. Every bottle is enclosed in a wrapper of RED enameled paper, printed in the English, French, Spanish and German languages, from a costly engraved plate, of which the copyright has been secured. An inside wrapper, containing full directions for using the Medicine, and a valuable treatise on Diseases of the Lungs, with directions for the cure of Coughs, Colds, Bronchitis and Consumption, compiled from the most reliable medical authorities by a distinguished physician, also accompanying each bottle.

CELEBRATED SMOKE

Consuming Patent

LAMPS.

REQUIRING only the poorest oil, lard, tallow or grease, producing a light *Unsurpassed*, at an expense of less than half a cent per hour. Adapted for the Parlor, Kitchen, and Workshop; also a valuable Study Lamp.) It is fast superseding all other lamps. The principle of the lamp is such that PERFECT COMBUSTION is secured. Therefore it is inodorous because smokeless. It is more easily managed than any known lamp, and the vast number of them in *successful* operation sufficiently attest its merits.

We have kindly been permitted to peruse a letter received at the Missionary Rooms from H. G. O. Dwight, at Constantinople. He says: "I am exceedingly pleased with the Lamp you sent me, manufactured by the Uffords' 117 Court street, Boston, and can recommend it to all who are seeking, as I was, for a clear, strong, steady and economical light. It saves my eyes from much wearing labor in preparing Armenian manuscript for the press," &c.

John G. Whittier, the gifted poet, says, in a note to the manufacturers: "It is, beyond comparison, the best lamp I ever used—have just purchased one for my sister as the most useful present I could make her." Price of the Lamp, $1.25.
